A gentleman following the arduous profession of a pugilist was on the 19th inst. summoned before the Lambeth magistrate for a breach of vocation. The stakes reached the large amount of a thousand pounds; the attendance was enormous, the ring was kept by a force of police six hundred pounds, and the supporters of the other expressing their confidence in his abilities to the extent of the remaining four hundred. The decision of the case, as to whether the "noble art" was recognised as admirers of the "noble art," kindly provided a train for these gentlemen and their friends to Wootton-Basset, where the ring was duly formed, and arrived at Wootton-Basset, near Swindon, before six o'clock in the morning. The combatants were the two men placed in custody, but they had hardly begun to spar before the police arrived and put a stop to the tournament. The gentlemen and their *entourage* returned to town, intending to take the train to the next meeting, proceeded to Fenchurch-street, and took train for Purfleet. There, at six o'clock in the morning, with gentlemen, routed by the police in one county, can meet in another to pound each other's bodies. Personally we have no objection to pugilistic encounters between men who like it, but are tolerant—our name is not legion—and it may be that, in this "nineteen-hundred" age, those who are opinionated are adverse to these displays are in a minority. Even the Home Secretary, it will be remembered, tacitly declined to prevent the great fight between Ercsmus and Jack Jones, and the Lambeth magistrate might, instead of the Government winking at a practice which it is reluctant to put down, have encouraged it, and so have kept the money in the country, it would be much better to legalise prize-fighting? There are many noblemen and gentlemen of a sporting turn of mind who are fond of the "noble science," and who, if they could, would revive the "Corinthian" tastes, but under proper restrictions. If we must have our gladiators, let us have at least an amphitheatre for them. In such a select inclosure our pugilists could fight for ten thousand pounds a side if they so chose, and could find backers; but outdoor prize-fighting, with its concomitant evils of riotous assemblages, overladen trains, robbery and profligacy, should be treated with the same stemness as gambling. In a licensed amphitheatre graduated sums could be charged for admission, and the police would keep order instead of clearing the combatants from the field. No great harm would perhaps accrue from these spectacles of pluck and endurance; but it is the ruffianism, the brutality, and the evil character of the frequenters of prize fights that has rendered them, in later years, intolerable to the decent part of the community. The old-fashioned one—the Figgs and the Broughtons—used to fight in covered amphitheatres; it was only when the ring became nomadic that it lost its good character and acquired a disreputable one. Which is best: to legalise a small evil, or to avert one's gaze while impunity is allowed to a colossal one?

"Madame Schmitt" is not to be compelled to go into the white bears' den; and, moreover, Mdme. Schmitt is not to forfeit her four thousand francs. Such is the decision recently arrived at by the Paris tribunals in the case of an action brought by the proprietor of a bear's-show for breach of contract against a female bear-tamer. Mdme. Schmitt was perfectly willing to confront lions, tigers, and the black-and-white bear of Scandinavia; but limited the objection, on principle, to the white bear, who is popularly believed to be untamable. On the other hand, the hippodrome people declared that the white bear to be as innocent as a sucking dove, and that the shade of his ferocity was only *canards* bruited about to make the Parisians believe that the surrogates of the bears of *Le Dore Martin* had descended upon him.

It was the same case as *Ours Martin*, long a respected denizen of the Jardin des Plantes, who devoured the baby dropped into his den by a careless nursery maid. He keeper, interrogated as to the horrible catastrophe, was coolly to say, *Ce qu'est arrivé est regrettable pour malheureux, mais ce n'est pas ma faute.* We have seen this babycide, and have given him a sketch. It was not Madame, but Schwartz—a treacherous old brown fellow whom Sir Walter Scott saw during his visit to Paris after the peace of 1815, and whom he describes as giving a cry of affectionate recognition when two Russian bears, brought over by Schwartz, at his call, the mementoes bawled out of Mdme. Schmitt, over the details of which, for reasons we have before, we have laughed, forbore to continue episode to the great wild-beast rivalries of Hermann and Crockett.

Miss Braddon's admirable novel "Eleanor's Victory," first a serial advancement to the columns of *Once a Week*, is to be forthwith published, in three volumes, by Messrs. Tinsley Brothers. In almost every other kind of literature there is a dead lull, but the autumn will, doubtless, bring forth great things. The series of indigestible essays which, under the title of "Breakfast in Bed," have for a fortnight past appeared in *Temple Bar*, have also been brought to a conclusion, and will be shortly re-published.

Mr. Wollen has got his first-class-passenger-canal verdict and interest from the Sun Insurance Company, and the best practice is to accept all the other cases. The company has a good defence in the evidence for the defence to which we desire to call attention. A great fire, which attempted to be made of the purchase of sundry rolls of wall-paper which, it was alleged, would burn very quickly. A practice, however, stated that he had tested the inflammable quality of wall-paper very severely indeed, and that it burned very slowly. Of course it would. Everybody knows that wall-paper is painted, in distemper, with heavy earthy colours, and size as a medium. You might almost as well try to burn paper covered with clay. Just try a yard of paperhanging against a window-blind painted in oil colours. It will flare up in a moment, the former remodeler away for half an hour. Then, as to the assumed state of "great heat" from fire which Campden House was in, you have but to walk at this moment into the vestibule of any office in Fall-mall which is being "done up" while the majority of the members are out of town to see that the pictures concealed by canvas brown-holland hangings, the hall filled with scaffolding, the floor laid deep in sawdust, and the whole place overpapers all taken out of their shelves. And these were the precise appearances complained of as deliberate "preparation" at Campden House.

METROPOLITAN NEWS.

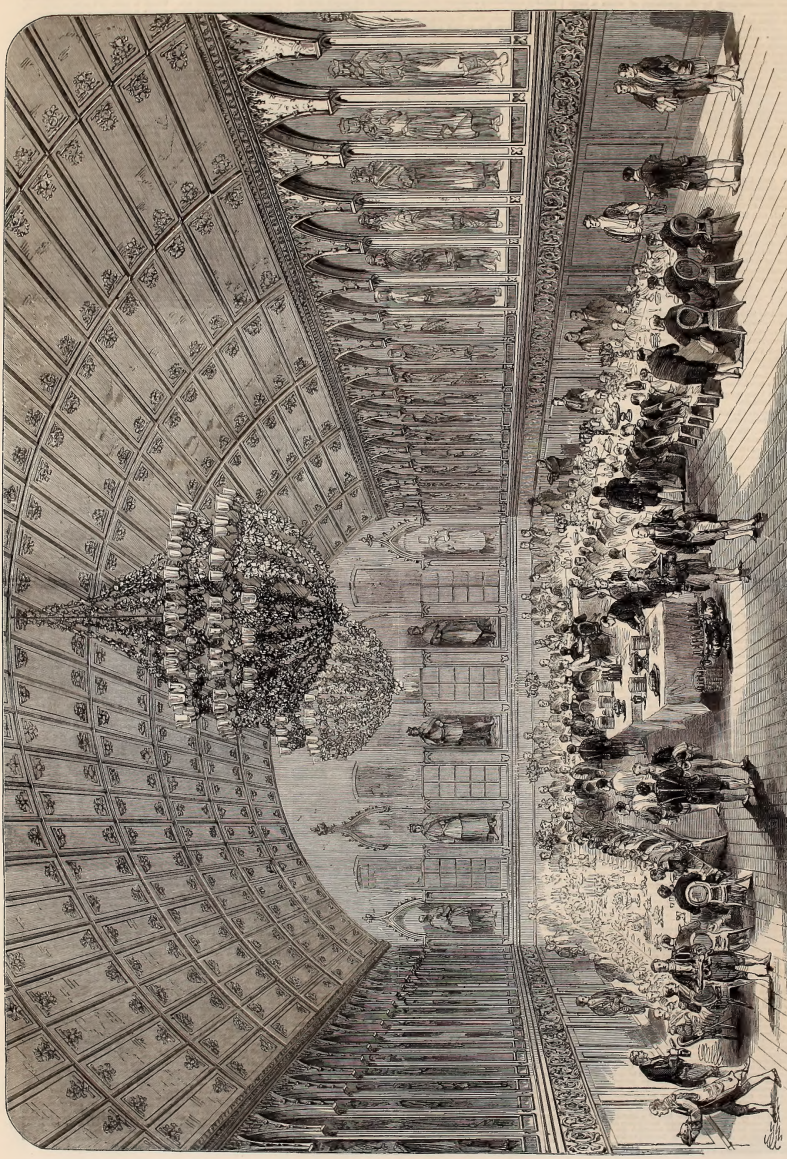
A collection of ancient carriages has been added to the South Kensington Museum atrocities.

A choral festival of 4000 voices will be held at the Crystal Palace on Saturday, the 19th inst., under the direction of Mr. G. W. Martin.

Sir James Plaisted Wilde, late one of the Barons of the Exchequer, was sworn in yesterday as Judge of the Court of Probate, in the room of the late Sir Cresswell Cresswell.

Last Saturday morning one of the mains of the New River Company near the Queen's Head Tavern, Islington, burst, and an immense volume of water was thrown out. St. Paul's churchyard, and the streets in the vicinity, were temporarily flooded.

A mercurial, signed by upwards of 200 ratepayers, has been presented to Earl Spencer to call on the owners of licensed refreshment-rooms in Wimbledon Common. It appears that within the last few years over 100 acres have been inclosed, some by private persons, and that public footpaths have been stopped.



Last Saturday two splendid additions were made to the fleet of the Funchal-road Steam Navigation Company, by the launch of two powerful iron screw-steamers, named the Golconda and Baroda, by Blackwall. Both vessels are identical in size, the dimensions being—length, 376 ft.; 3500 tons register, and 400-horse power.

Last week births in London—865 boys and 840 girls—were registered in London. In the ten corresponding weeks of the years 1893-93 the average number (corrected) was 1859.—The deaths, which were 1454 in the last week, were registered in 1894 in the ten years the number of deaths derived from ten corresponding weeks—viz., the thirty-fifth to the tenth of the year 1893-93 was 1359. The population is now estimated at 4624, and with a correction for increase of population, to 1197.

The Queen has graciously approved of the new Foreign Office some explanation of the present condition of the extensive works is necessary. up to the present time, the contract for the foundations and walls of the Foreign Office has alone been completed. The cost of this portion of the work was but £84,000. The original estimate, adopted, subsequently, for the whole superstructure of the Foreign Office, and amounts to a little over £195,000 for the works of the India Office. The latter building will not be visible from the park, are advancing with considerable rapidity. The expiration, in 1868, of the lease of the Foreign Office, and the consequent necessity that the Victoria-street has rendered it necessary to proceed with the new works with all possible speed. The architects for the buildings are Messrs. Sir Matthew Smith and Taylor, in order to avoid the delay that would otherwise occur while the question of competition was being prepared.—*Builder.*

The Crystal Palace flower and fruit show, held on Tuesday and Wednesday, was one of unusual magnitude and excellence. The stands of flowers and fruits filled the whole of the centre transept. The collection of fruit was undoubtedly the best that has been exhibited this season, and was a great improvement upon the show of last year. The collections of cut blooms also were likewise numerous, and of first-rate quality. There were some excellent dishes, but of course they could not be compared with the special bed of fame. The bulbous roots were remarkable, and the vetrines were splendid. The gorgeous gladiolus was in great force, and there were also many fine vetrines at Sydenham. The fruit appeared to possess the chief charm for the visitors. The collection of grapes was splendid. The second and last day of this season of members of the Crystal Palace Share Clubs took place on Sunday in the palace, and was attended by a large number of members and their families. Several pieces of sacred music were played on the great organ.

A meeting of the Royal National Life-boat Institution was held on Thursday, at the London Tavern, Bishopsgate-street, Sir Edward Perrott, Bart., vice-president, in the chair. Rewards amounting to £11 9s. were voted to the crews of the Rosscarbery and Aberdovey life-boats of the society, for rescuing the crew of five men of the schooner Centrica, of Chester, and six men of the barque Ida, of Whitehaven, which vessels were driven to the amount of £11 9s. were likewise granted to the crews of the institution's life-boats at Southport, Lytham, Blackpool, and Walmer, Kent, for going off in reply to signals of distress to the rescue of shipwrecked crews; but when their services were not required. Various other rewards were likewise voted to the crews of shore-boats, for saving the lives of sixteen persons on different occasions. It was stated that the institution had, during the past month, received a legacy of £200 from the late Mr. William Currie, of Ashley, of Cornhill; and also a legacy of £100 from Mrs. Emily Kemmer, of Pinstone, Oxford; and that £50 had also been received by the society from the relatives of the late Mrs. Thornton. The institution has just sent large life-boats to Hastings and to Blakeney, on the Norfolk coast, in lieu of their former boats at those places, which were deemed too small for the localities. Mr. Worrall, a member of the Society of Friends, and residing at Matlock, in Derbyshire, was making strenuous exertions to raise the cost of life-boats from persons having the same surname. The operations of the institution extend over the whole coasts of the British Isles, and by its system of rewards it encourages every means, either by life-boats or otherwise, to save life from shipwreck. Thus, about £1300 a year are granted by it as rewards for saving life from wrecks, besides a considerable number of silver medals, votes on vellum, &c. Various life-boats belonging to the boat establish ments were ordered to be made, and the proceedings terminated.

CONGRESS OF GERMAN SOVEREIGNS AT FRANKFORT: THE BANQUET AT THE RÖMER.—SEE PAGE 244.

TOUR OF THE LIEUTENANT-GOVERNOR OF THE PUNJAUB THROUGH CASHMERE: MEETING OF THE LIEUTENANT-GOVERNOR AND THE MAHARAJAH OF CASHMERE AT PUMMO.—FROM A DRAWING BY AN OFFICER OF THE STAFF.—SEE NEXT PAGE.

TOUR OF THE LIEUTENANT-GOVERNOR OF THE PUNJAUB THROUGH CASHMERE

(From a Correspondent.)

SIR ROBERT MONTGOMERY, accompanied by Lady Montgomery and the officers of his Staff, has lately made a tour through Cashmere, the territory of the Maharajah Rumbeer Singh. The first Sketch represents the meeting of the Lieutenant-Governor and the Maharajah at the fort of the River Jovey, on which stands the ancient town and citadel of Jummoo. According to Eastern routine, the Maharajah proceeded some distance from his palace to meet his guest and escort him into his territory. After a short stay at Jummoo the Lieutenant-Governor proceeded to Serinuggur, the capital of Cashmere. The route traversed by the party is not open to European travellers, except those who might be going on duty or by special invitation of the Maharajah. It is a direct route from Jummoo to the eastern extremity of Cashmere, and passes over the Banihal Pass, some 9000 ft. above the level of the sea, beyond which lies the Valley of Cashmere, an oblong plain, luxuriant with flowers and gardens, and on all sides environed by lofty mountains, which, from their height, must be unique in the rest of the world. Descending the Banihal range, the Lieutenant-Governor proceeded to Islamabad, a picturesque town on the banks of the River Jhelum. Here, a large fleet of boats, about seventy or eighty in number, awaited the travellers. These boats were of every description, from the Royal barge, with gilded ornaments, to cashmere-worked canopy, down to the ordinary thatch-covered boat of the country. The two Royal barges were manned each by fifty boatmen, or native paddlemen, the guard being universally used in Cashmere in place of the oar.

From Islamabad the Lieutenant-Governor proceeded by river to Serinuggur, the capital of Cashmere, where he was again met by the Maharajah, who had preceded him to that place.

The second Sketch represents the procession of boats approaching the town. In the centre appears a hill well known in the neighbourhood of Serinuggur—"Takht i Sulieman," the Throne, 1100 ft. above the plain below, and from it is to be seen one of the most charming views in the world; the eye commanding the whole valley, about eighty miles long and twenty broad, and at the foot of the spectator lies the picturesque city of Serinuggur. This city is built on both sides of the River Jhelum, which here forms the principal street, just as the Great Canal does at Venice. Immediately in the river lies the palace of the Maharajah, which their goods to London and Paris, have built picturesque houses, with open verandahs. The river, which forms the high street of the town, is a noble stream, and is crossed by seven bridges, consisting of a roadway resting on massive piers of wood piled one on the other. The palace of the Maharajah, with its golden dome in the centre, must object in the scene; but nothing can rival the natural beauty of the spot. The grove of chenar trees, the splendid mountains, and the still sunshine under Srinnuggur a most picturesque city. The town is rich in various cloths, carpets, and shawls. The latter are well known to English ladies, and numbers annually find their way to London and Paris.

The visit of the Lieutenant-Governor was inaugurated by grand displays of fireworks, and by illuminations on the lake and river. The Maharajah entertained the officers of the party at dinner, on which occasion the Serinuggur at a dinner at his palace, and held a grand durbar, at which some sixty gentlemen were present. After a short stay at Serinuggur the Lieutenant-Governor proceeded to the hill sanatorium of Murree. The road from Serinuggur to Murree runs along the left bank of the river Jhelum. This river, which in the valley of Cashmere was a tranquil stream, now becomes a rushing torrent, and mids a further chasm to the combination of forest, rock, and rich foliage, with which every traveller must be familiar. The Lieutenant-Governor arrived at his hill residence at Murree on the 27th of May, having occupied in five weeks his tour through the valley of Cashmere and the surrounding hills.

THE THEATRES.

NEW ROYALTY. — This theatre, which has of late years undergone so many changes of fortune, has at last come under the management of Mr. Charles Selby, who has long acquired the fat stage promises well for the future prosperity of the house. She opens with an entirely new company, and, in regard to new pieces, has as much assisted by the repertoire of her late husband. One of these posthumous works was presented on Monday. It is entitled "Court Fallacies," and the action is laid in the reign of Louis XV., the Duke of Richelieu being the leading character. The Duke and his companion, a wag of the name of John with the Nose (Mr. Fleuri (Miss Pelham), then living under the protection of her aunt, the Countess of Verneuil (Mrs. Selby). The Duke, however, is doomed to be annoyed by a rustic cousin, Julian de Rochefort (Miss Elina Newton), who, assuming the character of a hoyden, creates a diversion and helps the gallant to escape. The comedy, as the title of the Duke was ably supported by Mr. W. H. Stephens; and the young lady, who appears new to the boards, showed much talent as the clever page. That she sometimes overacted the situation was to have been expected—a tendency which practice will teach her how to subdue. The last piece, entitled "Pirates of Penzance," is a trifle, more of rather inferior quality, and was, moreover, acted by novices, who somewhat augmented the length of the performance. Mr. Chaseo, and the *dramatis personæ* consist of a frolicsome boat's crew, who commit all manner of improprieties. Such a plot is not to be commended, but Mr. Selby must guard against indiscriminate admission into her piece. She has now possession of a very pretty theatre, and we think, if she is careful to ensure the elegance of the dramas she produces, that she may also secure a remunerative audience.

The report presented by Mr. Farnall to the weekly meeting of the Central Relief Committee, on Monday, presents another important and favourable view of the business now receiving the attention of the Lancashire manufacturing districts. Compared with the previous week, there is the very considerable increase of 1281 persons. Since the 9th of January the increase is 117,805. The amount of money in the hands of the treasurers of the twenty-seven unions supporting the cotton distr ict is £90,10s, and that in the hands of the bank is £307,591. In the course of the meeting it was stated that £200,000 would be required for Manchester alone between this and the end of March. Mr. Alderman Heywood, the Manchester City Council have resolved to borrow £80,000 to meet the pressure of the Relief Works Act. This sum will be spent in the following proportions:—Ardwick, for roads and sewerage, £30,000; formation of new cemetery, £15,000; waterworks, £15,000.

The last advices from the colony of Natal bring the message of the Governor on the opening of the Legislative Council. The estimates previously passed for the current year amounted to £99,938 revenue, and £117,615 expenditure, leaving a sum to be provided for, which it was expected should be met by an unappropriated balance in the Treasury. This balance, however, having been reduced by the expenses of the late disturbances arising from India, no portion of which will be refunded to the Government till the close of 1863, it had been deemed necessary to make a considerable reduction of the public works for which the estimates had originally provided. The application for a guarantee for a railway between Pietermaritzburg and the Durban would be laid before the council; but, in the opinion of the Governor, the Durban would be better than in the present state of the colony it would be prudent to undertake. A similar view was taken by his Excellency of a proposal for a telegraph line between Natal and the Cape.

The Channel Fleet, for the appearance of which the inhabitants of Derry and Moville had been eagerly watching, arrived in Lough Foyle on the morning of Wednesday week. The crews mustered about 5000 men. Several hundred persons visited the fleet in the course of the day; and a deputation from Moville presented an address of welcome and congratulation to Admiral Dacres on board his flag-ship. The ships was illuminated at night with tar-barrels, fireworks, and bonfires. The Grand Jury and Corporation of Derry paid a State visit to the Channel Squadron on Thursday, and presented an address to Admiral Dacres. On Friday the gallant Admiral was presented with the freedom of the city. A ball and supper, on a scale of magnificence never before equalled in Londonderry, were given in the evening by the Corporation and citizens to celebrate the visit of the fleet. Admiral Dacres and all the officers of the fleet not detained on board their vessels by the imperative calls of duty were present, and the festivities were prolonged to an advanced hour in the morning.—The squadron steamed out of Lough Foyle at five o'clock on Monday evening, and arrived at Greenock on Tuesday morning. The admiral and officers will be feted by the Provost and magistrates of Glasgow. The squadron will remain at Greenock till Monday, and will then sail for Belfast, where it will remain for three days, and will then proceed direct for the Mersey. The stay of the fleet at Liverpool is uncertain, but will not be less than six days.

MEMBERS OUT OF PARLIAMENT.

THE preservation of the continuity of Parliament, though a self-imposed, is doubtless a pleasant task to members in the recess. They probably realise the wisdom of King James's action, that those which are cock-boats in the metropolitan ocean loom large enough in provincial creeks. Every member, moreover, is sure to be missed from his appointed gallery during the Session, may often, while seeking to withdraw his attention from commonplace talk in an interval of dulness, catch out individual representatives of the people, whose by fame or name he knows not, and wonder what are the qualities, hidden from public view, that have sent them to Parliament. Others have brought such apparently dull and listless men into the legislative body, their only claim to their seats seeming to be an aptitude for sitting. The answer is, go to Bribeton, where one of the heavy and leaden eyed waiters for divisions in St. Stephen's is holding political festival with the electors of his borough, and listen to him there. There will be seen a gentleman of vivacious manners, with a ready smile and address for every one he meets, and in his view, who probably makes very good speech, and never fails to let his own special constituency understand that it is just the strong-point of the whole Parliamentary system. When one personally knows how great is the glorification of memberdom into its own grounds, when one has ascertained how small a fraction of the supposed noneities of Parliament in the aggregate are very decided entities, one will probably be slow to have a better opinion of the judgment of electors, and to estimate the qualities of patience and modesty which so many silent and unobtrusive members display. No one can thoroughly comprehend the true nature of representative institutions who does not see something of the autumnal congresses of clerical and electoral which have not yet set in for this year.

An early closing of the regular Session has caused the opening of the provincial Parliamentary season to take place early. One notable exception, however, occurred; the members for Marylebone absolutely sent their constituents into the dog days of September. The representation of this borough is so wholly abnormal, so great is the singularity of its electors, irishmen sitting for large and many minded metropolitan constituencies, which can only be accounted for by the fact that local and class antagonism is so strong that real confidence is impossible. The two parties have so nearly the same closed international rights for the present from a jocular point of view, that nothing which is done by the Marylebone members in the provinces could be very good to those electors who were likely to assemble in St. Pancras Vestry Hall, that Lord Fermoy and Mr. Harvey Lewis should appear amongst them in their constituents' midst, and, without the slightest clinging about them; but the members themselves probably were anxious to get away from the metropolis, and to be out of the reach of the word, but who, during the last year or two, has been getting on in the House? Mr. Lewis has certainly not done so, and has shown his possession of a good deal of common sense, and left off that bumptiousness which members for Westminster, Pimbury, Lambeth, the Tower Hamlets, &c., seem to think is the only way of representing their constituencies. Mr. Cox has probably returned from Londonderry with a new sense of the dignity of Parliamentary life, the Irish Society of London—he was very rude to its tenants, who wanted to get him to come into the general Irish view about rent and tenant-right. Fortunately for him, the particular interest of an Irish corporation, who were content with an apology. If it had been the case of a landlord, he would have probably been driven from behind a hedge; and what a catastrophe would that have been for the Liberal party!

Who is to abolish church rates by Parliamentary process? Sir Sir John Trelawny has, in presence of his constituents at Tavistock, formally abandoned the conduct of the measure. Mr. Hadfield, the last Session Sir John treated the matter as a kind of dissolving view—as the impossible came into position, and as the new and unexpected which have given them political prominence fade into unsubstantiality, in their hands at least. He dealt with it with a grim humour, and with a forcibly pointed, but not exactly fair, Parliamentary history, in order, doubtless, to cover the real mortification he was experiencing at the failure of the John and Jane Bull scheme of improving the refreshment-rooms of the House of Commons was discussed, and treated with proper contempt the notion that luxurious dining was part of our Parliamentary system. Mr. Cox and Mr. Monsell, Andrew Marlow, but of course that worthy was in his mind when he said tenants—the Irish landlord is the worst of all landlords—and the bitcoit. He might have added that such was his own practice, and on one who looked for his rent with a jaundiced eye.

One of the proofs of the alleged Conservative reaction is supposed to have been found in the borough of Leicester. For the first time, we believe, since the Reform Bill, Leicester has not returned a Conservative. On the face of it, it is intended to be believed that a new man and a new measure have been the cause of the one and more than his abstract politics. The real fact is that Mr. Heygate, who achieved this triumph, is a Leicestershire man, brother to a Barone of estate in the county, who has considerable local influence. Striking in at a favourable moment, and with at least some local influence already in his favour, he was successful. Mr. Gregory's trial is for a place where he probably is well known and personally liked. But Mr. Heygate is a likable gentleman, and, moreover, makes a very good member; and, his Conservatism being of the new than the triumph of party can hardly be said to have been much illustrated by the event. It was an important event, though. He has been addressing a Leicestershire audience; but, as the "talk was of bullocks," he was in his own element, and was heard gladly.

In point of fact the exchange of sentiments between most of the members and constituencies which have met has hitherto been very dull, and, with the exception of Mr. Gregory's speech at Northampton, there was an assemblage the other day, and the members of the district were in attendance to hear. But Mr. Gregory was a man of agriculture, and their chief speaker on this subject was Mr. Rolt, the eminent Chancery barrister, who is one of the representatives of the county. Of course Mr. Rolt knows more about the agriculture theoretically and professionally, and that knowledge has enabled him also to make a considerable figure in the House of Commons; but as the result of great professional success, he is the owner of an estate, and, consequently, an important group. He has been addressing a Leicestershire audience; but, as the "talk was of bullocks," he was in his own element, and was heard gladly.

In point of fact the exchange of sentiments between most of the members and constituencies which have met has hitherto been very dull, and, with the exception of Mr. Gregory's speech at Northampton, there was an assemblage the other day, and the members of the district were in attendance to hear. But Mr. Gregory was a man of agriculture, and their chief speaker on this subject was Mr. Rolt, the eminent Chancery barrister, who is one of the representatives of the county. Of course Mr. Rolt knows more about the agriculture theoretically and professionally, and that knowledge has enabled him also to make a considerable figure in the House of Commons; but as the result of great professional success, he is the owner of an estate, and, consequently, an important group. He has been addressing a Leicestershire audience; but, as the "talk was of bullocks," he was in his own element, and was heard gladly.

Lord Stanley will be ready with a speech on any subject. The practice of collating bluebooks renders it more easy than ever to get up the facts and illustrations exceedingly easy. Nobody, indeed, is more thoroughly at Stanley delivering excellent talk on agriculture, and especially on Lancashire agriculture. Probably every one who heard him went away with a sort of satisfaction that a great landed proprietor *is* peace knew so much of the right thing to do with land; and few, perhaps, would think that they might have been listening to a piece of industrious and clever "editing!" The promises, political and social, that have been made Lord Stanley's behalf since he entered into public life have been so many and so large that he suffers from the enthusiasm of his sponsors. Those who know him now are exactly aware of what to expect from him, and are never disappointed. If he does not reach the standard which his more moderate admirers have set up for him it is probably because of his lack of an ambition, or that is spontaneity. If he possesses any natural impulsiveness, he has so subjected himself to a system of proof, he has so tested himself, that he has lost the chief quality of his fresh and unsophisticated days, and, more or less, is an essential element in the public men of this country. With somewhat prejudiced eyes Lord Stanley has nominally followed his father in his political career; essentially a Liberal, in the fullest sense of the term, he calls himself a Conservative. The result is, of course, eminently unsatisfactory in its effects on his career, and it is traceable in every speech he makes. Seeing how Lord Derby has won everything only by the weight of his character, and by an unpassed temperament, Lord Stanley, in trying to avoid that error, has fallen into the other extreme; and if, as one sometimes thinks will be the case, he never attains to the political eminence which has been prophesied for him, it will be because he has trained himself too highly.

NATIONAL SPORTS.

GREAT events are not unfrequently preceded by a marked stillness. It is so in the Turf world; and until the great meeting at Doncaster town moor, on the 15th inst., there will be only Warwick to excite the attention of the sporting world. The meetings which follow next week are so insignificant in themselves, and in their effect upon the future, that they scarcely deserve a passing notice, Derby excepted.

The sport at Lichfield on the 2nd and 3rd September has been efforts, with all the inspiration of Manfield, little better. The opening day at Derby however, brought out some good heads, and the contests in several instances were close and exciting. A continuance of good management and patronage, such as has been bestowed upon it on this occasion, will no doubt cause the Derby autumn meeting to take rank as one of the best of all the midland meetings. Warwick and Leicester take place next week—Warwick on Tuesday and Wednesday, and the latter on Thursday and Friday. With few exceptions, the running at Warwick has not reflected the St. Leger quotations—knocking out a favourite and bringing in an outsider. It may not be too much to anticipate something of the kind in 1863, and it is not improbable that those who have been threatened could be so much talked about in hand will take the opportunity of introducing him formally into the ring at the Leger post.

The cricket season of 1863—at least in so far as legitimate matches in the metropolitan counties are concerned—was wound up last week by a grand match at the Oval, which, alluded to in our last.

The beautiful and picturesque ground at Southgate, adjoining the park of Old Walker, Esq., was the scene of a return-match between the clubs of Surrey and Southgate on Thursday and Friday. The game proved to be rather a hollow affair for the latter, who ultimately won by seven wickets, the figures being—Surrey, 84 and 54; Southgate, 106 and 44, with three wickets down. Matches were played at Scarborough by the Gentlemen and Players, and Marylebone by the United. The North and South also "settled their differences" at Liverpool, though not as experienced by the managers of the North in getting together an efficient team; many of the "crack" players being identified with a clique who are doing all in their power to bring legitimate cricket into disrepute too. The result of the match again proved the superiority of the North, the score at the close of the third innings standing for under.—South, 115 and 61; North, 114 and 146; showing a majority of 84 for the latter.

The establishment of a "Cricket Parliament," composed of representatives from every county, which shall maintain a paternal supervision. It was first promulgated by the *Sporting Life*, at the close of the season of 1862, and is duly commented on by the *Field*. Such a system of government must tend to the advancement of that healthful and invigorating exercise, which cannot be kept at the above extremities ultimately proved victorious by nineteen runs.

Sport in the Highlands was never more glorious; what with the splendid weather and the presence of Royalty among them, sportsmen have never had such a jubilee. Grouse were never more plentiful. The Mahaudh Dhuibh (Black Mountain) is now 190 brace by its own gun; and the same murderous sweep has been followed up with but slight intermission ever since. The Prince of Wales, Lord of her Royal Highness the Princess of Wales, angling bids fair to become as fashionable an amusement in the Highlands as croquet in England. The prospect would be enough to delight the shade of Izaak Walton, if it saddened that of Samuel Johnson.

LICHFIELD RACES.—MONDAY.

City Stakes.—Sir Watkin, 1. Jewel, 2. Lady Bountiful, 8.
Staffordshire Stakes.—Rifle Corps, 1. Wynnstay, 2. Sally, 3.
Champagne Stakes.—Dawdle, 1. Practitioner, 2. Pretty Girl I., 3.
Farewell Plate.—Sir Watkin, 1. Fern, 2.
Beaudesert Welter Cup.—Golden Drop, 1. Keane, 2. Ophelia, 3.

TUESDAY.

Copeland Nursery Handicap.—Cutaway, 1. Dermot Asthon, 2. Edward the Confessor, 3.
Golden Cup.—Drop, 1. Golden Drop, 2. Charming Woman, 3.
Sweepstakes of 10 sovs.—Pretty Girl I., 1. Edward the Confessor, 2.
Avon Plate.—Miss Ada, 1. Ophelia, 2. Fern, 3.

CUDBAGH SEPTEMBER MEETING.—TUESDAY.

Scurry Stakes.—Redskin, 1. Cuscoe Rose, 2. Astar, 3.
Her Majesty's Plate.—Tourist, 1. Xantes, 2. Captain Crow, 3.
Cudbagh Stakes.—Quarantine, 1. Cuscoe Rose, 2. Sir Judy, 3.
Kildare Handicap.—Spring Duty, 1. Amadi, 2. Bombardier, 3.

DEVON AND EXETER MEETING.—TUESDAY.

Haldon Plate.—Heber, 1. Princess Vocqual, 2. Icarus, 3.
Riding Stakes of 3 sovs.—Mr. Hodge, 1. Mr. Hodgkinson, 2. Princess Vocqual, 3.
Ladies' Plate.—Brown Betty, 1. Ring 2. Tonio, 3.
Maiden Plate.—Princess Vocqual, 1. Icarus, 2.
Rougemont Stakes.—Sennett, 1. Brown Betty, 2. Tonio, 3.
Dawlish Stakes.—Heber, 1. Sennett, 2.

WEDNESDAY.

Devon and Exeter Club Stakes.—Mr. Harmsd, 2. Scurvenier, 3.
Mamhead Stakes.—Outlaw, 1. Agatha, 2. Montimina I., 3.
County Cup.—Cashiobu, 1. Mr. Hodge, 2. Heber, 3.
Selling Sweepstakes.—Newfoundland walked over.
Nursery Plate.—Agatha, 1. Ring, 2. Agnes, 3.
Handicap Sweepstakes.—Lady di Vcary, 1. The Dictator, 2. Barmaid, 3.

DERBY SUMMER MEETING.—WEDNESDAY.

Trial Stakes.—The Clown, 1. Lord Zetland, 2.
Chesterfield Stakes.—Lord Zetland, 1. Garrotter, 3.
Derwent Stakes.—Monkey, 1. Dindale, 2. Vulture, 3.
Nursery Plate.—Little Savage, 1. Rothschild, 2. Redcap, 3.
Tradesmen's Plate.—Tippler, 1. Jack's Alive, 2. Warhorse, 3.
Portland Cup Buck Stakes.—Middlewatch, 1. Somersault, 2.
Grand Stand Plate.—Last Shaun, 1. Glory Girl, 2. Outlaw, 3.

THURSDAY.

Derby Stakes.—Practitioner, 1. Tomfoolery, 2. Colmbra, 3.
Kinlapeyre Plate.—Miss Lindegreen, 1. Scythia, 2.
Donnington Plate.—Overcurn, 1. Lurco, 2. Redcap, 3.
Derby Stakes.—Miss Agnes, 1. Miss Agnes, 2. Highland Mary, 3.
Chatsworth Stakes.—Stockinger, 1. Doncaster, 2. Warhorse, 3.
Harrington Stakes.—Forbidden, 1. Dawdle, 2. Tomfoolery, 3.

COUNTRY NEWS.

Earl Russell is to be presented with the freedom of Dundee the day after the opening of the Baxter Park.

The State apartments of Windsor Castle will be closed on the 9th inst.; they will be reopened on the 15th inst.

John Johnson, Esq., barrister, has been appointed Recorder for Chichester, in the place of the late Wm. Milton Bridger, Esq.

The British Archæological Society will hold its annual meeting next month, at Leeds, under the presidency of Lord Houghton.

Mr. Serjeant Kinglake has been appointed senior counsel for the Post Office on the Western Circuit, in lieu of the late Sir F. Slade.

A writ for a representative Peer in the room of the late Lord Downes has been issued, and it is supposed that Lord Inchiquin will be elected.

On Thursday week the Royal North Lancashire Agricultural Association held their annual show at Lancaster. Lord Stanley, M.P., presided at the dinner.

The foundation-stone of the new Custom House buildings, South Shields, was laid on Thursday week by the Mayor, J. B. Dale, Esq., in the presence of a numerous assemblage.

A woman named Ingraham died in the streets of Strokestown, Roscommon, last week, for want of proper nourishment. She had, when searched, £147 11s. 10d. on her person.

The annual floral fete and musical festival at Bishop Auckland was held yesterday week, in the romantic park attached to Auckland Castle, the seat of the Bishop of Durham.

At a meeting of the ratepayers of Chorlton-on-Medlock, held on Monday, it was decided that a public park and playground should be provided for the crowded population of Chorlton and Hulme.

The citizens of Exeter and noblemen and gentlemen of the county of Devon have unanimously agreed to take active measures to invite the Royal Agricultural Society to hold its meeting in Exeter in 1865.

Mr. E. Stanley, of Ponsonby Hall, and late M.P. for West Cumberland, has just died at the age of seventy-three years. Mr. Stanley represented West Cumberland for twenty years, until his retirement from public life, in 1852.

Sir W. Fraser was yesterday week returned without opposition as member for Ludlow, in the room of the late Mr. Beriah Botfield. The new member is a Conservative, as have also been most of the members for the borough since the passing of the Reform Bill.

The committee for carrying out the Bradford memorial to the late Richard Oastler have intrusted the commission to Mr. Birnie Philip. The memorial will take the form of a group (the figure of the philanthropist being the centre one), and will cost £1000.

Amongst the most prominent features of the coming Worcester musical festival will be the performance of Herr Schachner's oratorio of "Israel's Return from Babylon." The solo parts will be sustained by Mdlle. Titiens, Miss Palmer, Mr. Sims Reeves, and Mr. Santley.

The second of the steam-rams built by Messrs. Laird, of Birkenhead, it is supposed for the Confederates, was launched last Saturday. She was named El Monassir—the Victory. Her sister ship is called El Toussoun. Both are fitted with the newest inventions for warlike destruction.

A fire has broken out in the Wellington Pit, at Whitehaven, the property of the Earl of Lonsdale. It was discovered on Monday week, and it gradually increased until Friday, when it was found necessary to withdraw the miners and drown the pit. The accident will throw about 700 men out of employment.

The formal opening of the section of the Kent Coast Railway from Herne Bay to Margate took place on Wednesday. The Government Inspector, however, has objected to the girders of some of the bridges of small span, and some time must elapse before they can be replaced by others. The section traversed is eleven miles and a half in length.

The Local Government Act has been adopted at Great Harwood, Lancashire. The ratepayers have been led to take this step in consequence of a vast amount of sickness, which it is hoped will be avoided when the powers of the Act are carried out for the removal of nuisances.

At the Salford Sessions, on Wednesday week, a stylishly-dressed young woman, named Alexandra Duzal, a returned convict, was sentenced to six years' penal servitude for pocket-picking. On receiving sentence she said, "I can do all that as I did the other, and come back a fine woman and clever thief again."

In consequence of the breakage of the shaft-gear of the Burradon Colliery, near Newcastle, on Monday, about 200 miners were in danger of being confined in the pit without any early means of escape. Under the guidance of some of the more experienced colliers, the party sought a passage to the shaft of Seghill Colliery, about three miles distant, which they reached in safety.

Sir John Arnott cut the first turf of the Cork and Macroom Railway, on Wednesday week, at Ardarostig, where the line will join the Cork and Bandon. The new railway, which will be a great accommodation to the public, will commence at the station of the Cork and Bandon Railway, Albert-quay, Cork, and, passing by the town of Ballincollig and the villages of Ovens, Killumney, Farran, and Crookstown, will terminate at Macroom.

In consequence of Wednesday being the last day upon which persons proceeding to the hop-gardens in Kent were conveyed at reduced rates—viz.. to Gravesend, by steam-boat, 6d. each person; and by railway, from the Bricklayers' Arms station to Maidstone, 2s.—a large number of persons left. It is estimated that since Monday morning, when the reduction took place, 10,000 hop-pickers have taken advantage of the arrangements.

The Cambrian Archæological Society, which, as we stated last week, has been holding its annual congress at Kington, brought its proceedings to a close on Saturday by the most interesting excursion of the week. The regular meetings were closed on Friday, but Saturday was an extra day devoted to a pilgrimage to Wroxeter, the site of the famous remains of the ancient Roman city of Uriconium. Mr. Wreight, F.S.A., was the cicerone, and explained the discoveries made and the extent of the excavations.

The Rev. J. S. Padley, a clergyman living at Dalton, in Lancashire, brought an action, at the Liverpool Assizes, last week, against Mr. Cooper, a surgeon, for libel. A Captain Baddeley had died in Mr. Padley's house, and left him all his property (stated to be only £500), to the exclusion of his nephews. Shortly after his death the defendant and five other nephews of Captain Baddeley applied to have the body exhumed, and caused statements to be inserted in local papers tending to suggest that he had been poisoned. After an inquiry by the police the authorities decided that there was not the slightest ground for exhuming the body. While the trial was proceeding the defendant agreed to pay £150 and apologise, and the action was withdrawn.

The shattered trunk of Herne's oak, in Windsor Park, was blown down on Monday morning. A branch of the tree which fell from the trunk upwards of twenty years ago has been carefully preserved in the Royal stores at Windsor Castle. Since then this famous tree has been fenced in with park pales, and a plate has been attached to it upon which is engraved a quotation from "The Merry Wives of Windsor." The identity of Herne's oak has been disputed by many writers; but in a plan of the Castle and Tower of Windsor, published at Eton in 1742, the position of the oak is clearly defined. It is marked as Falstaff's oak. The fairies' dell has been partially filled up, but the late Prince Consort had much of the earth removed, when the remains of large oaks in an upright position were discovered.

A new edifice for religious worship, entitled the Merrion Hall, was opened at Dublin on Wednesday week. It has been erected by public subscription, at a cost of £16,000, and is intended for the celebration of Divine worship without any of the distinctive characteristics of the different sects, thus "affording a neutral ground on which Christians of all denominations may unite in public devotion." The building, which is situate at the corner of Lower Merrion-street and Harcourt-place, is constructed of white Suffolk brick, with a richly-ornamented front of Caen and Portland stone. It will accommodate 5000 persons. The Rev. James Denham Smith, by whose admirers the project was set on foot, will be the principal minister.

The grand national Eisteddfod and Gorsedd of the bards of Cambria was opened by proclamation at Swansea, on Tuesday, by the bard Clwydfardd. This being the annual gathering under the auspices of Yr Eisteddfod committee, which is held alternately in North and South Wales, the muster was very large. Mr. Hussey Vivian, M.P., presided, and the competitions in literature, poetry, and music were carried on with their accustomed spirit, the principal prize being awarded to the Rev. John Griffiths, of Llandilo, for the poem on the "Return to Babylon." The Eisteddfod was held in a pavilion erected for the purpose, capable of containing 6000 persons. It was decorated with the usual Welsh mottoes, and the platform was also ornamented with statuary of eminent Welshmen, by Mr. W. Davies, of London, and Tydain's photographs of Welsh celebrities, male and female. The day was closed with a concert.

A case, "Rutliff v. Williams," heard at Croydon on Monday, afforded rather a comical illustration of the exaggeration of a little matter into a lawsuit. It was an action against a Thames waterman, by one of his "fares," for being upset in it, and thus "getting a ducking." The "declaration," in which the plaintiff set forth in legal parlance his grievances, ran thus:—That he was a passenger in the boat, and that through the negligence of the defendant it was upset, and the plaintiff was "thrown from the boat into the river, and was immersed in water, hurt, bruised, wounded, and otherwise injured, and his clothes were spoiled, and he lost his umbrella; and he became and was sick, sore, and disordered, and so continued for a long time—to wit, from thence hitherto (i.e., July last, when his sufferings were thus recounted), and was put to expense for medical and other assistance, and prevented from attending to his lawful and necessary affairs and business, and was and is otherwise injured." For all these grievances, woes, and wrongs he claimed the sum of £100. The jury, without hesitation, returned a verdict for the plaintiff—damages, one farthing.

The Kilkenny cattle show was closed yesterday week. The interest taken in it appeared to increase as its termination approached; 8000 persons were admitted on Thursday, and nearly double that number yesterday week, when the charge for admission was reduced to 6d. The town was crowded all day with excursionists from all parts of the country. Most of the animals exhibited were sold in the showyard. The sheep were eagerly bought up, and the English exhibitors in this class were scarcely left an animal to take home. One of them, Mr. Morris, disposed of several rams at from ten to eighteen guineas each.——The Lord Lieutenant drove in from Woodstock early in the day, and proceeded to the District Lunatic Asylum, which he carefully inspected. He then visited the Kilkenny Model Schools, in which 250 pupils were assembled, and the agricultural school and model farm of the National Board, in each of which the pupils were examined in his presence, and were highly commended by him for their intelligent answers. In the evening his Excellency attended the ball which terminated the proceedings of the show week. It took place in the Athenæum. There was a very large assemblage of the nobility and gentry of Kilkenny and the adjoining counties, and the entertainment passed off with great éclat.

Several Harvest Feasts have been held during the past week. Archdeacon Denison presided over the Harvest Festival of East Brent on Thursday week, which commenced with service in the church, after which the congregation adjourned to the dinner-tent. The *Bristol Times* says:—"The chairman was evidently accustomed to the position, and he bore the honours of the day with jovial humour. Two sharp blows on the gong, and the quickly-uttered word 'Grace!' brought five hundred people to their feet. 'God bless these things to our use, for Jesus Christ our Lord's sake!' was solemnly said; and before the company could sit down again the chairman, with a 'Now then!' had thrust a huge carving-knife into a monster sirloin of beef. Then began the attack upon the enormous joints of meat—joints so enormous that beneath their weight any other tables than those rough deal planks might have tottered and fallen. The meat disposed of, troops of ladies—sixty in all, and headed by the band—entered the tent at both ends, and walked round the boards in single file, each lady bearing in her hands a steaming plum-pudding, decked with geranium and verbena blossoms. When the puddings had been eaten a monster loaf (twenty quarterns), 6 ft. long, and made of this year's corn, was brought in on four men's shoulders and placed in front of the chairman; and while a burly farmer, with one foot on the table and another on a seat, was endeavouring to cut up this, a huge cheese, weighing upwards of 80 lb., made its appearance. A number of ladies, visitors and villagers, sat down to a very early tea. Games of football were heartily entered into until after sunset, and then the company passed into the tent—now lighted up by oil lamps and Chinese lanterns—and danced for two or three hours. At ten o'clock the tent was cleared, and so, noiselessly, ended the seventh Harvest-home."

CHURCH AND UNIVERSITIES.

The Archbishop of Canterbury intends holding a general ordination on Sunday, the 20th inst.

An elegant silver tea service has been presented to the Rev. George Morris Spawers, Vicar of Harting, Sussex, by his parishioners, after discharging the duties of Curate in the parish for fifteen years.

Preparations have for some time been going on for a grand choral gathering at York Minster on the 13th of October. It is expected that the performers, who are to be sent from the various choirs throughout Yorkshire, will number about 2000. On this occasion the organ being built in the nave will be employed for the first time at a public performance.

A number of noblemen, Bishops, clergy, and laity propose to hold a congress on Church affairs in the course of next month at Manchester, where papers will be read and discussed on the questions that at the present day agitate the Church both in England and Ireland; the great object to be kept in view being the greater efficiency of the Church in its work of instructing and improving the people.

The following preferments and appointments have recently been made:—The Rev. H. T. Lee, Vicar of Helhoughton with Rainham St. Martin, to be Rural Dean of the deaneries of Brisley and Toftrees; Rev. T. B. Brown to be Rector of Normanton and Domestic Chaplain to Lord Aveland; Rev. W. Cockin to be Rector of Bishopwearmouth; Rev. J. W. Oates to be Curate (Sole Charge) of Newinham with Mapledenwell, Hants.

A public meeting was held the other day in Shrewsbury, in support of a movement which has been for some time in operation there as well as elsewhere, for abolishing pew rents in churches, removing the exclusive pews, and throwing the churches open to all classes of the parishioners. Lord Newport took the chair, and the meeting was addressed by the Ven. Archdeacon Allen, Archdeacon Ffoulkes, Colonel Hill, and others of the clergy and gentry in the neighbourhood. The meeting was a very crowded one.

The following are the preachers appointed to preach in St. Paul's Cathedral on Sunday mornings this month:—Sept. 6th, Rev. R. C. Packman, B.A., of St. Peter's College, Cambridge, Priest in Ordinary to the Queen, and Rector of Langdon Hills; 13th, Rev. C. Marshall, M.A., of Trinity College, Cambridge, Vicar of St. Bride's, Fleet-street; 20th, Rev. W. A. Soames, M.A., of Trinity College, Cambridge, Vicar of Greenwich; 27th, Rev. T. Ainger, M.A., of St. John's College, Cambridge, Incumbent of Hampstead.

St. Mary's Church, Hull, which has been undergoing restorations, not quite finished, for two years and a quarter, was reopened on Thursday week in the presence of the Archbishop of York and the Bishop of Melbourne, the former of whom preached, after which a collection was made amounting to £117, to which £40 more was added by the collection at the evening service, when the Bishop of Melbourne preached. The Rev. John Scott, the Incumbent, also received a cheque for £100 from Mr. Somes, M.P., who was unable to attend.

The Church of St. Bartholomew, Cross-in-hand, in the parish of Waldron, Sussex, was consecrated on the Feast of St. Bartholomew, by the Bishop of Chichester. Owing to the closing of the parish church for restoration in the previous year, a service was commenced by the Rector in a temporary building at Cross-in-hand. This gave rise to a munificent offer on the part of J. G. Boucher, Esq., of Heatherden House, to build a church at his own expense for the accommodation of that neighbourhood, the most thickly-populated portion of the parish of Waldron. This good work has been happily completed.

On St. Bartholomew's Day the corner-stone of new national schools for the district of Masbro', in the parish of Rotherham, Yorkshire, was laid by Mrs. White, wife of the Rev. H. Master White, Curate of the district, which contains six thousand souls, and for which he is at present endeavouring to raise a church, in order that it may be made into a separate parish. Over the porch will be the inscription, "In memory of F. M. A., a beloved sister;" the schools being erected by Mr. and Mrs. White as a memorial of their sister, whose death last year in the midst of her untiring labours was so severely felt by the poor and the children among whom she taught. The rooms will hold about 325 children. The cost of the buildings will be about £1000.

The laying of a stone to commemorate the restoration, or rather the rebuilding, of Tuam Cathedral was performed on Thursday week by the Bishop of that diocese. The proceedings were commenced by Divine service in the cathedral, at which the Bishop and a large number of clergy attended. There was a crowded congregation, composed not only of the gentry and superior classes of the locality, but also of a considerable number of persons of the humbler ranks. There was full choral service, with anthem, but no sermon. The only part of the present cathedral, says the *News Letter*, which is of any architectural interest is a porch and doorway. It appears, by an inscription upon an ancient Irish cross, that this porch and doorway once formed the chancel and chancel-arch of a church built A.D. 1130, and which is believed to have been the structure that was burned in 1152. It now constitutes the entrance to the present cathedral. A great object of the restorers has been to preserve this porch and doorway, and to have a new structure erected in harmony with them. The task of restoration has been committed to Sir Thomas Deane and Son, who are also engaged in the restoration of the Cathedral of St. Canice in Kilkenny. They have prepared a design for Tuam Cathedral, the estimated cost of carrying it out being about £10,000. Towards this a grant of £2000 has been made by the Ecclesiastical Commissioners, of £500 by the Bishop of Tuam, and of £100 each by the Primate of Ireland, the Rev. Charles Seymour, the Rector and Provost; by Mr. Jeremiah Nunn, Mr. Benjamin Lee Guinness, Lord Leconfield, and Mr. Henry Hoare. The Rev. C. Seymour, the Rector, in the course of a long address, in which he said that the members of the Church were fast increasing in Tuam, remarked that his "first subscription towards the requisite £12,000 was a penny, and his second was £500 from the Bishop, and that not one single Protestant had refused his aid." He added:—"Again, I am not without great gratitude to God for this, that, from having been the most persecuted man in Tuam, I stand here this day with numbers of my Roman Catholic friends and parishioners standing round in this place. Within the last week I have received numerous instances which show their kindly feeling towards me; and they—I will not say wish prosperity to the thing—but are certainly more upon my side than against me. I have been offered rooms for my friends by Roman Catholics; and I was refused money by Roman Catholics for things that we required for this meeting."

THE UNIVERSITIES AND PUBLIC SCHOOLS.—At Cambridge Mr. Henry Hollingworth, Scholar of Kings', has been elected a Fellow.

The Rev. J. Twentyman, Fellow of Christ's College, Cambridge, has been appointed one of the Masters of Cheltenham College, in the place of the Rev. P. Sandilands, who retired at midsummer. There are at present 663 pupils receiving instruction at this establishment.

In accordance with a scheme recently prepared by the Ecclesiastical Commissioners, and confirmed by her Majesty in Council, St. David's College, Lampeter, has received a further endowment, the object being to extend the course of education, "so as to be equivalent to the ordinary course of education for a Bachelor's degree at the Universities of Oxford and Cambridge." The endowment will provide two new professorships, and a large number of additional scholarships to the amount of more than £300 per annum. These will be open to all candidates without any restriction.

The Rev. R. C. Whiting, M.A., Fellow of Trinity College, Cambridge, has been appointed to the subwardenship of Radley College, vacated by the resignation of the Rev. William Wood, late Fellow of Trinity College, Oxford. Another mastership has become vacant by the election of W. W. Jackson, Esq., to a fellowship and tutorship at Exeter College. The boys will return on Sept. 15, an additional week's holiday having been given at the special request of his Royal Highness the Prince of Wales.

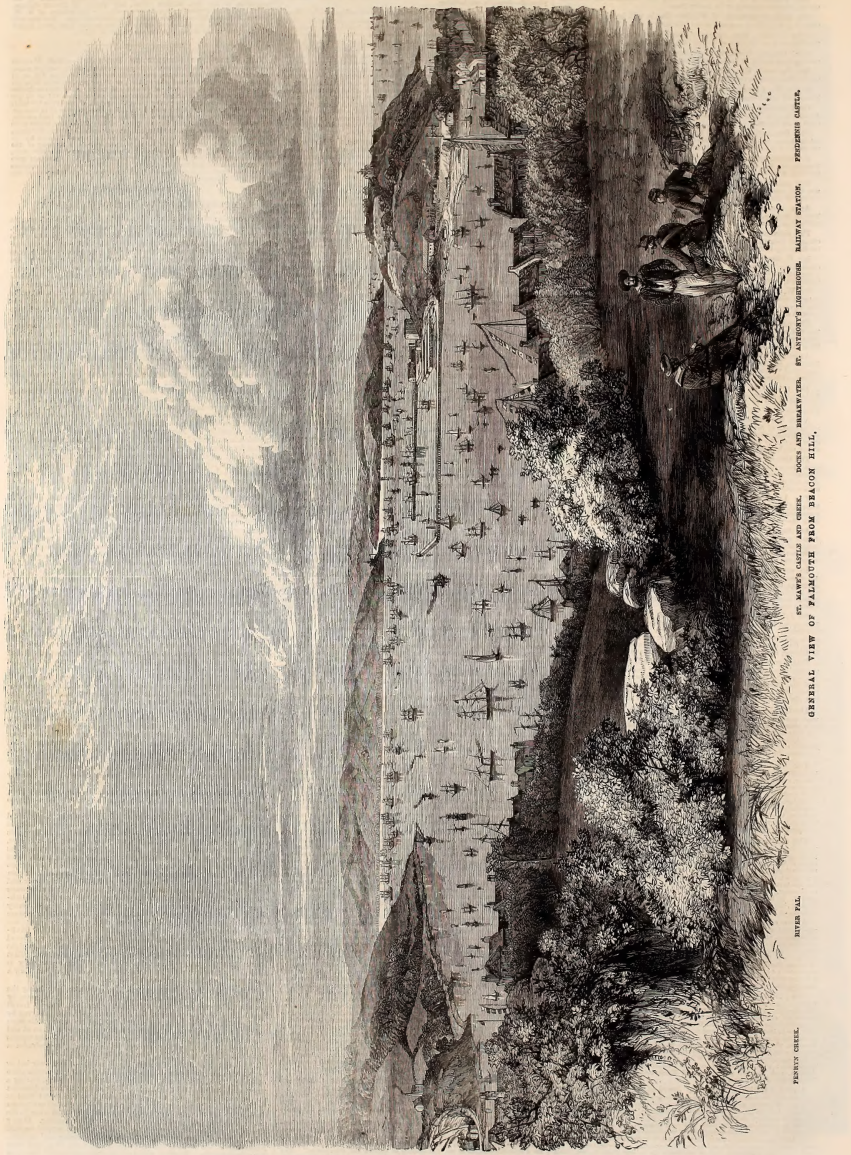
THE MERCHANT SERVICE OF DENMARK.—The Danish merchant service, which has considerably increased within the last few years, consisted in 1860 of 5653 vessels, gauging 246,340 tons. Of those 716, or 13 per cent, were of 100 tons and above; 1290, or 23 per cent, of from 30 to 100 tons; and 3647, or 64 per cent, of 30 tons and under; 336 vessels—together measuring 41,482 tons—belonged to Copenhagen, and of these 176, or 52 per cent, were of 100 tons and upwards; 91, or 27 per cent, of from 30 to 100 tons; and 69, or 21 per cent, of 30 tons and under. The steamers were 56 in number, measuring 3172 tons, with engines of 3737-horse power. Of the total service, the shipping of the Duchy of Holstein measured only 45,822 tons, whilst more than 200,578 tons belonged to the kingdom, properly speaking, and to Schleswig, the latter possessing 61,524 tons. The entry to the port of Elsinore having been proved to be impracticable for large steam-vessels, a meeting of the consular body, under the presidency of the Consul of France, lately took place, to obtain a remedy for that hindrance to commerce. The proceedings were favourably received, and the Danish Minister of the Interior has taken measures which give reason to hope that the port will be rendered accessible to any vessels in all weathers.

COMPLETION OF THE CORNWALL RAILWAY.

BY the opening of the line from Truro to Falmouth, the latter town has been brought into direct railway communication with London. An event of such importance to the inhabitants of Falmouth was celebrated by them with great rejoicings. Business was entirely suspended. Numerous arches formed of evergreens and flowers spanned the streets, and flags waved from all available points. On the morning of the 21st ult., the opening day, a procession, consisting, among others, of the Mayor and Town Council, clergymen and other ministers, directors of the Docks Company, tradesmen of the town, Foresters, Oddfellows, sailors, and marines, accompanied by several bands of music, proceeded from Green-bank to the railway station, which they reached about twelve o'clock. In a short time the opening-train, which consisted of fourteen first-class carriages, filled with the chairman and directors of the Cornwall Railway Company and other influential gentlemen, arrived. On alighting, the directors were met and welcomed (as shown in our Engraving) by R. R. Broad, Esq., the Mayor of Falmouth, and the Corporation, and after suitable greetings his Worship presented the chairman with a congratulatory address. Dr. Smith, on receiving the address, expressed his happiness at visiting Falmouth that day on the auspicious occasion that had brought them together, and on behalf of the directors pledged himself to a hearty co-operation with the inhabitants for the welfare of Falmouth and the weal of the county. The procession then re-formed and returned through the town. At two o'clock a banquet took place at the large warehouse on the docks, the interior of which had been transformed. Here, under the presidency of his Worship the Mayor, nearly 350 gentlemen of the highest position in and out of the county sat down. Dinner was also provided for about 400 navvies, who had been employed on the railway works. At eight o'clock there was a display of fireworks on the Moor, and at ten a torchlight procession through the town. There was also a subscription ball at the Polytechnic Hall. The town was pretty generally illuminated, and the celebration of the day was in every way satisfactory.

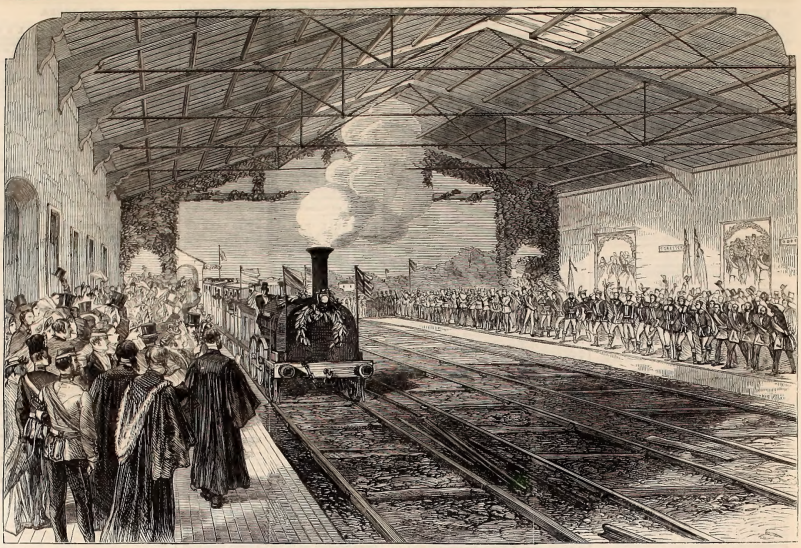
The distance from the Truro station to the terminus at Falmouth is eleven miles and a half, within which space the railway is carried over eight viaducts and through two tunnels.

The opening of this the last link of the Cornwall railway from Truro puts every part of the kingdom in direct communication with a splendid port at the extreme of the Channel, and to a great extent free from the dangers which are the general characteristic of the Channel. Falmouth, indeed, in regard to its efficiency as a port, is second to none in the kingdom, and in beauty inferior only to the Bay of Naples. The pride of the mariner is to make the Lizard; and while northward to Bristol is an iron-bound coast without the slightest shelter or means of refuge for 150 miles, in the south there is a desirable haven lighted by the Lizard to Falmouth, and approachable at any time of tide, with headlands on each side of the entrance, equally available for shelter and for armament, and so arranged internally as to offer a refuge in ten minutes from the raging sea in the bitterest gale of wind, and having another harbour formed, with a completely sheltered range of docks for discharging and repairing, and where the mail-steamers, as much at ease as if they were within the St. Katharine Docks, could run in between two ranges of railroad carriages, one for passengers, and the other for specie, mails, and baggage.



This port, owing to the uneven surface of Cornwall and from its distant locality from the seat of Goverment (London), had passed comparatively unnoticed till about 300 years ago, when Sir Walter Raleigh landed there, and was so charmed by its natural beauty and efficiency that he applied his sagacious judgment and energy in turning the few fishing-huts which then existed into a small town, which in its progress is destined to become what we may call the *Dover of the Atlantic*. In 1688 it was established by the Government as the mail-packet station; but its use for this purpose gradually fell off until, in 1850, Falmouth ceased altogether to be a packet-station. Its progress was retarded by the want of three advantages, which the complètion of the present railway communication provides.

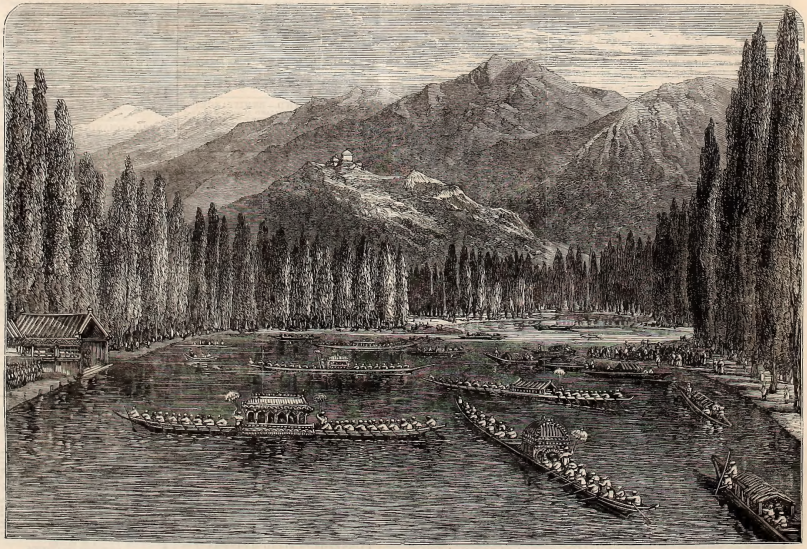
Falmouth, up to this time, has not had the direct line of railway which would have enabled it to compete with other ports in steam-navigation. Now that it possesses all these facilities of communication, it will no doubt soon attract the attention which its merits so eminently deserve.



And, whilst the great importance of Falmouth as a naval and commercial port has been long acknowledged, although never brought into that conspicuous prominency which it deserves, its hygienic merits, now that it is linked to our great system of railways, will gradually attract attention. Looking upon the great coast arc from Scarborough on the north point, to Tenby on the south, there is not an intermediate town or village reachable by rail that does not teem in summer and autumn with health and recreation seekers from the provinces, and from the seething metropolis. In winter and spring, again, there is not a sheltered nook on the small arc between the undercliff of Hastings, including that of Ventnor and the south-lying slopes of Torquay and Penzance, where the pulmonary invalid is not seen in quest of that mild equability of temperature so necessary for staying his terrible malady. It is, perhaps, not a little curious that, hitherto, Falmouth and its beautiful Mediterranean-looking bay have been almost completely overlooked by the classes of travellers here alluded to. Doubtless, the oversight arose in a great measure from the want of communication. That barrier being, however, at last removed, a fitting opportunity is afforded by our giving a View of the place, appending to that View a few remarks on Falmouth's sanitary excellence.

A mild, equable temperature, with marine atmosphere, being the grand desideratum sought for along our south coast, it appears by the admirably-arranged meteorological registrations kept by Lovell Squire, Esq., of Falmouth, and his son, from 1837, and preserved by the Royal Cornwall Polytechnic Society, that nowhere is this more likely to be found, together with every domestic comfort, than at and about Falmouth. Space will permit of only a reference to the reports of the society above mentioned; but we willingly give verbatim a few observations on the locality, written by Mr. Squire:—

"The climate of Falmouth is mild and moist—seldom very hot or very cold. January is the coldest month, having a mean temperature of 42 deg. 9 min. Fahrenheit. August is the hottest month, having a mean temperature of 61 deg. 7 min. The average difference between the temperature of day and night throughout the whole year is 12 deg. 2 min. In winter snow rarely lies on the ground more than three days; and occasionally several years pass without the water in the neighbourhood being sufficiently frozen to admit of skating. Heavy thunderstorms are of rare occurrence. The average annual rainfall is 40 deg. 43 min. inches, calculated from twenty-one years' registry. November is the wettest month in the year; April, May, and June the driest months. Westerly winds are the most prevalent; two days



GENERAL VIEW OF FALMOUTH FROM BEACON HILL.

OPENING OF THE FALMOUTH AND TRURO RAILWAY: ARRIVAL OF THE FIRST TRAIN AT FALMOUTH STATION.

out of five the wind blows from the south or west, or the intermediate points. That part of Falmouth known as Wood-lane and its neighbourhood is delightfully situated, sloping to the south, and commanding a fine view of the English Channel. This locality is admirably adapted as a winter residence for invalids. Instances have not been wanting of invalids on their way to Madeira stopping here by preference, and thus sparing themselves the expense and inconvenience of a sea voyage."

If, in addition to the advantages comprised in the foregoing observations visitors find, as we believe they will, that the subsoil is sand and gravel, and that the Gulf-Stream-tempered atmosphere contains a large proportion of that wondrous health-restoring agent, ozone, we shall not be surprised if they pronounce Falmouth deserving of the significant motto the celebrated Dr. Gregory placed over his garden door, "Hinc Sanitas."

TOUR OF THE LIEUTENANT-GOVERNOR OF THE PUNJAUB THROUGH CASHMERE: ARRIVAL AT SRINNUGGUR.—FROM A DRAWING BY AN OFFICER OF THE STAFF.—SEE PAGE 238.

**** The charge for the insertion of Births, Marriages, and Deaths is Five Shillings for each announcement.*

MONETARY TRANSACTIONS OF THE WEEK.

(From our City Correspondent.)

The steady influx of gold into the Bank of England, and the favourable state of the foreign exchanges, have produced a firmer feeling in the market for Home Securities, and a slight upward movement in the quotations. Exchequer Bills have ruled steady. The next issue will bear interest at the rate of £2 15s. per cent per annum.

There has been a moderate demand for accommodation, both at the Bank of England and in Lombard-street, and the quotation are well supported.

Bankers' acceptances have been done at 3½ ⅞, and in the Stock Exchange money may be had at 3 per cent.

On the Continent capital is in fair request. In the quotations, very little change has taken place.

The steamer for India has taken out £113,181, and £31,000 has been forwarded to the West Indies.

Another sale of £400,000 in bills on India has taken place, at previous quotations.

The Railway Passengers' Assurance Company have declared a dividend at the rate of 4 per cent per annum. The directors of the Canada Agency Association have announced an ad interim dividend at the rate of 20 per cent. The dividend of the Lambeth Bridge Company is at the rate of 9 per cent.

Advices from New York state that the stock of bullion held by the banks was £6,575,000, or about £1,500,000 less than was held in February last.

Home and India Stocks, &c., were firm in price on Monday; but the business doing then was somewhat restricted.

Greek Bonds, Mexican Stock, and Spanish Securities have ruled firm, and an advance has taken place in the quotations. Venezuela Stock and Turkish Consolidés have also realised enhanced prices.

The market for Joint-Stock Bank Shares has continued firm, and the quotations have been well supported.

Colonial Government Securities have been in fair average request, and the leading transactions are as follow:—Canada Six per Cents, 103½; Ditto Five per Cents, 94½; Mauritius Six per Cents, 1873, 107½; Natal Six per Cents, 109½; and Victoria Six per Cents, 114½.

The Miscellaneous Market has continued steady. Anglo-Mexican Mint shares have marked 19½; Egyptian Commercial and Trading, 3½; Electric Telegraph, 103½; General Credit and Finance of London, 4⅝; Hudson's Bay, 4⅞; International Financial Society, 10⅝; Joint-stock Discount, 6¼; London Financial Association, 12½; National Discount, 9¼; Oriental Inland Steam, 3½; and Rio de Janeiro City Improvements, 5¼.

American Securities have sold steadily, on rather higher terms:—Erie Shares have been done at 84½; Ditto, Seven per Cent Preference, 74½; Illinois Central Seven per Cent, 81; New York Seven per Cent, 65; Philadelphia and Reading, 40.

The dealings in the Railway Share Market have been very moderate. In some instances prices have given way. Annexed are Thursday's official closing quotations:—

Ordinary Shares and Stocks.—Great Eastern, 50⅞; Ditto, East Anglian Stock, 24½; Great Northern, A Stock, 124½; Ditto, B Stock, 135; Great Southern and Western (Ireland), 99½; Great Western, 67; Lancashire and Yorkshire, 112⅞; London and Brighton, 118⅞; London and South-Western, 102½; London and North-Western, 102½; Metropolitan, 122; North British, 56; North-Eastern—Berwick, 100½; Ditto, Leeds, 57½; North Staffordshire, 81; South Devon, 31½; South-Eastern, 93⅞; Stockton and Darlington, 37; Vale of Neath, 87; Victoria Station and Pimlico, 160½.

Preference Shares.—Great Western Five per Cent, 101½; Midland Four-and-aHalf per Cent, 102½; North-Eastern—York, 10½; Waterford and Kilkenny, 46½.

Lines Leased at Fixed Rentals.—London, Tilbury, and Southend, 98½; Londonderry and Enniskillen, B, 110; Midland—Bradford, 93 ex div.; Nottingham and Grantham, 9½.

British Possessions.—Atlantic and St. Lawrence, 63; Bombay, Baroda, and Central India, 108; Cape Town and Dock, 108½; East Indian, 108⅞; Grand Trunk of Canada, 20½; Great Indian Peninsula, 108½; Great Southern of India, 108½; Great Western of Canada, New, 7½; Madras Five per Cent, 108; Ditto, Four-and-Three-Quarters per Cent, 102; Delhi, 108; Punjaub, 108.

Foreign.—Antwerp and Rotterdam, 9; Dutch Rhenish, 17⅞; Ditto, 22½; Ottoman (Smyrna to Aidin), 11½; Sambre and Meuse, 10½; San Paulo, 22½; South Austrian and Lombardo-Venetian, 22⅞; Turin and Savona, 1½.

THE MARKETS.

Corn Exchange, Aug. 31.—To-day's market was well supplied with new English wheat, in excellent condition. All kinds moved off steadily, and last week's prices were fully supported. The show of foreign wheat was extensive. Selected samples commanded rather more attention, at late rates: but inferior qualities were very dull. Floating cargoes of grain ruled about stationary. Both English and foreign barley met a slow sale, on former terms. New English realised 35s. to 37s. per quarter. Malt maintained its previous value, with a moderate inquiry. Good sound oats were firm in price; but heated samples were much neglected. Beans and peas were inactive, but not cheaper. The flour trade was rather heavy, at the late decline.

Sept. 2.—English wheat was in fair request, at very full prices. All other produce moved off slowly, at late rates.

English.—Wheat, Essex and Kent, red, 38s. to 44s.; ditto, white, 40s. to 44s.; Norfolk and Suffolk, red, 39s. to 44s.; rye, 31s. to 37s.; grinding barley, 26s. to 28s.; distilling ditto, 29s. to 31s.; malting ditto, 20s. to 40s.; Lincoln and Norfolk malt, 60s. to 66s.; brown ditto, 50s. to 55s.; Kingston and Ware, 60s. to 68s.; Chevalier, 66s. to 68s.; Yorkshire and Lincolnshire feed oats, 18s. to 23s.; potato ditto, 23s. to 27s.; Youghal and Cork, black, 17s. to 22s.; ditto, white, 18s. to 23s.; tick beans, 30s. to 32s.; gray peas, 35s. to 35s.; maple, 38s. to 40s.; white, 37s. to 38s.; boilers, 38s. to 39s. per quarter. Town-made flour, 37s. to 43s.; town households, 30s. to 32s.; country marks, 28s. to 32s. per 280 lb. French, 35s. to 33s. per sack; American, 19s. to 23s. per barrel.

Arrivals this Week.—English and Scotch: wheat, 1070; barley, 110; malt, 440; flour, 400. Irish: oats, 430. Foreign: wheat, 8130; barley, 2049; oats, 6110; flour, 360 sacks.

Seeds.—New white mustard seed has sold steadily, at from 9s. to 10s.; and new brown, 12s. to 13s. per bushel. All other seeds, as well as cakes, have commanded very little attention.

Linseed, English, crushing, 62s. to 68s.; Calcutta, 65s. to 68s.; hempseed, 44s. to 48s. per quarter; coriander, 14s. to 15s. per cwt. brown mustard seed, 9s. to 12s.; white ditto, 7s. to 8s.; tares, old, 4s. to 5s. per bushel; English rapeseed, 62s. to 65s. per quarter. Linseed cakes, English, £9 10s. to £10 10s.; ditto, foreign, £9 10s. to £10 10s.; rape cakes, £5 to £6 per ton; canary, 48s. to 52s. per quarter; red clover seed, 38s. to 48s.; white ditto, 51s. to 58s. per cwt.

Imperial Weekly Averages.—Wheat, 45s. 9d.; barley, 33s. 10d.; oats, 22s. 8d.; rye, 33s. 9d.; beans, 39s. 6d.; peas, 35s. 9d.

The Six Weeks Averages.—Wheat, 46s.; barley, 31s. 5d.; oats, 23s.; rye, 31s. 8d.; beans, 39s. 8d.; peas, 35s. 6d.

English Grain Sold last Week.—Wheat, 74,121; barley, 2066; oats, 6583; rye, 191; beans, 1139; peas, 649 quarters.

Tea.—Privately, as well as at public sale, a full average business has been transacted in this market, at full quotations.

Sugar.—The market is less active, and in some instances the quotations have ruled a shade lower. Barbadoes has realised 33s. 6d. to 39s.; Jamaica, 32s. 6d. to 35s.; Tobago, 30s. to 33s. 6d.; and St. Kitts, 33s. to 34s. 6d. per cwt. Refined goods move off slowly, and common brown lumps are selling at 45s. per cwt. The stock of sugar amounts to 113,275 tons, against 88,136 tons last year.

Coffee.—No quotable change has taken place in prices; but the market may be considered steady. Stock 10,493 tons, against 11,002 tons in 1862.

Rice.—Most kinds are firm, at full quotations. Stock, 4,1633 tons, against 62,044 tons.

Provisions.—There is a full average business doing in most kinds of Irish butter, at full quotations. Foreign qualities are steady, at 96s. to 108s. per cwt. for the best Friesland. Hams, lard, &c., are quite as dear as last week.

Tallow.—Demand inactive, at the late decline in value. P.Y.C., on the spot, 42s to 42s. 6d.; and for the last three months, 41s. per cwt. Stock, 41,663 casks, against 35,335 ditto last year. Rough fat, 2s. 1½d. per 8 lb.

Oils.—Linseed oil moves off slowly, at 44s. per cwt., on the spot. Rape is steady, at 43s. to 46s.; olive, £53 to £60; cocoanut, £45 to £47 10s.; and fine palm, £35 10s. to £36. French turpentine is freely offered at 63s. per cwt.

Spirits.—The demand for rum is somewhat heavy, at 1s. 6d. per gallon for proof Leewards; and 1s. 5d. for East India. Brandy is selling at from 3s. to 11s. 4d.; Hambro' spirit, 1s. 5d. to 1s. 6d.; English ditto, grain, 1s. 8d. to 1s. 10d.; ditto, rice, 1s. 4d. to 1s. 5d.; and English gin, for export, proof, 2s. 9d. to 3s. per gallon.

Hay and Straw.—Meadow hay, £3 to £4 10s.; clover, £3 10s. to £6; and straw, £1 8s. to £1 16s. per load.

Coals.—Best house coals, 17s. 3d. to 18s.; seconds, 15s. 9d. to 16s. 9d.; Hartley's, 15s. to 15s. 9d; and manufacturers', 13s. to 15s. per ton.

Hops.—Picking is now pretty general, and about 800 pockets have already been disposed of, at from £7 to £8 10s. per cwt.

Wool.—The market is firm, and prices are well supported.

Potatoes.—The supplies are seasonably good, and the demand is steady, at from 60s. to 110s. per ton.

Metropolitan Cattle Market (Thursday, Sept. 3.)—Our market, to-day, was but moderately supplied with beasts, both as to number and quality. Prime breeds sold readily, at fully Monday's currency. Otherwise, the beef trade was in a sluggish state, at late rates. Sheep—the supply of which was rather limited—moved off steadily, at extreme quotations. The best Downs were worth quite 5s. 2d. per 8 lb. The demand for lambs was somewhat heavy, at the late decline in value. Prices ranged from 5s. to 6s. per 8 lb. The veal trade was heavy, yet the currencies were supported. Pigs were very firm in price, but milch cows were a slow inquiry. Per 8 lb. to sink the offal:—Coarse and inferior beasts, 3s. 4d. to 3s. 8d.; second quality ditto, 3s. 10d. to 4s. 4d.; prime large oxen, 4s. 6d. to 4s. 8d.; prime Scots, &c., 4s. 8d. to 4s. 10d.; coarse and inferior sheep, 3s. 6d. to 4s.; second quality ditto, 4s. 2d. to 4s. 6d.; prime coarse-woolled sheep, 4s. 8d. to 4s. 10d.; prime Southdown ditto, 5s. to 5s. 2d.; large coarse calves, 3s. 6d. to 4s. 2d.; prime small ditto, 4s. 4d. to 4s. 8d.; large hogs, 3s. 6d. to 4s.; neat small porkers, 4s. 2d. to 4s. 6d.; lambs, 5s. to 6s.; suckling calves, 14s. to 21s.; and quarter-old store pigs, 20s. to 29s each. Total supply:—Beasts, 970; cows, 140; sheep and lambs, 8300; calves, 380; pigs, 250. Foreign: Beasts, 220; sheep and lambs, 1200; calves, 200.

Newgate and Leadenhall.—The supplies of meat are on the increase; and the demand is inactive, as follows:—Beef from 2s. 8d. to 4s. 2d.; mutton, 3s. 8d. to 4s. 6d.; lamb, 4s. 8d. to 5s. 2d.; veal, 3s. 8d. to 4s. 4d.; and pork, 3s. 8d. to 4s. 10d. per 8 lb. by the carcass.

Robert Herbert.

THE LONDON GAZETTE.

Friday, August 28.

DR. DE JONGH'S (Knight of the Order of Leopold of Belgium) LIGHT-BROWN COD-LIVER OIL, prescribed by the most eminent Medical Men throughout the world as the safest, speediest, and most effectual remedy for CONSUMPTION, CHRONIC BRONCHITIS, ASTHMA, COUGHS, RHEUMATISM, GOUT, GENERAL DEBILITY, DISEASES OF THE SKIN, RICKETS, INFANTILE WASTING, AND ALL SCROFULOUS AFFECTIONS, is incomparably superior to every other variety.

SELECT MEDICAL OPINIONS.
Sir HENRY MARSH, Bart., M.D., Physician in Ordinary to the Queen in Ireland.
"I consider Dr. de Jongh's Light-Brown Cod Liver Oil to be a very pure Oil, not likely to create disgust, and a therapeutic agent of great value."

DR. GRANVILLE, F.R.S., Author of the "Spas of Germany."
"Dr. Granville has found that Dr. de Jongh's Light-brown Cod-liver Oil produces the desired effect in a shorter time than other kinds, and that it does not cause the nausea and indigestion too often consequent on the administration of the Pale Oil."

EDWIN CANTON, Esq., F.R.C.S., President of the Medical Society of London, &c., &c.
"For several years past I have been in the habit of prescribing Dr. de Jongh's Light-brown Cod-liver Oil, and find it to be much more efficacious than other varieties of the same medicine which I have also employed with a view to test their relative superiority."

Dr. de Jongh's Light-brown Cod-liver Oil is sold only in Imperial half-pints, 2s. 6d.; pints, 4s. 9d.; quarts, 9s.; capsuled and labelled with his stamp and signature, WITHOUT WHICH NONE CAN POSSIBLY BE GENUINE, by respectable Chemists and Druggists.
SOLE CONSIGNEES,
ANSAR HARFORD and CO., 77, STRAND, LONDON, W.C.

GLYCERINE, which very simple tests show to be impure, is being sold on the statement that it is in every respect "equal to Price's." Most medical men prescribe "Price's Glycerine." Where purity is of importance, patients can ensure it by desiring to have their Glycerine in 1-lb., 8, 4, or 2 oz. bottles, with capsules over the stoppers, marked "Price's Patent."—Belmont, Vauxhall.

DINNEFORD'S FLUID MAGNESIA is an excellent remedy for Acidity of the Stomach, Heartburn, Headache, Gout, and Indigestion, and as a mild aperient for delicate constitutions. 172, New Bond-street, London; and all Chemists.

"RECONNOITRER" GLASS, 9s. 6d.! This Tourists' Favourite weighs 8 oz., is achromatic, and so strong that ships, houses, trees, &c., ten miles off; Jupiter's Moons, &c., are distinctly seen by it; and when used as a landscape glass is valuable on a twenty-five mile radius. "I think the Reconnoitrer very good."—The Marquis of Carmarthen. "I never before met an article that so completely answered its maker's recommendation."—F. H. Fawkes, Esq., Farnley, Otley. "Regarding the glasses supplied by Messrs. Salom, I am well pleased with them."—From a report by the Head Gamekeeper of the Marquis of Breadalbane. "The economy of price is not secured at the cost of efficiency. We have carefully tried it at an 800-yard rifle-range against all the glasses possessed by the members of the corps, and found it fully equal to any, although they had cost more than four times its price."—The Field. Post-free, 10s. 10d. The Hythe Glass, showing bullet marks at 1200 yards, 31s. 6d. These Glasses are only to be had direct from SALOM and CO., 98, Princes-street, Edinburgh, who have no agents.

KEYZOR and BENDON'S TWO-GUINEA BINOCULAR FIELD, RIFLE, or OPERA GLASS.—The extraordinary power of this instrument renders it adapted to define objects distinctly at ten miles' distance—suitable for the theatre, racecourse, target practice, sportsmen, tourists, and general outdoor observation. Illustrated Price Lists of Optical Instruments for 2 stamps.—50, High Holborn, London.

CRAMER'S ENGLISH PIANETTE, 37 guineas. Cramer and Co. have much pleasure in introducing this instrument. It has all the requisites of the best Pianoforte—check repeater action, trichord, &c.—and is, in fact, a Cramer in miniature. In practising the Pianette, the fingers of the player will be strengthened much more rapidly than on an old instrument, keen to the key and worn in the centre. Compass, from C to C in treble, 72 octaves.

Purchasers are cordially requested to observe that this instrument bears the name of Cramer, Beale, and Co. on the fallboard, action, and that Cramer and Co. are the only manufacturers of it in England.—46 and 2 9, Regent-street.

CRAMER'S INDIAN PIANETTE, in solid Mahogany, for warm climates. The most portable Pianofortes yet made. Price 25 guineas.

167 and 2 9, Regent-street.

CRAMER'S PIANOFORTE GALLERY. Cramer and Co. have the honour to announce a Special Pianoforte. There is a profusion of every description, from the smallest Cottage Pianoforte to the Grand Concert Model. All the newest improvements are introduced from the factories, all that are defective in tone being carefully avoided. Cramer and Co. feel sure that many members rely on having placed in their hands whenever may require a Pianoforte, a perfect instrument, at the lowest remunerative cash price.

Cash purchases will receive the usual discount.

Pianofortes Tuned, Repaired, and Exchanged.

Cramer and Co. deliver their Pianofortes at any railway station in the United Kingdom, free of charge, and guarantee everything to be in perfect order.—Cramer, Beale, and Wood's Pianoforte Gallery (the largest in Europe), 46 and 209, Regent-street.

PIANOFORTE RENOVATION.—CRAMER and CO. have pleasure in announcing that their experienced workmen for the repairing and removing of the mechanism of pianofortes were sent by years of training. Cramer and Co. do not pretend (as is very commonly done) to make the instrument "as good as new," but they undertake to put it into such order as to be sound to great durability of tone, and no expense made to be perfectly sent factory. Cramer and Co. give estimates of cost, and pay whether they undertake the work.—Cramer, Beale, and Wood's Pianoforte Gallery (the largest in Europe), 207 and 209, Regent-street.

CRAMER and CO.'S GREAT SALE of SECOND-HAND PIANOFORTES. Cramer and Co. have just received a large number of Pianofortes from the season's hire, and will for a short time offer them at very low prices, commencing with the 3rd of October. The number of instruments to select from is quite unprecedented.

SELF-ACTING ORGAN, with Six barrels, playing Three Overtures and selections of Operatic Music. This magnificent Instrument is now on view at the Gallery, and will be sold for 250 guineas, which is not one-third the cost. Perfect condition. Apply to CRAMER and CO., 207 and 209, Regent-street.

NOTICE.—HALF-PRICE.—All Music, and the best Editions, at half the published price, sent post-free for postage-stamps.—CRAMER and WOOD, 201, Regent-street.

ENGLISH CONCERTINAS, by LACHENAL & CO. Full Compass, with the latest improvements warranted for Six Climates, and to keep well in Tune, from Two guineas.—LACHENAL and CO., 20, New Bond-street.

BOOSEYS' MINIATURE PIANOFORTE, price 17 guineas. Messrs. Boosey and Co. have much pleasure in remarks to examine a new description of Pianoforte manufactured by Messrs. Rudolph Ibach Sohn, of Barmen, which they have recently introduced. It is of the usual horizontal form, but in it cramin such surprise as would be caused by a child "discovering most elaborate piece of mechanism in a full-grown piano. It has a rich, brilliant tone, quite strong enough to fill the largest drawing-room, and a touch which is perfectly responsive to the player's every wish. Messrs. Boosey and Co. think a price has never before been presented to the public.—Vide ILLUSTRATED LONDON NEWS, Sept. 1, 1883, page 215. Messrs. Boosey and Co. have only a few of these instruments for sale, and these at the above price.—Boosey and Sons, 295, Holles-street, London.

SECOND HAND PIANOFORTES. Messrs. BOOSEY and SONS have a few of SECOND-HAND PIANOFORTES for Sale, by BROADWOOD, COLLARD, ERARD, and other Makers, which they can recommend, at very reduced prices. Also, new Instruments of every description.—Chappell and Co., 50, New Bond-street.

PIANOFORTES at CHAPPELL'S.—The largest Stock in London, by Broadwood, Collard, Erard, &c., for Sale or Hire.—50, New Bond-street.

CHAPPELL'S FOREIGN PIANINO (The only Pianino to which the Prize Medal was awarded).—A most elegant Cabinet Pianoforte, with Trichord Treble, Check Action, and most perfect touch; admirably adapted to small rooms, resting the tone, and standing well in tune. Price 35 guineas. Also, a Pianoforte of the same description, with all the latest improvements, 45 guineas.

Also, in mahogany, rosewood, or walnut, 25 and 26 guineas. A great variety may be seen at

CHAPPELL and CO.'S, 50, New Bond-street.

CHAPPELL and CO.'S ENGLISH MODEL COTTAGE PIANOFORTE.—To customers preferring the pure English tone of Pianofortes by Broadwood, Collard, Erard, &c., a Model will be found in the Cottage Pianoforte by Chappell and Co. Although the price is of the same simple description as those made by the above eminent firms, it will be found to possess where the more complicated actions are objectionable to many of the English Pianofortes manufactured. The full Iron Frame, similar in every respect to other instruments at 50 guineas, price 25 guineas; or handsomely inlaid, 30 guineas.

CHAPPELL and CO., 50, New Bond-street.

CHAPPELL'S FOREIGN MODEL PIANOFORTE, price 20 guineas in rosewood; or in walnut or mahogany, 18 guineas. Although this Pianoforte is of the usual compass of Seven Octaves, it is strengthened by every possible improvement, and will stand perfectly in tune. The workmanship is of the best description; the touch is even and responsive, and the tone is remarkably pure and sweet. Messrs. Chappell have much pleasure in recommending this Pianoforte, to all respects comparable, her hitherto been made to Pianofortes at a much higher price. Every instrument will be warranted, and (if desired) exchanged within six months of the purchase.

CHAPPELL and CO., 50, New Bond-street.

BROADWOOD, COLLARD, and ERARD. The best Pianofortes of every description, including all the latest improvements. Pianofortes for Hire, may be hired by the year, and hired with option of purchase; at the new Showrooms of CHAPPELL and CO., 50, New Bond-street.

ALEXANDRE'S DRAWING-ROOM MODEL HARMONIUM, the best that can be made, price 45 guineas. Illustrated List of the Full Compass Model Organ Harmoniums of Alexandre's manufacture, on application to CHAPPELL and CO., 50, New Bond-street.

SIX-GUINEA HARMONIUM by ALEXANDRE, with five octaves, two fall-boards, and in oak or walnut cases, elaborately carved. Recommended to all those cheap harmoniums which are sold in such large numbers.

CHAPPELL and CO., 50, New Bond-street.

SECOND HAND HARMONIUMS by ALEXANDRE, in oak or walnut, as good as new, at considerably reduced prices. At CHAPPELL'S, 50, New Bond-street.

ALEXANDRE'S PRIZE EXHIBITION MODEL HARMONIUM, for the CHURCH. Being a new Model Harmonium, recently invented by the best of the eight first, in oak case, 37 guineas. A large assortment may be always seen at CHAPPELL and CO.'S, 50, New Bond-street.

CHISSHOLME and SONS, Pianoforte Manufacturers (from Messrs. Broadwood's), Pianoforte street, Oxford-street, W. Wholesale Prices, in solid walnut, mahogany, or oak cases, from 20 guineas. Pianofortes on hire from 10s. per Month.

It is more delicate than any of the imitations, has a finer flavour, and is more delicious.

The Cowqan has the natural golden stage, and not the chalk white produced by artificial process.

KEEN, ROBINSON, BELLVILLE, and CO., Garlick-hill, London.

STARCH MANUFACTURERS TO H.R.H. THE PRINCESS OF WALES.

GLENFIELD PATENT STARCH, awarded the Prize Medal, 1862.

BUST OF LORD CLYDE.

AT this moment, when our islands are mourning the loss of our most distinguished soldier, the memorial of which we present an Engraving, possesses a special interest, which is increased by the fact that it is the only bust for which the departed hero would ever give sittings to a sculptor. The work has been seen in London, having been exhibited at the Academy in 1862, when this Journal remarked that "the bust of Lord Clyde, by Mr. Ewing, of Glasgow, resembled some of the best Roman busts." The history of the work is interesting, as it illustrates the unwillingness of Colin Campbell to receive the homage which society sought to render him. Mr. Dalgleish, member for Glasgow, desired to present to his fellow-citizens a memorial of the great soldier who had been a Glasgow lad; but Lord Clyde at first decidedly refused to sit, and it was only on the renewed application of the intending donor and other distinguished Glasgow gentlemen, that his Lordship assented. Then he went to work with his old business spirit. "How many sittings do you require?" he asked of Mr. Ewing. Being told, he proceeded, "What time tomorrow can you begin?" "At eight in the morning, if that will suit your Lordship." "Right! Come, that's better than some of the fashionable fellows, who won't work till the middle of the day. At eight, then." Punctually at the hour appointed the soldier and the sculptor met, and the bust was begun. Lord Clyde then said, "Couldn't you make it serve in future?" "Certainly, my Lord." So, at seven in the morning, in his chambers in the Albany, Lord Clyde gave the sittings, while ninety-nine out of a hundred of his order were asleep. He never sat for another sculptor, and this memorial is therefore doubly precious. But, independently of its accidental value, its intrinsic merit is very high indeed, and Mr. Ewing, while executing a likeness that satisfies those who were the most intimate friends of the hero, has done himself honour by his masterly treatment of the subject, and by a breadth and nobleness to which the admirable finish of the work is ancillary, without seeking to demand separate attention—another form of the same praise which we bestowed on first seeing the bust, and which we repeat on careful re-examination. Glasgow is at this moment honourably eager to erect a statue to the great soldier who adds another to the brilliant list of her remarkable men; and Mr. Ewing's close acquaintance with the appearance of Lord Clyde seems—the sculptor's genius, of course, also being taken into consideration—to indicate this gentleman as the artist most likely to show that Scotland can not only produce great men, but do them fitting honour.

BUST OF THE LATE LORD CLYDE, BY EWING, OF GLASGOW.

THE BRISTOL AND SOUTH WALES UNION RAILWAY.

THIS line of railway, which was opened on the 25th ult., forms an important link in the railway system of this country, providing as it does the means of rapid communication between the south of England and all parts of the principality. It unites Bristol with South Wales, and connects the railways on the English side of the Bristol Channel with those on the Welsh side, and the English with the Bristol Channels. The previous means of regular communication between the west, south-west, and south-east of England and South Wales were extremely circuitous, and the want of this railway was severely felt. The distance from Bristol to Newport by railway viâ Gloucester was eighty-two miles, and to Cardiff ninety-four miles. By the junction line these distances have been reduced to twenty-six and thirty-eight miles respectively; being a saving in each case of fifty-six miles. The distance from Newport to Southampton by the old route by railway was 169 miles, and from Cardiff to Southampton 181 miles. By the present line and the Wilts, Somerset, and Weymouth these distances are reduced to 99 and 111 miles respectively, being a saving in each case of seventy miles.

This junction line, which is constructed on the broad-gauge principle, leaves the main line of the Great Western at Temple Meads, near where the Midland Railway branches off, goes to the New Passage, thence by steam ferry across the Severn, and on to Portakewett on the South Wales Railway. It is nearly fourteen miles in length.

The piers at the Severn, undoubtedly the most interesting works on the line, are formed of creosoted timber, and the construction of both piers is the same, with the exception of the foundations, which, on the New Passage side, consist of piles driven firmly into the ground till they reach the rock below, which exists at a depth of from 6ft. to 20ft. The superstructure is carried on upright timbers, braced together in couples, and standing in rows of five couples. There are upwards of seventy rows, which are 22ft. apart, and connected at the top by longitudinal balks corresponding with the uprights, on which 3-inch planking is laid transversely, and which carries the permanent way. The pier is erected to a height of 50ft. above low-water mark. As at present arranged, the passengers will proceed in the carriages to the pier-head, where they will alight, and proceed down stairs, where they will embark on board the steamer. On the opposite side, at Portakewett, where the water deepens more rapidly, the pier is only required to be about half the length. Here some difficulty was found with regard to the foundations, on account of the rocky nature of the shore, which was eventually overcome by building masonry foundations, and fixing the piles on them by means of cast-iron shoes.

OPENING OF THE BRISTOL AND SOUTH WALES UNION RAILWAY AND FERRY: NEW PASSAGE HOTEL AND PIER.

THE CONGRESS OF FRANKFORT.

(From our Special Correspondent.)

THE Congress of German Sovereigns has been somewhat hastily judged by nearly all the organs of public opinion in Europe. The spectacle of some thirty crowned heads, possessing vast political power, yet irresponsible for their acts, deliberating on questions ordinarily left to Ministers and diplomatists, was so new to the world that it bewildered, to some extent, the eyes of spectators, leading them to form incorrect or unwarrantable conclusions. Calmly considered, the congress has fulfilled its object: it has not done so much as some expected, it has gone far beyond what others feared; but, on the whole, it has accomplished a notable purpose. The whole of the Sovereigns of the German Confederation—not excepting the ruler of Prussia, who, in principle, has withdrawn to the object of the meeting, although he did not join it personally—have solemnly declared before the world that Germany requires a greater amount of liberty, and a liberty that the present federal pact is altogether inadequate to the wants of the nation; and that a central power is absolutely necessary to secure the independence of the country, in danger alike through Gallic thirst of conquest on the one side, and Muscovite despotism on the other. If the Congress has done nothing else, it has roused the people of Germany to a strong feeling of these wants, and an equally strong desire to find the necessary remedies. The Governments, of course, will listen, says an old Italian proverb.

The meetings of the Congress, during the first week, were kept strictly secret, and very little authentic information of the proceedings got to the public. Subsequently, however, the secret was broken through to a great extent, and a host of semi-official reports of the subject of the deliberations was allowed to get into some favoured journals, and through them, into the mass of German and foreign newspapers. From the beginning, the Emperor, the soul of the Congress, was in favour of publicity; but his views on the matter were not shared by his brother Sovereigns, who insisted on a veil being put on deliberations. However, it was arranged that one stranger should be admitted to the meetings to act as secretary and reporter of the proceedings, and an Austrian privy-councillor, Herr von Biegeleben, was appointed to this important post. He, with the probable consent of the Emperor, furnished abstracts of the sittings to Dr. Alexander Schmidt, a gentleman representing the semi-official press of Austria, including such journals as the *Europe*, of Frankfort, and the *Austrian Observer*, which thus became the organs of intercommunication between the Congress and the public. On the other hand, more direct reports of the doings of the Congress, as well as of the inner aspect of their meetings, flowed by stealth into a few German papers possessing high and illustrious correspondents, such as the *Schweizer Zeitung*, believed to be "inspired" by Duke Ernest of Saxe-Coburg, brother of our late Prince Consort. One of the most interesting and the most striking sketch of the look of the Royal Conferences held in the great saloon of the Palace of the Diet, the former residence of the Prince of Turn-und-Taxis.

The Princes—including the representatives of the four free cities of the Confederation—were seated, in their sovereign capacity, at a large oval table, at the head of which presided the Emperor of Austria. In front of every Sovereign was a large portfolio, open and blank, in which, from time to time, notes were made; while the inquiring chairman had, in addition, a silver hand-bell for the purpose of enjoining silence, or calling attention to matters under discussion. The secretary, Herr von Biegeleben, having taken his place at a side-table, the meeting was, in due time, opened with a short speech of the Emperor, recapitulating past resolutions and proposing fresh matter for discussion.

During the first few meetings, it is said, the Sovereigns were rather shy, and unwilling to express their opinions; but by-and-by they acquired the habit of speaking more freely, and of discussing them in a contrary direction. Not one of the Princes, however, appeared inclined to deliver long speeches or anything approaching to a studied oration. Short remarks on the subject matter under discussion constituted the staple of the debates, enlivened now and then by some rather unparliamentary interruption like the memorable "Ich verstehe nicht, sie da blind! King of Hanover, the Elector of Hesse-Cassel, and the Grand Duke of Mecklenburg-Schwerin. The four Burgomasters of the free cities, apparently cowed by the presence of so many crowned heads—all in sopbocks and Field-Marshals' uniforms, and belong with princely titles—spoke only occasionally and very briefly; and, when they whowere looked at by one of the princely speakers, nodded silent approbation. Such was the picture of the Parliament of Sovereigns at Frankfort.

That these new and singular members of Parliament did not achieve much in the way of regular legislation was to be expected, as indeed, turned out to be the case. The Act of Reform submitted by the Emperor of Austria was never discussed paragraph by paragraph as a whole, but commented upon bit by bit, particularly in those paragraphs which involved the personal position of the Princes themselves. Thus, in the Reform project, it was proposed that the Directory should consist of five members—namely, the Sovereigns of Austria, Prussia, and Bavaria, and two Princes elected by the remaining States. This, the third paragraph of the Reform project gave rise to endless discussion, in which personal vanity got the upper hand over political wisdom, with the result of throwing the whole matter into utter confusion. At first, it was "settled" that there should be seven members in the Directory instead of five; it was next again "settled" that the number of members should be five, with complete arrangements to prevent the mischief of the even number; and it was then again, and finally, settled to keep the whole matter in suspense, and leave the decision to the further consideration of a second meeting of ministers plenipotentiary. A question quite as important, if not more so—the formation of the Second Chamber—decided off-hand after a few minutes' talk, was voted that there should be a Parliament of the German nation, to consist of three hundred members, elected by the Diets of the various States. In proportion of seventy-five Germans living in the same number from Prussia, twenty-seven from Bavaria, and the rest from the remaining States. An amendment of the Duke of Saxe-Coburg, that the deputies should be elected directly by the people, instead of by the Chambers, fell through, the Grand Duke of Mecklenburg-Schwerin having declared the proposition to be "too revolutionary." The Grand Duke's advocacy of election by Diets was curious, for as Mecklenburg-Schwerin possesses only one Diet, a little country, inhabited by an entirely agricultural population, is the only State of Germany which has still completely feudal institutions, including a Legislative Assembly composed of only landowners and noblesse. It is not much more than a score of years ago that serfdom was abolished in this strange mode of Reckenthum.

The actual resolutions of the Congress of Sovereigns, so far as known at present, amount to the determination to draw up a new constitution, of which the following are the chief points. There shall be for the future a Directory of six members, all of them reigning Princes or their delegates, to whom is given the executive of the affairs of the Confederation, including the power to make treaties with other States, to declare war, and to conclude peace. The duties of this Directory is to stand a Bundesrath, or council of the Confederation, composed of twenty-one members nominated by the various States in proportion to their contributions to the federal treasury. The Bundesrath is to form a sort of upper house of legislature, while the lower house will be represented by the Second Chamber, composed, as already stated, of three hundred deputies elected by the various States. This Parliament of the German nation is to meet every third year, in the month of May, at Frankfort; but it may be called together at any time in extraordinary session at the summons of the Directory. Power is given to the Assembly to make and alter any laws concerning the whole of Germany, and even to change the fundamental charter of the Confederation; but to do the latter a majority of at least four-fifths of the members is required. The meeting of Parliament is to be followed, wherever possible, by an assembly of all the Sovereigns of the Confederation, to deliberate on the resolutions and votes of the former, and, if necessary, to carry them into effect. As supreme court of appeal, and arbiter in all cases of dispute between Princes and subjects, there is to be, finally, a Bundesgericht, or Confederate Court of Justice, composed of fifteen Judges, nominated for life, irrevocable and irremovable, and paid out of the national treasury. Thus is to be carried out the new charter of the nation, having for object "the protection of the peace and security of Germany towards foreign countries, the upholding of peace and liberty in home affairs, and the progress of the people in wellbeing and happiness."

BANQUET GIVEN TO THE SOVEREIGNS BY THE SENATE OF FRANKFORT IN THE GREAT HALL OF THE RÖMER.

The whole history of Germany, as an empire, centres in the quaint old edifice of Frankfort called the Römer. It was here that the Emperors, or Kaisers, were nominated by the seven electors of the "Holy Roman Empire;" it was here they were installed in their high dignity; and it was here they showed themselves first to the people, receiving that public approbation which was then thought the sole finishing the work of the electors. Particularly rich in historical associations is the grand old room of the Römer denominated the Kaisersaal, or Hall of the Emperors. The great feast which followed the election of every new Sovereign took place in this hall, and it was in commemoration of the last of these that the Senate resolved to offer a banquet to all the German Princes assembled in Congress at the same place.

The Kaisersaal is elaborately embellished with a number of old frescoes, of no great artistic value, representing events in German history. The pictures taken down to the left of the throne are of patriotic association, gathering round the name of Charlemagne, the first of the gifted dynasty who filled by a series of portraits of the fifty Kaisers of Germany, from Charlemagne, crowned in 768, to Francis II., grandsire of the present Emperor of Austria, who laid down his crown, at the bidding of Napoleon, in the year 1806. These full-length portraits, which completely fill the walls of the Kaisersaal, are painted by the first German artists of the day, after authentic drawings, medals, and statues. Underneath each figure are the mottoes—sahlspriche, or chosen proverbs, by which they are called in German—which the originals wrote, of these exceedingly quaint and curious. Pious Charlemagne commences with "Christus vincit, Christus regnat, Christus imperat" (Christ conquers, Christ reigns, Christ triumphs); while his successor, Ludwig, has for motto "Optimum regimen nullum sine amicis" (No good rule without friends). Charles the Stout, is described as "Os garnulum intricat omnia" (A chatterbox will betray everything); and his successor, Arnulf, the conqueror of the Normans, as "Ira furor brevis est" (Anger is but a fit), is the road to—a certain dark place). Some of the mottoes are rather startling, as that of Henry IV. of Kaiserslautern, "Ferrum ferrum thorium ego strepitum audivi" (I have heard the crackling of many fig-leaves); and "Hujus modi comparanie sunt opes, quæ simul cum ventis volant" (Such is the nature of riches, which fly away like a shipwrecked on the top), the latter the motto of Louis VII., surnamed the Bavarian. Over the door of entrance—immediately on the hall is the motto of Emperor Wenceslas—" Morosophi moriones pessimi" (Learned fools are the worst of fools).

The banquet was fixed for the hour of six o'clock on the evening of Monday, Aug. 17. At the foot of the staircase leading up to the Kaisersaal a guard of honour was drawn up, and in the ante-room—the various Princes were received by senators of the city, who had been sent to the railway station to meet the Sovereigns at the "Golden Bull." The door of this chamber, inside and out, was guarded by twelve halberdiers, in gorgeous array of scarlet and silver; while the ante-room itself was filled with servants in full dress, ranged on the staircase. The Emperor, on his arrival, was led straight into the Kaisersaal, followed, one by one, according to the list of precedence, Princes, taking seat at the head of a large table in the form of a horseshoe. To the right of his Imperial Majesty sat the King of Bavaria, who, as the first in rank, took the place of honour. Next further on, while to his left were the King of Saxony, the Crown Prince of Wurtemberg, and the Grand Duke of Baden. The other Princes sat in order of precedence, as interpreted by the honourable Burgomasters of Frankfort; the age of individuals being a guide in doubtful cases. The table was laid for about 150 guests, a smaller table was filled by the senators of the Republic, their black dresses forming a striking contrast to the gay uniforms of the Princes and their suites.

The dinner, served by liveried waiters in black evening dress, lasted for nearly three hours, the interval between the twenty-seven courses being filled up by the conversation of the Sovereigns and the music of a military band stationed in the square surrounding the Römerberg. Only two speeches were made in the course of the banquet, the first by the Burgomaster Fellner, in proposing the health of the Emperor of Austria, and the second by Dr. Müller, to the assembled Sovereigns, and a reply of the Emperor. There was not much that was notable in either of these orations, except the allusion made by Dr. Müller to the fact that the Princes of Germany were united by a hearty love to the united fatherland—*eine Herzliche Liebe zum gemeinsamen Vaterland*. The words, in their actual truth, or merely a postprandial sentiment, must be shown by the ultimate result of the congress in its benefits to the German nation.

FIREWORKS IN HONOUR OF THE SOVEREIGNS.

The banquet ended, all the Princes, preceded by the Senators, went in procession to the bridge over the river Main, to witness the fireworks on the opposite side of the river. They were prepared by the Senate at an expense of 10,000 florins, and had for their centre piece a magnificent sight, although bearing somewhat of the character of the impromptu. The exquisite situation, no doubt, contributed greatly to the effect of the display. The Sovereigns looked down on the yellow waves of the River Maine, as in a broad and cloudless mirror. The opposite bank, with its high and precipitous rocks, covered by numerous rockets and Bengalic flames in a most fantastic and highly picturesque manner. The end of the exhibition was formed by the modern, but highly effective, south-western emblem of the colossal figure of Germania, with the sword in the right, and the black, red, and gold banner in the left hand. Immediately on the appearance of this spectacle, which so excited the people that till after midnight groups promenaded the streets, singing patriotic songs.

The town of Pampeluna, say the Madrid journals, was a few days back the scene of a fearful incident. A lion, belonging to a travelling menagerie, escaped from its cage, and spread terror and consternation in everyone that it met. Three persons were killed by the terrible animal, and it made a dozen others seriously ill. The number would have been much considerable if the lion had not perceived a butcher's shop, into which he entered, and began to devour the contents. The butcher's cheers proved the presence of mind to close his shop, and the owner of the lion, being informed of the circumstance, hastened to the spot, and with a single blow of a hatchet put it to the shop door. The lion rushed out as soon as the door was opened, and was caught in the cage.

INTERNATIONAL SOCIAL SCIENCE ASSOCIATION.—During the week which begins on Monday, the 14th inst., the Brussels International Association for the Progress of Social Sciences will hold its first meeting, under the presidency of M. le Prince de Ligne, Speaker in the Belgian Senate; M. Verdeil, Minister of the Interior; and Representative M. Ch. Faider, Regier, Minister of Foreign Affairs. There is to be a competition for a prize of 1,000 francs, to be awarded to the author of the best memoir on the best which literary men should be guided, either, we presume, in making references, reading books, or writing them. The Association, which is composed of 150 members, but none from Great Britain, which we regret, as we should almost in each crying out for a reform, has already received the adhesion of persons of morality in fiction. By the arrangements made to render the gathering successful, the members of the Brussels Association, who number 300 in membership, may reach Ghent and return to London at half fare, travel through Belgium and Germany at reduced prices, and return to Brussels from the 10th to the 20th inst., except only by the line of Landen and Maestricht; they will be lodged at the Hôtel de Flandre, and dine at the same hotel; and they will receive, as a final and crowning blessing, a copy of the "Transactions of the Congress," which will be published by Jamar.—*Social Science Review.*

THE WORKS OF THE NILE.—The *Times* correspondent, writing from Alexandria, Aug. 19, states that the Nile is rising as rapidly as to give great anxiety to the inhabitants of Egypt. It is already 24 feet above the season, and it has yet forty-five days to rise. The Government has dispatched to all the provinces large bodies of timber and workmen, to repair the dams on the gaps in case the dykes give way, and men are employed in raising the banks along the river. Should such a catastrophe, as took occur as it 1861, when the Nile burst its banks and inundated Lower Egypt, the cotton crop would run the greatest risk, and a large portion would certainly be destroyed. This would be a fearful calamity following on the cattle disease, which has already told proportionally against the cotton. In many districts there are no animals left to turn the water-wheels, and the plants have been destroyed from want of water. Until the Government has made its returns, the third picking will be late, and will run some risk from cold and rain. The produce of the last year's crop, which was 1,800,000 cantars, estimated at 100 lbs. upon a low average, ought each to yield 200 lb. of ginned cotton, or a total of 360,000 tons. The deficiency in the present crop is chiefly from the backwardness of the crops one fourth of the ordinary yield will be lost.

CURRENT LITERATURE.

The Politics of Christianity. By Edward Miall. (1 vol. Arthur Miall.) Mr. Miall has for some years conducted the *Nonconformist*, and this is a collection of papers published in the journal during 1847-8. The son of Mr. Miall's teaching appears to be that government should be founded upon Christianity. This is described as such no one in possession of average Christian principles can possibly dissent; but, as Christ alone knows who is really a Christian and who acts from really Christian motives, it seems impossible as by down any general rules whereby Governments may be regulated. For, notoriously, the thousand sects into which the Christian Church is divided is unhappily divided have each their own peculiar notions upon points of Christianity? What is all in all to one is anathematizable to another; and how, then, is the Government, which is to have its policy based upon Christianity, to proceed so as to satisfy every prejudice of every sect? It is true that the kingdom of Christ is within us; and is not, therefore, the only hope of a corporate Government, whose actions are to be in accordance with the politics of Christ, ever to be found in the existence of a Christian spirit in the individuals who form the governing body? And this happy consummation must be gradually—very gradually—brought about. What mortal, again, shall pretend to judge his brother? What mortal shall dare to say that his fellow is not a Christian, because he has not the exact Christianity to legislate or administrate agreeably to the politics of Christians? The fact is, Mr. Miall wishes to commence at the end; for surely, when human nature is so purified that not only private families but the whole social community is swayed by the gentle precepts of the New Testament, the result will be of the great benefit to have been attained, and the kingdom of this world will pass away. This is what we are working up to, but what we can expect to begin from. In his arguments Mr. Miall is very fond of analogy. Now, it is a common saying that "analogies never go on all fours"—that is, that they do not correspond in every point. Mr. Miall is not very happy in the analogy which he brings to bear upon the subject of compulsory maintenance of religion. "I suppose the case of a father of a family," who, by pugilistic skill, can "compel all creatures to his will," who has formed a friendship with a family of equal strength of his pursuits, and who reasons thus:—"The minister is a man, and I cannot doubt that the supply of his wants would be a thing in accordance with the Divine will. I propose, therefore, to lay the case before my neighbours do it." And, because common sense at once answers that such an answer would be knocked down, he draws, by analogy, the conclusion that State provision for the clergy is equally unjustifiable. We do not wish to decide the question; we only say the analogy is defective, for the reason that it assumes the point in dispute, whereas to the State it is delegated, and from the State, if the people think fit, it can be withdrawn. This is, however, a serious point, some elegance, and some eloquence.

The Romance of the Forest among the Flays of the Colonies. By V. M. S. (1 vol. James Nisbet and Co.) Under the above rather fantastic title the public have the opportunity of reading "a narrative of Christian effort in the Australian Colonies." A clergyman's daughter, at the time of the International Exhibition, was moved with a yearning for the spiritual welfare of the inhabitants of New South Wales, having enlisted in her service "a man of faith and love," to do the hard work of personal wrestling with the sinners from the East and the West, and she herself undertook to herself to look after the letters in many languages to be given by the gentleman to exhibitors and young persons visiting the Exhibition building. The scheme was good, and we are loth to speak otherwise than in terms of the highest respect for any attempt to benefit erring man. Let authorities decide whether it be a wise thing for a young lady to take upon herself so superior in godliness to others as to press upon them unasked advice, to take it for granted that they are in a state of spiritual darkness, to question them so as to learn from their language whether or not they have "obtained redeeming mercy," and to set down as lost whoever cannot properly answer certain peculiar technical phrases. So far as it is sufficient to say that the writer of this book seems to have acted upon this principle, and to have assuredly no lack of faith in the souls of our brethren; and such of us as, holding no office or ministry in the Church, merely act in a manner commissioned to undertake that work, have, nevertheless, a completely settled conviction of our own souls as to have time and to feel worthiness for it, are very much to be pitied for the want of discrimination in the critical accounts of the success he had in letters to the lady. It is gratifying to learn that his Hebrew and Greek letters were thankfully accepted; and, from an expression in one of the letters—"I have had a blessed day here"—one is justified in concluding that the success was not small. We regret, for our own part, that the writer does not regret that the language of the book should savour of what is (for want of a better term) called "Exhibition English," and we confess a feeling closely akin to commiseration for the Roman Catholic priest, who, having visited the Exhibition with a view towards artistic and scientific productions, "returned to Australia, and called out a hymn in the carriage department, and into an argument about "the second article of the Creed" in the Fine Arts." Every one knows that a hymn had "tears in his eyes" during a harangue from the letter-writer, but the cause for his tearfulness is not assigned.

Shakspere-Characters. By Mrs. Jameson. Parker Clarke. (1 vol. Smith, Elder, and Co.) In a handsome, sober-sided, substantial volume, Mr. Clarke offers to libraries a collection of lectures formerly delivered. The characters here discussed are principally the "pubescents" as to whom we have had to speak upon his account with admiration for the bard, and so evident a love for his own labours, that, were his acumen and judgment less than they are, he would still be entitled to the gratitude of every one of his readers. Every one of Avon is sweet music to Mr. Clarke; and one of the chief objects of his present essay is to show that the Shakspere-characters are such as the poet has delineated his characters throughout." We feel confident there are many to whom the book will be welcome as a guide, not only in Shakspere and his creations, but in life itself. Many a work for themselves mines unexplored by Mr. Clarke in the vast region of Shakspere will be found by the present.

A Mining Journey Across the Great Andes. By Major F. Ignacio Rickard. (1 vol. Smith, Elder, and Co.) Silver and gold, coined, uncoined, and hidden in the bowels of the earth, will be the texts to interest mankind until they have become considerably more dependated in value than they are at present. Major Rickard (or better perhaps nay, proves) gold to have already become. There is, consequently, little fear but that many banks will be outstretched to seize the book which Major Rickard has prepared for general information about the mines of San Juan. It is not, however, until we arrive at about the middle of the second volume of these handsome Christmas pages, that we get upon that interesting ground, the greater part of the book being taken up with a diary of a journey from Valparaiso to San Juan. Major Rickard's claim to be considered an authority upon the subject of which he writes may be found in the following statement:—He was sent in 1852 appointed by the Government of the Argentine Republic Inspector-General of Mines. Two maps add to the value of this little work.

A French naval steamer that ran between Oran and Marseilles went astern, and, though the crew and passengers were saved, the mails and the specie were lost in the sea.

The *Malta Times* describes as follows the re-establishment of communication between Malta and Alexandria. The saw was discovered at a distance of sixty miles from the Alexandria coast. The end of the telegraph cable had been ripped on to the deep-sea cable when the line was laid, owing to the rocky nature of the bottom of the sea. The first time the line was cut out, the final splice was made on the morning of the 18th ult., and at 3.30 p.m. the communication was established, and Alexandria was restored. As we have already announced, the line throughout between Malta and Alexandria is now reopened to the public.

The Russian fleet in the Baltic consists at present, according to an official paper published at Cronstadt, of the following ships:—The Nicolas I., screw-ship of the line, 111 guns; Pangoul, screw-ship of the line, 87 guns; Perseveral, screw-frigate, 51 guns; Dimitri Donskoi, screw-frigate, 81 guns; Alexander Newsky, screw-frigate, 81 guns; Wyaz, screw-corvette, 17 guns; Witez, screw-corvette, 17 guns; Olof, Swedish, paddle-steam-frigate. And the following ships just returned from China:—The corvette Kamchatka and the frigate Majestchi. Besides these, there are as a large number of smaller screw and paddle-steamers, to which must further be added the Russian Admiral and the Perveretz, which have since then arrived from England.

FINE ARTS.

THE "LONDON" AND OTHER ART-UNIONS.

THE exhibition at the Gallery of British Artists, Suffolk-street, of the pictures chosen by the prizeholders of the present year in the Art-Union of London suggests a fitting opportunity for saying a few words on the proceedings of this society. Besides this, there are many thousands directly interested in one or other of the many art-unions, and the patronage and influence of these associations are so considerable, that an examination of their claims is fairly due to the public.

It may be thought by many visitors to the exhibition in Suffolk-street that the collection affords a creditable average taste of art-patrons. If such a belief should be entertained by artists (and we fear it is by many), is however, greatly to be deprecated, and a little reflection will prove that the fact is not conclusive. For, in the first place, it is more than probable that only a small proportion of the richer and better class of connoisseurs and patrons are subscribers to art-unions, and for which, for instance, that of the Fine Arts Association, with its large premium list, affords ample place, the allotment of prizes being quite accidental, the selections will naturally only represent the average taste of such persons as may afford the guinea subscription. Again, it may be not unfairly assumed that the motive for many a subscription is quite as much speculative as for a £500 prize. And these patronise art. For this reason we feel bound to place the ordinary subscribers to art-unions in the lower grade of patrons of art.

And this consideration compels us to make a proportionate abatement in the appreciation of some promoters of this and similar schemes already indicated, they induce many artists to "paint down" to a low standard of taste. On the other hand, it must be said that a gratuitous and occasionally the winner of a prize not only acquires a work that will serve to increase both his knowledge of art and love of nature, but will, at once put him, perhaps for the first time, above the atoment, to a rising and genuine artist, that may be necessary to keep him on the path to nobler effort and greater success.

In the report for the present year of the London Art-Union occurs a singular passage, in which the hope is expressed that the Prince of Wales, following in the footsteps of the late Prince Consort, may be led "to give his aid in promoting the fine arts in this country." *the elevating influence, they, "of common things and the more common increase of home joys,"* is, however, undoubtedly the foundation of art, and it seems to us the only legitimate purpose, at least, of such societies. We deny that art-unions in this country have contributed, except possibly in some very rare instances, to elevate taste. It must be acknowledged that they have tended to diffuse a great deal of art, though nearly always of mediocre and inferior quality, and have contributed somewhat to encourage artists. On the whole, therefore, it may concluded, in a spirit of not unreasonable optimism, that although the influence of art-unions on the taste of the patronising artists through these popular lotteries is adopted in France and Germany upon a larger scale than with us, and that other Continental art-unions, which are in some instances in the hands of the Government, are very successful. But, then, it must be remembered that this is often helped on for instance, in the case of the Dusseldorf Art-Union, which procured the great line-engraving after "La Disputa," by Raphael, upon the walls of the Vatican, by some twelve years.

Returning to the exhibition of the London Art-Union (and bearing in mind what has been already said), we are glad to observe a decided improvement in the choice of the prizeholders. The popular taste manifested in the selection of the number of prizes for engravings there are fewer than usual of the vulgar, the childishly trivial, and conventionally pathetic which have been so prevalent of late years. Little exception can be taken to Mr. Barwell's "Reconciliation," which is one of the principal picture prizes. As, however—if proving nothing unfair—a curious instance of the fallibility, occasionally, of art-critics, it may be mentioned that the second chief picture prize was originally by a "leading contemporary" as "somewhat weak, almost overtaxing to avoid." The "Labour's Sanctities," another prize by the same painter, is certainly in better taste. Mr. Cobbett's "Pear Gathering" is one of his best works; and the other good figure pictures by Miss Kate Swift, and Messrs. Poynter, W. H. Knight, and Jamerson. The latter artist has a fine picture in the Holme, R. Collinson, Gosling, S. R. Percy, Leader, and H. T. Boddington, and the best water colours are by W. J. Bennet, H. Warren, W. Callow, J. C. Reed, W. C. Smith, and C. Davidson. The first prize in the last distribution was the marble statue "The Dancing Girl," by Mr. W. C. Marshall, R.A., which was one of the competition in 1845, and for which £500 was paid. The council now offer £600 for a similar figure or group, and open it to all sculptors. It may well be doubted whether the lessening the chances by a single prize to so large an amount will be found proportionately attractive. Accordingly, the purchase of a prize of £500 or £600 leads to an inquiry into the patronage of the sculptor, which is by no much increased. Last year, £2,000 subscribed this year is distributed thus:—To management, £270; To Art-Union of London fund, £321 9s.; to subscribers for selection, £4125; and to one or other form of patronage, £4,284. Of pictures, busts, &c., and engraving, no less than £5702 19s. 2d. The distinction between the London and those conducted on the principle of that of Glasgow" art-union is therefore less than is generally supposed. The latter expends *the whole* of the money subscribed in the purchase of taste" purchasing the pictures as well as other objects, from which subscribers afterwards select. The London council expend *more than half* the money subscribed after expenses are deducted. The advantage of the "committee of taste" is that it (presumably) secures the production of, or judgment in art, of a superior order to that of general painting. Its disadvantages are that it opens a door to jobbery and favouritism, and prevents the entirely free use of individual judgment and taste, even in those that are perfectly trustworthy. Theoretically, the latter system, in regard to pictures, should be more decidedly beneficial to art, and possibly it has accomplished more good in the latter manner in which the patronage assumed by an art-union is exercised than, however, our opinion of it would be modified if the prizes elevate art be chiefly touched. Now, the direct patronage of the London Art-Union has only extended, in reference to pictures, to the copyright of those engraved; and it is worth consideration whether they have had little art-value, though their subjects have been well calculated to be popular. The engravings themselves have not always been satisfactory; and, even when both picture and engraving have been good, the number of impressions has been so large that a considerable proportion of the prints have of necessity been imperfect. A good deal of money has been frittered away upon objects, such as parian statuettes, which few will rank much above the ornaments of the decorator. If any person will glance at the list of publications and selected prizes of this society for the twenty-seven years of its existence, and for which the large sum of £301,887 1s. 6d. has been subscribed, he will see the truth of our general remarks. Upon examination, therefore, the pretensions of this and similar art-unions to elevate art, and the consequent right—which is actually assumed—to be teachers in the same, rest on a very shadowy foundation. We readily refer to define their true and what they do not.

The report of the Art-Union of London avers that "the art of the sculptor demands at the hands of the association all the aid that it can be given." With this proposition no one will disagree. We regret to find, however, that, by the adoption of the vicious principle of competition, the art which, above all others, is the noblest, will certainly be neutralised. The "Dancing Girl," by Mr. Marshall, which was the first and gold prize of 1845, would, in 1863, in all probability be an exceptional result. It should be generally known that Mr. Foley and several of the most eminent English sculptors will not enter into a competition at all. The evil of competition has been proved in cases where prizes were offered by this very society for sets of illustrations. Take, for instance, the premium of a commission direct to Mr. Noel Paton for twenty illustrations of Coleridge's "Ancient Mariner" (a subject of the highest order of imagination for the present year), and the result is the best work of the kind they have hitherto published. Competitions are always a temptation to men in the first professional position. The prize should be only twenty competitors for the £600 commission; each of these competitors will take his models from Sadler's Wells. The twentieth will gain a commission worth at the very utmost some £200 or £300 clear against three or four times the amount lost to the others. And there are a thousand other objections. Public exhibitions serve every purpose of competitions. Let all who would really help sculpture do so by ordering it, or better still, give a commission direct to some artist of assured ability and desert.

There is a difficulty about the site of Mr. Noble's statue of Sir James Outram. Mr. Cowper objects to it being placed in Trafalgar-square, and it is proposed to set it somewhere in Parliament-street, or to Scotland; or to the birthplace of the gallant soldier, in Derbyshire. We think that Mr. Noble's proposition with the Westminster equestrian statue of Sir James, which is to form a companion to the sculptor's admirable equestrian statue of Lord Hardinge at Calcutta. The modelling of the horse in Mr. Noble's statue of Sir James is remarkably spirited. We very much regret to hear that the project of the statue being a duplicate of Mr. Noble's statue for London has failed: the necessary funds were not forthcoming.

The subject of a monument to Lord Clyde seems likely to be taken up by the Scotch members, noblemen and gentlemen.

A pretty and ingenious application of photography is made in Mr. Serman's Photographic Jewellery, which is intended for the safe preservation of a souvenir of friends or relatives in a convenient form. They are small photographs, carefully executed, mounted under glass, the sides of a glass locket, or casket or case of any size, from that of a chatelaine ornament to three or four inches in height, the effect of the picture being that it appears suspended in the middle of the frame, a best portrait is seen in apparent relief, having a perfect stereoscopic effect.

Messrs. Bisson Frères are adding to their well-known large Swiss photographs some magnificent views in Rome, Venice, Florence, Pisa, and Amalfi. Among the finest of these we may name "The Arch of St. Mark, Venice;" "The Entrance of St. Mark's;" "The Gate of the Arsenal, Venice;" "The Bridge of Sighs;" "Interior Duomo, Pisa;" "The Cathedral of Milan;" "The Arc des Orfèvres;" "The Basilica of Constantine;" and a full view of "St. Peter's, Rome."

THE FARM.

A SHORT tour to the north of Scotland has pleasantly occupied us since our last. The rain was a sad drawback during our visit to the Shetlands. We were there in the middle of July, and had hoped to have returned to a Southron, after such a wet July, seemed sadly remote. The sheep were a most varied and curious little race, the wool of the Shetland sheep is famous for its fineness, and is in great demand. Theses "heavy treasures" (for who has not heard of Shetland hosiery?) are safely brought to us by the Leith steamer, which runs to Lerwick two seasons ago, and has never been caught yet. A dog once led this roving life in Cumberland, and would eat nothing but the fat bacon and the lean. Whether the Shetland ponies possess this or very caustic judgment upon Shetland mutton, as he never touches it, has not been ascertained. Certainly it is not the sheep for a relish. If my M.P.H., English, Scotch, or Irish, will see sail with Captain Parrick, of the Shetland Company's fine steam-packet, on any Friday, accompanied by ten couple of hounds and a couple of terriers, the Shetlanders will no doubt treat him like a Prince, put him over ponies, and ride with him to the meets, and to the kill, and brush and whips, and not only give him the burgess ticket, but illuminate the town in his honour if he kills. A nobler object of a crusade could hardly be imagined.

"But to our muttons." Some Scottish farmers have gone over the sea and imported the Shetland sheep, to cross the Cheviots and Cheviots as well. Shorthorns have also made their way to the island by Messrs. Cruickshank, Duthie, and Stephen. At the last fair the native cattle are exported each year, and from 400 to 500 ponies, principally for the Newcastle coalpits, although it is said that they will soon be superseded by the Shetland horse. The latter is also principally used in this way. Shetlanders are rather careless about the style of their steeds; but they are remarkably strong and hardy, and will, in August, when we saw them, they were full of condition. Their power of carrying weight is quite equal to that of the Shetland pony of the season, one of whom we met coaling the hills with 56 lb. of hosiery on her back, and making nothing of it; and it is said they can carry 20 lb. for each 100 lb. weight of their own body. Owing to the lack of grass, the cows were very cheap, and one cutter's wife bought a couple of cows and a calf for £5, and sold the calf and lead in the eighteen miles which we had to walk back from the interior to the steamer. It was tethered among the oxen by the Voe, and was brought, with 50 carcase from the Voe, and the strange emotions it would have raised in the breast of a Booth or an Eastwood, and others of the Bates family, assembled at the Voe, would have led well enough; but our pocket-money was limited, and the speculation too tremendous. One fellow-passenger could not resist a cock and three hens at 6d. each, and consoled himself with a humour with his bargain on finding that a friend had bought two couple of young cockerels for 1s. 6d. Mr. Duthie, at the last fair, bought ponies for the plough-team at £7 10s., and oxen at 7s. 6d., any one with £60 or £70 might have stocked a fair eight-acre farm; and returned with his happy family of illputians on the steamer in triumph.

The Channel Fleet did not visit the Shetlands. It is said that even its quiet people were rather hard on them when they did come, and wanted to sell them their own fish at a high price, instead of 6d. and so on; but that may be an invention of the Orkneyites. If the Shetlands are gradually improving (and people are not half above yet to see the beauties of the islands), the Orkneys, fish, and beef purposes and crossing with the shorthorn) the Orkneys are improving still more. We were the guests of Mr. Traill Burroughs, the landlord-proprietor, Mr. Balfour, of Balfour and Trenabie, is quite a model landlord of the old style, with cattle-sheds, and farm, and farmer artillery troop. In the Orkneys, generally, the crops are very faircasts best—but rather behindhand, owing to the drought in June and July and August. Sea-weed and bone-dust are found to be extremely cheap. We bought a five-year-old mare of nearly fifteen hands, which cannot be sent to market as she is not quite handsome enough; for £10 and fresh shoes all round for a luck penny; and a friend got an excellent Clydesdale mare, which had worked four or five seasons, for £20. Mr. Traill Burroughs has a fine stock of cattle, and 6000 are exported each year for Aberdeen, Banffshire, Edinburgh, Morayshire, &c. When the Channel Fleet was there last year the island furnished 6000 lb. of meat per diem and supplies for ten days more "without deranging the export by a single horn." The same cannot be said of the shooting forays of the officers of the Channel Fleet during their stay last month, as in the course of them they shot a cow on the knee or head (the accounts of the historians differ); and the old woman, who does not understand that it is "a necessary to prove which of the ships' companies" did it, thinks of walking up to London bodily in her clogs, if she can get no other way, and sitting at the door of the Admiralty till she receives compensation from his Grace of Somerset or raises a public subscription. After their visit last year a bullock died, and proved, on dissection, to have shot lodged in the shoulder; but the reasonable view to take was to throw off 6d, and the Orcadians cordially winked at them when they had the victualling of the ships. The officers spread themselves like locusts over the islands in parties of 40 to 50, fifteen yards from end to other, and blazed away at everything—larks (five to one lark), sparrows, grouse, and starlings. They replied to proprietors that they had her Majesty's commission, and bid them "go to blazes." Not long since a Cabinet Minister fed swiftly from that spot on being threatened with a prosecution for trespass; but the Channel Fleet officers braved everything for sport. One grouse-shooter wisely understood when, from the statements of his flock, that their carefully led them from his own hired moor on to a neighbour's ground, which they soon found out, and, on the grandmother alone withstood them, when they landed forty strong from a tender, by vowing that if he only whistled he could raise 100 men, and so they departed. The remainder of the year was a wild one. The foxhounds the landowners' battle, and by his consistent firmness, successfully broken up the practice of hunting to common rights (some which did not belong to them) never came off after all. The bluejackets advanced in a serried line; but just as they reached his inclemments the elements intervened, and a deluge came down in such torrents that not a gun would go off, and they made a masterly retreat to the ships without meeting the enemy. If, however, they only keep off the grouse and the cows, and victual the ships off the island, and only ask leave to shoot such birds, the Orcadians will be delighted to see them another year, and give them all the best they can. Till the halcyon period arrives they will continue to call them the "Hen and Chickens," simply because the latter name was one which suggested the risk his ships in the Westray Firth, and gave it up after the second attempt.

Thurso, which the fleet did not visit, grimly consoles itself for their absence by saying "the price of our potatoes and cabbages will not be raised."

The turnips in Caithness are not very remarkable, as it was too wet in the spring and too dry in the summer to suit them; but the crops of heavy rains will keep back a very promising harvest for at least a fortnight. Stook has been selling well, many of the top breeders getting rid of their young stock at a good all wisey bargain, as it is the best and not by the pail, at about £1 for each month's keep since their birth. Mackay's Hotel at Thurso was our last halt, and is where he is being used as a cross for the Galloway cattle as well as the country ones. The former cross is one to which the Baronet is especially devoted his mansion and with no small success. Sir George Dunbar, on the contrary, crosses the shorthorn bull with country cows and Galloway heifers. The calves of his cross were very soon become as big as their dams, and are thrifty good doers. Sir George has sold his cross to Caithness, and has purchased a first-prize shearling and a three shear for his own use, the latter of which would, if we mistake not, have held his own well if he had gone to Kelso.

At the Rochdale Show, Colonel Towneley has been remarkably successful with four entries, and secured the £5 and silver cup, for the best animal in the yard—i.e., Royal Butterfly, in his seventh year, but as straight and active as when he was a yearling. Several Royal winners were there, Mr. Rosette (stock), Mr. Rosette (bull), then stock shows again, such is a prize shorthorn's life nowadays). and The Hero (bull), Mr. Towneley's Colonel (bull), Mr. Thistle bull Hengist, and Mr. Charlesworth's General Murat, but all to no purpose. The magnificent gladiator Royal Duke, the Royal North Lancashire, at Lancaster, Royal Butterfly was first in the old class, Royal Butterfly 11th (second at Worcester) second; and Master of the Rolls, Colonel Towneley's, Sir Paul's Hengist, were both highly commended. It was a grand class, and Mr. Bolton's Royal Butterfly 11th (second at Worcester) was very good. The hero was first in the younger class of seventeen, and Mr. Atherton's white American bull Lord Oxford 2nd next; Mr. Blundell's Baron Hillsborough 3rd. The cows went in for the same prize, with different judges (Messrs. Unthank and Stevenson, of Fourstones), and their prizewinners at Rochdale were shown in the old and half class, where Mr. Richard Booth's Prince of Battersea was first, and Colonel Towneley's Royal Butterfly 11th second, or "as you were" at Stockton. The cows were all shown together in the open class, and, in fact, it was perhaps the choicest show of shorthorns that has been seen this season. Mr. Richard Booth's Duchess, bred by Mr. Ind, of Southwicke (2nd), the H.C.s being Soldier's Bride (which never had any right to be in the Duke of Buckingham) and Colonel Towneley's Butterfly. Rosedale, Royal Butterfly's Duchess, and Second Queen of May was the two-year-old heifer order of merit; and Colonel Towneley had the first prize with the Royal Butterfly 11th calf; Castanera and two more from the Towneley herd close up, with H.C.s. The Colonel was also first with Royal Butterfly 11th, and it was "Hats off! for the Queen of the Ocean. Joe's Blondin wears no willow when that red and white glory of Wrialsby and Royal Butterfly were declared to be male and female champions of the yard. John Ward and Rosedale were fairly collared and beaten at last.

Colonel Towneley's Royal Butterfly won first prize for the junior shearling gimmers at five places in the North, and second and extra prizes as well, has just sold five of them, along with six shearling rams, to Mr. Fisher, of Adelaide, in Australia. The Cotswold sales have gone off with great spirit this year, and there were many fresh commissioners from all parts. "Let us have anything," as Hill said to a buyer not unlike by a Yale man." There is no ring, and the hill-men prefer to cluster round the rams and the auctioneer, so that a stranger may be very "pooly," or send a flying bid. The average for the great seven-day sales will range from 8 gns. to 17 gns., Mr. W. Hewer, the veteran auctioneer, having been with first prize at 17 gns. His promptitude in taking up Mr. Beale Brown's Chester challenge to show 100 rams for 100 sheep, and his offer to forfeit if he was not lost on the sheep world in general and the Cotswold in particular.

The treaty for the suppression of the Scheldt dues was published in the Paris papers of yesterday week.

A letter from Paris states that M. Nadar's newly-invented aerial machine has been successfully experimented with, and has at last finished. Its dimensions are so enormous that it will have accommodation, it is declared, for more than a hundred passengers. Its first aerial journey is to be from Paris to Berlin, and will occupy the "Grand Monarque."

The usual monthly returns of the Bank of England have been published in the Paris papers of yesterday week.

A letter from Paris states that M. Nadar's newly-invented aerial machine has been successfully experimented with, and has at last finished. Its dimensions are so enormous that it will have accommodation, it is declared, for more than a hundred passengers. Its first aerial journey is to be from Paris to Berlin, and will occupy the "Grand Monarque."

The usual monthly returns of the Bank of England have been published in the Paris papers of yesterday week.

A considerable increase of our trade is apparent from these returns. With respect to our exports, compared with the month of July in the last three years, they stand then:—July, 1861, £10,94,260; 1862, £12,21,801; 1863, £13,648,849; and comparing the first seven months of the year, the exports for the same period as follow:—£70,237,685, £69,446,480, and £71,661,071. If the exports of the remaining five months of the year maintain the same proportion, the exports of 1863 will exceed those of 1860, which were the largest recorded.

The Gowran Castle steamship, Captain Norman Macleod, of 1000 tons, belonging to Messrs. T. and W. Smith, London, sailed from Plymouth on the 20th ult. for Brisbane, Moreton Bay, having 220 Government emigrants, under the care of Dr. Dunbar Kitching, R.N., surgeon superintendent. The ship Tartar, 850 tons, belonging to Messrs. T. Feigate and Co., London, sailed from Gravesend, on a voyage to Moreton Bay, for Brisbane, on Wednesday week, on board thirty-one married people, fifteen single men, fifty single women, and fifty-three children under twelve years of age, in all 114 souls, under the care of G. Pocklington, Esq., surgeon superintendent. The single women were domestic servants, selected chiefly from the farming districts.

Another adventurous traveller (says the *Saint Public of Lyons*) has just left us for the interior of Africa. M. Jules Remonnay, who had been for two years past in Rhiogna, has recently died there, in an obscure village, in consequence of the wounds received from the Berg, his fellow-traveller. Dr. Stendner had just completed his researches in the countries extending from the 8th to the 12th degree of latitude in Rhiogna, and was about to start on another exploring expedition, when he was taken ill. The Baron, Dr. Stendner's friend, who had shared in his previous explorations, accompanied by three European ladies and a troop of 120 negroes. Nothing has been heard of them since the 13th of May.

The *Moniteur de la Haute Loire* mentions a curious instance of the effect produced by the electric fluid. It says:—"A man named Eingles, residing at Genestelon, in this department, was returning home from a neighbouring village two days back, when he was killed by lightning. With the exception of his jacket-sleeves and the metal which he wore, he was completely stripped by the electric fluid. His clothes were found lying about, some as much as 30 ft. from the spot, and all in shreds. The soles were the only part of his boots that remained near him, and they were divided into two parts, one on the face of the other. The unfortunate man had completely shaved on one side, and one ear nearly torn off."

ST. PAUL'S CHURCH, MAHÉ, SEYCHELLES.

THIS church, consecrated in 1859, is built of coral, in the town of Victoria, Island of Mahé, the largest of the Seychelles group. It forms a striking object viewed from the channel, in the midst of very beautiful scenery. There is a leading library, chiefly of French books, in the vestry; and after the violent hurricane and floods in October of last year the church was crowded with families who had fled for refuge, and for some time afterwards the lower and corners of the church were filled with bags of rice stored up for the supply of large numbers of the lower orders of the population whose houses and small plantations had been destroyed. The accompanying Engraving is from a photograph taken by Dr. Brooks, the Government medical officer in the islands.

The Seychelles are a group of islands in the Indian Ocean, a dependency of the British Government of Mauritius, between latitude 3 deg. 30 min. and 5 deg. 40 min. S., and longitude 55 deg. 20 min. and 56 deg. 30 min. E. They consist of thirty small islands, the four groups, one of which is formed of Mahé, with St. Anne, Cerf, and other smaller islands. They are all of granitic formation, and elevated on a coral bank. Mahé, the largest island, is sixteen miles long and four miles broad. Though mountainous, it is fertile. Its chief town is Port Victoria, on the east coast.

ST. PAUL'S CHURCH, VICTORIA, MAHÉ, ONE OF THE GROUP OF SEYCHELLES ISLANDS.

TESTIMONIAL TO SIR JOHN GRAY.

THE city of Dublin has for many years suffered all the inconveniences of having a supply of water insufficient in quantity, bad in quality, and defective in respect to distribution and pressure. This imperfect supply is taken from two canals, which are largely used for the ordinary purposes of trade between the city and the agricultural districts, including the transit of cattle inwards and of manure outwards. The water of these canals is of about 14 deg. of hardness, and is distributed from a head of seventy-eight feet above ordnance datum, the pressure from which is so defective that the water will not rise in any house more than two or three feet above the pavement of most of the principal streets of the city.

Such was the state of the water supply of Dublin when the present Corporation determined to procure a supply suited to the civilisation of the age. Dr. Gray—now Sir John Gray—having devoted much time to the study of sanitary subjects, was appointed chairman of the Corporation Committee. The most resolute opposition was encountered by this committee, which consisted of some of the ablest and first men in the city. The more wealthy owners of property objected to increased taxation, the canal companies desired to monopolise the supply, and their numerous and influential shareholders took an active part in stimulating the opposition. The chairman had naturally to take the lead in all the discussions and debates, some of which were prolonged for three consecutive days. Several years of vigorous efforts to combat this powerful opposition ended in the carriage, in 1861, of the Act for supplying the city with the waters of the Vartry, after an unexampled opposition before the Commons' Committee, which lasted four weeks. The *Dublin Gazette* of July 23 announces that, "in special recognition of the indefatigable zeal and high ability evinced throughout the whole progress" of this great sanitary reform, the Lord Lieutenant conferred the honour of knighthood on Sir John Gray, and the superb presentation, of which we give an Engraving to-day, is the testimony of the citizens of Dublin, including many who were amongst the most active opponents of the measure, to the disinterested motives which influenced, and to the ability with which he carried out, the great task set before him.

A FISHING EXCURSION IN NEW BRUNSWICK.

(From a Correspondent.)

IN accordance with a promise of long standing to introduce a friend to the beauties of the lakes in Charlotte County, New Brunswick, and the unrivalled trout-fishing to be found therein, we found ourselves in the month of July ascending the path which led to the Indian lodges, to engage the indispensable services of Sebatis. As we emerge from a little wood the Indian lodges open to view, and we are challenged by those ever-wary sentinels the Indian dogs, who partake in many ways of the peculiarities of their masters, resist all our attempts at becoming friends, and retire barking and snarling as we advance. Numerous little dusky figures of Indian children start up from behind bushes and stumps, whence, unseen themselves, they had watched our approach, and dogs and children in a mad scamper seek refuge in the lodges. Aroused by the tumult, the Indian men and women begin to show themselves at the doors, and we see the well-known form of Sebatis advance to welcome us. Our errand is stated, his services and canoe are engaged, and arrangements completed to start the next morning. The morning was cloudy, with a moderate breeze; after a few moments' consultation, in which Sebatis gave it as his opinion that we would have a rough time of it on the lake, as there was every prospect of the wind increasing, we determined to try it. So Sebatis, taking the canoe on his back, started off through the woods for the shores of Lake Utopia, giving us as much as we could do to keep up with him, although our loads of fishing rods, &c., were light in comparison to his, and he never paused for rest until, having completed the half mile between his lodge and the lake, he deposited the canoe on the beach, and when we came up had lit and was puffing away at that never-failing solace, his pipe. We were not long in making the discovery that what had only appeared in the shelter of the woods to be a slight breeze proved a brisk gale on the water. Sebatis launched the canoe, and, paddle in hand, stepped lightly in, as only an Indian can; and the next moment, impelled by his sturdy strokes, we were bounding merrily over the waves. The sky was darkening ominously, and the wind steadily increasing as we paddled along for four miles under the lee of the shore, until we reached Birch Point. Here we had to cross the lake, and there was no concealing the fact that we were fairly in for a wet time of it. If we had any doubts on the subject, they were instantly dispelled by the attitude of Sebatis, who, throwing his hat into the canoe, and brushing the long black hair from his face, seemed bracing all his nerves for the coming struggle. And now as we leave the shelter of the shore we get the full force of the gale, and our canoe goes dashing madly over the waves. Presently we feel our frail barque quiver under us, and with the water trickling down our backs, we realise the fact that we have shipped our first sea. As it is totally inadmissible to ship water in a canoe, on account of the difficulty of bailing, Sebatis now changes his tactics, and, instead of meeting the waves, gradually allows the canoe to wear off into the trough as they pass. Only the most consummate skill on his part could have effected this with safety, and I believe had any white man attempted the like exploit we should have been instantly swamped. It was now blowing a whole gale of wind, and the sky was black as midnight, except when the sun ever and anon broke through the clouds, revealing the rugged forms of the Red Rock Mountains. For an instant the sunlight and shadows play all hide and seek, and then all is gloom again. Sebatis's powers are evidently taxed to their utmost, and full well we know what one false stroke of his paddle would do; we are powerless to aid him; all the assistance we can give is to sit perfectly still, and this we require no bidding to do. As a wave larger than its predecessors approaches his eagle eye brightens, and a shade of anxiety passes over his otherwise imperturbable face. The wave passes, and with it his anxious look; and this impression of coolness and intrepidity paddles away, looking for another wave; Sebatis says it momentarily as if he meditated landing; but the surf, dashing high on the rocky shore, precludes any such idea, and he keeps steadily on his course.

TESTIMONIAL TO SIR JOHN GRAY.

Now the distant rumbling of thunder is heard, increasing in volume as it approaches, breaking into loud crashes overhead, reverberating amongst the hills and passing away in low mutterings. A few large drops, and then down comes the rain, a perfect deluge, and twinkling we are drenched to the skin. Flash upon flash of vivid lightning, majestic rolls of thunder, and we are in the very midst of a summer storm. A few more strokes of the paddle, and we reach the shore. But where to land? Where in all that boiling surf can we find a spot to beach our light canoe? Sebatis answers our thoughts, pointing the canoe for a bridge which appears in sight as we round the point, and in a few moments we shoot under it, emerge into the comparatively calm waters of Trout Brook, and safely land, verifying in our case the old adage that speaks of fishermen's luck, "A wet jacket and an empty stomach." The canoe is unpacked, and Sebatis proceeds to make a fire. He hits upon an old pine log; with a few blows of his axe he knocks off the wet bark, and procures a plentiful supply of tinder dry as tinder, and we are soon drying our soaking garments before a roaring fire, while Sebatis proceeds to prepare the lunch, of which we are in sorry need. In an hour or so the rain ceases, and the sun shines out bright and warm; and, as we must not lose time, we pack the canoe and continue our voyage up Trout Brook. Beautiful we glide along the placid stream, through the reeds and lilies, and under broad-spreading branches of the silver birch; in places they meet over head, and, entwining their branches lovingly, form green arches, under which we pass. Now and then, as we paddle through the long reeds, black ducks startled from their summer haunts rise with noisy quacking and seek safety in flight. As we watch them we think with pleasure of the time (September) when we, with trusty double-barrel and our good retriever, will lay the flappers, now all unconscious in their parent nest. With regret we leave the lovely brook, and shoot into the waters of Trout Lake. Having reached the opposite shore, we land on a sandbar, and put up our rods to try our luck with the speckled trout. We take up our position in the canoe opposite the inlet to the lake: Sebatis sinks a pole into the sand to hold on by, and to prevent the canoe from drifting. After a few casts a fish is struck and landed; and now the trout are breaking in all directions, and as fast as our flies touch the water they are seized by two, and often three, fish at a time. The trout are not large, averaging about half a pound; they are the trout which belong to the lake. Later in the season (September and October) the large trout, often weighing four pounds and upwards, run up into this lake, and are taken in large numbers with the fly. Grasshoppers are used with killing effect by the country people. After some excellent sport with the small fry, and having filled our baskets, we put our rods up and bid farewell to Trout Lake. We make a portage of half a mile over a hill, and launch on Mill Lake. As we paddle up to the mouth of the inlet our attention is attracted by the strange spectacle presented by the reeds on the margin of the lake; each reed appears to be festooned with silver tinsel, which quivers and flashes in the bright sunlight. Curious to solve the mystery, we land, and on examination find that the effect is produced by dragon-flies just bursting from the chrysalis, which is attached to the reeds; and their wings fluttering and drying in the sun as they became detached produced the effect which we witnessed. Every instant dozens were freed and flew off. Countless numbers fell on the surface of the lake, but I did not notice that any trout rose at them.

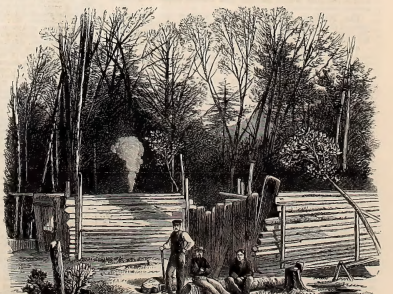
We landed at the favourite fishing-place, a deep hole at the mouth of the inlet, put up our rods and began fishing with great effect; but before long we had good sport for about twenty minutes, when the fish suddenly left off rising.

In a short time, however, the trout began to show themselves again, and we resumed our sport. Side by side we threw our lines, and landed our fish with varying luck, until, fairly surfeited with our success, we cried enough, and proceeded to count and admire our fish. As the day is growing late, we start through the woods for Crazy Lake, where we are to camp for the night. On our way we surprise an old hen grouse and brood. She, with trailing wings and uttering a plaintive, warning cry to her young ones, entices us to follow her, almost permitting us to put our hands upon her. In the meantime the little fellows scamper off

A FISHING EXCURSION IN NEW BRUNSWICK.

CROSSING LAKE UTOPIA IN A STORM.

LAKE UTOPIA—EVENING.



in all directions, and, assured of their safety, she secures her own. As we have had a pretty hard day of it, we are not sorry when the two-mile tramp is over and we arrive at Crary Lake; and Sebatis seems of a like mind, as he drops the canoe with a grunt, and proceeds to make a bough camp and prepare our dinner. The trout prove excellent: so do our appetites. But with the night come the only torments to our otherwise perfect enjoyment—black flies, mosquitoes, and midges, the latter the greatest torments of all. So small as to be almost imperceptible, they sting most villanously, creeping up your nose, into your eyes and ears, and almost driving you demented. The Indians not inaptly call them "*feel 'um no see 'ums.*" They had not troubled us much in the day, but now seemed bent upon making up for lost time. We slew them by thousands, but it seemed we were literally doing it *pour encourager les autres*, for their place was instantly filled by countless battalions. Our weariness proving superior to the torment, however, we finally got to sleep. Waking early, Sebatis has our breakfast ready; and, that over, we start to try our luck in Crary Lake. The trout in this lake are large, and have been taken of five pounds and a half weight. As we could not both fish from the canoe, we desire Sebatis to make a raft for us. He soon procures the number of logs necessary for the purpose, and lashes them firmly together with withes, and places over all some large sheets of bark peeled from spruce-trees. Leaving Sebatis to his own devices, we pole off into the lake, take up a favourable position, and begin to cast. Faithfully we whip the water for half an hour, without getting a rise; then, up pole, and off to another position. All in vain we change our casts and offer the most tempting lures our fly-books afford. The trout, proverbially shy in this lake, will not deign to move; and at last we give it up and pole our raft to an old pine log which lies half in the water and presents a good chance for us to land. We clamber up the old pine, and, seating ourselves on the trunk, with our backs to the water, light our pipes, and console ourselves with the idea that our finny friends will rise by-and-by, as the sky is getting cloudy and a slight breeze is springing up. Even while we speak, a heavy splash is heard in the lake, and, turning round quickly, we see the large circles in the water expanding towards the shore, marking the spot where the trout rose. As we pole to land, we notice that the pole, after sinking through a tangled bed of weeds about four feet under water, brought up in hard gravel. A trout had evidently been routed out of this haunt by our poling. Hastily we push off our raft, and silently push off and anchor near the spot whences the trout broke. At the very first cast a heavy fish is struck. And now we are in our glory. While the reels at the trout bolt for the deep water. Gradually we reel them up, and ply them with point and butt. With the greatest difficulty and risk to our rods we prevent their dashing under the raft in their mad efforts to get free. At length the fish become more shy, and presently few are moving. And we are nothing loth to leave off, as we have now over three dozen trout, few of them under one pound in weight. So we up pole, push ashore, land, and exhibit to the admiration of Sebatis our speckled spoil. It may be here remarked that in these waters you cannot have a fly too gaudy. The most killing fly we used was constructed as follows:—Body, red and black pig's wool, ribbed with gold; legs, red hackle; wings, the scarlet feathers from a parrot's tail, mixed with the feathers from the back of the wood or summer duck; this, with the red and black palmers and the mealy white fly for night fishing are the only flies we find necessary. When these do not take any other fly will seldom prove successful. To return to our narration. With infinite gusto we attack the lunch which Sebatis had waiting for us; and as nothing to advantage could be done in fishing in the heat of the day, we saunter off into the woods, where we find a lovely spot where beautiful trailing arbutus in full bloom mingles its perfume with the blossoms of the wild cherry and moose-wood. Retracing our steps to camp, we find everything packed in readiness for our return to Lake Utopia, at the head of which lake we are to have the evening's fishing. Off we tramp, cross Mill Lake, carry the canoe over another portage of a quarter of a mile, launch our canoe in Lake Utopia, and paddle to the head of the lake. Here, while we are at dinner, we hear a rustling in the bushes; an Indian appears bearing a canoe upon his back, followed by two others carrying packs, guns, snowshoes, &c. It proves to be the old Indian chief, John Francis; his son, Mitchell Francis; and the Indian doctor, Saukobasis. They are on their way home from the sugar camps, where they have been since when boiling maple sugar, trapping &c. We invite them to join us at dinner, and shortly another arrival takes place in the persons of two river drivers who are picking up drift logs on the lake. The aborigines, the lumbermen, and ourselves from the city of St. John exemplify three phases of civilisation in one of the most thriving, and second to none in loyalty, of all our beloved Queen's wide domains. Sebatis informs me that the old chief is a good storyteller, has an excellent memory, and can relate interesting incidents concerning the first settlement of the country, which he had from his father and grandfather. As he has all his dresses belonging to his station as chief of the Passamaquoddy Indians with him, we offer to draw his portrait if he will remain the night. The old man kindly acquiesces, and invites us to be his guests for the night in the sugar-camps on the hillside. So we cross the lake to the mouth of a cool brook where we think the trout will be rising in the evening. As we draw near we see him breaking anchor the canoe, and in an hour or two our baskets are filled. A shelldrake starts up in alarm and flies far away, until his form is lost in the

JOHN FRANCIS, CHIEF OF THE PASSAMAQUODDY INDIANS.

ENTERTAINING THE CHIEF.

THE SUGAR CAMP.

golden depths of the evening sky, recalling vividly the lines by the American poet William Cullen Bryant:—

> Whither, 'midst falling dew,
> While glow the heavens with the last steps of day,
> Far through their rosy depths dost thou pursue
> Thy solitary way? &c.

Accompanied by the chief, his son, and Dr. Saukobasin—the latter has a peculiar expression: he laughs only with the lower half of his face, his eyes gleaming savagely at you all the while—we tramp off to the sugar-camps, where we are to spend the night. The camps are situated on the side of a hill covered with maple-trees, a brawling brook runs at the door, and a break in the forest affords a peep at the lake, and gives the charm of distance to a primitive and very lovely scene. It was well we had a good supply of provisions, for our family had increased alarmingly, and we now numbered six persons. Sebatis, working under the eye of his chief, exerted all his powers and served an excellent supper. After the old man had told us many interesting stories of old times, hunting yarns, &c., at Sebatis's suggestion we asked him to sing some Indian songs, and we are not likely to forget the strange, wild scene—the old man beating time on a birch-bark drum improvised for the occasion, and singing song after song in Indian, until the grey dawn, peeping in through the chinks in the camp, warned us to our tardy couches. The next day was devoted to taking the old chief's portrait. He retired to his camp to make his toilet. "Shade of Commodore Trunnion, who is this?" On looking up we were startled to find an old naval officer of the time of George III. standing at the camp door with his back towards us; the only part of his dress that appeared at all incongruous was his hat, which was a common black hat, with two bands of gold lace around it; as he turned, we perceived that it was our friend the Indian chief. The propriety of his having his portrait drawn in Indian costume was hinted at; but, as he was in the habit of wearing this dress on great occasions, and it had been handed down to him by his father, some difficulty was experienced in prevailing upon him to change, more particularly as he evidently considered himself "en grande tenue," as also did the other Indians. At last he retired, and presently reappeared in porcupine quill and beadwork, ornamented sashes, leggings, moccasins, &c.; but all our efforts to get rid of the epaulettes were unavailing, as he considered he was making a great sacrifice in giving up the hat, &c. He expressed himself much gratified with the likeness, and highly delighted at the prospect of its appearing in the Illustrated London News.

We passed the remainder of the day pleasantly roaming about in the woods, selecting many charming bits of scenery, and towards evening we packed up and started down the lake in company with the chief, on our way home. As we paddled along, the old chief amused us by singing Indian songs, until Sebatis told me that he (the chief) was the only man in the tribe who could give the war-whoop of the Passamaquoddys, and that he would do so if he were asked. The request was made; but as he did not make any reply, we began to fear that he would not comply, when suddenly the echoes of the lake were awoke by the most unearthly yell, so loud that it could be heard at a great distance, and utterly baffling all description, carrying the mind back some hundred years, when, instead of our peaceful party, the lake was traversed by bands of painted braves, and the echoes were awakened by a series of yells such as the one we had just heard. Evidently "of the past the old man's thoughts were," as he sat in his canoe with downcast eyes and his head bent forward on his breast.

Borne by the evening breeze from the distant shores of the lake come the tinkling of bells and the lowing of herds, telling of that civilisation before which his race is passing away, so fast that in all probability in a few short years they will be numbered with the things that were. About seven hundred souls are all that remain of this remnant of a once powerful community. The old man will sing no more to-night.

As we scan the beautiful lake, reflecting so powerfully in its glassy waters the hills now gilded by the setting sun, we almost fail to recognise it as the scene of our boisterous passage two days ago. Presently our landing-place is reached, and we disembark, highly delighted with our summer holiday, and bearing with us to the toil and drudgery of our everyday life the belief that all those who make the search will never fail to find "tongues in trees, books in the running brooks, sermons in stones, and good in everything."

NAVAL AND MILITARY INTELLIGENCE.

WAR OFFICE.

13th Hussars: Lieut. W. P. Bagenal to be Captain; Cornet J. A. Ford to be Lieutenant. 19th: Capt. H. C. Craigie to be Major.

Royal Artillery: Lieut.-Col. S. J. Stevens, C.B., to be Paymaster.

Military Train: Lieut. C. T. Wilson to be Captain; Ensign A. R. Warren to be Lieutenant; Cadet G. Phibbs to be Ensign.

2nd Foot: Ensign S. Barry to be Lieutenant; Cadet E. W. Broderick to be Ensign. 8th: Capt. J. Cusack to be Captain. 11th: Capt. L. C. Brown to be Captain. 13th; Major A. A. Dick to be Major. 14th: Lieut. R. A. L. Furneaux to be Captain; Ensign R. Hall to be Lieutenant; Cadet F. W. Bloomfield to be Ensign. 19th: Cadets L. R. H. D. Campbell and C. Barton to be Ensigns. 26th: J. E. N. Whitlock to be Ensign. 34th: Ensign C. C. Clayton to be Lieutenant; Ensign G. C. D. Bampfield to be Ensign. 38th: Ensign J. B. Sparks to be Lieutenant; Ensign W. St. James Young to be Ensign. 39th: Cadet C. N. M. Hamilton to be Ensign. 41st: Capt. J. E. D. Hill to be Captain. 59th: Capt. A. H. Versturne to be Captain. 66th: Lieut. J. T. Ready to be Captain; Ensigns J. Hammond and T. E. Soady to be Lieutenants; Cadets E. J. Johnston and J. W. Carroll to be Ensigns. 72nd: Staff Assist. Surg. E. Footner to be Assistant Surgeon. 90th: Staff Surg. W. Boyd to be Surgeon. 102nd: Lieut. J. A. Woods to be Captain; Ensign J. Maule to be Lieutenant; Cadet W. Brydon to be Ensign.

3rd West India Regiment: Major R. Hughes to be Lieutenant-Colonel.

Medical Department.—Assist. Surg. J. H. Ross, M.B., and Surg. J. Mullins to be Staff Surgeons; Assist. Surgs. J. S. Johnston, M.D., and J. Tulloch, M.D., to be Staff Assistant Surgeons.

Brevet.—Colonel J. B. Woomam to have the honorary rank of Major-General; Lieut. W. L. Hilton to have the honorary rank of Captain; Lieut.-Cols. E. W. D. Lowe and H. L. Gardiner to be Colonels.

Major-General Bloomfield, Inspector-General of the Royal Artillery, returned to town last week from a tour of inspection in Scotland and the northern district.

Her Majesty's war-sloop Geyser appears to have been hovering about the Channel in search of the Confederate war-steamer Florida. The object of the Geyser was probably to guard against any infringement of British neutrality by attacks on American merchantmen in British waters.

The next examination of candidates for admission to the Royal Military College, Sandhurst, will commence on Thursday, the 17th of December next, at Chelsea Hospital; and that for admission to the Royal Military Academy, Woolwich, on the 4th of January, 1864, at the same place.

Tuesday's *Gazette* announces that the colonelcy of the Coldstream Guards, vacant by the death of Lord Clyde, has been conferred on Sir William Gomm, and that Major-General M'Pherson has succeeded to the colonelcy of Sir William's old regiment, the 13th Foot.

A general order from the Horse Guards has been received at Chatham garrison announcing that his Royal Highness the Field Marshal Commanding-in-Chief, with the concurrence of the Secretary of State for War, has been pleased to award silver medals, with gratuities, to various non-commissioned officers and gunners of the Royal Artillery for long service and exemplary conduct.

The last of the wooden ships which is ever likely to be added to the British Navy was launched at Woolwich on Saturday last. The Wolverine, of 21 guns, was laid on the slip some years ago, and when the necessity for iron casing became visible her progress was suspended with a view to her conversion. The Admiralty, however, finally determined to finish her as she had been begun. The Wolverine is a sister ship to the Orpheus.

Prince Arthur, accompanied by Major Elphinstone, arrived at Woolwich on Monday, and proceeded to the Royal Arsenal, where arrangements had been made to carry out a series of interesting experiments with Francis's corrugated-iron military waggons, which will also serve the purposes of boats for the transport of troops or stores across a lake or river. He was received at the main gate by Colonel J. C. Kennedy, C.B., Lieutenant-Colonel O'Brien, and Major Sherrington, of the Military Train Corps, and the party then proceeded to the canal near the Government practice-range, when one of the waggons, having been divested of its shafts and wheels, was thrown into the water, and his Royal Highness and the officers named having entered the vehicle, it was easily navigated by two men with oars. A second waggon was then tested, and having embarked sixteen men of the Military Train Corps, with its own wheels and an additional weight of about 7 cwt., was propelled with ease.

On Tuesday a grand field-day of the troops in Portsmouth garrison took place on Southsea-common. They comprised the I and K battalions of the mounted artillery, under the command of Colonel Anderson; second battalion 1st Royals, under the command of Colonel Holcombe; 53rd Regiment, under the command of Colonel English, C.B.; and 55th Regiment, under the command of Lieutenant-Colonel Hume. The Lieutenant-Governor, Major-General Lord W. Paulet, C.B., attended by Colonel E. Somerset, C.B., Deputy Adjutant Quartermaster-General; Colonel J. Thackwell, Deputy Adjutant Assistant General; Colonel E. C. Warde, C.B., Royal Artillery; Major Nugent, C.B., Royal Engineers; an Lieutenant C. Paulet, Aide-de-Camp, arrived on the ground at three o'clock, and immediately inspected the troops, the infantry being in column in the centre, and a battery of artillery on their right and left; after which the whole marched round in review order, headed by the united bands of the three regiments. Lord Paulet then assumed the command, the artillery being ordered to fire, whilst the infantry formed into squares. Several other manœuvres were executed, representing the advance and retiring of an army, under cover of the artillery and light infantry; and finally, forming a line, the batteries resuming their original position on each side of the infantry, opened and carried on a rapid succession of field firing for some minutes, which being followed by a brief address from Lord Paulet to the Colonels of regiments and brigades, the troops were marched to their respective quarters. A vast concourse of persons witnessed the spectacle.

THE VOLUNTEER MOVEMENT.

There is a provision in the Volunteer Act that the acceptance of a commission is not to render a seat in the House of Commons vacant.

The prize-shooting of the London Rifle Brigade was brought to a conclusion last Saturday by a competition for three silver-plated tankards and six university pewters, provided from the proceeds of "Aunt Sally" during the meeting and of a collection made by Lieutenant Frodsham. These prizes were offered as consolation ones for non-winners. They were contested for by a large number. The winners were Colour-Sergeant Albiston, Private Woolley, Private Neal, Corporal Kelly, Private Stanford, Private Horncastle, Colour-Sergeant Holme, Private James, and Private Talchell.

The horse troop of the Hon. Artillery Company, under the command of Captain Jay, which had been for ten days at Seaford, on the coast of Sussex, for drill and ball practice, returned to town last Saturday. The two guns which they took with them were in almost daily use, and the practice was very satisfactory. On Wednesday, with the view of reciprocating the kindly feeling that was manifested towards the troop during their stay in Seaford, the principal inhabitants were entertained at a dinner and ball given by the officers; and on Friday a series of races, also organised by the officers, took place, and passed off in a very gratifying manner.

The annual inspection of the 1st City of London Engineers took place on Saturday evening last at Victoria Park. At the conclusion of the proceedings Colonel Morris expressed his disappointment at not meeting the corps in larger numbers, considering its standing, and disapproved of members asking for leave of absence. He considered the arms in admirable condition, and urged the members to follow the example of their officers, whose efficiency, he said, must be the result of great attention to their duties.

Last Saturday the Post Office division (B and C companies) of the Civil Service Corps competed at their ranges at Wimbledon for their extra prizes. Two prizes, presented by Mr. F. R. Jackson, Controller of the Money Order Department, were won by Quartermaster-Sergeant Hubburd and Corporal Backhouse. Colour-Sergeant Cardin and Corporal Backhouse tied for the second prize. In shooting off, Colour-Sergeant Cardin made a bull's-eye to a centre; but, winning another first prize, he had to resign this prize to Corporal Backhouse. Two prizes, presented by Mr. W. H. Ashurst, solicitor to the Post Office, were won as follows:—The first prize by Colour-Sergeant Cardin, and the second by Lieutenant Walliker. There were four ties for the second prize—Lieutenant Walliker and Privates Elliman, Crossley, and Watkins. In shooting off, Lieutenant Walliker made a centre, Mr. Elliman an outer.

A competition for prizes offered by the non-commissioned officers of the 12th Tower Hamlets (Stoke Newington) took place yesterday week at the butts at Tottenham. Ensign Partridge and Assistant-Surgeon Miller proved the winners.

The seventh company of the Finsbury (39th Middlesex) held their annual competition, for prizes presented by the officers, on Saturday week. The first prize was won by Sergeant Arch, second by Corporal Hamston, third by Mr. Buttfield, fourth by Mr. Grover.

The annual prize competition of the 37th Middlesex (Bloomsbury) took place last week at the butts at Willesden. On Wednesday the chief prize of the week was contended for—viz., the challenge gold medal and badge, the gift of James Patrick, Esq., to which was added a small gold medal to be kept by the winner. Private Mark was the winner.

The last contest for the Harrow cup—which is looked upon as one of the highest prizes that can be gained by volunteer corps—took place yesterday week at the Stanmore range. The competitors were the thirteenth company (Captain Styan's) of the Queen's (Westminster) Volunteers and the C company of the Victorias. The Queen's men won by 6 points. The total scores were—Queen's, 127; Victorias, 121. The thirteenth company of the Queen's, it will be remembered, held the inland revenue challenge cup in ten consecutive matches, and, as they have thus had to bring their men into the field so often this season, an intention announced before the match will now be carried out, for the Harrow cup will be resigned, and they will shoot no more matches for the present.

In Essex a return contest has taken place between eight members of the Saffron Walden and eight of the Bishop Stortford company. The scores made were:—Bishop Stortford, 329; Saffron Walden, 317. The first match was won by the Bishop Stortford company, so that they were successful on both occasions.——A carbine-match between the members of the Harwich Battery of Artillery and ten of the 2nd Suffolk or Walton Battery of Artillery has also taken place. The shooting took place at the Harwich butts, and the Harwich won, for the third time, by 24 marks.

The 3rd Kent, on Saturday week, competed at Eltham for the following prizes:—A purse of five sovereigns, which was won by Sergeant Winser; a Steward telescope, won by Sergeant Voller; a prize, value £5, won by Corporal W. Morris; the ladies' prize, value £12, won by Private Stuart. There were two small money prizes in the third competition, which were carried off by Sergeant Voller and Private Bizzell.——The 4th Kent (Woolwich), commanded by Captain Carter, and the 21th Kent (Charlton), commanded by Captain Graham, assembled yesterday week on the grounds of Sir T. M. Wilson, Bart., Little Heath, Charlton, for the annual review of the force by Colonel Luard, Assistant Inspector-General of Volunteers. Various evolutions were carried out in a highly creditable manner.——An interesting meeting connected with the 14th Kent Artillery (Royal Dockyard) took place yesterday week in the Government Range, Royal Arsenal, for the purpose of giving its members an opportunity of winning some of the numerous prizes offered by the liberality of the officers and friend of the corps. The following is the list of the successful competitors, the prizes being awarded according to the order in which their names appear:—Gunner W. Shields, Gunner W. Ford, Corporal G. Crawford, Gunner J. Forbes, Sergeant P. Frater, Lieutenant R. P. Chapel, Gunner W. Pettit, Gunner T. Vaughan, Sergeant Shawcroft, Captain E. M. Browne, Gunner H. Wood, Gunner J. Warlock, Bombadier J. S. Holland, Gunner W. Jolly, Sergeant-Major R. Kemp, Gunner J. Dickson, Gunner H. Moore, Gunner G. Aylmer, Gunner J. W. Holland, Gunner J. Davis, Gunner G. Reeves, Corporal W. Townsend, and Gunner J. Yates.

The annual prize meeting of the 1st Sussex came off on Wednesday and Thursday, last week, at the Sheep Cote Valley ranges. There were eighteen matches in the programme, and the following were the results of the principal ones:—The first was a challenge cup, given by Mr. Abbey, for competition, between Nos. 1, 2, 3, and 4 companies of the battalion, and the result was—First company, 572; second, 632; third, 638; fourth, 585. The winners (No. 3) agreed to give the cup to Captain Corrie rather than fire amongst themselves to see who should own it. In the officers' prizes, Sergeant Russell took £5; Sergeant Garwood, £2; Corporal Chandler and Corporal Wallis, who tied, divided £5; Private Wright took £2 5s.; and Private Wilshere, 15s. The Corporation prize of £15, for competition between the Brighton Artillery with carbines, and the 1st Sussex Rifles, was divided into four, of which Private Abbey (Rifles) took £5; Sergeant-Major Broadbridge, £3; Sergeant Bull, £2; and £5 was divided by Ensign Lomax, Sergeant Livesay, Corporal Wallis, and Private Dash, who tied. The next of any importance was the artillery and rifle competition for a challenge cup, in which great interest was centered. The result was—No. 3 battery (Artillery) made 347 points, and the second company (Rifles) 363. In the next match, five shots each, at 400 and 500 yards, Sergeant Taylor took £5; Private Wilshere, £2; and Private Brown, £1. For eight prizes, given by Mr. Moor, amounting to £30, Private Dash, £5; Private Wagget, £4; Private Reeves, £3; Ensign Lomax, £2; Sergeant Waggett, £1; Corporal Wallis, £6; Sergeant Livesay, £4; Private Abbey, £3; and Sergeant Russell, £2. The remaining matches were for rifles, watches, drinking-flasks, and other things, which had been given by private individuals.

In Wiltshire, the Lord Lieutenant, the Marquis of Ailesbury, has signified his wish that the uniform to be adopted by the volunteers of the county shall be dark green with scarlet facings. Many of the companies now wear dark gray, and a few light gray.——The annual prize meeting of the County Rifle Association is fixed for the 22nd, 23rd, and 24th of September, at Roundway Down, near Devizes.——Yesterday week a contest came off, between fifteen of the Salisbury companies and fifteen of the Wilton corps, at Laverstock Down. The total score of the Salisbury men was 364, that of their opponents, 313. The highest score was made by Private Watson, of Salisbury.

The annual competition for prizes presented to the 1st Berks (Reading) took place on Tuesday and Wednesday, last week, at the Coley range, in the presence of Major Sir Paul Hunter, Bart., and a distinguished company. The prizes were numerous and valuable, and a good proportion of the members of each of the three companies entered the contest. The first and second prizes, of the value of £30 and £20 respectively, were presented by Sir F. H. Goldsmid, Bart., M.P. for the borough; third, the ladies' cup, a silver tankard, value £10; a valuable clock, presented by Mr. C. Stephens, banker; a silver-mounted inkstand, given by Lady Hunter, value £6; a silver cup, value £5, presented by Mr. J. O. Taylor, the Mayor; a £5 prize, given by Captain Stephens, the commanding officer; a drinking-cup, presented by Captain W. Braham, the Royal Berks Militia, &c. The competition was with the long Enfield, Hythe position. Wimbledon targets and scoring. The ranges were 200, 500, 600, 700, and 800 yards, seven shots at each distance; and it was arranged that the prizes (with the exception of Lady Hunter's and the commanding officer's, given for special purposes) should be awarded in order of merit to the highest aggregate scores at all the ranges. The first three ranges were shot on Tuesday, when the weather was most unfavourable, with the wind blowing in all directions, while heavy rain fell at intervals throughout the day. The seven highest scores made at the three first ranges were as follows:—Mr. J. Thos. Turner, 53 marks; Sergeant Jos. Rose, 50; Sergeant Chas. Gostage, 49; Private Blatch, 49; Sergeant Bath, 48; Sergeant C. Butler, 47; Quartermaster-Sergeant Ruddock, 46. Lady Hunter's prize was carried off by R. Shepherd. The commanding officer's prize was shot for on Wednesday. The successful competitor was Quartermaster-Sergeant Ruddock. Musketry-Instructor Sergeant Turner and Sergeant Rose each made 75 marks, and the former, winning the tie, took the first prize, of £30; Sergeant Rose gained the second, of £20; Quartermaster-Sergeant Ruddock won the ladies' cup; Sergeant Butler gained Mr. Stevens's timepiece; Sergeant Gostage, the Mayor's cup; and Private Moss, £3, after shooting off ties; Captain Braham's cup fell to the lot of Private Blatch. Lieutenant Exall, Privates Sellar, Chesterton, and C. Clark, and Sergeant Bath were awarded money prizes ranging from £2 10s. to 10s. The prizes were distributed on Thursday at the Abbey Gateway (the head-quarters of the corps), in the presence of a fashionable company.

In Suffolk an effort is being made to establish a mounted corps in the district round Ipswich.——The volunteers of Hadleigh, Sudbury, and Dedham, in all about 140, have been entertained by Sir R. Rowley, at Tendring Hall. The festivities were a repetition of similar fêtes in 1862 and 1861. After a number of evolutions were gone through, the volunteers had to take shelter from the rain in a liberally stored refreshment marquee. Among the speeches delivered was a brief one from Lady Rowley.——A competition has taken place among the members of the Woodbridge corps for a prize of £10, offered by Captain Rouse, for efficiency in file, volley, and skirmishing practice.——Mr. J. P. Fitzgerald entertained the officers and members of the Woodbridge and Glevering corps last week. Drill and dinner, the latter on a very liberal scale, were the order of the day and evening.——The Leiston corps has just had its annual competition. The prizes offered in the first class were to the amount of £12. The first prize was won by Captain Garrett.

The amount to be competed for in prizes at the approaching meeting of the Norfolk Volunteer Service Association is £230. The Lord Lieutenant of the county (the Earl of Leicester) has consented to a proposal to hold a review of all the Norfolk corps near Norwich on the Tuesday of the "festival week."——A competition has taken place among members of the Aylsham corps for a series of prizes given by Mrs. Ernuin; a challenge cup provoked fifteen entries, and was won provisionally by Private G. E. Burrell.——The Norwich companies have been hospitably entertained by Mr. G. Gedge, at Catton, near that city. About 400 volunteers and friends of Mr. Gedge sat down to the repast, the military portion of the company having previously edified the civilians, who had assembled in large numbers, with a display of the efficiency which they have attained at their drill. The 1st Norfolk Light Horse, under the command of Captain Hay Gurney, took part in the evolutions, and the infantry assembled were under the command of Colonel Brett.——On Thursday the 2nd Norwich Company had a competition on the Norwich range for several prizes. The principal was "the company challenge plate," to which a telescope was added by Major Patteson, late Captain of the company. This prize was carried off by Corporal Noverre, who must win it again next year before he can claim its exclusive possession. Corporal Noverre also won a handsome silver challenge cup, presented by Mr. Boulton, late Colour-Sergeant in the company.

A competition for a challenge cup offered to the 8th Cambridgeshire took place last week, and again resulted in favour of Private Barker. The annual prize-shooting of the corps came off on Thursday week. The first prize, the chaplain's cup, was won by Private Hodson.

In Lincolnshire, the Lowth corps has been reviewed and entertained by its late Captain, Major Smyth, at his residence at South Elkington.——The Gainsborough company has been inspected by Lieutenant-Colonel Harman, C.B., one of the Government Inspectors of Volunteers, who, after complimenting the members on their general efficiency, intimated that their file and volley firing was too hurried. Lieutenant-Colonel Harman has also inspected the Grimsby, Spilsby, Lincoln, Alford, &c., companies, and has generally expressed himself in complimentary terms as to their efficiency, although he did not scruple also to name their faults. The officers of the Lincoln corps entertained the gallant Colonel at dinner.

The 1st Lancashire corps was inspected on Saturday week, on the South Common, by Lieutenant-Colonel Hannan, Deputy-Inspector of Volunteers. The men, who were under the command of Captain Commandant Shuttleworth, went through a variety of evolutions, at the conclusion of which the inspecting officer complimented them in general terms upon the manner in which they had acquitted themselves.——On Wednesday week the members of No. 2 Company of the 1st Manchester assembled at the range, at Fallowfield, to compete for prizes given by the officers of the company. The prizes were a London armoury rifle, a field glass, and two money prizes. The rifle, which was the first prize, was won by Private W. H. Fletcher; the glass by Private W. O. Murphy; and the thirth and fourth prizes were won by Lance-Corporal T. Taylor and Corporal T. Pearson.——Last Saturday the members of the 1st Manchester assembled at their range at Barton Moss to compete for a third series of prizes given by the council of the corps. The winners were Messrs. A. Shaw, T. Mottershead, W. Watson, J. Powell, and T. Heppleston. At the finish of the contest, a second competition was arranged for fifty of the members who had attended the highest number of parades and drills. The prizes were won by Messrs. Heap, Taylor, and Emery.——The third annual prize meeting of the Lancashire Rifle Association commenced on Monday morning at Altcar, and was resumed on each day throughout the week.

In Yorkshire the volunteers held various prize meetings last week. The Filey and Hunmanby Volunteer Artillery held their contest at Hunmanby. Corporal J. H. Smith won the chief prize.——The Richmond volunteers shot for Mr. E. Mason's prize. Private T. Blades proved the winner, having made five bull's-eyes in five shots at the long range, with very unfavourable weather.——At Tadcaster, eight members of that corps and eight of the York Club had a contest at ranges of 200, 400, and 600 yards, five rounds at each. At first the Tadcaster men seemed likely to gain the victory, but the York men shot so well at the long distances that Victory was theirs—York scoring 242 against Tadcaster 211.——The Mason challenge cup, value £25, given by Mrs. Mason, of Copwick Hall, Ripon, was shot for by Ripon volunteers at that place. The weather was miserably bad. The scoring, nevertheless, was remarkably good, Corporal Pierce, the winner of the cup, registering 58.——The return match between the Howden and Selby volunteers, eleven from each company, was shot off at Skelton. The total scores were—Howden, 338; Selby, 296; thus reversing the result of the previous contest. A third meeting is, therefore, to be held.——The return match between the Wakefield and Huddersfield volunteers, eight from each company, again resulted in victory for the latter.——The Hull volunteers have held two prize contests. The challenge cup of £25, to be won three times to give ownership, was shot for, and this year Corporal J. Thorney is the winner. The president's cup, given to the York Rifle Club by Captain Anderson, to be shot for monthly until won twice by the same person, when such winner is to possess it absolutely, was won in the first contest by Corporal Hall. In case the cup is not disposed of by Christmas, the winners are to compete among themselves for possession. There were sixteen competitors in the first contest.——Nineteen Staff Sergeants of the 6th West York Militia beat the same number of Staff Sergeants of the 5th Royal Lancashire Militia at a shooting-match on Wednesday week.

The third annual competition of the Cumberland and Westmorland Rifle Association, extending over three days, was concluded at the Carlisle range yesterday week. The first competition was among the various batteries of the Cumberland Volunteer Artillery brigade, for a cup value £35, the gift of the Colonel. This cup, which must be won two years in succession, or three times, before it becomes the permanent property of the corps, was last year won by the Carlisle battery. The Maryport battery were this year the winners. The next prize competed for was the Cumberland Rifle Battalion challenge cup, to be won under conditions similar to those of the artillery prize, with a douceur of £5 to the man who made the highest score. Each corps was represented by five members. In the past year the Brampton corps were the winners; last year the Workington corps; and this year it has gone to Carlisle. The prize for the highest individual score was won by Private Broatch, Keswick, who tied Private Osbridge, of Wigton. On the second day a prize of £30 was given by the association, open to all volunteers of the two counties, was shot for; and Private Gray, 10th Cumberland, made the highest score, 35. There were several ties at 34. The Lord Lieutenant's cup, to be shot for by effective volunteers of the two counties, and won twice before it becomes private property, was next contended for. The winner was Private Davidson, Carlisle, who receives £10 10s. with it. On the third day Corporal Rudd, 1st Cumberland, who, it will be remembered, made the highest score at the first two distances for the Queen's prize at Wimbledon, came up first for a £30 prize at 500 yards. Each competitor had five shots. Rudd's score was 19, the highest possible score being 20; but two marks had been allowed for long Enfields (with which weapon he shot), so that the actual score was 17. Private Wilson (2nd Cumberland), Private Hudson, 5th Cumberland, and Ensign Palmer, 1st Cumberland, tied for a £50 prize. For a £20 prize for carbine-shooting, Private Tinnion, 11th Cumberland, was first.

The volunteers of the counties of Gloucester and Monmouth met at Piercefield Park, Chepstow, on Monday, and were reviewed by Colonel Dick, assisted by Major Noel and Major Wickham. Lord Llanover, Colonel Herbert, Mrs. Herbert, and several of the local gentry were present. At the termination of the review, Colonel Dick complimented the volunteers on the results of the inspection, but recommended them to pay more attention to company drill. The artillery was specially complimented by the gallant Colonel. The prizes won at the late county rifle competition were afterwards distributed by Mrs. Herbert, daughter of Lord Llanover. The proceedings terminated with some remarks by his Lordship, in which he spoke favourably of the new regulations for the volunteer forces of the kingdom, and exhorted the riflemen of Gloucester and Monmouth to keep up their target-practice.

At a meeting of the first battery First Brigade Glamorgan Volunteer Artillery, held at the Townhall, Cardiff, last week, to take into consideration what course should be adopted in consequence of the resignation of Captain Alexander, the entire battery, with the exception of the First Lieutenant and one or two absentees, signed their resignation.

A correspondent of the *British American*, published at Kingston, Upper Canada, mentions that he recently ploughed up, in the third concession of Kingston township, nine human skeletons, evidently those of aborigines, three pots and dishes made of clay and pulverised granite, elegantly carved, and other Indian fossil remains. Over one of the mounds, of which there were several on the spot, was a large pine.

COLUMN FOR THE CURIOUS.

THE fine old mansion or palace of Sir Robert Clayton (of the time of Charles II.), on the east side of Old Jewry, has just been taken down. The street has a host of memories: indeed, for its length, it is one of the most historical thoroughfares in the city of London. Sir Robert Clayton (who has lately been often named as the munificent benefactor to St. Thomas's Hospital) built the above stately mansion in the Old Jewry, for hearing the sufferings in the year 1671. It was nobly placed upon a stone balustraded terrace, in a courtyard, and had a fine red brick, richly ornamented. John Evelyn, who was a guest at a great feast here, describes, in his "Diary," Sept. 26, 1672, the mansion as "built indeede for a great magistrate of the city most. The entire dining-room is hung round with the history of the Grants' War, incomparably done by Mr. Streeter; but the finest piece is near the upper end." Mr. Peter Cunningham, in "Diary," adds (1818), "these paintings have long since been removed to the seat of the Clayton family, at Marden Park, near Godstone, in Surrey" (the property of Augustus Clayton, Baronet.

In 1679-80 Charles II. and the Duke of York supped at the mansion in the Old Jewry, with Sir Robert Clayton, Lord Mayor. The chronicles of the houses in the streets were illuminated with flambeaux; and the Duke and the Duke had a passage made for them by the Trained Bands upon the ground from Cheapside. Sir Robert represented the metropolis nearly thirty years in Parliament, and was Alderman of the City at his decease, which event created a Baronet in 1731-2. Sir James Thornhill painted the staircase of the Old Jewry mansion with the story of Hercules and Antæus, besides a copy of "the Rape of Dejanira," after Guido. The house had several tenants before it was occupied by Samuel Colegrp, the celebrated surgeon. In 1806 it was opened as the temporary home of the London Institution, with a library of 10,000 volumes. Here, in the rooms he occupied as librarian to the Institution, died Porson, Porson, on the night of Sunday, Sept. 25, 1808, "with a deep groan, exactly as the clock struck one." Dr. Adam Clarke was one of the most interesting account of his visits to Porson here. The Institution removed from the house in 1810, and it was next occupied as the museum of the London Missionary Society; and subsequently divided into offices. The Lord Mayor's Court was latterly held here. Although it had been built somewhat unsuitably for warehouses, it was a very handsome specimen of the palace of a merchant-prince, carrying us back to the sumptuous civic life of the seventeenth and eighteenth centuries, when our rich citizens lived in splendour upon the sites wherein they had accumulated their well-earned wealth.

An interesting search is being made at Dover, in the building which before the Revolution was an English college for the education of priests. John Kemble, the great actor; and Charles Butler, the eminent lawyer; it will be recollected, were scholars here. The discipline was ascetic, and during the furor of 1793 Dooxy, with similar religious establishments in France, was sacked by the Revolutionists. Some of the inmates, however, contrived to bury, in two chests, all the plate, silver vessels, and sacerdotal relics, which belonged to the community—the latter including the haircloth of Thomas à Becket and the skullcap of St. Carlo Borromeo. The building and grounds were purchased by the Government in 1808, and are now occupied by a corps of engineers. Recently, the secret of the buried treasure being divulged, the engineers obtained permission to search the premises, when, on digging beneath the fireplace of one of the rooms on the ground floor, they found one of the chests, containing silver articles—goblets, dishes, cruets, &c.—of the value of about 400l. Among the most remarkable are a silver-mounted dish, inscribed "Norfolk, 1791;" a gold goblet, bearing armorial enamels, with the names of Philip Howard, 1744 (Corby Castle); Father Daniel, 1747; Henry Weston, 1751; Thomas Gifford, of Chillington, 1756; and of Jean Knappe, 1763.

The Academy of Sciences at Paris has just received the first volume of the splendid, folio edition of the Astronomical Tables of King Alphonso X. of Castile, printed at Madrid by order of the Queen of Spain from the manuscript in the University of Alcala. The work is written in Spanish, being almost the first book of western science written in a modern language, a great step towards the diffusion of knowledge in the thirteenth century. The whole introduction is the catalogue of the fixed stars, celebrated as the Alphonsine Tables. They are followed by canonical tables, solar and lunar tables, some eloquent and poetical explanations, and some short hints about astrology. The following will show how King Alphonso treated certain astronomical questions:—

Of Urea Minor he says, "Some astronomers have taken it for a vein with no pole: others say it has the form of an animal, which should not be a lion, a wolf, or a dog, as a male or a female bear. Here, then, are heavenly animals including dead as well as the living—the constellation Ursa Minor, and recognised by ancient astronomers, because they saw four stars forming a square and three in the tail thus. They must have been more acute and a better eyesight than ours, and the sky must have been very clear. Since they say it is a she-bear, we will be sure we are not lucky if we cannot distinguish it.

This reads like comic astronomy. If it be a fair specimen, the old astronomers did not err much in their estimate of the Alphonsine Tables. Regiomontanus says, "beware lest you trust too much to blind enthusiasts of Alphonsine tables;" and Copernicus declared that the 400,000 ducats expended upon the Tables would have been better laid out in actual observation of the heavens. It was under Alphonso, however, we should add that the King had let or nothing to do with the construction of the Tables which bear his name.

In the *Journal de la Société Archéologique de Normandie*, recently issued, appears a very interesting obituary notice of the Rev. F. W. Hope, M.A., distinguished as the Entomological Professor of London, and who bequeathed to the University of Oxford the rich museum which he formed in Spring-gardens, Portman-square. Hope also purchased large and entire collections, including Mr. Hubbard's of Orkney birds; Professor Bell's, of reptiles and crustacea; Mr. Westwood's, of insects, books, and manuscripts; and Mr. Haliday's, of the insects of Madeira. These vast accessions have all been added to Mr. Hope's museum at the University of Oxford, which he endowed, to add to the chair for the teaching of zoology, with £300 per annum; besides a most remarkable collection of 140,000 engraved portraits, nearly 70,000 topographical prints, and between 50,000 and 60,000 volumes of history prints. The whole is open for the inspection of the public, for which the building is specially adapted; besides the residence of the curator, serving to elucidate his museum. The insects require attention, at least once a year, to be preserved from destruction, and Mr. Hope had a case for examination every day in the year. He purchased curious papers and works on entomology, and left in MS. his "Entomologia Sacra," in 4 vols. 4to, unfinished, and the antiquarian manuscripts, with all species of insects referred to in Holy Writ are most precisely and learnedly described.

Lately there passed out of the strange Scotchman, named Andrew Hamilton, better known in the western district of Fife as "the African chief." He seems to have been chiefly known by his eccentric mode of living; but, according to the *Edinburgh Courant*, "Hutton was a great naturalist, and in several languages. He lived as he was the case, his waste of life is the more to be reproved. He not only neglected the gifts of food, but what he did eat was of the coarsest description: he had a horror of Rebuchadnezzar's appetite for vegetation. The immediate cause of Hutton's death was eating the leaves of ash-trees: he had been observed to gather Mr. Hutton his relatives found, in an old tea-kettle, a cheque for £70, the interest on which had been accumulating for seventeen years; and a depositbook showed a balance of £61 to his credit in the National Security Savings Bank. Several £1 notes, and a quantity of loose money, in half-crowns, shillings, &c., were also found concealed in the house; and the miserable man possessed considerable property in Dunfermline. Caulfield or Kirby would have enshrined Hutton in their books of wonderful people; though he does not rank with Roger Crab, who subsisted, at three farthings a week, upon bran, herbs, roots, dockleaves, malt-dust, grass; his drink water; by which he reduced himself almost to a skeleton in 1665, twenty-five years previous to his death.

CHESS.

TO CORRESPONDENTS.

H. C. Adelaide, South Australia.—I. A book containing the games played at the chess meeting in London last year is reported to be in preparation: but it will not be published, we fear, till all interest in the event is lutched to commemorate has passed away. 2. The Chess Club of Adelaide is not known enough to us not quite to be able to answer.

ALGERNON, Bungay.—Your solution of Enigma No. 1338 is perfectly correct.

J. Dixon, Hull.—Your solutions of Problem No. 1338 and Enigma 1339 are correct. We are glad to hear that you find the Problems so much to your liking, as well as Mr. Rudzka's partner with Mr. Bradshaw.

G. E., Guraish-heap, Swadlincote.—You will find the same solution is mentioned more than once in our Journal since the problem appeared.

J. Dixon.—Your solution of Problem No. 1339 (1. K B 5th), in Problem 1017, on his first move. The result of his playing 1. K B 4th is answered by the solution we gave.

J. H., Rescue Cottage, Great Saxe, near Birmingham, is desirous of playing a game of chess by correspondence.

F. J., Dublin.—The revised copy of your game appears correct, and we shall report upon it next week.

J. H. D.—You are correct in your solution of the second problem we sent you. Mr. Rudzka's games which have been preserved will give very general satisfaction. The games you enclosed appear to be simply ingenious, but rather weak.

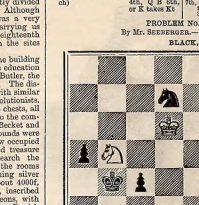
C. S., Wisbech.—We are not acquainted with the games mentioned.

J. Pr. Jr., Petersburg.—A reply has been forwarded by post.

ALGERNON, Bungay.—The solution of Mr. Bellenden's prize enigma No. 1339 is as follows:—

WHITE.	BLACK.
1. Kt to K 6th (ch)	K to Q 4th
(If. 1. P takes Kt, then White plays 2. B mates. If 1. K to Q 5th, 2. Kt to B 7th (ch), 3. Kt to Q 6th, and 4. Kt to B 5th, mate.)	

Solutions of Problem No. 1337 received by MMs. B. W. S., Illinois, U.S.; Rev. J. Vernon, H.S., Pitt Address; F. A. S., Bedale; Shrimp, Q. W. Waverley, Ashton-under-Lyne; Rev. J. Wayte, Rugby; Rev. W. Wilkinson, Lincoln; Lionel, S. V. K., Jersey; Helen H. R. S., Isle; A Clerk, D. O. I.; A Cadger, T. A., Retford; Gamp, Old Ford; Alpha, Bath; Rev. J. Owen, Aberystwith; Rev. J. Hall, Kirkleatham; Rev. W. Mackay, Inverness; Rev. J. Hall, Sunderland; Rev. J. Crewe, Tarporley; Rev. T. Hutchings, Falmouth; T. L. D. E., B. M. M. Castilian, Max, Johnnie, Rock, A. Gorman, Dora, H. J. B., Surtees, Gipsy, W. H. S., R. D., Miss W., F. R., S. E., Newbury, J. Swaby, W. M. S., I. O., A Student, Pride, D. Argelès, Beaver, F. F., M. S. Dauntless, Saxon, P. C., Leamington, Observer, H. W. S., Wilfred, Dr. Bird, Hermann, and S. Kensington are correct. All others are wrong.



SOLUTION OF PROBLEM NO. 1018.

WHITE.	BLACK.	WHITE.	BLACK.
1. B to K 1st third	K to K B 3rd, or	3. R or Kt mates.	
	K to K 5th	If	P to Q 8th (ch)
2. Kt to K B 4th (dis ch)	K to K 4th, Q B 4th, or K takes Kt	3. Kt to Q 6th (ch)	K to Q 4th
		This will make two self-mates.	
		3. Kt to K 8th (ch)	K to Q 5th
		4. Kt mate.	

PROBLEM NO. 1019.

By Mr. BERENGER.—*La Régence.*

BLACK.

WHITE.

White, playing first, to mate in three moves.

CONTINUATION OF MR. BUCKLE'S GAMES.

Mr. Buckle gives his Q Rook;

(Remove White's Q Rook)—(Scotch Gambit).

WHITE (Mr. B.)	BLACK (Amateur.)
1. P to K 4th	P to K 4th
2. P to Q 4th	P to Q 4th
3. B to Q B 4th	P takes P

(This move is not commendable where the pieces are all developed, but in the game at present under consideration it is a good attacking move, for the sake of an attacking position on the extract.)

3.	P to Q B 4th
4. P to Q B 3rd	Kt to Q B 3rd
5. Kt to B 3rd	B to K B 4th
6. B to Q 3rd	P takes Q P
7. Kt to K 5th	P to K 3rd
8. Castles	Kt to K R 3rd
9. B to K sq	P to K B 4th

And White mates in two moves.

Mr. BUCKLE gives the same opponent the odds of the Q R;

(Remove Black's Q Kt from the Board.—Irregular Opening.)

BLACK (Mr. B.)	WHITE (Amateur.)	BLACK (Mr. B.)	WHITE (Amateur.)
1. P to K 4th	P to Q 4th	24. Q to K B sq	
2. P to Q 4th	P to K 4th	(Black is now compelled to change his tactics, and open an attack on the side to which the adverse King has retreated).	
3. P to K B 4th	P to K B 4th	24.	R to Q 3rd
4. B to Q B sq	P to K 3rd	25. P to Q B 4th	Q to Q sq
5. P to Q B 3rd	P to Q B 3rd	(White is not unmindful of the danger threatened to his King, and we shall see that he soon it with no little skill and generalship).	
6. P to Q 5th	P takes P	26. P to Q B 4th	Q to Q Kt 3rd
7. P takes Q P	P takes P	27. Q to K 3rd	P to Q R 3rd
8. P to K B 4th	P to K Kt 2nd	28. Q to Q B 2nd	R to Q B 3rd
9. Kt to K R 4th		29. P to Q Kt 4th	P to Q Kt 3rd
		30. R to K B 2nd	P takes P
		31. P to Q Kt 5th	Q B P takes P
		32. Q to B 5th (ch)	K to Q 2nd
		33. P to Q R 4th	Q takes Q R P
		34. Q to K 6th (ch)	K to Q 3rd

(If he had taken the proffered Book, Mr. Buckle would have won the game by persistently checking it with the Queen).

35. Q to Q B 7th (ch)	Q takes R
36. Q to Q 8th (ch)	P to Q Kt 3rd
37. Q to K 6th (ch)	K to K 2nd
38. Q to Q 6th (ch)	K to B 2nd
39. Q to K 6th (ch)	K to Q 2nd

(An error. He ought to have been content to draw the game by repeatedly checking it with the Queen).

40. Q to K 7th	Q to Q Kt 2nd
41. Q takes Q (ch)	K takes R

And White eventually won the battle.

CHESS ENIGMAS.

No. 1346.—By Messrs. Elson and Warner.

One of the oldest-known Problems in the late Towns.

White: K at Q Kt 3rd, Q at K Kt 8th, Bs at K R 2nd and K Kt 8th, Ps at K R 4th and K B 3rd.

Black: K at Q 6th, B at K 6th, Bs at K B 4th and Q 7th, Kt at Q 8rd; Ps at K 3rd and 4th, Q 4th and 6th, and Q Kt 4th.

White to play, and mate in four moves.

No. 1347.—By Mr. W. T. Pierce.

White: K at Q R 2nd, B at K B 3rd, Bs at K R 3rd and Q 6th; Kts at K 8th and Q 4th, P at Q R 6th.

Black: K at Q 4th, P at Q 2nd.

White to play, and mate in two moves.

No. 1348.—By Mr. P. T. Duffy.

White: K at K Kt 8th, Q at K Sq, B at Q 8th, Kt at Q 8th.

Black: K at Q 4th, P at K 3rd.

White, playing first, to mate in four moves.

OBITUARY OF ELIMENT PERSONS.

LORD DE FREYNE.

The Right Hon. and Rev. John French, second Baron De Freyne, of Coolavin, in the county of Sligo, in the Peerage of the United Kingdom, was the second son of Arthur French, Esq., of French Park, for thirty-five years M.P. for the county of Roscommon, by his wife Margaret, daughter of Edward Cooke, Esq., the representative of that Norman family of Cooke, Castle Cooke, and was the brother of Arthur, the present Lord De Freyne, of French Park, created Baron de Freyne and Annaghmore, by patent, dated the 15th of April, 1797, and Baronet of Frenchpark in the Peerage of

Coolavin, in the United Kingdom, with special remainder to his brothers and their male issue. The late Lord De Freyne, of the Rectory, the subject of this notice, was born in 1737, and was educated at Trinity College, Dublin, and having taken holy orders, was Rector of Grange 1760, and Archdeacon of Kilkenny. He succeeded, to his British peerage of De Freyne, his brother Arthur, the first Baron, who died, unmarried, on the 29th of January, 1856. His own brother, also unmarried, occurred on the 22nd ult. He is succeeded by his next brother Charles, late a Captain in the 81st Foot, now third Lord De Freyne: whilst his youngest brother, Colonel Fitzstephen French, of Lough Rerill, M.P. for the county of Roscommon, becomes representative to the title. The family of French (originally De Freyne or De Fraxinis) Lords de Freyne, was established in England at the Conquest and a powerful Anglo-Norman Baron of the house, Sir Humphrey de Frayne, went over with Strongbow to Ireland, where his descendants have possessions there. From that time to this the French, his descendants, have widely spread, and maintained a high position in the chief kingdom. They can now number among them with many of the very first Irish families, and their political antecedents tend much to their credit and consideration. The Frenches, of Frenchpark, the immediate ancestors of the Peer just dead, have represented the county of Roscommon in Parliament for more than 130 years, and the representation of that county still continues. They have on more than one occasion declined offers of peerage, and the honour of a baronetcy was offered by Lord Castlereagh, the late Peer's brother, at a time when it was felt he could do so without the slightest infringement of that independence which the family has so honourably and constantly maintained.

WILLS AND BEQUESTS.

The will of Mrs. Margaret Stancomb, of Trowbridge, Wilts, was proved in the London Court by her son, William Stancomb, Esq., the surviving executor. The personal property is under £30,000, and the testatrix died in April last, and was the relict of the late William Stancomb, Esq. The will bears date 1845, and is codicil 1850, and another 1861. Her property she directs to be divided into six equal parts, leaving to her son and five daughters a share each. A legacy is left to the Sunday-school connected with the Baptist chapel at Trowbridge at which the testatrix attended, and a sum of £100 is bequeathed to clothing and other gifts among members of the congregation. Legacies and annuities are also left to her servants.

The will of Richard Trentham Reeve, LL.B., of The Elms, Fulham, was proved in London by the executors, Samuel Henry Jebb, Esq., the testator's brother, and the Rev. Charles Campbell, the testator's brother-in-law. The personal property is of the value of £30,000, a fact which caused the Registrar to say he became Colonel in 1858, Major-General in 1862, and retired on full pay in 1863, and was in the service of Sir Charles Napier in the Indian campaigns of 1842-3, and Inspector-General of Military Prisons, and Chairman of the Directors of Convict Prisons. Bishop, who was in the service of the testator's father, he left £100. His will bears date 1861, and there are two codicils, dated 1858 and 1860. To his wife, Leslie Reeve, and who was the daughter of the second Earl of Culchester, he leaves a liberal annuity and a portion of the furniture, wine, &c., from Gladwyn Jebb, Esq., he bequeathed his real estate, and, after leaving a pecuniary legacy to each of his three daughters, directs the residue of the personal estate to be divided between them and his son.

The will of Mr. Thomas Hall Stanton, late of Tooting, Surrey, Stafforshire, was proved in the London Court by William Kenwright Harvey, Esq., the nephew, and John Cockerill Harvey, Esq., the grandson of the testator, the joint acting executors and trustees. The personal property was sworn under £40,000. The testator bequeaths to his daughter, Mrs. Harvey, an annuity of £1000 a year, and his residence, with the furniture, &c., for her life, and has made a liberal provision for her children. His widow, dividing his real estates to her eldest son, to whom he also leaves £8000 from the personalty, bequeathing the remainder to the other children or the issue of her children. There are a few legacies to personal friends, and legacies and annuities to servants.

The Ottoman empire possesses but three railways—from Scutari to Ainlik, from Smyrna to Aidin, and from Smyrna to Cassaba to Suez. According to the *Journal de Constantinople*, there is an intention to establish a line from Bagdad to Bassora, from Aleppo to Bagdad, and from Bagdad to Bussorah.

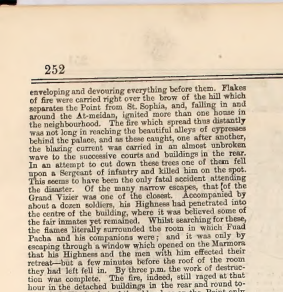
IRISH FISHERIES.—The Commissioners of Fisheries report to the Lord Lieutenant that the salmon-fishing of 1862 was more productive than for the last two or three years—an improvement which they trust is consequent on the vigilance of the Coast Guard, the boats of constables and their officers, with the aid of the constabulary, in preserving the spawning fish during the winter, and in destroying the illegal nets and gear by means of capture. But these means have considerably increased, and practices have been employed which are injurious to the fishery contrary to the Act of the 26th of 1842, with reference to the use of fixed engines. Many of the rivers continue to be crowded with illegal fixed engines, and, owing to the imperfection in navigation, requiring the attention of the Lords of the Admiralty as controller of the tidal salmon-fishery, the Commissioners of Fisheries have very materially shortened the season for fishing the Limerick district, the waters of which run through extensive counties, and the season has been the preservation of an unusually abundant stock of breeding fish for the spawning-beds during the past winter. The bounty for conservators for the district reaches £3417 for license duties in 1862. The Commissioners have granted licenses to twenty-six persons to plant artificial oyster-beds for a period of twenty-one acres in all; but it does not appear that any oyster spat or brood has been collected for the purpose of stocking the beds, owing to the great distinctness, that, with the exception of the east coast, where the take of herrings has been unusually productive, there is no material change for the better or improvement in Ireland; in many places the fishing population appears to be dying out, and boats are to be seen lying idle on the beach. It is difficult to account for this falling off, as, where capital and individual enterprise have been judiciously invested in the herring-fishery, the most satisfactory results have in all cases been obtained round the shores of Ireland. It is a coast, however, subject to many drawbacks in the past winter. The number of boats for which bounty-claims were paid in 1862 was 1,000, and the number of men employed 5,000. The Commissioners have granted licenses to twenty-six persons to plant artificial oyster-beds for a period of twenty-one acres in all; but it does not appear that any oyster spat or brood has been collected for the purpose of stocking the beds, owing to the great distinctness, that, with the exception of the east coast, where the take of herrings has been unusually productive, there is no material change for the better or improvement in Ireland; in many places the fishing population appears to be dying out, and boats are to be seen lying idle on the beach. It is difficult to account for this falling off, as, where capital and individual enterprise have been judiciously invested in the herring-fishery, the most satisfactory results have in all cases been obtained round the shores of Ireland. It is a coast, however, subject to many drawbacks in the past winter. The number of boats for which bounty-claims were paid in 1862 was 1,000, and the number of men employed 5,000.

BURNING OF THE OLD SERAGLIO AT CONSTANTINOPLE

A positive calamity has befallen Stamboul. The old palace of Selim, of Mustapha, and of Mahmoud, connected to the private apartments, the most unique and characteristic architectural feature on the south side of the Golden Horn—has been levelled by the flames. The disaster which has thus deprived the metropolis and capital of one of its most striking and historically interesting monuments is fully described by the *Levant Herald*. Monday, 10th of August, 1863, will long abide memory the bursting out of a column of black smoke from the southern extremity of the building announced to nearly every quarter of the city that the quantity-beautiful old building, which had escaped the fiery vicissitudes of a hundred years, had at length fallen a prey to the consuming power of the flames. Before the fire could be got under the whole pile was hopelessly and irretrievably ablaze. Before the first of the scores of vociferous engines which hurried from every quarter of the capital to the scene of calamity could even reach the Point, the old palace was far beyond salvation by any local means. The Grand Vizier, who happened to be at Dolma-bakche at the time, was the first on the spot, having hurried across in one of the palace caiques. He was speedily followed by the whole of the other Ministers, nearly all the general officers in garrison in the capital, and about 3000 troops. A couple of strong boats' crews from her Majesty's ship Vesey, lying off Tophana, also hastened to the scene, and lent excellent help in the efforts made to overcome the flames. The usual remedy of pulling down or pulling or pulling on each side of it was in vain resorted to; the flames literally jumped over each successive cessive charm thus made, and rolled on in increased volume,

enveloping and devouring everything before them. Flakes of fire were carried right over the brow of the hill which separates the Point from St. Sophia, and, falling in and around the At-meidan, ignited more than one house in the neighbourhood. The fire which spread thus distantly was not long in reaching the beautiful alleys of cypresses behind the palace, and as these caught, one after another, the blazing current was carried in an almost unbroken wave to the successive courts and buildings in the rear. In an attempt to cut down these trees one of them fell upon a Sergeant of infantry and killed him on the spot. This seems to have been the only fatal accident attending the disaster. Of the many narrow escapes, that [illegible] Grand Vizier was one of the closest. Accompanied by about a dozen soldiers, his Highness had penetrated into the centre of the building, where it was believed some of the fair inmates yet remained. Whilst searching for these, the flames literally surrounded the room in which Fuad Pacha and his companions were; and it was only by escaping through a window which opened on the Marmora that his Highness and the men with him effected their retreat—but a few minutes before the roof of the room they had left fell in. By three p.m. the work of destruction was complete. The fire, indeed, had spread at that hour in the detached buildings in the rear and round to ward Yali Kiosh; but of the old palace on the Point only the outer court walls and the tottering chimney-stacks remained.

The site of the old building thus destroyed is one of the most historic in Stamboul. In the earliest Byzantine days it was covered by the Acropolis of the new eastern capital; later, by a palace of the Empress Placidia; later still, by another and grander Imperial residence, reared by Justinian, on the ruins of which other palaces were successively built, till Mahomet II. erected that of which the structure destroyed on Monday was the last of many restorations. In this actual building took place the assassinations of Sultans Selim III. and Mustapha IV., and from it issued the successive edicts which crushed the Wahhabees, annihilated the Janissaries, and inaugurated the other acts of reforming "vigour" which illustrated the reign of Mahmoud.



On the completion of the new palace of Dolma-bakteh, the late Sultan removed to the latter residence, and the old building sank into a retreat for the surviving (and unmarried) members of his father's harem. On the death of Abdul Medjid himself, the former inmates were cleared out and the ladies of his own late establishment installed in their stead. These consisted of four *kadin effendis* (or wives) and about 300 other females four *kadin effendis* (or wives) and about 300 other females of lower harem rank. Besides this goodly company, the establishment included more than 100 servants—the whole of whom were in it when the calamity of Monday occurred. These, as also the other women and servants, managed to effect their retreat into the outer front court, and there they were found half an hour later by the *Aznas-dar-usta* (lady governess) of the Palace, who hastened from Dolma-bakteh to take charge of the burnt-out establishment. The whole were speedily and safely removed in caiques and carriages, first in part to some of the neighbouring harems, and finally, in the course of the afternoon, to Dolma-bakteh. Efforts were made to save some portion of the costly wardrobes, jewels, and furniture thus hastily abandoned, but with hardly any success. The whole may be said to have fallen a prey to the flames. Happily, the old jewelled arms and other precious antiquities which visitors to this historic treasure-house will remember were removed some months ago to Yeni-kiosk, a modern stone building on the crown of the hill behind, which has escaped the general ruin; and there they lie, in the silver-gilt throne which does duty at Bairam under the "Beautiful Gate"—never still to be, let us trust, of unholy repose.

Our Engraving is from a drawing by Mr. Kingston Harvey, of Constantinople.

OYSTER FISHERIES ON THE FRENCH COAST.

MESSRS. Nicolle and Le Huquet were deputed by the Jersey Legislature to visit those parts of the French coast where the cultivation of oysters is carried on, in order that they might inspect the various processes and report thereon. Having successfully completed their tour of inspection, they have embodied the results of their observations in an excellent report, of which we give the chief points.

They went first to the Isle de Ré, which is a large portion of the seashore has been formed into beds made of two parallel rows of stones, the interstices of which are filled with mud, so as to retain the water and preserve the oysters against the heat of summer and the frost of winter, the water being always kept from twelve to eighteen inches high. In these beds are placed convex tiles, coated with lime, or stones placed in such way as to leave room for the young oysters to cling to them. By this mode an incredible quantity of oysters have been collected on a seashore which, a few years ago, was of no value, so that this branch of industry realises at present an extraordinary revenue and spreads comfort amongst a large number of families who were previously in a state of indigence. These beds are conceded to them by Government at a small rental. The stones and tiles are

THE GREG'ON BATHS AND WASHHOUSES, LANCASTER.

CLUSTER OF OYSTERS FROM THE BEDS OF ST. BRIEUX.

left for a year without being disturbed; they are then turned over, so that the oysters which were under may be brought to the top, and are left thus until they have attained a proper size. They are then detached and placed in other beds, called Claires, to develop themselves in readiness for the market. During the spring tides, at low water, when the beds are uncovered, the sight is described as being magnificent. It appears that this industry, which now forms a source of great riches for that small place, only dates from 1858; that in such a short period, on an extent of five miles in length, upwards of two thousand parks have been formed; these parks, of thirty yards square, are worth 60*l.* (£12) each.

From Ré they went to Marennes, where a large extent of ground is formed in beds which are paved at the bottom, and in which oysters are deposited to turn green, which gives them an additional value; this colour is caused by the mud of the river. The water is always kept at 15 to 16 in. high.

Next they repaired to the Basin of Arcachon, which is a large bay or salt lake, nearly twenty leagues in circumference, where are vast quantities of oysters that have been deposited there young, in order to acquire the necessary size before being sold for consumption. The Commissary of Marine at Teste conducted the deputation to an oyster bed belonging to the Government, which is very prosperous, and where workmen were occupied in detaching oysters from each other for the purpose of developing their size. These beds are covered with white bivalve shells that have been thrown on them, and to which at first the small oysters adhere. There are nearly two hundred boats round this basin where the keepers remain, who watch the beds and work on them. The proprietor of one of these beds had scattered 500,000 oysters over it three year since, now estimates the yield at 1,000,000.

Thence the deputation went to Concarneau, where they made the acquaintance of M. Goyon, who for several years has made pisciculture his study. He has oyster beds on a large scale, which have given the most satisfactory results.

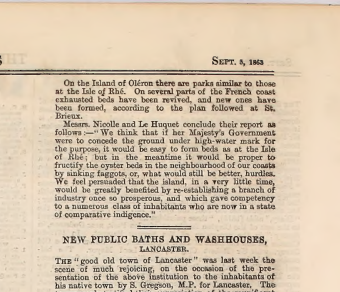
They then visited St. Brieux, where about two years ago parent oysters were deposited on beds which were exhausted, over which were placed faggots, sunk by means of stones to prevent the escape of the young oysters. Already a single bed has yielded 17,000,000 moderate-sized oysters, and the produce in all the beds has been satisfactory. The Commissary of Marine here gave the deputation a small branch of one of these faggots covered with oysters, of which we give an illustration.

Finally, they visited the Bay of Cancale, where, notwithstanding the force of the tides and the set of currents, the vast sandy shore is covered with oyster parks of large extent, amounting to more than 3000, made at little cost by sinking stakes in the mud and sand, which are entwined with bushy branches more supple, which form a double hedge; the interstices, being filled with mud and straw, retain the water and secure the oysters against frost. They grow here in a wonderful manner. The tide rises as high in that bay as in Jersey.

On the Island of Oléron there are parks similar to those at the Isle of Ré. On several parts of the French coast exhausted beds have been revived, and new ones have been formed, according to the plan followed at St. Brieux.

Messrs. Nicolle and Le Huquet conclude their report as follows:—"We think that if her Majesty's Government were to concede the ground under high-water mark for the purpose, it would be easy to form beds as at the Isle of Ré; but in the meantime it would be proper to fructify the oyster beds in the neighbourhood of our coasts by sinking faggots, or, what would still be better, hurdles. We feel persuaded that the island, in a very little time, would be greatly benefited by re-establishing a branch of industry once so prosperous, and which gave competency to a numerous class of inhabitants who are now in a state of comparative indigence."

NEW PUBLIC BATHS AND WASHHOUSES, LANCASTER.



THE "good old town of Lancaster" was last week the scene of much rejoicing, on the occasion of the presentation of the above institution to the inhabitants of his native town by S. Gregson, M.P. for Lancaster. The townspeople testified their appreciation of the munificent gift by a general holiday, the streets and public buildings being gaily decorated with flags and the bells of the various churches ringing merry peals during the day. The principal personages who were to take part in the ceremony, having met at the Town Hall, proceeded in procession to the building, where a raised platform, covered with crimson cloth, had been prepared for their reception. The 10th Lancashire Volunteer Rifle Corps kept the ground, the space immediately in front of the platform being occupied by the children belonging to the various schools in Lancaster. A great number of the nobility and gentry of the neighbourhood, including many of the clergy, together with an immense concourse of the inhabitants of the town and its vicinity, assembled to witness the interesting ceremony. Mr. Gregson was accompanied by Sir Wm. Brown, High Sheriff, Mr. W. J. Garnett, M.P., the Mayor of Liverpool, Charles Martin, Esq., C.E., the architect of the building, and a large number of ladies and personal friends. After a short but eloquent address, Mr. Gregson formally presented the institution to the Mayor and Corporation of the town, for the use of the inhabitants of Lancaster for ever. The gift having been warmly acknowledged by the Mayor (Mr. Greg), an address was presented to the benevolent donor, signed by the working men of Lancaster, and conveying in simple but earnest language their appreciation of the blessing conferred upon them in having such an institution placed within their means. The National Anthem, sung by hundreds of trained and beautiful little voices, concluded the ceremony. In the evening illuminations and other festivities terminated an eventful day for Lancaster.

The establishment, which was designed by Charles Martin, Esq., C.E., of London, is considered one of the most perfect of the kind yet constructed. It consists of a large, handsome swimming-bath, numerous first and second-class private baths for males and females, and a large laundry, with machine for the management of the various accessories to the different departments. The bathing departments are considered models of comfort and compactness, and the various ingenious contrivances for lessening labour and promoting dispatch in the laundry department are much admired. We believe that the cost of all the establishments of this kind hitherto erected has been borne by corporate or other public bodies from capital raised by a charge upon the rates, and that this is the first instance of such an institution having been founded by a private individual.

THE GRAMMAR SCHOOL AT HALSTEAD, ESSEX.

THIS school was established in or about the year 1692, by a good dame of the name of Ramsey, in connection with Christ's Hospital in London. Of late years this "charity" has, like many others, undergone considerable improvement, through the combination of a variety of other local charities and other arrangements made with the sanction of the Charity Commissioners. It was, however, the wish of the trustees at first to rebuild the whole school-buildings on a new site, offered to them by Lord Maynard, but this being objected to by the Commissioners, the present building has been erected in place of the old and dilapidated house previously existing. The schoolroom, however, and other buildings which were erected some few years back have been retained. Since the building of this new edifice the school has much increased in numbers and improved in character, under the management of the Rev. H. G. Watson. The interior arrangements, as well as the exterior appearance of the new building, have been much approved, and, altogether, we may congratulate the county of Essex on another revival of an old educational establishment, which, like many others, has long neglected.

The architect is Mr. Chas. P. Hayward, of 8, Adam-street, Adelphi, London, and the builders Messrs. Sudbury and Son, of Halstead.

THE ILLUSTRATED LONDON NEWS.

No. 1221.—VOL. XLIII. SATURDAY, SEPTEMBER 12, 1863. WITH A SUPPLEMENT, FIVEPENCE

THE SESSION OF SCIENCE.

THE British Association may take rank now with our national institutions. Its annual session is looked forward to by a considerable class of her Majesty's subjects with as eager an interest as that which is felt by the general public in the Session of Parliament. There are, indeed, some points of resemblance between them, but more of difference. The association sits hardly as many days as Parliament does months. Its proper function is rather to review than to legislate. Its subject-matter is furnished by the objects and processes of nature, instead of by the evil passions of man. It has little, if any, room for faction. It is not disturbed by Ministerial crises. Its decisions rest upon facts, not votes, and the intellect rather than the will is the instrument with which it works. Its atmosphere is calm. Its temper is docile. It welcomes truth from whatever quarter; and the minutes of its proceedings constitute a record of man's progress in the knowledge and application of the laws of the material universe.

It may seem late to notice the Newcastle meetings, which closed with last week; but of the transactions of this scientific parliament it may be observed that their interest does not readily evaporate. Moreover, as it is no part of our intention to review them in detail, but simply to glance at the more prominent characteristics of the session, it was obviously desirable to have all the materials before us in one view, and to survey them from that comparative distance which might help us to discern their relations to each other and their more general bearings upon the advancement of science. The inaugural discourse of Sir William Armstrong, the president for the year, it is true, might have sufficed to suggest all the thoughts we are about to put before our readers; but the papers subsequently read in the several sections contribute to a fuller illustration of the subject.

The immense importance of scientific research to the practical amelioration of man's earthly lot has become so patent to the commonest observation as to make it quite superfluous and almost impertinent to dwell upon the point. But it is worthy of remark that the science of the age is becoming predominantly practical—perhaps we might put the case more intelligibly by saying that the great majority of scientific men, at least in our own country, are more intent upon applying than upon extending their knowledge of the powers and the processes of the physical world. It would, of course, be absurd as well as unjust to urge this statement by way of reproach. Who would quarrel with the special aims of studies the results of which add so largely to our daily enjoyment? Nevertheless, there is danger lest mere utility be too directly pursued. Not only is it not the highest end of science, but, like human happiness, it is realised most fully when it is looked upon as of secondary importance. But what may be called speculative science, always supposing that its methods are legitimate, is, after all, more fruitful of advantage to society than even that which is distinguished as practical. It is the parent of discovery. It increases the "knowledge" which, in an emphatic sense, is "power." We cannot be too grateful for the wealth added to our stores by those who dig up and render available the precious ore of truth; but neither ought we to forget that successful mining follows in the footsteps of sagacious "prospecting," and that he who leads the way to new fields of knowledge confers at least as great a benefit upon the world as they who turn them to practical account. The British Association, we trust, will stimulate more and more by each of its successive sessions, those motives which impel

EXECUTION IN JAPAN: COUNTING THE COMPENSATION-MONEY FOR THE MURDER OF MR. RICHARDSON.—FROM A SKETCH BY OUR SPECIAL ARTIST.—SEE PAGE 272

research into the higher and more evasive problems of nature, the solution of which promise little immediate profit, but a true insight into which would indefinitely increase our mastery over the mechanism by which her most beneficent ends are wrought out. We think we perceive in the records of the recent session gratifying evidence of the growth of the right spirit, and sure we are that the laborious and conscientious pursuit of scientific truth for its own sake, rather than for what may be got out of it, will, in the long run, put greater blessings within reach of mankind than the most devoted attention to exclusively practical results.

It is not to be concealed, however, that speculative science has its special temptations. It is apt to mistake fancies for facts, and to make haste to generalise where it is bound more severely and with conscientious impartiality to investigate. Patience, modesty, reticence, are indispensably requisite to any successful prosecution of scientific speculation. Intuition may detect in an instant the true meaning of the star of that phenomenon but it can only be verified by repeated observations, and by a wide induction of corroborative facts. Are we wrong in supposing that railway speed and electric instantaneousness in our ordinary social intercommunications have made some of us impatient in our methods of inquiring after truth? We revere too highly the leading members of the British Association to pass any proceedings which have been matured under unfriendly review. But it strikes us, notwithstanding, that the tendency of the day is to jump to conclusions. And it is a tendency which seems to us to be on the increase in some of the sections of the Association. Nay, we fear that, to some ancient and in some special directions even worthy prejudices cloak themselves under the mantle of science, investigations are carried on with a bias towards foregone conclusions, and discussions are pervaded by an animus altogether unsuited to the regions of philosophy. These are exceptional blemishes in the proceedings of the session, we unhesitatingly admit; but they are blemishes, and it would be well that the grander and calmer intellect of the body should discourage the less disciplined ardour which does more than is suspected, perhaps, to bring science into disrepute with vulgar minds.

The most remarkable, and by far the most gratifying, characteristic of the Newcastle sessions of the British Association was the evidence they supplied of a perceptible and increasingly rapid convergence of several independent lines of discovery towards one of those great generalisations, the unveiling of which opens a new epoch in the realms of science. When Newton solved the problem of gravitation, and demonstrated the laws in conformity with which its mysterious power is invariably exerted, he supplied human intellect with a key with which it speedily unlocked vast stores of hidden knowledge. We seem to be on the eve of opening still more important revelation. Each successive step appears to place us upon the very margin of a sunmit from which we shall overlook with admiring wonder a broad domain of virgin truth. One of those primary principles in the light of which so many facilities become explicable, and so many apparent contradictions are reconciled, so many ill-understood hints resolve themselves into a grand unity of significance, seems to lie imbedded in the immediate neighbourhood of conclusions which science has already made us. It is hardly possible to mistake the indications which crowd upon us from all sides, like flocks of birds met with at sea, show that we are approaching an unexplored coast. We may observe, however, that the greater the certainty that we are coming upon some unusually light-bearing discovery, whilst it fires our enthusiasm, ought also to increase our self-diffidence. It is a time to be sanguine when, perhaps, we are within a few months, certainly within a few years, of a scientific revolution, the nature, extent, and ultimate bearings of which none can undertake to foretell.

For the second time Newcastle-upon-Tyne has entertained the British Association—need we say how warmly and how well? In its own name and of the distinguished body to whom its hospitalities were offered? Everything was pleasant but the weather—a rather large exception where outdoor excursions form a prominent part of the programme. This contretemps, of course, could neither be foreseen nor prevented. Science is on the right track to ascertain some meteorological laws, at least; and who shall say whether, when next it holds its sessions at Newcastle, some Fitzroy or Glaisher will not be able to determine a few weeks beforehand whether sunshine or rain is to be expected?

The Archbishop of York has accepted office as one of the vice-presidents of the National Shakspeare Committee.

The Austrian journals state that the authorities of Ostrou, in Moravia, recently seized nineteen sacks of flour, in each of which they found concealed in the interstitial spaces of the fabric, 40 cartridges. The flour came from Prussia, and were on their way into Russia, via Galatz.

THE OUTFITTING FOR THE ARCTIC EXPEDITION.—Large bundles of worn-out clothes came down to us for distribution, and it was bothersome to see what strange and incongruous clearings of the wardrobe were unpacked. Here was an Admiral's full dress, with cocked hat to match. So docile is the mind to the impression of rank, and so natural is a spirit of place and authority. Some wag was for encasing a certain half-witted lad in it, on which the simpleton father would have rejoiced and magnified with his new form and unique headpiece; but the salt-water suit was sent to the second-hand clothier for exchange or cash. Opera hats and white kid gloves were put on sticks, which cure, perhaps, cockpiing the "light fantastic toe," but tripped grievously at Munich's ball, and got very little for the trouble which had no doubt crossed the broad fields of Leicestershire on some jaunter by Thursday's train. The hussar uniform, with its tight pantaloons and cut and the top-boots also. What Nimrod can we find among the opulent and shuffling tramp in this exhaustion apparel? Now a drab spencer with many capes falls upon the floor before us; it has withstood many a shower as it walked hospitably at the door of the Opera House to accommodate the Belgravesquare for the dilatory family. We must see what the second hand clothes-market will give us for this many-caped relic of other days. Here a veiled dress and a faded bonnet, both of the latest Parisian fashion, are hustled out of the clothes-bag. What a depth of degradation to be trimmed up for the unsightly proprietors of a factory-girl, after airing themselves in the park on those graceful shoulders behind those splendid boys! "Imperial Cæsar, turned to dust and clay, stopping a hole to keep the wind away!" We heard of a chairwoman receiving a suit gown as her share of the booty. "And what have you made of it, Sally?" inquired the mistress of a house where she was working. "You will look as fine as a Duchess in it, I expect?" "Well, now: bless you, missus," replied Sally, "I couldn't for the life of me, for shame, be seen in it. Fancy me a workwoman, in satin! So I sold it for five shillings, and had a jolly good spree with it."—*Fraser's Magazine.*

FOREIGN AND COLONIAL NEWS.

FRANCE

Considerable diplomatic activity has been perceptible of late in Paris. The Emperor has given audiences and presided at Cabinet Councils daily. On Sunday he received the French Ambassadors at Vienna, Rome, and Madrid. His Majesty left for Biarritz at the close of the week. It is stated that the Emperor and the Empress will return to Paris towards the end of September, and will leave Paris for Compiègne in the beginning of October.

We read in *Galignani*:—"The Emperor went, accompanied by only two persons of his household, a few days ago, into the park of St. Cloud, and amused the royal who were witnessing the different amusements of the fête of that place. The Imperial party had not been walking about long when his Majesty was recognised by the people, who respectfully opened a passage whenever he drew near his steps."

M. Drouyn de Lhuys had interviews on Monday with M. de Budberg and Prince Metternich.

Nubar Pacha, the Envoy from the Sultan of Turkey, is the bearer of two firmans of the Sultan. The first firman withdraws the occupation of the lands bordering on the fresh-water canal which were granted to the Suez Company. The second abolishes forever the public works in Egypt. The Pacha had an interview with M. Drouyn de Lhuys on Saturday. His mission appears to be very unpalatable in Paris, and is attributed to English influence at Constantinople. The *Pays* says:—"The conditions brought by Nubar Pacha relative to the Suez Canal are said to be unacceptable to Europe. We believe ourselves able to state that M. Drouyn de Lhuys demands the strict execution of the programme agreed upon between the late Viceroy of Egypt and the Suez Canal Company."

The French nobility has recently lost four ladies of the highest rank, and distinguished for their wit and beauty, in the great aristocracy—La Marquise de Mortemart, née Anne de Montmorency; La Duchesse de Biron, née Delphine Doria; La Comtesse de Boigne, née; and La Marquise de Grammont (not Gramont), daughter of the Duc de Crillon, the last of the descendants of the friend of Henri IV.

An Imperial decree appoints the Mexican General Marquet Commander of the Legion of Honour. M. Charles de Franqueville, auditor of the Council of State, has died, at the age of 36, of a disease of the brain. M. Troplong, President of the Senate, and the principal apostle of Constitution, has received the decoration of the Legion of Honour.

Manin, the celebrated leader of the most successful movement of nullods in Paris, has died, at the age of sixty, in a charitable asylum.

The *Gazette des Etrangers* announces the death of M. Mirabile, director of the establishment of the Bains des Pyramides, Cairo.

The pleasure-hunting population of Paris is about to be deprived of the Champs Elysées as a source of amusement. The ground has been sold for the purpose of erecting a street upon its valuable ground. Gradually the public has been driven from place to place for its enjoyments—from the Boulevards de Bonne-Nouvelle and Italiens to the source of attraction.

A pamphlet in French has appeared at Paris, under the title of "France, Mexico, and the Confederate States," puts forth the interest which France has in the success of the Southern States, and the impossibility of a re-establishment of the American Union. The pamphlet maintains that the American war will only be useful to France if the separation between North and South be definitive—complete—"for," it continues, "the Confederates States will be our allies, and will guarantee us against the hostility of the North; whereas, if reunited, they will fall our hopes, and our manufacturers will obtain the cotton which is absolutely necessary for them." The pamphlet is said to have been written by a person who is now generally believed to have been published by persons interested in Confederate affairs.

The *Moniteur* alludes to the appearance of the Confederate privateer Florida in Brest Harbour to repair damages, and maintains that her reception in that harbour was in ordinary accordance with the usages of national law.

One of the privateers fitted out, or said to be fitted out, at Nantes, is that two steam-clippers, with their bows as sharp as razors, eighty metres long, pierced for 22 guns, and to be provided with engines of 100-horse power, on the building slips at Nantes; and when the two steamships are in course of construction in the yards of M. Arman, at Bordeaux, of 1,000 tons. The Government of the United States will question are to be delivered at sea twenty leagues off Belle Isle, and that of course they are intended for the Confederates.

SPAIN.

A telegram from Madrid states that the Government has resolved to make no concession to the Opposition. As the Queen supports her Ministers in their policy, the Opposition will be defeated, and have themselves, till the meeting of the Cortes, with pursuing their policy of abstention from voting at the elections.

ITALY.

The Turin journals announce that a liberal exchange in the tariff is in contemplation, chiefly as affects the export duties.

The death of Joseph in Farina, Vice-President of the Chamber of Deputies, is announced.

There has been a great trial at Naples. Signor dei Quattromini was indicted as the author of the bomb which exploded in Garibaldi's being his accomplice. The trial closed yesterday week. The Princess was acquitted, and Quattromini was sentenced to ten years' imprisonment and a fine of 2,000 ducats. Signor Bonnemere was charged as well with the Princess.

The health of Garibaldi continues to improve. The General walks about Capera by the aid of a stick, and without feeling pain.

At Bologna, on Monday, the brigand Carlo Crocco, Michele Nunco, Carnia, and Fortuno presented themselves to the commandant of the Italian troops, requesting a safe conduct for 230 other brigands who had promised to lay down their arms. Crocco, the Governor, and chiefs left Bionero for Lagopesoli, with cries of "Viva Victor Emmanuel!" and displaying the national flag.

AUSTRIA

On his return to Vienna, yesterday week, the Emperor was received with an immense enthusiasm. The streets were decorated with the Austrian and Hungarian colours, and strewn with garlands. Immense crowds saluted his Majesty with hearty cheers.

The sittings of the Reichsrath are to be resumed on the 15th inst. Much interest is felt in the debates in connection with the doings of the Emperor in the Frankfort Congress.

PRUSSIA.

The protocol of the deliberations of the Frankfort Congress, and an invitation by the Princes to the King of Prussia to give it his approval, were delivered to his Majesty by an Aide-de-Camp of the Austrian Emperor, on Saturday last. The *Nouvelliste de Francfort Nationale* the King told the messenger that he had nothing to add to what he had already said to Count Rechberg.

The Grand Duke and Grand Duchess Constantine arrived at Berlin on Monday.

The Chamber of Deputies has been dissolved by a Royal decree issued at Berlin yesterday week. The Ministerial report which precedes the decree says that there was no agreement on the budget question between the Government and the Chamber, but that the formal dissolution had been delayed until the King's return to Berlin. As there has been no change in the state of affairs in Prussia, and as "tendences have manifested themselves within the limits of the constitutional system," the Government may be enabled to restore Prussia from that position as a great power in Germany and Europe which is for some time unattainable. Fresh elections will take place immediately, in order that the new Parliament may be convoked to discuss the Budget within the current year.

The Statistical Congress is sitting in Berlin, and occupies the Chamber of Peers, the Minister of the Interior presiding. It was opened on Sunday. On the motion of the Marquis Arguila the provisional presidents and vice-presidents were confirmed in their functions. The Minister of the Interior was elected honorary president and M. Engel acting president of the Congress. All the eighteen nine-German delegates were elected vice-presidents. MM. Bodich and Schwab were elected German secretaries; MM. Raymond and Boucher, French; and Mr. Hamilton the English secretary. Two hundred and eighty-three members were present. The international committee consists of the following gentlemen:—For London, Dr. Farr; Berlin, Herr Engel; Konigsberg, Herr Doubert; Vienna, Herr Becker; Paris, M. Legoyt; Stockholm, M. Berg; St. Petersburg, M. Issmenow; and Brussels, M. Visschers. The King, in a speech addressed on Monday to the members of the Congress, expressed his sense of the value of their labours, and a hope that they would turn to the advantage of Prussia.

According to the *Banque Gazette* of Berlin, 30,000,000f. are to be expended in the improvement of the Prussian fortresses, particularly those on the frontiers.

DENMARK.

A telegram from Flensburg brings news of a fact not favourable to the position of Denmark in her quarrel with Germany. It is there that the Lower House of the Schleswig Diet has declined to elect delegates to the Danish Reichsrath. The refusal means that Schleswig does not wish to be incorporated with Denmark, but would prefer to remain in its old connection with Holstein.

The *Morning Post* announces that as it has "reason to believe," the Cabinets of Copenhagen and Stockholm have concluded a treaty of alliance for the defence of the Danish territories against any German aggression.

SWEDEN AND NORWAY.

The elections for the provincial assemblies have terminated throughout the whole of Sweden. These bodies, called for the first time to regulate the affairs and special interests of the provinces, are to enjoy a great administrative power and considerable influence. They represent a total number of 1022 deputies, elected without distinction of orders. According to the result of the present elections, 409 votes have been given to the burgess class and to liberal ideas, and 419 to the conservative principles professed by the other three orders—nobles, clergy, and peasants. Taking into account, therefore, that the agricultural class in Sweden represents seven-ninths of the whole population, the triumph of progress manifested by the electoral votes cannot fail to attract notice.

The Norwegian Budget, fixed for the three years which have to run until the meeting of the new Storthing in 1866, is naturally 4,587,600 species (of, 8d.) for the expenses, being the highest amount ever known in Norway.

RUSSIA.

The Hereditary Grand Duke has been appointed Hetman of all the Cossacks; and the Emperor, by ukase, has conferred fresh dignities on Menzoff, in recognition of his long and glorious services.

In Poland matters go on as usual. Accounts of desultory fights, with varied results and with frightful casualties, make up the total of the telegraphic despatches. In Warsaw the Russian authorities are flying at small game. A large number of ladies have been arrested, and three of them severely flogged, in order to extort from them the names of persons for whom they and others made insurgents' uniforms.

The *Journal de St. Petersbourg* denies the rumour concerning new arrangements by Russia in the Polish affairs, and declares that the Emperor considers his first duty to be the re-establishment of order in Poland, and then he is determined to fulfil his international obligations, his sanction on the Polish question has undergone no change.

The Government, no doubt with the view of alleviating the peasantry from any affection for the Polish insurgents, has issued a decree under which the peasants of the Ukraine are to become proprietors of their land on paying a certain amount of purchase-money to Russia.

The rumour that the Grand Duke Constantine was about to relinquish the viceroyalty of Poland is shown to have been well-founded; for a telegram from Berlin informs us that the Grand Duke and his consort arrived on Tuesday in that city, and that, after visiting the King of Hanover and the Grand Duke of Baden, they will proceed to England, in which country they intend to spend some time. According to *Galignani*, the Grand Duke has given it out that his consort will not come to England, but will proceed at once to the Crimea, and from thence to Cannes, for the winter.

From the Black Sea there is news of another Russian aggression. A Turkish vessel has been seized at Anapa by the Russians, notwithstanding the protests of the foreign Consuls.

AMERICA.

THE DESTRUCTION OF FORT SUMTER.

Fort Sumter, the seizure of which by the Southerners was the original deliberate act of war, while in possession by them as the principal defence of Charleston helped to keep open their main channel of external supply, has succumbed to the combined attachments brought to bear against it. Southern accounts admitted that its resistance was over, and that the moment at which its ruins must fall into the hands of the enemy was only a matter of hours.

After an incessant bombardment of six days—from the 17th to the 23rd of August—Fort Sumter was reduced to ruins. Its guns were all disabled, and the Federal shot made a clean sweep of the place. Major Beatti, who commanded the fort when ordered, however, to hold it to the last. On the 22nd General Gillmore demanded the surrender of the fort and Morris Island, threatening to bombard Charleston if the demand were not complied with. General Beauregard replied that General Gilmore was guilty of a violation of the laws of war, and pronounced Charleston safe, however, as General Gilmore gave notice to non-combatants to leave the town; and on the 24th fire was opened upon it, several shots filled with Greek fire taking effect. The Southern journals reported that Sumter had not been allowed for the removal of non-combatants, and General Beauregard replied that the town of Charleston, General Gilmore replied by redemanding the surrender of the forts.

The Federal fleet was, according to the latest account, preparing to move up the harbour.

General Gilmore officially reports, on the 24th ult., the practical demolition of Fort Sumter; that after seven days' bombardment it is a shapeless and harmless mass of ruins. "A longer fire," he says, "would make it a greater mass of ruins, but scarcely more powerless for the defence of Charleston Harbour. It is unnecessary to continue to fire on the ruins. I have established batteries on my left, within effective range of the heart of Charleston, and shall continue my fire, after giving General Beauregard due notice. My projectiles catered Charleston, and General Beauregard designates them the most destructive missiles ever used in war."

The batteries which destroyed Fort Sumter were located at distances varying between 1,200 and 1,800 yards, and consisted of seven in every.

Forts Moultrie, Greig, and Johnston, and the batteries on Sullivan's Island, kept up a heavy fire on Morris Island, but succeeded in doing little damage.

During the bombardment on the 18th, a shot from Fort Wagner broke a piece of the interior lining of the ironclad Cattskill, and struck the heads of Commander Rogers and Paymaster Woodbury, killing them instantly.

The *Richmond Examiner* says:—"If the Federals captured the Charleston and Savannah Railway, Charleston would not be taken, but it would not enable them to hold the city, as General Beauregard can maintain himself against any force sent, or likely to be sent, against him."

Two blockade runners entered Charleston on the 23rd.

The New York *Herald* of the 28th, in commenting upon the use of the "Greek fire" in the siege of Charleston, says:—"Although, as an agent of destruction, it has no equal, civilisation until now, by that tacit understanding among Christian nations which respects the use of unnatural weapons, has refrained from its employment even in the most bloody and desperate campaigns. It has been left for this Administration, which claims to be waging war in the name of philanthropy, to conjure up this liquid demon as a fit ally to the purpose of extermination." Further: "If a fleet of ironclads should appear in New York harbour, and at the midnight hour should throw their deadly missiles among us, this liquid and unquenchable fire, into the heart of this metropolis, while standing amid the ashes of our houses, and gazing upon the crisped and burning bodies of our wives

and children, we could perhaps appreciate the savagism of that style of warfare."

THE ARMIES IN VIRGINIA.

General Lee's army, estimated at 60,000 men, is around Culpeppe Courthouse, General Longstreet holds Fredericksburg, and General Stuart is guarding the fords of the Rappahannock.

There is a considerable Confederate infantry force at Port Conway, between the Potomac and the Rappahannock, who are continually sent conscription. General Kilpatrick had a skirmish with them, but was compelled to fall back from his reconnaissance.

A letter from the South Side of the army of the Potomac, dated Aug. 28, gives an account of the presentation of a sword to General Meade by the Pennsylvania Reserve Corps. The presentation was made by the officers and men of the first division of the fifth corps, which was the division long commanded by General Meade, and now commanded by General Crawford.

A Washington despatch of the 27th ult. says:—"Advices from the army of the Potomac state that no offensive operations of a general character have taken place during the recent warm weather, the cavalry under General Pleasanton has been constantly on the alert, scouring, reconnoitring, and picketing, and not a day has passed which has not added to the list of rebel prisoners, and some of these captures are of an important character. Over one hundred prisoners on the Rappahannock below hold friendly intercourse daily, but no intelligence of importance is obtained by these means. The rebels generally assert that the heavy fighting is over for the season in Virgin a."

OTHER WAR NEWS.

The advance of General Rosecrans's army appeared before Chattanooga on the 21st ult. and threw shells into the city, where General Kee Johnston is commanding, having superseded General Bragg, who had gone to Atlanta. The Confederates opened fire from nineteen guns, which did little damage. The Federals did not reply to the Federal fire. The Federals disabled two steamers moored at the wharf, but were unsuccessful in their attempt to destroy the pontoon bridge opposite the city. The Confederate works upon the river are very strong, the parapets being fifteen feet wide. There are several water batteries on a level with the river. The Confederate divisions are at Chattanooga, and there is a large Confederate force in the neighbourhood. It was reported that a large force of Confederate troops was marching to assail the place in the rear, and that another had cut the communication between Bragg and left wing of the army under Johnston.

The guerrillas of the Confederate chief Quantrell have entirely destroyed Lawrence, Kansas. The attack was made at midnight. Fifty prominent citizens, including the Mayor, were killed in sight on their houses, surrounded by their families. Over one hundred citizens were wounded, and every five-year-old male in the Senator Lane escaped. Lawrence is principally inhabited by New England emigrants, between whom and their Missouri neighbours there were strong antagonisms. It will be remembered that the Lawrence massacre will lead to sanguinary border warfare. Quantrell's guerrillas are being hunted down, and left-wing Missourians patrol the border counties of Missouri. Large numbers of them have been killed and their horses destroyed.

A Federal expedition has proceeded to Granada, Mississippi, forcing the Confederates to destroy a large amount of railroad stock.

A war-steamer, and elegantly-fitted yacht, recently hoisting the English and Confederate flags, was stated to have run past the Federal cruisers into Wilmington, and to be ready to run out whenever opportunity offers to have entered that port within a short time. The steamer Cronstadt has been captured off Wilmington.

The *Port Royal New South* of Aug. 27, has a paragraph stating that the Confederate steamer Evensdale, with a cargo of cotton and a large number of passengers, including a full complement of officers for a new pirate craft at Nassau, has been lying several weeks in the Savannah River. On the night after she attempted to run out of the harbour, and was overhauled by the United States steamer Vixen. Twenty-two of her passengers were captured.

A destitute family in Natchez, below Vicksburg, to the effects that 100,000 bales of Confederate States' cotton have been captured there.

THE DRAUGHT IN NEW YORK.

The draught had terminated in New York and was to commence in Brooklyn on the 28th ult. The proceedings were accompanied with uniform quietness. Many prominent citizens were among the draughted, including the Mayor of Meyor. The Mayor has given a bond for the draughted, including the Mayor of Meyor. The Mayor has given a bond for 3,000,000 dols. for the victims of the draught. Notwithstanding the action of the Mayor, the board of councilmen pledged themselves to pay the \$300 to the drafted men exempted who could not pass the measure over his veto. The *New York Herald* says the city were in military possession, armed in the completest manner, showed themselves in every quarter, and all the public squares were transformed into camps for newly-arrived regiments, sent specially for the purpose of preserving order during the draught.

The New York Board of Supervision has passed an ordinance appropriating the sum of \$2,500,000 for the benefit of the families of the firemen, police, and heads of families. The Mayor has signed this ordinance, which it is supposed will settle the difficulty between the municipality and the State.

General Dix has published correspondence to prove that he called on the Federal Government in vain to enforce the draught in consequence of the delay of Governor Seymour in replying to his application for the necessary troops.

An excited meeting of draughted Democrats was held in New York, at which the conscription was denounced as a cruel and inhuman measure, and resolutions were passed against its consequences.

THE CONFEDERATES ARMING THEIR NEGROES.

A New York telegram of the 29th ult., brought by the Hibernian, contains the intelligence, of which the importance can hardly be exaggerated, that the Confederate Congress has voted a bill, signed by Davis, after a consultation with Governors of the Confederate States, has empowered the President to arm negroes, who are to be rewarded by their freedom, and a grant of fifty acres of land to each man at the end of the war. This intelligence was, we are told, derived from Southern papers received at Montreal on the 29th.

However gloomy may be the prospects of the Confederates, there is no abatement in the energy of their supporters. Whatever the result may they insist the South will never submit. Richmond may fall, and Charleston may be burnt to ashes, but the South must and shall be independent.

A MESSAGE FROM AMERICA TO EUROPE.

Mr. Seward has issued a circular despatch, dated Aug. 12, to the United States Consuls in Europe, describing with great fulness and confidence the military and naval operations of the present year in America. In this letter he has endeavoured once more to dispel the "prejudice" which, as he says, has caused English and French statesmen to "overlook the importance of the Government and to maintain the Union and preserve the integrity of the Republic could not be successful." He then proceeds to recapitulate the Northern armies since August, 1862, and admits that no great progress has been made by the Federal arms in the East, but declares that in the West 200,000 square miles have been subjugated by the Federal arms. Every "insurgent port is blockaded, besieged, or occupied, while the central and western Federal armies are pressing into the very heart of Confederacy" in two. The "insurgents" have lost one third of their whole force, and the last conscription ordered by "the leader of the rebellion" is the strongest proof that the insurgents will not muster more than 70,000 to 95,000 men. The Federal armies are everywhere superior in numbers, and a draught of 200,000 men is now being large voluntary enlistments take place, and about 70,000 negro troops will even be organized. The North is abundantly supplied with provisions and stores, and its loans are readily taken at par. These facts the Consuls are to represent "in such a way as may be most effective to convince those who seek a renewal of commercial prosperity through the restoration of peace in America that the quickest and shortest way to gain that desired end is to withdraw support and favour from the insurgents, and to leave the adjustment of all domestic controversies exclusively with the people of the United States."

MISCELLANEOUS.

General Pemberton, who surrendered Vicksburg to the Federals, is reported to have died at Selma, Alabama,

The desertions of substitutes for draughted men having become so frequent in the Federal army, it is officially announced that in all such cases the extreme penalty of martial law will be administered.

The *New York Times* urges the Government to prepare for a war with France. Such a war, it says, is not certain, but it would be dangerous and foolish to act as if it were impossible. The *New York Times* has little doubt that Napoleon has made a secret treaty with President Davis for the cession of Texas, as the equivalent for recognition and substantial aid. The *New York Herald* asserts that the troops now in Texas will be sent to the Potomac.

A few days before the departure of the last mail from New York a shocking steam-boat disaster occurred in Cleveland Ohio. The steamer City of Buffalo, while leaving the Reserve Basin, exploded one of her nearly her full load, when a negro, carrying a percussion-shell on board, let it fall, causing an instant explosion. The vessel burst, and the fire communicated to the ammunition on board, blowing the steamer to pieces. Out of 100 men on board, only four escaped.

The Hibernian visited the coast of the North States between the 18th and 22nd of August. Among the disasters reported to the founding of the United steamer brig Blackbird, which went down with all hands, save one man.

CANADA.

The Canadian Parliament had passed the Address by a small majority, after several amendments, charging the present Ministry with illegal and unconstitutional conduct.

A telegram from New York announces the arrival of Lord Lyons and suite at Hamilton, Canada West, on the evening of the 29th ult. They were to remain until the 30th, and then proceed to Montreal and Quebec.

INDIA.

By the Bombay mail we learn that all within the territory of British India are quiet, and that an improving trade and growing industry were generally apparent. Considerable uneasiness was manifested among merchants arising from the unsettled state of Afghanistan, in which three political parties were striving for the mastery; and the relations of the Ameer with the Khan of Khelat were not satisfactory. There was also some apprehension of a conflict with Burmah, on account of the unsatisfactory treatment of the British envoy at the court of the King. Serious loses had occurred in the Punjaub and Scinde in consequence of very extensive floods, and the huge towns of the north-west Provinces had been driven from the cholera panic. The best evidences of identity of the presumed Nana Sahib are said to be furnished by a scar on the left arm, which he removed to Cawnpore, where the doubts respecting him cannot fail to be cleared up.

CHINA AND JAPAN.

The China news tells of greater quiet in that country. A commercial treaty had been signed at Yeddo between

In Japan a civil war was the consequence. But the relations with foreigners are stated to be pacific. It would, therefore, seem that the Tycoon's Government has chosen to run the dangers of a quarrel with the Mikado and the hostile Princes rather than to run the risk of a war with England.

NEW ZEALAND.

The last lobes that a Maori war might yet be averted seem to be dispelled by New Zealand advices. According to the brief telegram which has reached us the Waitara (Waikato ?) natives have "declared war," and 4,000 of them are in arms. Governor Gore Browne, therefore, had consequently been compelled, in order to provide for the defence of Auckland, to withdraw his troops from the neighbourhood of Taranaki.

LATEST NEWS FROM ABROAD.

The following telegrams have been received through Mr. Reuter's office :—

FRANCE.—Paris, Sept. 10, — The surrender of the five brigands taken from the Roman territory was accomplished with uniform quietness. Many prominent citizens were among the draughted, including the Mayor of Meyor. The Mayor has given a bond for 3,000,000 dols. for the victims of the draught. Notwithstanding the action of the Mayor, the board of councilmen pledged themselves to pay the \$300 to the drafted men exempted who could not pass the measure over his veto. The *New York Herald* says the city were in military possession, armed in the completest manner, showed themselves in every quarter, and all the public squares were transformed into camps for newly-arrived regiments, sent specially for the purpose of preserving order during the draught.

The New York Board of Supervision has passed an ordinance appropriating the sum of \$2,500,000 for the benefit of the families of the firemen, police, and heads of families. The Mayor has signed this ordinance, which it is supposed will settle the difficulty between the municipality and the State.

General Dix has published correspondence to prove that he called on the Federal Government in vain to enforce the draught in consequence of the delay of Governor Seymour in replying to his application for the necessary troops.

An excited meeting of draughted Democrats was held in New York, at which the conscription was denounced as a cruel and inhuman measure, and resolutions were passed against its consequences.

CHURCH AND UNIVERSITIES.

A magnificent memorial-window, in honour of the late Prince Consort, has been placed in St. Mary's Church, Nottingham.

The Bishop of Durham preached in St. Nicholas Church, Newcastle, on Thursday week, on the annual meeting of the Diocesan Society of the Sons of the Clergy.

The clergy of the diocese of Natal have addressed a decided protest to Dr. Colenso against his heretical teaching. The protest is signed by the most influential of the clergy, led by the Archdeacon, and speaks in no mild terms of the writings of the Bishop of Natal.

It is understood that the Bishop of Norwich has commenced proceedings against Mr. Bunnett, Rector of Church, Suffolk, for having introduced innovations into the celebration of Divine worship in the parish church.

A tablet is about to be placed in St. Petrox Church, Dartmouth, to the memory of the late Rev. J. W. Weeks (of which parish he was a native), formerly a missionary to Sierra Leone, missionary in Africa, and later in the Bishop of Sierra Leone.

On the last, the church of Nantclda, a chapelry in the parish of Cantreff, Brecon shire, was opened for Divine worship by the Lord Bishop of St. David's. The church has been restored from the plans of Mr. Charles Buckeridge, architect, Lower Brook street, at a cost of about £400.

The church of Antingham St. Mary, Norfolk, was on the 4th ult. re-opened for Divine service, after undergoing a complete internal restoration. A sum of £482 was expended in the work, to which the patron (Lord Suffield) and the Rector (the Rev. J. English) each contributed £100.

On Sunday a new organ, by Messrs. Forster and Andrews, Hull, with thirty stops, the gift of A. B. Tomlinson, Esq., of Biggins' House, was inaugurated in the parish church of Kirkby Lonsdale, Westmoreland, by Dr. Spark, organist of the Town hall, Leeds.

The Rev. Joseph Ogle Whatton, who is in his eighty-eighth year, recently left Bishopstoke Rectory, after breakfast, for London, where, in the church of St. Clement Danes, he officiated in the marriage of his infant great-grandchild, the daughter of Mr. P. O. Papillon, M.P., and after the ceremony returned to Bishopstoke to dinner, delay a journey, in going and returning, of more than 160 miles.

On the 2nd inst. the Bishop of Rochester opened the new parish schools at Warnham, Horsham. All the grants were divided by the Bishop at luncheon by Mrs. Grant at Warnelegore, and the children of the parish, 150 in number, were entertained at the house. The schools are built to accommodate 120 children. The Rector was desired by the Bishop to make known his Lordship's disapproval of the use of tobacco in the schools.

A short time ago the Archbishop of Canterbury visited Ashford on the opening of an iron mission church intended to provide for the spiritual instruction of the numerous workpeople employed at Gunsmiths, who congregate in a neighbourhood called St. Faith's-green. Immediately adjacent to the church a commodious vicarage was erected at the cost of Mr. Jessee Predrick. The Archbishop, Lord Charles Russell, Mr. Whatman, and other gentlemen spoke at considerable length.

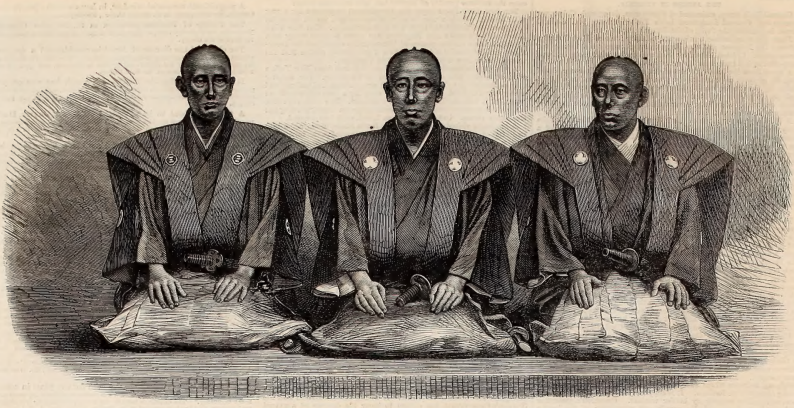
The beautiful church, which has been for ten years in course of erection, was consecrated on the 4th inst. the consecrated ceremony took with much ceremony. The church is built in the Second Pointed style of English architecture, and has been erected at the cost of the Rev. T. R. Lucas, to the cost of £20,000. The internal work is exceedingly rich. Statues of the apostles and of other saints are placed over the arches between the nave and the aisles; the principal windows are filled with designs in stained glass; while the chancel is decorated in polychromy, and has the roof painted in blue, with a beautifully-executed stone screen, enriched with coloured marbles. The chancel is separated from the nave by a handsome parquet, and contains a pair of right hills. The church was designed by Mr. Ferrin, the diocesan architect, the builder being Mr. Jones, of Bromsgrove, and altogether it is one of the most magnificent modern churches in Somersetshire.

The Synod of the diocese of Argyle and the Isles was held on the 26th ult. In the absence Bishop (through ill-health) the presidential chair of the Bishop and the attention of subscription. On the latter point the Bishop said he was glad to see that the subscription had taken the opinion of the Synod. Subsequently, at the invitation of the Bishop, the members of the Synod proceeded to consider the question of holding a Synod with reference to the existing formularies or of making alterations in them. A brief discussion ensued, in which the Rev. Messrs. Campbell, Wood, and Gunning took part—Mr. Wood having been authorized by several of the clergy to speak in their behalf. The general impression of the meeting was that the machinery of the Synod, recognising the importance as well as the depth and delicacy of the questions at issue, were unwilling at present to take any recommendation, to remain themselves to any formal expression of opinion upon the matter.

On Wednesday week a new Congregational church, or church, to be dedicated to St. James, was laid at Peckmoor, Wigan, a rising neighbourhood, in which many new houses and other works have lately been and are now being erected. The *Manchester Guardian* states that the edifice will be built and endowed in memory of the late Rev. Dr. Raffles, by Edward Eckersley, of the firm of James Eckersley and Sons, cotton-spinners, Wigan. The Congregation will adopt left a handsome legacy towards the object, and the funds having been further augmented by Mr. N. Eckersley, the surviving brother of the deceased donor. The Rev. Thomas Raffles, D.D., son of the late Bishop of Ripon at Ripon, the Bishop of Norwich at Norwich; Oct. 11, the Bishop of Winchester at Farnham Castle, the Bishop of Lichfield at Abbots Bromley; Dec. 20, the Bishop of Peterborough at Peterborough; Dec. 20, the Bishop of London at the Chapel Royal, Whitehall, the Archbishop of York, the Bishop of York at Winchester at Farnham Castle, the Bishop of Chichester at Chichester, the Bishop of Lichfield at Ingleby, the Bishop of Oxford at Christ Church, the Bishop of Hereford at Hereford, the Bishop of Bath and Wells at Wells, the Bishop of Chester at Chester, the Bishop of Worcester at Worcester, the Bishop of Oxford at Oxford.

PREFERMENTS AND APPOINTMENTS.—The Rev. Lord Says and Sele to be Archdeacon of Hereford. Rev. T. Dixon, Incumbent of Holy Trinity, South Shields, Durham, to be Rural Dean. Rev. J. D. Hodgson, Vicar of Great Stanmore, to be Rural Dean of the first portion of Harrow of Marlborough, Sarum. Rev. W. Howarth, Rector of Whitton-cum-Thurlton, to be Honorary Canon in Norwich Cathedral. Rev. Sir William Hale Maule Curzon and Frecester in Carlisle Cathedral. *Retiries*: The Rev. J. Bacon to Wyverstone, Suffolk. Rev. J. Langshaw-Jackson, Rural Dean, Hillsborough. Rev. D. W. Evans to Child Okeford, Dorset; Rev. C. R. Oakley to St. Paul's, Covent-garden; Rev. J. Ellacombe, Honorary Canon, Gloucester; The Rev. Mr. Capel to Abergavenny, Monmouthshire; Rev. W. Williams to Own Aspley, Huntingdon; Rev. R. Jones to Llanfyllin, Montgomeryshire; Rev. V. Payne to Christ Church, Gloucester.—*Guardian*.

THE UNIVERSITIES AND PUBLIC SCHOOLS.—Prince Frederick of Denmark is entered at Christ Church, and will become resident in Oxford at the commencement of the next term. The Rev. Mr. Eliott, of Christ Church, has been appointed tutor to the young Prince; and the residence of Alderman Randall, of Oxford, has been engaged for the accompaniment of himself and suite. Information was received on Saturday morning of the death of Rev. F. J. A. Hort, Fellow of Jesus College, who was mastered by three Indians on the banks of the Missouri. Mr. Hort, a barrister, left England in the month of July, volunteered his services to carry a message from General Sibley to General Sumner, and was murdered in America. On Saturday morning the answer was waglad by the Sioux Indians and murdered, three others being found in his body, as well as recently other injuries.—Messrs. Macmillan and Co. announce that they have been appointed publishers to the Cambridge Local Examinations, and that the next October 1, all publications issued from the 'Learned Side' by the delegates of the Clarendon Press will be supplied by them."



At Cambridge there will be Congregations on the following days of the ensuing Michaelmas Term :—Thursday, Oct. 4, at ten; Thursday, Oct. 11, 25, 29, Nov. 12, Nov. 26, and Dec. 10, all at twelve.

The Rev. Robert Darby has resigned the office of the Liverpool Collegiate Institution his intention to deliver the prizes and certificates obtained by the pupils of this institution at the recent Oxford local examination, and also to award the annual University Exhibition. The day final for his visit is the 16th of October.

The Rev. F. A. Pentreath to be Head Master of the Aston Classical and Commercial School.

The Rev. J. Tweutyman, Fellow of Christ's College, Cambridge, to be an Assistant Master in Cheltenham College.

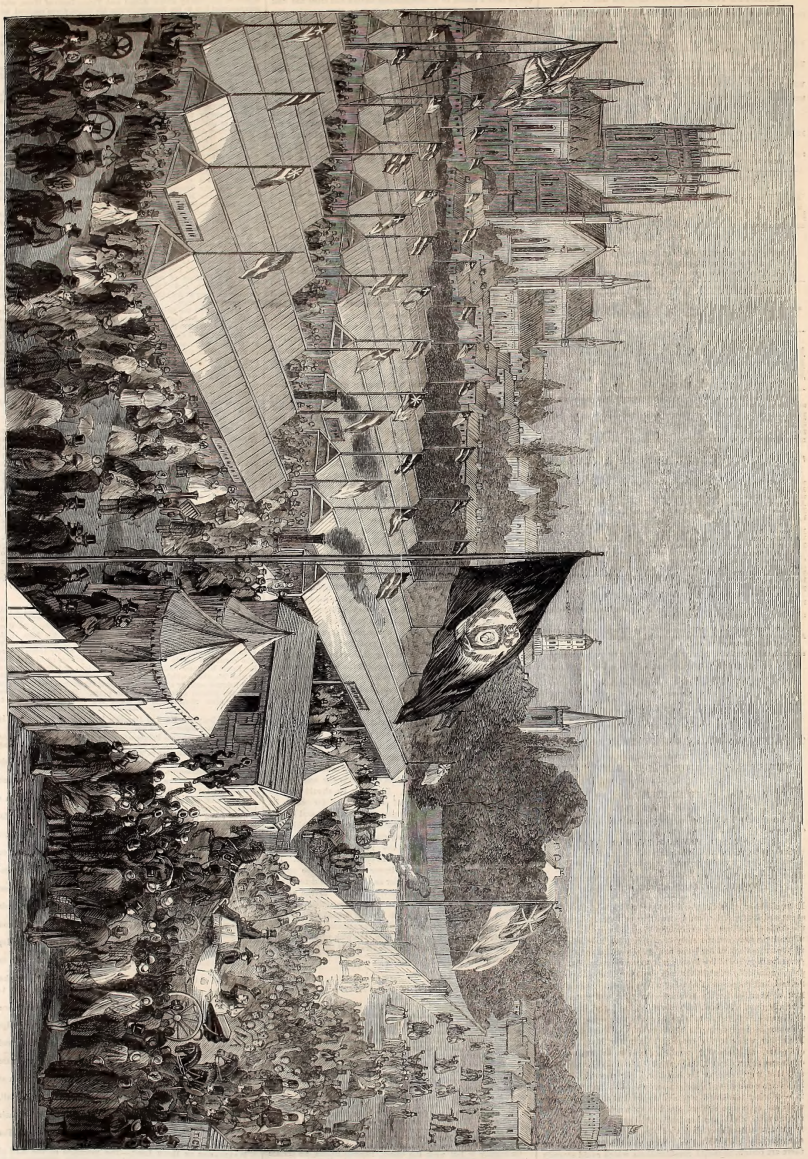
A grand dinner was given last Saturday at the Palace at Gatesd in honour of the Grand Duke of Mecklenburg.

MINISTERS OF STATE, JAPAN.—FROM A PHOTOGRAPH.—SEE PAGE 263.

THE STATE OF AFFAIRS IN JAPAN.

(From our Special Artist and Correspondent.)

Yokohama, June 28, 1863.



I arrived here a week ago, in H.B.M.'s ship Ocnus, from Shanghai. On my way out I had heard of the ultimatum having been delivered to the Japanese Government, and expected to arrive only in time to share in the looked-for hurly-burly that would follow its refusal; but upon reaching Penang we heard that a further delay had been granted, and that twenty-one days more had been given them during which to decide the momentous issue of war or peace. This was in April, and when we reached Hong-Kong we were told of further delay, and that the question was still undecided. Upon my arrival at Shanghai I found opinions divided, but the general impression was in favour of war. There were ugly rumours prevalent of the condition of things at Nagasaki. The merchants were said to have adopted measures for their defence; the Consul slept on board a ship in the harbour; the town was overrun with armed Japanese, who were insolent to foreigners; batteries were being erected, and it was expected that short notice would be given to strangers to leave so soon as war was decided upon. Meanwhile, as if to strengthen these unfavourable impressions, people were arriving constantly at Shanghai from Japan, who helped to keep up the excitement. Upon her way the Cormorant met the Racehorse off Cape Chickakoff (Japan), who gave us news that peace had not been broken, and was likely to be maintained; but no sooner had we arrived in Yokohama Bay than the tide again turned, and the Centaur informed us that war was imminent, that the Admiral had given the merchants eight days to embark themselves and their valuables, and that active operations would soon after commence; so that upon landing we expected to find the town abandoned by all save an insolent and quarrelsome soldiery. But it was quite otherwise. The only symptom of disturbance apparent was a written notice posted in the hotel, to the effect that boarders, &c., would please to settle their current accounts, in ready money, before the 27th. The streets were their ordinary aspect; the shops were open, the people affable and smiling as ever; two-sworded men, so far from provoking quarrel, were singularly polite; and the Europeans seemed even less conspicuously armed than usual. Indeed, I only met two or three carrying weapons, and one of them certainly was an American. We dined out in the evening, and walked about the town afterwards, unarmed and unmolested. And yet the air was rife with vague rumours, and the question of peace or war was evidently in men's minds, if it did not much disturb them. This state of affairs continued for several days, when the townsfolk began to talk about the expected arrival of Sioto-Baiki, the Mikado's Envoy, with the compensation-money demanded for the murder of Mr. Richardson; and were enough one evening a Japanese steamer arrived with the sum on board. The authorities were exceedingly anxious to discharge their task at once, under the friendly shade of night; but Colonel Neale was firm, and next morning, before break of day, the sleepers of Yokohama were roused by the rattle of carts filled with dollars proceeding from the port towards the English Legation. Again the Japanese tried hard to induce Colonel Neale to accept the bulk as correct in amount and take it from them without further publicity; but this, too, was as firmly declined, and they had to count it out in the presence of the public and the laughing coolies. In their irritation an order, purporting to come from the Mikado, was delivered to the Representatives of foreign Powers, that, the money having been paid and satisfaction given, strangers were at once to leave. To this still stronger resistance was offered. The French Admiral at once declared that, in the event of force being attempted, he would hold the settlement. The other Representatives were equally plain-spoken, and an apology was shortly offered, re-establishing the *status quo*. The money is now being taken on board the Pearl from Colonel Neale's quarters. Meanwhile, precautions are not neglected. A battery is being constructed by us on a bluff commanding the town; strong pickets are thrown out at night; Applin's horse are quartered in the yard of the British Legation, and the Armstrong guns on board the ships are watched and ready. I fancy that the Japanese are singularly aware of this last fact, and have a peculiar disinclination to provoke them. The morning after the money was paid a grand promenade of blue jackets took place. Accompanied by their band, some mountain howitzers, and an Armstrong gun, they marched through the town towards Kanagawa, and drew up in front of the Governor's house. The weather was lovely and the music most inspiring. Ready and ingenious as ever, the Japanese had in a few hours spread abroad the report that our imposing visit to the Governor was for the express purpose of acknowledging the condescension of the Japanese Government in paying the compensation-money.

It is rumoured now that a new treaty will be entered into with the Mikado. This should have been done long ago. I have no doubt that Satsuma will only be too glad to have friendly intercourse with the outer world; and I shall not be surprised if it be found that we have mistaken the temper of the Princes, and that many of them have been and still are our friends; but that the Government of the Tycoon, which has all the ports in its hands, has maligned them, so that it should alone profit by foreign commerce. As it is the customs revenues go to the Tycoon only; and the Princes are naturally jealous and irritated at getting no share of the golden shower. Among other pleasant rumours, the prospect of a civil war is beginning to be familiarly discussed by the Japanese, with whom the Tycoon is by no means popular. I take this opportunity of sending a sketch of the counting of the indemnity-money at the British Legation. Two Japanese custom-house officers are present, seated on chairs, and three Chinese Shroffs are charged with seeing that the money is right in amount and good in quality. As it is counted it is packed in boxes for embarkation on board the Pearl (the subject of my other sketch). On its way thither it is escorted by Applin's Horse, and two marines guard each box. Japanese boys enjoy the sport, and the Yokonins look on with open eyes and ejaculate, "Marohodo!" which is their equivalent for our "You don't say so!"

The post closes to-night. There is no more news. I have taken a small house here, and shall soon find myself in working trim. Officers and merchants begin to ride about the country freely again, and things look pacific. But there is no certainty in life—assuredly not in life in Japan.

SKETCH IN JAPAN: CONVEYING THE COMPENSATION-MONEY TO H.M.S. PEARL.—FROM A SKETCH BY OUR SPECIAL ARTIST.—SEE PAGE 263.

Price One Shilling, beautifully Printed in Colours.

THE ILLUSTRATED LONDON ALMANACK

FOR 1864

will shortly be published, containing Fresh Water Fish, from Pictures by H. L. Bowlby, with Interesting Descriptions, by Jabez A. Bunyan, printed in the highest style of the Chromatic Art by Leighton Brothers; Twelve Plates of Art Engraving; Astronomical Diagrams of Remarkable Phenomena, with Explanatory Notes; and Twelve Original Designs as Headings to the Calendar, by F. W. Fairholt.

It contains also Lists of the Royal Family of Great Britain; the Queen's Household; her Majesty's Ministers; and Public Offices; Law and University Terms; Fixed and Movable Festivals; Anniversaries and Remarkable Events; Times of High Water at London Bridge; Tables of Stamps, Taxes, and Government Duties; the Christian, Jewish, and Mahometan Calendars; Commercial Symbols and Abbreviations; and a considerable amount of useful and interesting information, rendering the ILLUSTRATED LONDON ALMANACK an acceptable and elegant companion for the library, counter, or drawing room; while, as regards price, it is the cheapest Almanack published.

The ILLUSTRATED LONDON ALMANACK is inclosed in an elegant cover printed in colours.

Published at the Office of the ILLUSTRATED LONDON NEWS, 198, Strand, and sold by all Booksellers and Newsagents.

TO ADVERTISERS. — Advertisements for the ILLUSTRATED LONDON ALMANACK for 1864 must be received at the Office on or before the 22nd inst. Office, 198, Strand, Sept. 12, 1863.

On SATURDAY, OCTOBER 3rd, will be published

A DOUBLE NUMBER

OF THE

ILLUSTRATED LONDON NEWS,

WITH WHICH WILL BE ISSUED

TWO ENGRAVINGS, PRINTED IN COLOURS,

ENTITLED

"THE VILLAGE OF ARGENIO, LAKE COMO, ITALY,"

From a Painting by G. PETTITT; and

"LITTLE LOVES,"

From a Painting by E. HAVELL.

The accompanying Number and Supplement will contain a variety of Fine-Art and News Illustrations.

Price of the Double Number, 10d; Stamped, 1s.

THE ILLUSTRATED LONDON NEWS.

LONDON: SATURDAY, SEPTEMBER 19, 1863.

It would be ungrateful indeed if Florence Nightingale were to speak and England be found unwilling to listen. Long after the deeds of the present generation shall belong to history, it will delight us to record the story of the English lady who gave up the attractions of her home and social position to follow the generous impulses of her heart; and whose very shadow, as she passed noiselessly at night through the death-haunted wards of Scutari, had the power of blessing where it fell. There was no lack of nobler female heroines—the time will never come when England will want for bravery of hand and heart—but to Florence Nightingale belongs the credit of bringing womanly influence to bear upon the condition of the English soldier. From her we look for especial regard for him in times of peace, as from her we would assuredly be expected to originate any future plans for his care when public steel and lead may hereafter lay him low. In a word, Florence Nightingale has earned the right—may she live long to exercise it!—of being heard and attended to so often as she pleases to topic us upon the subject she has so much at heart. The subject upon which she has lately addressed the public is an important one—the condition of the soldiers who hold the Queen's vast Indian Empire. Were other motives wanting, there are certain financial considerations which could scarcely fail to recommend this subject to the English mind. When it is considered that every British regiment which may be marched out to read a lesson to a troublesome Indian hill tribe has cost the country, say, £160,000 to bring it into that position, the importance of economising the lives of the men so far as possible becomes, putting the question of humanity aside, apparent. What shall be said, then, when we hear of a fearfully high death-rate at the Indian stations in times of peace, when nothing is to be gained by the sacrifice of the soldier's life; when, further, we are told—and proof abundant is offered for the assertion—that the causes of this mortality are patent, well known—nay, notorious; and, lastly, that they admit, and have all along admitted, of certain and absolute remedy? In Miss Nightingale's own words, "The epidemics which devastate India arise from causes which exist in what one may call a state of *absolute perfection* in the Indian towns, but which have been removed with entire success in this country."

The circumstances which have once more drawn Miss Nightingale from her seclusion may be briefly stated. Under the presidency of the late Lord Herbert, who was emphatically the soldier's friend, a Royal Commission upon the sanitary state of the Army in India was nominated. It completed its investigations last Standay, by which the returns procured from all the principal stations of India were submitted in manuscript to Miss Nightingale for her comments. These she has separately published, enriched with sketches and diagrams. They are conclusive enough. "If," writes Miss Nightingale, "in a single station in India there were a good system of drainage, water supply, and cleansing for itself and its bazaars, with properly planned and constructed barracks, and hospitals provided with what is necessary for occupation and health; a station where the men are not encouraged to drink, and where they are provided with rational means for employing their time; to such a station my remarks do not apply. But I have not found it."

The main causes of the mortality among our Indian soldiers are, undeniably, want of cleanliness in their barracks, want of occupation for their lives. Bad water, bad drainage, imperfect ventilation, and overcrowding are minor causes. Let there be silence in the most favourable climate; but when to the above predisposing causes of disease are added high living and indolence, the result in India is fatal. And yet, although the Indian officials, by their own showing, admit their long and perfect acquaintance for the above facts, nothing has been done, nor, unless in obedience to a movement begun at home, does anything seem likely to be done, to better the condition of the troops that hold our Indian Empire. To such a pitch of culpable carelessness has the system, or want of system, been carried, that the Indian stations to which troops are sent to recruit their health are often more unhealthy than the quarters in the plains, from which they have been removed. Again, indolence in India is a dangerous indulgence, which too many English residents allow themselves from choice, but which is generally forced upon the soldier. Except morning and evening parades, and his turn on guard, he has nothing in the world to do. Many of the men spend eighteen out of the twenty-four hours of the day upon their cots, rousing themselves only to eat and drink. No other course of life could more certainly engender disease and accelerate mental and physical decay. If soldiers were wanting, it would be found that in the fact that when the services of the troops in the field are required, even in the most unfavourable weather, there is little sickness or epidemic disease among them. Indeed, it is certain that the soldier in India is never better than when he is exposed to the harass and fatigue of field service, and that war, so far from claiming a larger proportion of victims, is positively more favourable to his chances of life than peace.

Sad as these facts are, they admit of remedies which should be at once applied. Nothing should be allowed to interfere with the immediate reform of the barrack accommodation, while steps should at once be taken to provide the soldier with rational, recreative occupation. Somehow, he should be kept employed. The construction of public works, for which he might receive some additional pay, would interest and benefit him. Workshops for trades might with advantage be established. Farmyards and gardening, libraries, clubs, and gymnasia should follow. Above all, one of the most valuable of Miss Nightingale's suggestions should at once be acted upon. The hope of rising to a higher and a better position in the service should be held out to the soldier as an inducement to refrain from hurtful indulgence, and devote himself to the serious business of life. Her recommendation is strengthened by the fact that Sir Charles Trevelyan at Madras acually carried out the theory, and selected by competitive examinations among the regiments a certain number of men, the pick of the army in the Presidency, for admission to the service of the Government in the civil and military departments.

THE COURT.

The Queen, accompanied by the members of the Royal family and attended by her suite, took her departure from the Castle of Rosenau on Monday, on her return to England. Her Majesty reached Kranichstein, near Darmstadt, on Tuesday morning, and met with Princess Louis of Hesse. The Queen took leave of the Princess and Prince Louis of Hesse at Kranichstein on Tuesday evening, and arrived at Antwerp at half-past eight o'clock on Wednesday morning. The Queen embarked immediately on board the Royal yacht Victoria and Albert (Captain the Prince of Leiningen), accompanied by the Admiralty steam-vessels the Black Eagle and the Vivid. The Royal squadron anchored for the night in Margate Roads, at seven o'clock, and on the following morning proceeded up the river to Greenhithe, where the Fairy (steam-tender to the Victoria and Albert) was lying in readiness to convey the Queen and her suite from the Royal yacht to Woolwich. Her Majesty and the Royal family embarked on board the Fairy on Thursday morning, and steamed up the river to Woolwich Arsenal, where the Royal travellers disembarked, and immediately proceeded on their route to Windsor Castle.

On Sunday in last week the Queen, Princess Helena, and Prince Alfred attended Divine service in the Chapel at the Kallenberg.

On Monday the Queen visited Rosenau. His Majesty arrived by special train from Baden soon after five o'clock at Oestaa, where he was met by Prince Alfred and Prince Louis of Hesse, who accompanied him to the Rosenau, where his Majesty was received by the Queen, Princess Louis of Hesse, Princess Helena, Princess Beatrice, and Prince Leopold. The ladies and gentlemen in waiting were in attendance. The King remained with her Majesty until half-past seven o'clock, when his Majesty took leave of the Queen and drove to the railway station, accompanied by Prince Alfred and Prince Louis of Hesse.

On Tuesday Prince Alfred, attended by Major Cowell, left the Rosenau for Hummelsheim, on a visit to the Duke and Duchess of Saxe-Altenburg.

On Wednesday the Duke of Coburg arrived at the Kallenberg, and, accompanied by the Duchess of Coburg, visited the Queen at the Rosenau in the afternoon.

On Thursday the Emperor of Austria arrived at the palace at Coburg at one o'clock. He was received by Prince and Princess of Hesse, Prince Alfred, and Princess Helena had arrived previously at the palace. The Emperor visited the railway station by the Duke of Saxe-Coburg, who accompanied his Majesty to the palace, where he was received by the Duchess of Coburg, who conducted the Emperor into the presence of the Queen. There were also present Prince and Princess Augustus of Saxe-Coburg with their family, and Prince Edward of Leiningen. A déjeuner was prepared for the Queen and the Emperor and the Royal party. The Queen was attended by the Marchioness of Ely, Lady Augusta Bruce, and the gentlemen in waiting. Lord Granville was also present.

Prince Leopold and Princess Beatrice subsequently visited the Emperor at the palace. Prince Alfred had arrived that day from Hummelsheim.

The King of Portugal (first cousin of the Queen) visited her Majesty on Saturday. The Duke of Saxe-Coburg accompanied the King from the Kallenberg, where his Majesty arrived the day before, after an absence of twenty-seven years. The King was received privately several of the ladies and gentlemen of the household of the Duke and Duchess of Saxe-Coburg. The Queen, Princess Alfred, Princess Helena, and Prince Leopold attended Divine service on Sunday morning at the church at Ceslau. The Hofprediger Hanan performed the service.

The Queen and the Royal family have taken daily walks and drives in the neighbourhood of the Rosenau, and visited the widow of Baron Steckmar and the late Prince Consort's tutor, Mr. Florschutz, at Coburg. Mr. Barnard, Her Majesty's Resident at Coburg, also had the honour of an interview with the Queen at the Rosenau. Prince Augustus of Saxe-Coburg, during their stay at Coburg, spent the greater part of each day with the Queen. The Prince of Royal Engineers took leave of her Majesty on Friday and returned to Darmstadt. Princess Hohenlohe and Princess Adelaide, accompanied by the Countess Erbach and Mr. Broff, have honoured the theatre at Coburg twice with their presence.

The Queen will leave Windsor Castle for Balmoral on Monday next.

THE PRINCE AND PRINCESS OF WALES.

The Prince and Princess of Wales continue at the Castle of Abergeldie. On Monday in last week the Prince went to the Glen of Girnock deer-forest, his Royal Highness had excellent sport and secured three fine stags that respectively carried eight, ten, and twelve points. The Prince returned home waiting with his men, who conveyed the trophies of the day's sport. In the afternoon the three antlered kings of the forest were exhibited to the Princess and suite. On Tuesday the Prince commenced grouse shooting on the grouse-ward to the strains of the pipes, to the great delight of the Royal party. On Tuesday morning the Prince went to the moors; in the afternoon his Royal Highness was desirous of passing the same day (the 1st inst.) was the anniversary of the Princess's birthday. Their Royal Highnesses visited Craithie Church, and then proceeded to the vicinity of Abergeldie. The Prince and Princess will shortly take their departure from the Highlands, and return to Marlborough House en route for Sandringham House. The Earl of Fife, Duke of Edinburgh to the Princess will be presented to her Royal Highness at Holyrood Palace on the occasion of her Highness's visit.

The Hon. Mrs. Bruce has arrived at Abergeldie, and succeeded the Hon. Mrs. Coke as Lady in Waiting to the Princess.

PRINCESS LOUISA.

Princess Louisa last week visited Mr. James Clarke with a visit at Eagle's Nest, Bournemouth. Her Royal Highness was accompanied by Lady C. Bingham, the Hon. Horatia Stopford, the Hon. Mrs. Grey and Miss Grey, Miss Hilyard, Colonel the Hon. G. A. Liddell, and Mr. Grey. The Princess arrived at Bournemouth in the fifth steam-yacht, and proceeded in the pier by Sir Joseph Cooke, who conducted her to Eagle's Nest. After partaking of luncheon, her Royal Highness visited Cranborne Garden, and then proceeded to the Flagstaff, which is the highest eminence at Bournemouth. The Princess and her attendants expressed themselves greatly pleased with the general appearance of the place. The Royal Highness shortly after re-embarked on board the Elfin and returned to Osborne.

His Majesty the King of Hanover is expected in London in a few days, from Hanover, for a short stay.

Her Royal Highness Princess George of Saxony, accompanied by Baron Gerolderf, arrived in town on Monday, from a tour in Scotland. Her Royal Highness left town on Wednesday for Dresden.

The Excellency the Swedish Minister has left town to join the Countess Wachtmeister, who is staying at Dieppe.

His Excellency the Minister for the Netherlands has left town, for the Continent, for a few weeks.

The Duke and Duchess of Manchester have left town on a tour in Germany.

The Duke of Newcastle left town a few days since for Scotland.

The Marchioness of Salisbury and her youthful family have left Bournemouth for Hatfield House.

The Marquis of Hastington arrived at Devonshire House on Monday from Bolton Abbey, Yorkshire.

The Earl and Countess of Dartmouth have left Grosvenor-square for Patshull Hall, Wolverhampton.

Earl and Countess Amherst have arrived at their seat near Sevenoaks.

The Earl and Countess of Zetland have left town for their seat, Upsall-am, Gallowsbrough.

The Earl and Countess of Malmesbury have arrived at Heron Court, Hants.

The Countess Dowager of Tankerville left town on Monday on a visit to the Earl and Countess of Malmesbury, at Heron Court.

The Countess (Dowager) of Lichfield is on a tour in Switzerland.

The Earl of Clare has left town for Hastings for a few weeks.

The Earl of Coventry left town on Monday, on a visit to Earl and Countess Amherst, at Sevenoaks Abbey.

The Earl of Cawdor has arrived at his seat, Golden Grove, Carmarthenshire, from Scotland.

Viscount and Viscountess Palmerston have left Cambridge House for Broadlands.

Viscount and Viscountess Stratford de Redcliffe have arrived at Alston, Berkshire, on a visit to Lady Rolle.

Viscount and Viscountess Sandon left Grosvenor-square on Wednesday for Sandon Hall, Staffordshire.

The Hon. Francis and Mrs. Stonor are passing the season at Buckingham House, Brighton.

Lord and Lady Harriet Ashley have arrived at Brethy Hall, Derbyshire, on a visit to the Earl and Countess of Chesterfield.

Lord and Lady Adolphus Vane Tempest have arrived at their residence in Chester-square.

Baron and Baroness Lionel De Rothschild and Miss De Rothschild have arrived at Kingston House.

MARRIAGE IN HIGH LIFE.—The marriage of the Earl of Witton with Miss Elton (smith will take place this day (Saturday), at St. George's, Hanover-square—Cancelled.—The marriage of Lord Londesborough with Lady Edith Somerset took place on Thursday, at St. George's, Hanover-square.

ECHOES OF THE WEEK.

SHORTHAND or longhand? Sir William Armstrong has sounded the keynote of a chorus of controversy as to calligraphy. The disciples of phonography are rushing into the fray, and we may expect a release of that *Eunetic Nut*, so very well meant, and so very much laughed at, fourteen years since. The shorthand advocates maintain that the rapidity of modern thought demands a mode of calligraphic expression as rapid, and that precious time is needlessly wasted in inscribing on paper every word and sentence in such words as "—ication," "circumvallation," "idiosyncrasy," and the like. Then a learned gentleman has come up in defence of the "longhand" —i.e., that method of handwriting based on tracing the characters at an obtuse angle, and *towards* the body of the writer, in lieu of at an acute angle *from* the body. In this latter system, it is alleged, muscular action is wasted; in the latter it is saved. This would be true enough if the characters were mere mathematical notations, like the Arabic and Persian, consisted mainly of downstrokes; but "backhanded" calligraphy is, in the end, a bungling in the hand of the work towards the body, certainly, and no sure one set of muscles is called into play; but, *en revanche*, the continual recurrence of retroactive movements engenders a certain stiffness, of which the reaction is lassitude. Persons who write a great deal would be well to abjure the processes. Alexander Dumas the elder, who, in his time, has probably covered more paper with "copy" than any other author living, tells us in his memoirs that, as a matter of relief, he used to write his novels "backhanded," or slanting to the right, and his plays "backhanded," or inclining to the left.

Be the revelation dearer or sinister, however, we should deprecate the employment of shorthand in literary composition. For originality, or for artistic impressionable books, phonography is most useful; and every improvement tending to simplify it would be hailed with pleasure. But fragments, bits, and hieroglyphical signs, and constant repetitions, a kind of abbreviated longhand has been in use for hundreds of years; but to write "to be supposed, find that flow of thought or rapid or continuous as to sigh for a code of arbitrary signs. A good, long sesquipedalian word is, in fact, as often a boon to an author as it is "bad" to a lazy reader. It gives him time to think upon what is to come next.

Mr. Charles Dickens, the most accomplished and versatile of English comedians—the *Lara fa presto*, who speaks French and Italian as fluently and correctly as he does English, who has been here; who knows like Grisier and dances like the cosmargo; who can wrestle hors-cules in the Neapolitan patois, accompanying himself on the guitar; who has sung Neapolitan ballads at a table-d'hôte in a water-colonye; who has been twice across the Atlantic, twice married, and once "presented at Court"—has just begun a series of readings of years of age, is as agile and vivacious as a young man of twenty-five, has lately astonished the Parisians by an appearance at the Variétés Theatre, where he performed the part of Mr. Jingle in a vaudeville called "Un Anglais Timide," a French version of his own "Bashful Man."

We have said, advisedly, that the French playgoers were astonished with Mr. Matthews. In truth, they do not see his like, or anything exactly what he asks of him. An Englishman on the stage, speaking pure French—an Englishman who does not wear top-boots, a stripped waistcoat, and a tandyhanky"—who does not swagger, who does not continually ejaculate "sacre nom," and demand "rosbif" and "grogue," and who does not constantly quarrel with a "cocher" and a hatter to sing round his wife's neck when he sells her in Smithfield, is to the Gallican mind a phenomenon and almost a monstrosity. A small section of the public entertained that he ought to have with so ill a grace the fact of there being nothing clumsy, *outré*, or grotesque in Mr. Dickens's performance and delivery of the French language introduced into a cabal to hoot him. He will, however, if he choose to persevere, surmount these silly prejudices. We can't help thinking that the Vaudeville, in which he appeared, was a decided and disappointing than at the Variétés. would have been a far better arena for the display of his talents, as the characters in it are more to his taste. We should like to see Mr. Charles Mathews undertake—one which, to our thinking, he would most admirably sustain—the character of Mr. Affable Hawk in Mr. Lewes's novel ("The Game of Speculation") of Balzac's famous drama.

One day last week we resided in a pretty waterside village in Kent, and there we enjoyed the acquaintance of a butcher—*the* butcher of the place—and, unintentionally, were in the habit of purchasing our modest chop or steak. One morning a very ugly, rheumatic old woman came into the shop to bargain for some remnants of butchers' meat, and we observed that, on her entering, the proprietor rapidly disposed a chopper and a steel crosswise on the block. When the old body had gone away we asked him the reason for this curious trick of legerdemain. "She's a witch," was the reply, 'and if I didn't put the cross on the block she'd be sure to put a curse or spell on meat in the shop." We could not help thinking at the time that our friend the butcher was a slave to the grossest and most debasing superstition, but then it appears that he was quite right, for soon after we left the railway station was only just built, and when we took our departure the inhabitants had not quite made up their minds as to whether they should light their one street with gas or not. What, however, will our readers think of an unsophisticated spinster, who in the year of grace 1853 proceeded to visit a "wise" or "cunning man" in the very midst of this vast metropolis, and to pay him twopence for a printed slip of "Nativity, Capricorn and Sagittarius"? This horoscope, or nativity, announces that you will succeed in all your enterprises by all the cures and troubles you have given yourself. There was a great deal more of such cant for twopence, which wound up with—

> Learn, if thou art sage,
> Science sooner than heritage;
> Then heritage will be thine,
> Science shall nourish thee.

The "ruler of the planets" appended, by way of postscript to the foregoing, "Secret love-passages, to recover the ladies' lost property and future husbands, and gentlemen their present and future wives. Admission, half-a-crown. Hours calculated and disengaged."

At the first blush of virtuous indignation the public will probably cry out for all these "wise" or "cunning men" to be sent to the treadmill. A little more sense will probably suggest the advisability how pitiable is all this superstition and how detestable all the impostors, and when the public has decided to that is the air to evoke spirit music from accordions, and spirit drawings from under the knuckles, and to translate the spirits of the departed into Hebrew, Heliogabalus, and the late Mr. Grimaldi, are to be sent to the Board of Correction and hard labour.

The almost unprecedented dulness of the season has received a slight fillip in an acrimonious controversy between a magazine writer and the editor of a provincial newspaper respecting the treatment of Napoleon I. at St. Helena. One of the magazine writer's assertions was to the effect that Longwood, the five years' residence of the illustrious exile, was little better than "a barn patched up with boards and pitched paper, nailed together by ship's carpenters." A correspondent of the newspaper editor quite recently from St. Helena proved best been the residence of the Lieutenant-Governor of St. Helena, and that it was a very pretty cottage-residence in that romantic island, where there is no shade, and where it rains every day. We believe that Longwood in Napoleon's time was neither quite so good nor quite so bad a "barn" spoilt and ill-used, as the dispatch of the house on the plateau selected as the habitation of the whilom ocean part of the Emperor of the French was totally unfit for the use of the East India Company. The Lieutenant-Governor had occasionally used it as a summer residence, but was by no means in constant use of repair. It was only one story high, and it was totally unfurnished. It was the property of a personage accompanied by a numerous suite. Sir George Cockburn had all the carpenters' crews of his squadron sent up to Longwood, and, with their help and the assistance of fatigue parties of the military, the premises were "patched up" with boards, palisades, and pitched paper. Longwood was, however, never wind or water tight, and after the death of the immortal captive it became literally a "barn," a dunghing-machine being erected in Napoleon's bedchamber. The British Government had, however, at an early stage of his captivity recognised the unsuitability of the house to his position and his necessities, and the framework of a mansion was constructed in England and sent out to St. Helena; but Napoleon never dwelt in it.

COUNTRY NEWS.

The Queen has approved of Mr. R. H. Williams as Consul at Waterford for the King of the Belgians.

The subscriptions towards the erection of a monument to the late Lord Lieutenant of Staffordshire—Lord Hatherton—have reached £1000.

The city of Belfast is suffering from want of water to such an extent that even cloth rollers, it is said, is becoming an article of luxury.

The inhabitants of Stafford are making an effort for additional subscriptions to erect a memorial to Sir Francis Chantrey, Bart., of that borough.

The Bristol and South Wales Union Railway was opened for public traffic on Tuesday.

Miss Ida Lee Thomas Graham, daughter of Colonel Graham, of Donington, has just taken the veil at Donington Nunnery, near Taunton.

At the Liverpool Borough Sessions, on Saturday, the Recorder sentenced Mary Ann Jones, charged with having, twenty-five, to six months' imprisonment for stealing silver forks from a shop.

A child has died at Crobane, Clonmel, of hydrophobia. At the inquest it was stated that there are now in the town no fewer than nine instances of rabies in the country.

A curious mirage has been seen on Belfast Lough, where the reflection of a Glasgow steamer, itself out of sight, was clearly seen in the air near Bangor on Sunday.

The cottage of the "Dairyman's Daughter," at Arreton, in the Isle of Wight, celebrated in the religious world through the Rev. Legh Richmond's writings, is advertised for sale.

The Princess of Wales has granted her patronage to a bazaar to be held at Halifax in December next, in aid of the funds for the new church now in course of erection at the picturesque village of Copley, near that town.

Sir George Grey, in the name of the Queen, has written to the Mayor of Leicester to say that her Majesty regrets that the memorial of the late Prince Consort is to be erected in that town.

At a meeting of the Town Council of Stalybridge, on Monday, a resolution was passed to the effect that the sum of £1000 for the ornamentation fund should be established in the borough.

The stained glass window of Messrs. Turner, at Leicester, was burned down on Wednesday. Goods to the value of £10,000 were rescued, but the damage to the building is over £600, which sum is insured.

Captain Grant, the African traveller, is to be presented with the freedom of the burgh of Dingwall, where his mother, widow of the Rev. Alexander Grant, resides.

Three poor girls on their way to mass at Gartan, in the county of Donegal, were drowned on Sunday last in a bog hole, when a sudden torrent, caused, it is believed, by a waterspout, swept them away. Two were drowned and the third had her skull fractured.

A brick-maker at Effingham, Surrey, on Saturday morning to catch some fish in a pond that was nearly dried up, but though the water was only six inches deep, he was unable to get out of the mud, and before assistance a fish he fell, and, sinking into the mud, was suffocated.

At Warrington, on Monday, a young man named Durkin, having swallowed a bullet which he had bitten off, dropped a loaded gun, which at once went off, the charge lodging in the head of Lowe's son, a boy about eleven years of age, who died instantly.

Colonel Sykes met his constituents of Aberdeen on Friday, and gave a long account of the past Session. He had supported retrenchment, economy, and reform. A resolution of confidence in their member closed the proceedings.

A young whale about three feet long was taken at the farmed pebble ridge, Northam Burrows, near Bideford, on Tuesday week, by young Joseph Hearn, a lad employed as assistant to Mr. Hearn, father to a fisherman, near Braunton, about two or three miles from the same place.

The Queen has given £100, which sum is to be expended by the Society as held on Thursday week at Maryborough. There was a very good display of cattle, sheep, and pigs. The show of agricultural exhibited were of a superior class. A horticultural exhibition also took place. During the meeting the money dined together. The Earl of Portarlington presided.

The Lord Lieutenant of Ireland has appointed Dartmoor Prisons to chairmanships, there to join the projected central line of the South-Western Railway, by a branch following much the course of the valley of the Lyd, and, with one exception, which is the steepest a level plane; the whole of the works to be executed by the 1st of May, 1855.

At the Bradford County Court W. Earnshaw sued for £10 damages from F. Kershaw, for injuries received at cricket. The defendant and others were playing a game of cricket on the highway, Kershaw being at the pinfold was passing the ball, hit by the defendant, struck the plaintiff on the knee, severely inflicting such injuries that he was confined to his home following his employment for some time. The Court gave a verdict for £7.

The Hon. Sir C. B. Phipps has forwarded the Queen's acknowledgment of the receipt of the resolutions passed at a recent meeting of Yarmouth fishermen, expressing their condolence with her Majesty upon the fate at Aston Park, which resulted in the death of the female Blondin, and to the relatives of the unfortunate woman, and their sympathy with them under the future. Her majesty expresses the gratification with which she has heard to hit the assignation of the fishermen.

"Every nook and corner of our district," says the *Surrey Times*, "even the smallest, is being explored, and the search for coal is begun picking, and there is promise of a more than ordinary crop. With such an influx of population as is now being locally created, the local contemongers import their London cries, and one might almost suppose Whitechapel transported to New Cut or Portsmouth. The crops being heavy, the hopping is expected to last about three weeks."

A whirlwind occurred in the neighbourhood of Thornbury, Gloucester, on Wednesday week. It carried off the thatch from the tiles of a house, whirled a bushel basket for nearly a quarter of a mile, and then broke it to pieces. Several haystacks were overturned, and the corn and fruit trees were torn up by the roots, and others twisted partly or wholly off. The whirlwind passed over a field of wheat, which was in stook, and took a third of its height, and carried more than fifty yards, and an old woman was carried by the whirlwind from the road into a neighbouring field. Happily the storm covered but a narrow breadth, and lasted only a few minutes.

After the reigns of Edward I. and Edward II. and Edward I. and and III., was found in an old horn, at Malton. A claim to them was put in on the part of the Crown as treasure-trove, and the articles were forwarded to the Treasury, with a view to deposit them in the British Museum. The Queen has given £100, which sum is to be expended by the Society in the purchase of cattle, sheep, and pigs. The Earl of Portarlington, the previous owner, or holder, and it is at length ordered by the Lords of the Treasury that the articles be returned to the Lord Lieutenant of Ireland, for her Majesty for the holder to dispose of them as he sees proper. A portion is described as being of silver, and others of brass, and the whole much corroded.

Mr. C. A. Saunders, the secretary and general manager of the Great Western Railway, retires from office on a pension of £1200 per annum, with the understanding that the appointment will be offered to one of the present holders. The secretary and manager's duties will form distinctive departments under the new regime, the former superintending the whole, and the general manager of the South Wales division, will succeed his uncle as secretary to the amalgamated companies, and Mr. Gibbs, the Bristol and Exeter Company's goods manager, will be made general manager of the united systems.

The Queen, on Tuesday, visited Sherborne, in Gloucestershire, was last week the scene of great festivity, a hero family rejoicing with the townsfolk over the auspicious marriage of the Hon. Emily Dutton, Lord Sherborne's second daughter, to the Hon. and Rev. Henry Sherborne, second son of the noble lord. The ceremony took place on Wednesday in the fine old parish church, which had been beautifully adorned for the occasion by the ladies of the village. It was followed by a breakfast given by Lord and Lady Sherborne to a large party of friends and neighbours, in addition to those staying in the house. A supper was provided by Lord Sherborne for every poor person in the village of Sidbury, and the school children were feasted.

The "Cutlers' Feast," a semi-social, semi-political institution in Sheffield, was held on Thursday week in the town—Mr. Jessop, the newly-elected Master Cutler, in the chair. The dinner was attended by Lord Wharncliffe, Sir Charles Wood, Mr. Roebuck, and other notabilities. The Minister for India was received with much cordiality. Mr. Roebuck dilated on the liberty that England enjoyed, contrasting it with the state of slavery in France and the United States; and he warned the Cabinet Minister present that the wonderful change of England would not much longer endure the privileges they endured, and which might be removed by a recognition of the Confederate States.

NATIONAL SPORTS.

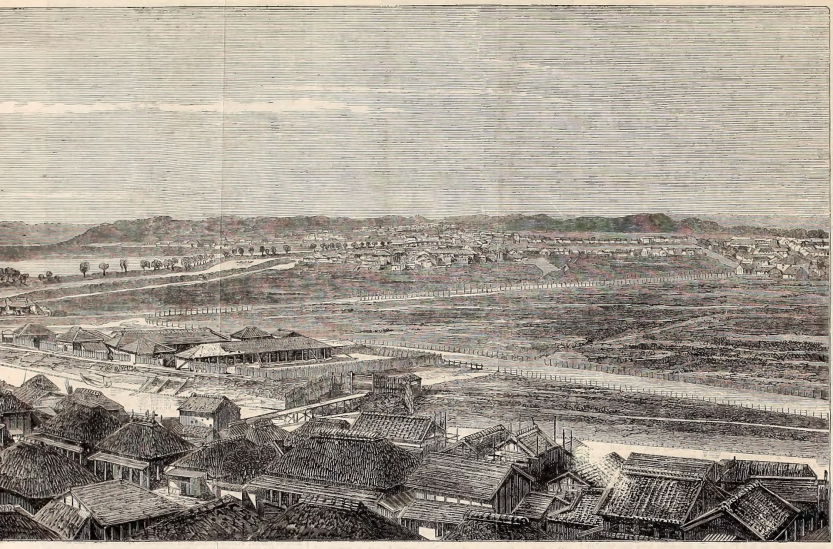
PROBABLY no Warwick September meeting ever exercised less influence upon the great event immediately following on "Doncaster Mere" than that which has been held this week. The betting has been in the running, through which one could get a "line" to reach any of the favourites; and, except the exultation of the layers over the discomfiture of Lord Clifden and their evident determination to keep the fallen lion down, there was no feature of any interest affecting the St. Leger. The weather was fine, the ground capital "going," and the sport in itself equal to the average of former years. Magnum Bonum, whose form temper required the presence of an safe stick to counter, has been scratched, leaving Hurlstone—at a difference of 9 lb. for the year—by a neck.

The winner of Tuesday's Cup on Wednesday brought him once more into the Leger lists, at 40 to 1; but it is difficult to perceive on what grounds his supporters backed him, since he was giving him 31 lb. The very equivocal position of Lord Clifden in the turf market causes much uneasiness in the minds of his recent backers, for having invested their money on the assumption that he "got out." The unsteadiness, too, of the three favourites who reign in his stead increases the anxiety, because they cannot see their way quite clear for "getting round," as it is termed. Of Queen Bertha, it must be said that we have to take too much on trust. The very latest concern from Malton, however, is that she is doing very healthily, and the *Sporting Life* of Wednesday last, in a special paragraph devoted to Lord Londesborough's stable, says she is "looking and going as well as her most sanguine friends can desire." All this possibly may be a very unimportant item in her form; for the close finish of her for the Oaks and a half-head win is hardly enough to make her a flyer on paper. The Ranger builds his reputation upon his victories in the Oaks and Leger, and the latest in the list of Lord Grosvenor Girl in the Yorkshire Stakes. The former was a clever performance, no doubt; but if Mr. Ten Broeck's mare could beat Lord Mr. Savile's horse won in either "slovenly" style. Avenger holds his own finally in the quotations. From the quarters whence the weststairs come the news is highly satisfactory to carry the stable money. Of his form and capabilities there can be no manner of doubt, and if Mr. Parr's Flatcatcher be the saddle the pace at which he may feel very confident. Golden Fledge is a useful, honest horse, with not much quality, and probably, like the Daniel O'Rourkes generally, took pace to finish at Doncaster; but if the tone of the market be any foreshadowing of results, "the Fledge" ought to be there or thereabouts on the day. Of the remainder nothing particular has been executed in his favour, and it is believed another yet remains to be "done." But the betting has been active, there have been several retired in turn, and Borealis and Blue Mantle head the rush. With a lively recollection of what Mr. D'Aosen can do in the way of surprises and with the memory of Mr. Bowes's double victory in Pomona and Caller Ou's magnificent and unlooked-for performance on Doncaster Moor, the public may be pardoned if they are inclined to back Bonny and Newmainster, and the adherents of the green jacket fondly believe in the possibility of a repetition of the Caller Ou "fluke," as the Bedalesian party termed it. Blue Mantle does not come once more to advantage in the betting. He is said to be taking most kindly to his work, which he does well, and they say will "stand" at Newmarket. But the "coming outsider," so much talked of, cannot be said to have come yet, unless he be found in the following list of probable starters and jockeys:—Avenger, A. Edwards; Borealis; Blue Mantle, J. Daley or Lynch; Borealis, Challoner (if not on Lord Clifden); Cheerful; Golden Fledge, Aldcroft; Newmainster, W. Jarvis; Pennybrook, Clements; The Eagle; Gladstone, H. Covey; Golden Plover, Flatman; Light Brigade, Light Bob; Lord Clifden (with a start), Challoner; Kemptown; National Guard, J. Snowden; Onesander, S. Rogers; Physalis colt; Queen Bertha, Fordham; The Ranger, J. Gardner; Stentor, Pavis; Sweetbriar.

The recurrence of the first day of partridge-shooting during the past week caused a considerable migration, at least, amongst our stout cricketers, who seem, with one common accord, to have abandoned the bat for the fowling-piece, so that no matches of importance (except those in which the "gentlemen" of Sussex were concerned) were brought to an issue. Of these, that played at the ground attached to Mr. Burrup's Inn, the Two Chimneys, Coldharbour Cattle Market (hop-by-the-way, furnishes some excellent wickets), was the most important. It was between the United Eleven and Twenty of the Middlesex Cribs, with two players. The former won the match "easy" on account of the heavy rains which fell, mostly during the nights. The close of inning to the Cribs who put in the Eleven, and they experienced some trouble in getting rid of them. Griffin being the only one who got the wicket for his 55, and Carpenter exhibiting a fine defence and some few hitting for which he marked 64. The other double scorers were Mortlock, 27; John Lillywhite, 15; and Caddick, 11; the total amounting to 222. The Twenty-Two only succeeded in putting together 72, of which Silcock and Absolon each marked 15, and Rushen and Bee 12 each, both of whom never ought to be omitted from any Middlesex Eleven) severally contributed 11; nine out of the Twenty-Two were "ciphers in the great account." In the second innings the Eleven left ten wickets "collapsed" for 106, Griffin's bowling being of a very telling description. Silcock's was a very fine innings of 36, and included a hit by the ball to the ground. The rain interfered so seriously with the play that the game finally terminated in a draw, the score being—United, 212; Twenty-two of Middlesex, 72 and 106. The Eleven wickets to 1 of the All-England Eleven was engaged at Retford also, against Twenty-two, including Jackson and Hall, of the pick of Yorkshire bowlers. The Eleven put together 146, of which Heyward obtained forty-seven and Mr. Tinley seven. The two of the Retford side—Jackson with nineteen and Smith with eleven—achieved "double figures," and sixty was all they could muster, which just left them in a position to follow their innings; and Heyward took eleven wickets for sixty-two up to the close of the second day's play. Saturday was so wet that the game was drawn, leaving one inning of the All-England Eleven unfinished contests. On Monday the delightful grounds of Mrs. Marshall, at Broomhurst, near Godalming, was the scene of a match between the Eleven of Godalming and the Hambledon district. There were over two thousand spectators. The Sixteen incluled Mr. F. Pilkington, and Mr. Pilkington and one of the "Godalming Boys" we are quite at a loss to understand). He did good service as usual, marking 64. The innings amounted to 136, and the United were all disposed of for 81. The Sixteen had to bring the largest score in the score. The Sixteen were all got rid of for 77 in their second hands, and up to the close of the day the Eleven had scored 44 runs for the loss of wickets for 22 runs. On Wednesday the game was resumed, and Godalming carried off their first victory by 64 runs.

The grouse-sporting in Ross-shire was never better, but south of Inverness, as far as the height of Badenoch, there have been some symptoms of grouse disease, and the birds are nearly so wicked as previous years. None of it seems to have crossed the line of the Caledonian Canal. The deer in Sutherland and Ross-shire never bore a finer set, fatter, nor with better heads. There was a fine open winter, and the grass early and abundant at the time of the growing of the horn, and such great warmth and dryness throughout the month that the horns were clear of velvet nearly a fortnight earlier than usual. Mr. Stevens has killed a stag of 1853, in his park, with the same gunshop at Inverness, in a rare sight, even for the oldest stalker, and three of this year's fat, fair to surpass them. So far Mr. Snowie awards the palm to a head of only ten tines, but very elegantly curved, from Mr. J. G. Leigh, of Strathconnon, who has sent in six "royals" for preservation at his park. He considers that Mr. Whitelhwyck, of Kinlochhilcart, to rank second. This is a remarkable "royal" of twelve tines, and with palmed tops six inches across. Mr. Chaplin, of Glenfalsie, stands third with an "emperor" of fourteen tines, and fifth with a "royal," his two heads being separated in Mr. Barnes's list by those of Mr. J. G. Leigh's, which is almost "a clabberlaudch"—i.e., with "chip horns."

Red fishers have not had a great time of it. The rivers were so low when the fish tried to ascend that the greater part of them were netted near the mouths. As compared with last year—which was, however, quite an exceptional one—in consequence of the heavy wheat-drowning wet, many fishers have so far not taken a fish.



LATEST BETTING AT TATTERSALL'S.—THURSDAY EVENING.

ON LEGER.—5 to 1 over Avenger (1 lt to 3); 11 to 2 over Queen Bertha (5 to 1); 8 to 1 each Golden Fledge and Blue Mantle (1 to 1 each); 10 to 1 each Borealis and Cheerful.

CHESHIRE CUP.—100 to 30 on the field (off).

YOKOHAMA, JAPAN.—FROM A PHOTOGRAPH.—SEE NEXT PAGE.

HOTOGRAPH.—SEE NEXT PAGE.

YOKOHAMA, JAPAN.

ON Engraving of Yokohama, showing the whole of the foreign settlement, the bay, Kanagawa, and the surrounding country, is from a series of photographs taken by Mr. W. Saunders, of Shanghai, in last November, from "The Bluff," that part of the suburbs lately agreed to be allotted to foreigners for private residences. Commencing at the right of the lower slip, the foreground gives us the native village of Honmura, and conveys a very capital idea of the picturesque roof and lofty, irregular houses. Immediately in front of the slip is seen the commencement of the canal lately cut for the protection of the settlement and town. On the other side of the canal we have the jetty of the premises of our consulate and Government officials, that with the triple gateway being the residence of Captain Vyse, her Britannic Majesty's Consul; the second above is the preparations for the new English church, for which a somewhat complicated scaffolding is already erected; the two-storied building of white is the passengers' hotel to which a few years since I myself was a visitor; further to the left is the Roman Catholic chapel; next comes the bakehouse for the settlement, showing the roof of the row of shops, merchants' houses, &c. Beyond we have a landscape peculiarly characteristic of Japanese scenery, the harbour of Yokohama is vividly reproduced; whilst on the other side is Kanagawa; and along the high ground in the distance is the Tokaido, or main road to the city of Yedo.

Yokohama is the nearest port to Yedo opened by treaty to foreigners. It is distant about ten or twelve miles from the capital. When the American squadron first visited Yokohama, in 1854, it was but a small fishing-village, containing probably not more than 1000 inhabitants. Now the population amounts to 18,000 or 20,000, and a large town covers a space that was formerly occupied by rice-fields and reeds, and by salt-marshes.

In a book recently published by Hurst and Blackett, entitled "A Lady's Visit to the Gold Mines," many particulars are given of this town, in which the authoress visited last year.

"About noon (writes the lady) we anchored in the harbour of Yokohama, the town of that name being visible, whilst on the opposite side of the bay is the town of Kanagawa. In 1861, about a year before our visit, great part of the town had been burnt down and destroyed by fire; and now again, six weeks previous to our arrival, a second conflagration has laid waste all that remained from the first, fortunately only leaving the foreign settlement house intact.

The Japanese domiciles, being constructed entirely of wood, are speedily consumed. In the other hand, owing to their rapidity, they are very quickly and easily reconstructed; and, as the Japanese, at all times, are prudent, they finished, with extraordinary speed, the new set themselves actively to work, with the view of repairing the loss they had sustained, so that, on our arrival, we did not see the place in such an utter state of desolation as we had been led to expect we should.

"The small pier at which we landed is a good, solid-looking piece of masonry, but was not quite completed. To the left of it they were making a Bund, similar to those in Shanghai or Nagasaki. In this quarter we find the European settlement, consisting of upwards of houses, new inhabited, and others rapidly rising up, which extend a long way further than the Bund, when finished, will command. On the opposite side is a hill on which a house for the British Minister is to be erected. No more space for it is already inclosed, near the edge of the cliff, from which the view of the bay is very fine. As we have completed, it will be a delightful summer residence, but the situation must be a little cold in winter.

"On having the boat we first proceeded to the Custom House, which is a long, low building, to the right of the pier. Here we had our luggage examined, the quantity, however, proving too small to require minute or lengthened inspection.

"A small portion of the town lies to the right of the pier. The gates in the streets, as is usual in all towns of this singular country, are situated at the entrance and exit, and not at the sides. In one of these gates we immediately closed, thus precluding all possibility of the inhabitants assembling together in great numbers.

"I was surprised to find that every European here has wooden palisades round his compound, or grounds attached to the house, which, in one of the streets, extend for a long temporary defence. Though this is, no doubt, a very prudent precaution, it is by no means an ornamental addition to one's property.

"Behind the settlement there is a flat piece of ground, apparently waste land, which we were informed is to be the racecourse; though, like many other things we saw here, it is not yet out of the early infancy. During our stay we took many walks in different directions, and observed that the country around and beyond is very pretty-being well wooded and hilly."

JAPANESE MINISTERS OF STATE.

On page 256 we give Portraits (also from photographs by Mr. Saunders) of three Japanese Ministers of Foreign affairs, as they are named in Japan. There should have been five figures in the group, but one resigned upon the previous day and another was sick. Their names are "Iwa Kami," "Hakura Sinro no Kami," and "Ongasa wura Dzusho no Kami."

The Queen has appointed Thomas Spencer Wells, Esq., to be surgeon to the household in ordinary to her Majesty, in the room of Charles Henry Phillips, Esq., deceased.

Earl Somers died on Tuesday night at Madresfield Court, near Malvern, after a few weeks' illness, in his seventy-ninth year.

The Finn Valley Railway, connecting the rising towns of Stranaar and Letterkenny, Donegal, Derry, &c., and proceeding with the Irish North-Western Railway stations, was opened on Monday under most encouraging circumstances.

The prizes given to the students at the Liverpool School of Science were distributed on Thursday evening. His Lordship, in a brief speech, discussed on the advantages of a scientific education, and pointed out some of the things in the course of such an education which required to be changed.

A meeting, convened by the Lord Provost of Edinburgh, was held in the council chamber on Tuesday for the purpose of nominating the Commissioners of the General Committee of the Hartley Colliery Accident Relief Fund, to appoint a corresponding committee in London, and to act as the trustees allotted to the eastern district of Scotland. The Lord Provost occupied the chair. Mr. Robert Cunningham, Sheriff Clerk Depute of the Eastern District of Scotland, stated that the amount subscribed for this fund amounted to £79,000, and that the gratuities which had been paid to widows, &c., made a surplus of £20,000 remained, which, with the sanction of the subscribers, the committee now propose to hand over to certain trustees to local committee, to be appointed in each of the twelve districts of inspection in the north of England, to be held in trust for the sole benefit of the accidents by colliery accidents. To carry out the proposition a committee for the eastern district, including the following gentlemen, was named at Edinburgh, his Grace the Duke of Buccleuch, who, along with Lord Belhaven, were also appointed trustees on behalf of Scotland.

The noble park presented to the inhabitants of Dundee by Sir David Baxter—one of the recently-created Baronets—was on Wednesday formed with great ceremony by the Provost, Magistrates, and Council, on behalf of the town. It occupies a space of thirty-eight acres, and is most beautifully situated in the neighbourhood of Broughty Ferry, in the district of Barnhill. At each entrance there are handsome lodges. The cost of the park and its accompaniments cannot be under £50,000. A statue of Sir David Baxter, the donor, is to be erected. The gift is appraised at 10,000 of the people of Dundee, as a mark of their gratitude for his noble gift, and which was executed by Mr. Brand, sculptor, Edinburgh. The day was a general holiday, and the town was exceedingly animated by the crowds of visitors who arrived to join in the festivities. The weather was most favourable, and the whole proceedings were highly successful. The Provost presided at the luncheon, which was largely attended by the leading gentlemen of the district. Before starting on his mission he went down to Windsor to receive instructions, and in the evening he was told the orders of the Queen. He had a despatch-box at his address in London. The box, with the Windsor seal, duly arrived, and Colin, attended by his then over-haunting uncles, proceeded direct to Berlin, where he was welcomed with all proper marks of respect. The hour was officially announced for the interview at which the Crown Prince was to receive the representative of the Crown, and Sir Colin, in full uniform, went to the box to take out the badges and insignia given to his charge. The movement—we won't say dismay, for is is not a word suited to the man—of Sir Colin may be imagined when he discovered that he had come to the wrong box, and that he carried so carefully along with him a plum cake and some other articles of a similar character. The box with the Windsor seal, which had arrived before the Windsor officials had packed up the more stately, but perhaps less important wines, offerings. In a day or two the box came, and the mission was duly performed.

The corps mustered in the park were the 1st Northumberland Artillery, 3rd Durham Rifles, 3rd Durham Battalion, 2nd Durham Artillery, 1st Durham Artillery, the Newcastle Artillery, the Newcastle Rifles, South Shields Artillery, 2nd Durham Rifles, and 1st Durham Battalion. The Duke of Durham, in the uniform of the Durham volunteers, of whom his Lordship is Colonel, attended by Colonel M'Murdo, Colonel Hale, Lieutenant-Colonel Hammond, Lieutenant-Colonel Perkins, Captain Commandant Wemyss-Hammond, Lieutenant-Colonel Carr, Captain Stewart, Captain Hunt, and Captain Stevenson, galloped up to the saluting-flag after the corps had been drawn up in saluting order, and, having been formally introduced to the several corps marched past Colonel M'Murdo, who commanded the brigade, their steady manœuvring being much admired. After the marching past the Countess of Durham presented the prizes to the successful competitors in the recent rifle meeting at Gosforth Park, and the Duke made a short speech; and at the close of the evolutions the reviewing officer, Colonel M'Murdo, addressed the men and officers of the corps. The gallant Colonel concluded by stating that the volunteer force was never in a higher state of efficiency, and during the trunk of the remarks about the masters becoming fewer and fewer.

During Saturday the 1st Newcastle Engineers (Sir W. G. Armstrong's) and, by some misunderstanding, the Sunderland Engineers, were used in making field-works in a strong position beside the Castle mounds, and these forts and redoubts were then attacked and stormed by a detachment of the 1st Newcastle Artillery, supplemented by the Engineers, who were commanded by Colonel Hall. They had then fired a volley from their shoulders, and at the close of the evolutions the reviewing officer, Colonel Wemyss-Hammond, addressed the men and officers. The gallant Colonel concluded by stating that the volunteer force was never in a higher state of efficiency, and during the trunk of the remarks about the masters becoming fewer and fewer.

During Saturday the 1st Newcastle Engineers (Sir W. G. Armstrong's) and, by some misunderstanding, the Sunderland Engineers, were used in making field-works in a strong position beside the Castle mounds, and these forts and redoubts were then attacked and stormed by a detachment of the 1st Newcastle Artillery, supplemented by the Engineers, who were commanded by Colonel Hall. They had then fired a volley from their shoulders, and at the close of the evolutions the reviewing officer, Colonel Wemyss-Hammond, addressed the men and officers. The gallant Colonel concluded by stating that the volunteer force was never in a higher state of efficiency, and during the trunk of the remarks about the masters becoming fewer and fewer.

The Aldershot Mission-hall and Soldiers' Institute, the first stone of which was laid by the Duke of Cambridge on the 11th of January, by the Earl of Shaftesbury, will be formally opened on the 8th prox. The object of the Mission-hall is to furnish the soldiers with the best means of recreation in place of the vitiating temptations which exist in Aldershot. Lectures, concerts, and entertainments of a purely moral, educational nature on interesting subjects will be given. Religious services will, of course, be held there.

The Channel Fleet, after a week's stay in the Clyde, weighed anchor for Belfast Lough on Wednesday morning in company with the fine weather. The Defence first steamed down the river, followed by the other vessels of the fleet. The Defence, from her weather-beaten appearance, we had that it was thought advisable to interrupt the progress of the fleet. The Defence, however, soon proceeded on her journey in company with the others. It being understood that four or five of the fleet sought shelter in Rothesay, Bute, and Loch Ryan, and the remainder in Belfast Lough, and to lift a few men are required for Belfast. Admiral Dacres and the officers of the Channel Fleet, during their visit to the Clyde, were actively engaged in target practice at the pontoon Gallery by the Lord Provost, magistrates, and Town Council of the city. The Admiral and officers were also, during their visit, hospitably entertained from gallant visitors to a magnificent ball. The Lords of the Admiralty have decided to reduce the number of ships in commission. The Channel Fleet cannot visit Cork and Limerick this year, the season being too advanced.

The Select Ordnance Committee carried out a series of experiments on Wednesday at Shoeburyness with the Armstrong gun and the comparative value of Armstrong and smooth-bore guns, the committee stated that they intended to make a full report upon the experiments to the Secretary of State. This piece of ordnance was exhibited, along with others, in the International Exhibition of 1862. It is a rifled breech-loading gun of large calibre and strength which has been well described as the "side-wedge," the bore in the rear of the charge chamber being cut away on the left side, so that the left side of the end of the wedge is worked at the side behind it, for which purpose the gun is here supported sideways. The gun is loaded from the left. Officers and men of the naval service consists in obviating the difficulty of fitting out the heavy vessels. The 110-pounder, and the 600-pounder shell fired, and to lift a few men are required to stand upon the carriage and exert all their strength in this side-wedge, which the sliding-vent is easily moved. The breech, or the wedge, which are constructed with mathematical accuracy, are properly oiled, the gun cannot be loaded with the requisite rapidity, owing to the possibility of inserting the friction-tube until the charge is properly wedged up.

CURIOSITIES OF THE LAW.

A notice from Colonel M'Murdo says:—Classes for musketry instruction of volunteers will be formed at schools of musketry at Hythe and Fleetwood commencing on the 1st inst. Officers commanding corps in Scotland, or in Northumberland, Cumberland, Westmorland, Durham, Yorkshire, Lancashire, Cheshire, and Man, who wish to send men as members to the class at Fleetwood, are requested to transmit their applications to the Inspector-General of Musketry, Pall Mall. Officers commanding rifle corps in the remaining portion of Great Britain may apply for permission to send one or more members to the class at Hythe, which will open on the 15th inst.

The 32nd annual prize meeting of the 32nd Middlesex was held last Saturday, at the Tottenham Range. The rain came down in torrents; and consequently which the contest concluded with vigour.

At the forthcoming meeting of the Royal Artillerist prizes will be offered for competition to the amount of nearly £900, including a £50 challenge cup and a bronze statuette of Minerva, value £30, which is to be kept by the winner.—Arrangements have been made for a contest during the coming meeting of the Association, given rounds at 200 yards, for the Wiltshire battalions. All the crack shots have been selected for the match, which is expected to be a most exciting one. During the following Monday week, the return match between fifteen of the 1st Wilts (Salisbury) and a similar number of the 2nd Wilts (Devizes) will be fired, the county cup, 382 marks, and the Wilton 350. The former were therefore again victorious.

The annual meeting of the Norfolk Volunteer Service Association was held on Monday at the Shirehall, Norwich.

On Monday a match was shot between No. 5 (Park) Company, Robin Hoods, and Companies 1 and 4 of the 1st Derbyshire Administrative Battalion, Sherwood Foresters, at Nottingham. The companies in the previous one having been shot between ten members of that company and ten of the Park Company, the latter winning by a majority of 19 points on the whole close, ending in the defeat of Derbyshire. The result of the match was that the Robin Hoods have now won seven matches out of eight, having defeated the 950 points and the 6th Derbyshire by 1140 points.

The Lord Mayor presided at the Quarterly Court of Lancaster Rifle Association commenced on Monday at Aitcar, near Liverpool. Though the prizes were numerous, the meeting was not so well attended as usual, owing to the number of competitors. The shooting continued throughout the week; but in consequence of the wet weather on Tuesday, only 200 yards' range of the meeting, the firing for the volley prizes was necessarily postponed till next year. The Prince of Wales's challenge cup, presented by the Queen for the association cup was won by Captain E. Ross. Among the other successful competitors were Lieutenant Wm. Sylvester, Captain Wm. Jones, and Captain Lee. The association purse of £50; Captain Kenshaw, of the 8th R.L.V., who won the Lord Leigh challenge cup; and Mr. Wilkinson, of the 1st R.L.V., who won the 1st of the association grand challenge cup. The *Manchester Guardian* attributes the smallness of the attendance to the fact that Aitcar is not a convenient spot as a place to which only part of the volunteers of the county have convenient access. The Earl of Derby's opinion that every year the number of the volunteers of Lancashire to require them to assemble year after year on a spot which is not conveniently accessible by the volunteers of Liverpool. We hope that the meeting at the association has been held at Aitcar for the last time for other reasons than the one given by the Earl of Derby. Under the rule of the association, will select a place of meeting is some other locality."——Several members of the 1st Manchester mustered on their ground at Burton Moss, on Saturday, to compete for a fourth series of prizes arranged by the officers and members of the council of the regiment. The weather was unfavourable for shooting, rain falling fast during the whole of the afternoon; notwithstanding this, the number of points made was good.

A review of the Durham County Volunteers, concluding with a sham fight, in which several corps belonging to Newcastle and the county of Northumberland took part, was held on Tuesday in Gosforth Castle, adjacent to Chester-le-street, on Monday. The day was not very favourable for the display, as a good deal of rain had fallen during the week; but the weather appeared upon the field, and over 6000 persons were present as spectators. The

Government has ordered the two steam-rams at Birkenhead which have been the subject of so much controversy of late to be detained.

The Danube Commission has decided upon the St. George's Mouth as the definitive ship channel. The Porte approves the decision of the special loan for the necessary work.

The *Moniteur* publishes accounts from Persia giving a fearful statement of the atrocities committed by the troops of Dost Mahomed at the capture of Herat.

A correspondent states that the Prussian Lieutenant alluded to in this Journal of Aug. 22 as having saved the life of the late Sir Hugh Rallett at the risk of his own, is the son of Baron Rudolph von Bodelschwingh Rallett. For this gallant act he received a star from the King of Prussia and a letter from the Queen of Prussia.

The *Levant Herald* states that an archæological discovery of great interest has recently been made on the Bosphorus by Dr. Millengen. In the second promontory of the Asiatic coast, from its Black Sea to the Salatic side, this gentleman has discovered the ruins of the ancient and elegant temple of Jupiter Urius. Several Greek Gibbon wrongly places lower down on the site of the present Castle of Asia.

It appears from a Parliamentary return lately issued that 413 applications for leases of waste lands of the same have been made, and that 288 licenses have been granted. The amount of fees payable in—on the Several grants is £1,000 in all. The rents in shops of waste lands £13 12s. 6d.; for every additional mass inserted in a license, £1 7s. 6d.; in addition a stamp duty of £1 10s. on the license. No grant or license in surname and arms, or a surname only, in compliance with the injunctions of the Royal sign manual, and the payment of £210 on the grant of a patent upon any voluntary explanation. The whole of the fees have been paid into the Exchequer through the Office of Woods and Forests.

An official inquiry was held at Portsmouth yesterday week by direction of the Board of Trade, into the circumstances of the stranding of the screw-steamer Her Majesty, on the Horse Sand Fort, Spithead, on Thursday week. When making an excursion trip round the Isle of Wight. It was proved in evidence that the steamer had on board 150 persons, and that she was only allowed to take the "outer" passage, and the mate immediately afterwards told the man at the wheel to steer for the "inner" passage. The man obeyed the mate's order, and the steamer almost immediately struck upon the sand, and remained there for a short time, when she was got off and proceeded on her way to Ryde, where she was docked and the passengers landed from her and sent on to Reds and Portsmouth. The jury, after a short consultation, returned the mate, William Sylvester, guilty of having during the course of the vessel, in opposition to the captain's orders, and especially in opposition to the pilot's orders, and in opposition to the rules and regulations of the Board of Trade. Before starting on his mission he went down to Windsor to receive instructions, and in the evening he was told the orders of the Queen. He had a despatch-box at his address in London. The box, with the Windsor seal, duly arrived, and Colin, attended by his then over-haunting uncles, proceeded direct to Berlin, where he was welcomed with all proper marks of respect. The hour was officially announced for the interview at which the Crown Prince was to receive the representative of the Crown, and Sir Colin, in full uniform, went to the box to take out the badges and insignia given to his charge. The movement—we won't say dismay, for is is not a word suited to the man—of Sir Colin may be imagined when he discovered that he had come to the wrong box, and that he carried so carefully along with him a plum cake and some other articles of a similar character. The box with the Windsor seal, which had arrived before the Windsor officials had packed up the more stately, but perhaps less important wines, offerings. In a day or two the box came, and the mission was duly performed.

METROPOLITAN NEWS.

The annual fête of the South London Order of Foresters, which comprises fifty-two courts and numbers nearly 4000 members, was held on Monday at the Crystal Palace. About 20,000 persons were present.

Two houses fell yesterday week at Sydenham. The foundations were laid on clay, and owing to the heavy rains the earth sunk, and the houses fell, carrying away the scaffolding and burying six persons, one of whom was fatally and two seriously injured.

At the meeting of the City Court of Sewers on Tuesday the plan of the London, Chatham, and Dover Railway for the viaduct across Ludgate hill was submitted; and, though the surveyor warned the Court that the viaduct would not look as well in fact as on paper, the plan was passed.

On Monday a large body of workmen commenced the demolition of several hundreds of houses in Sun-street, Long-alley, and the neighbourhood, to make way for the Finsbury Extension and Central City Terminus of the North London Railway. We learn from the *City Press* that Messrs. Waring and Co. have taken the contract for the construction of this branch railway, from Kingsland to Liverpool-street, City, for the sum of £215,000.

An enthusiastic meeting on behalf of Poland was held on Monday evening in the Vestry Hall, King's-road, Chelsea—Mr. Hall, chairman of the vestry, presided. Several speeches were delivered in warm praise of the Poles and in commendation of their movement. Finally, resolutions were adopted in favour of the Polish league and calling upon the Government to recognise the belligerent rights of Poland.

The autumnal show of flowers and fruit, which was held on Wednesday at the gardens of the Royal Horticultural Society, was very successful, and formed a fitting conclusion to the season. The display of flowers consisted principally of dahlias, gladioli, cut roses, asters, and chrysanthemums; and of fruit there was a great show of all those kinds which reach perfection at this season of the year.

The third annual election of the German National League in London took place at Seyd's Hotel on Saturday last. Professor Kinkel was chosen chairman for the ensuing year. Mr. Berndes, Mr. Born, Mr. Oppler, Dr. Beigel, and Mr. Jebens are the elected deputy chairmen, and Dr. Zerffi, Mr. Lasker, and Dr. Schlund the secretaries. The object of the society is to promote the complete union of Germany on a constitutional and popular basis.

At a recent meeting of the Chelsea vestry Dr. Barclay, medical officer of health, reported that he had tested bread obtained from some of the poorer districts in the parish to determine the quantity of alum contained, and he found that the worst was that supplied to the workhouse. It was resolved to send Dr. Barclay's report to the board, in order to have immediate steps taken in the matter.

A splendid iron screw steam-vessel, named the Nutfield, was launched on Thursday week from the premises of the builders, Messrs. Ash and Co., Isle of Dogs, Poplar, in the presence of a large number of spectators. After the launch the vessel was removed into dock to be fitted with her machinery and boilers, previous to being forwarded to her owners in Australia, where she will be used for river passenger traffic. The Nutfield is 1770 tons burden; length, 215 ft.; and breadth 25 ft. 6 in.

A strange discovery has been made in St. Mary's Church, Whitechapel. Workmen were engaged in repairing the roof of that edifice, when, close under the old tiling, they discovered the body of a child in an advanced state of decomposition. Since then eleven coffins have been found under the roof of the church. Some of them contained the bodies of children; others human bones and dust. It is supposed that they were placed there a long time ago by some interested person to avoid burial fees. An inquest was opened on some of the remains on Saturday. The evidence in reference to the dealing with the bodies of children was of a most revolting kind. Everybody connected with the church denied any share in placing the coffins and bodies where they were found. The inquest was adjourned.

Last week the births of 1863 children—925 boys and 938 girls—were registered in London. In the ten corresponding weeks of the years 1853-62 the average number (corrected) was 1830.——In the week that ended last Saturday the deaths in London exhibited a considerable decrease; they fell to 1232, which is a lower number than any that has been returned since the first week of July. The chief decrease in the mortality arose from diarrhœa, which fell from 181 to 123; whilst the deaths from smallpox, scarlatina, diphtheria, whooping-cough, and typhus were about the same as in the previous week. More than one half of the mortality during the week occurred to the younger portion of the population—namely, to 704, who were under twenty years of age; 326 were between twenty and sixty years of age, and 201 at sixty years of age and upwards. A gardener is recorded as having died at the advanced age of ninety-seven years.

On Monday, the 21st inst., the Lord Mayor, Sheriffs, Aldermen, &c., of the city of London, will attend Divine service at Christ's Church, Newgate-street, where a sermon will be preached by the Rev. W. Romanis, M.A., of Emmanuel College, Cambridge, late one of the Grecians of Christ's Hospital. They will afterwards hear the orations delivered in the hall, according to annual custom. The programme will be as follows:—Latin oration on "The Benefits of the Royal Hospitals," by J. H. Newnum; English oration on the same subject, by J. H. Wylie; Greek oration on the same subject, by C. G. Lead; to be followed by translations from "Richard II." into Greek Iambics, by L. L. Sharkey; from "Paradise Lost," into Greek Hexameters, by C. A. Fyffe; "The Field of Gilboa," into Greek Elegiacs," by J. W. Farrer; "The Soldier's Dream," into Latin Elegiacs, by A. Bovell; from "The Lady of the Lake," into Latin Lyrics, by R. H. Hughes. There will also be two original poems, not yet adjuged.

The quantity of coal entered for the port of London for the month of August just past was 414,283 tons 16 cwt., against 407,225 tons 10 cwt., or an increase of 7058 tons 6 cwt. as compared with August, 1862. The entries of seaborne coal were 271,463 tons; and, when contrasted with the corresponding month of last year there is, it appears, a diminution of 3471 tons. The 271,463 tons are made up as follows from the undermentioned places:—87,872 tons from Newcastle, 85,511 tons from Sunderland, 49,718 tons from Hartlepool and West Hartlepool, 22,318 tons from Seaham, 7362 tons from Middlesborough, 667 tons from Blyth, 1648 tons Scotch coal, 9871 tons Welsh, 2258 tons Yorkshire, 2152 tons small, and 2086 tons of cinders. The railway supply for the same period of August has been 142,110 tons 11 cwt., as against 131,192 tons 15 cwt. last year for the same month. The London and North-Western has carried 51,468 tons 6 cwt.; Great Northern, 49,620 tons; Great Eastern, 19,075 tons 9 cwt.; Great Western, 14,378 tons; Midland, 7354 tons 9 cwt.; Chatham and Dover, 202 tons 7 cwt.; and the Tilbury and Southend, 12 tons. The canal traffic was 710 tons 15 cwt., against 1188 tons 15 cwt. for August, 1862. The seaborne coal entered at London from the 1st of January to the end of August of the present year is 2,109,107 tons, conveyed in 6264 ships. For the same period of the preceding year the tonnage was 2,207,415 tons, in 6786 ships; so that for 1863 there is a decline of 522 ships and 98,308 tons. This deficiency is more than compensated for by the railway traffic, which for the eight months of the present year shows an increase of 162,612 tons 9 cwt., the quantity for 1862 being 907,043 tons 9 cwt.; this year, 1,069,655 tons 18 cwt. The canal supply has diminished from 7910 tons 15 cwt. last year to 6593 tons 5 cwt. for this year. The aggregate supply of the eight months of the present year has been 3,185,356 tons 3 cwt.; the same period of last year it was 3,122,369 tons 4 cwt.; so that the requirements of the metropolis have necessitated a supply of 62,986 tons 17 cwt. more than was required in 1862.

The Raising of Holborn Valley.—There are two plans before the public by which the existing evils of this route may be corrected, if not altogether removed. One is bold, comprehensive, and costly; it involves the demolition of a large amount of property in Holborn, Skinner-street, Farringdon-street, King-street, and adjacent thoroughfares, for the purpose of raising the general level of the roadway. According to this plan, instead of two steep hills, there will be four moderate inclines, running north and south and east and west. This will be a resolution of levels; and, should the gradients east and west be made easy enough for the heavy traffic that will continue to run in those directions, this plan will be the most thorough that could be devised. Mr. Bunning is the author of this scheme. The other proposes to throw a viaduct over the valley, towards the north side, thus avoiding an extensive destruction of property and providing a roadway on a dead level from east to west. There will also be, as at present, a level road from north to south; but there will be the great disadvantage of the present inclines out of the valley from Farringdon-street, &c., and the Metropolitan Railway station to Holborn and Skinner-street. This plan was advocated, though not originated, by Mr. Marrable, the late architect to the Metropolitan Board of Works, and it would be the cheaper of the two.—*City Press.*

Law and Police.—At the Judges' chambers yesterday week Mr. Justice Byles refused to give costs in several cases brought in the superior courts for small sums, which might have been tried in the county courts.

A singular case was tried before the Recorder of the City and a jury yesterday week. A Mr. Forster, who has been in business in London for the last four years, was sued for a debt, which he refused to pay. He pleaded infancy, and called his father, who proved that he was born in 1842, but admitted that he had given him money to begin business on his own account in 1859, and he would not swear it was not in 1858. The jury expressed their regret, in which the Recorder said all honest men would agree, that they were compelled to find for the defendant.

A curious point of law was argued before Mr. D'Eyncourt on Thursday week. When the Metropolitan Railway was under construction, Ray-street, in Clerkenwell, was blocked up for some time, and Mr. Law, who kept a coffee-shop there, claimed £100 compensation for loss of custom. As the company would not pay, Mr. Law proposed to have the damages assessed by a jury, as provided by a clause of the Lands Clauses Consolidation Act. The company resisted, and brought the question before the police magistrate, relying upon a clause in their own Act, which provides that, where a dispute about land arose in the case of a tenant from year to year, the compensation shall be decided by a magistrate, according to another clause in the Lands Clauses Consolidation Act. The great point in dispute was whether injury to the custom of a shop could be brought under the head of "land" or not. The magistrate agreed to take up the case, leaving it to the agent for Mr. Law, if he thought fit, to appeal.

A case which is, happily for the credit of human nature, almost unprecedented, was heard at the Sheriffs' Court last Saturday. A son sued his father for money lent. The father indignantly denied the loan; and the son, on being pressed, was obliged to confess that the money which he said he had lent was savings out of an allowance made him by his father. The jury stopped the case, and gave a verdict against the son, who will have to pay the costs out of the "savings" which he has made—according to his own account.

In a case of alleged fraudulent bankruptcy heard at Guildhall on Monday, a novel point was raised under the new law. The bankrupt was charged with dealing with his estate after it had become vested in the assignees. On the other side it was contended that, as the bankrupt had been granted time until November by the Court, he had only been doing his best for the great body of his creditors. The evidence of evil intent was not very strong; and the Alderman, remanding the prisoner, accepted bail for his due appearance.

John George Smith, calling himself an American, and his wife have been committed on charges of shoplifting at the stalls in the Crystal Palace. On the former, when searched, was found a valuable gold watch and chain, a Federal greenback note for 100 dols., and 18s. 6d. in silver; and on the latter nine sovereigns and nine half-eagles.

Two men, named Johnson and Timothy, have been sentenced by Serjeant Gazelee to three years' penal servitude for robbing cabs. Their plan was to drive a cart alongside a moving cab at night and then take off the luggage from the roof. There appears to be a well-organised system for the robbery of luggage from railway stations; but, from the frequent arrests that are made, there is some reason to hope that before long the race of luggage-thieves will be exhausted.

John Jones, described as an elderly man engaged in literary pursuits, was brought up at Bow-street on Thursday week charged with stealing a leaden paper-weight from the reading-room of the British Museum. He confessed his guilt, pleading extreme poverty, and the authorities of the Museum, under the circumstances, recommended him to mercy. The magistrate sentenced him to three months' imprisonment.

Mr. Selfe fined two Irish labourers, Dillon and Hayes, 50s. and 10s. respectively, for forcing themselves into a railway carriage already full.

A Dorsetshire farm labourer was convicted at the Guildhall Police Court last Saturday for sending to Newgate Market a hamper full of beef of a "mortally diseased" cow. One of the witnesses said he would not mind eating it if it were salted; but he would rather not be obliged to eat it. The magistrate let the fellow off with a month's imprisonment. A case under the Nuisances Removal Act came before Sir R. Carden at the Mansion House on Wednesday. The defendant was charged with having bad meat in his shop for sale, and, as he would not give up the name of the consignor, the summons was served. The defendant, who pleaded that he did not know the meat was bad, and that on former occasions he had pointed out bad meat to the inspector, was ultimately fined 20s. and costs. During the last six weeks more than nineteen tons of meat have been condemned in London as unfit for human food.

In another case, at Guildhall, a young man was charged with obtaining goods by fraud within three months of his bankruptcy. He had been arrested at Gravesend just as he was stepping on board a vessel for New Zealand. On his way up to town with the officer he was found coolly loading a revolver, of which he was at once deprived. He was sent to Leeds for trial, as the bulk of the goods was obtained in Yorkshire.

Some time ago a man calling himself Chapman was charged at a police-court with obtaining money fraudulently by the sale of an advowson which he did not possess. A Mr. George Turner, said to be the same individual, was on Tuesday placed at the bar at Westminster Police Court on a precisely similar charge. Towards the close of last year he advertised two advowsons for sale, and the Rev. J. Cox, of Hood Church, near Birkenhead, entered into correspondence with him as to one of them. This led to an interview, and Turner took Mr. Cox to Hardwick, near Wellingborough, which was the living he professed to have for sale. He showed him the church and the village, and afterwards an agreement was made that Turner, as the agent of Mr. James Wilson, of Clapham-common, should sell the advowson to Mr. Cox for £2625, of which £300 was to be paid down. That sum was paid down, but Mr. Cox's solicitors, failing to get any conveyance of the advowson, put the matter into the hands of the police, who could find no Mr. James Wilson. Turner was not apprehended, however, until last Tuesday evening, when he was taken at Bath, where, it is said, he was living as Sir Henry Seymour. In the course of the hearing it came out that about the time when he professed to sell the advowson to Mr. Cox he was negotiating, as he alleged, for its purchase from the real owners. He was remanded till Tuesday next.

Joseph Armstrong, Esq., Town Councillor and ex-Mayor of Newcastle, died at his residence, St. Thomas's-place, on the 29th ult., aged fifty-eight. Mr. Armstrong served the office of Sheriff of Newcastle 1856-7. He had been for many years part proprietor of the *Newcastle Courant*. The interment took place on Thursday week, the remains being followed to the grave by the Mayor's state coach, a long string of private carriages, and by the whole of the persons employed in the *Courant* office.

The annual meeting of the bards of Wales, for competing in poetry, music, and prose, came to a conclusion at Swansea yesterday week. As already stated, the proceedings commenced on Tuesday, under the presidency of Mr. Hussey Vivian, M.P. for Glamorgan. On Wednesday the president was Mr. D. Pugh, M.P.; on Thursday, Mr. E. M. Richards, the Mayor of Swansea; and on Friday, the Lord Bishop of St. David's. Altogether about £500 has been distributed in prizes, among which was a prize of £50 for the best ode on the late Prince Consort.

The triennial ceremony of "throwing the dart" in Cork harbour was performed on Thursday week by the Mayor of that city. The members of the Town Council embarked on board a steam-vessel, attended by all the civic officers, and the band of the Cork City Artillery. The steamer proceeded out to sea until she reached an imaginary line between Poor Head and Cork Head, which is supposed to be the maritime boundary of the borough. Here the Mayor donned his official robes, and proceeded, attended by the mace and sword bearer, the city treasurer, and the town clerk, all wearing their official costumes, to the prow of the vessel, whence he launched the javelin into the water, thereby asserting his authority as Lord High Admiral of the port.

MONETARY TRANSACTIONS OF THE WEEK.

(From our City Correspondent.)

The amount of business doing in National Securities has been very moderate; nevertheless, compared with last week, although in some instances prices have shown signs of weakness, the fluctuations in the quotations have been trifling. The quantity of stock afloat is limited. Most of the foreign exchanges continue in favour of this country; and we are still importing rather large amounts in gold from America. In the Unfunded Debt very little has been doing. However, some of the bills have marked 2s. prem.

Although the demand for money has been far from active, the rates for accommodation have been well supported. In the open market the best paper is done as follows, with an abundant supply of capital on offer :—

Thirty days' bills ..	3⅜ per cent.	Four months' bills ..	4 to 4½ per cent.
Sixty days' bills ..	3⅜ to ⅝ "	Six months' bills ..	4 to 5 "
Three months' bills ..	3⅞ "		

Long-dated paper is inquired for by the leading discount houses. In the Stock Exchange money may be had at 2⅞ to 3 per cent.

In Paris, money is a shade easier. On other parts of the Continent, however, it is firm. The quotations in the leading cities are as under :—

	Bank rate, per cent.	Open market, per cent.		Bank rate.	Open market.
Paris ..	4	.. 3½	Amsterdam ..	3	.. 3
Vienna ..	5	.. 5	Turin ..	5	.. 5
Berlin ..	4	.. 3¼	Brussels ..	4	.. 3½
Frankfort ..	3	.. 2¾	Hamburg ..	—	.. 2¾
			St. Petersburg	6	.. 8

Gold has continued to flow into the Bank of England; but £100,000 has been withdrawn for shipment to the Brazils.

The balance in hand of the South Sea Company is rather over £44,000. This sum admits of a final dividend to the shareholders of £4 5s. per cent.

The value of the gold known to be on passage from Australia is about £530,000. Bar silver has changed hands somewhat freely, at 5s. 1⅛d. per ounce.

The three last steamers from New York have brought £230,000. The exchange comes at 136½; and the premium on gold at 26.

The London General Omnibus Company and the Bank of British Columbia have each declared a dividend at the rate of 5 per cent per annum. The directors of the latter undertaking have started a new branch at Freshfield, British Columbia.

On Monday about an average business was transacted in Home Securities, and prices ruled firm. Bank Stock marked 240 to 239; Reduced Three per Cents, 92½ to ¾; Consols, for Money, 93⅝ ¾; New Three per Cents, 92⅞; Consols, for Account, 93⅞ ¾; Long Annuities, 14⅝; India Stock, 226; Ditto, Five Per Cents, 108⅞ ⅜; Ditto, Debentures, 100½; Ditto, Bonds, 19s. prem.; and Exchequer Bills, par to 2s. prem. On Tuesday the market was steady. Consols closed at 93½ for Money, and 93½ ⅝ for Account; Reduced and New Three per Cents realised 93¼ to ⅜; India Five per Cents, 108½ to ⅝; and Exchequer Bills par. Wednesday's market was flat, and prices declined. Consols, for Money, sold at 93⅜ ⅝; for Account, 93¾ ⅞ ⅝; Reduced Three per Cents, 92½ ¼ 92; New Three per Cents, 92¼ 92; New Two-and-a-Half per Cents, 77½; India Stock, 108⅞ ¾ ⅞; and Exchequer Bills, 2s. prem. to par. On Thursday the fluctuations in prices were trifling. Consols, for Money, realised 93⅝ to ½; for Account, 93⅝ ¾; Reduced and New Three per Cents, 92½ to ¾; and Exchequer Bills, par to 3s. prem. India Five per Cent Stock marked 108⅞ to ⅝; and India Bonds, 17s. prem.

The half-yearly meeting of the proprietors of the Bank of England was held on Thursday, when a dividend of 4½ per cent for the half year was declared, without deduction on account of income tax.

Mexican Stock has been dealt in to a considerable extent, and a further advance has taken place in its value. Spanish Securities have continued firm; but Confederate Scrip has ruled heavy in the extreme, at 31 to 29 dis. Turkish Consolidés have realised 54, being an improvement on last week's quotations. Brazilian Four-and-a-Half per Cents have marked 95; Buenos Ayres Six per Cents, 92¼; Ditto, Deferred, 38½; Danish Five per Cents, 1843, 91¼; Dutch Two-and-a-Half per Cents, 64⅝; Egyptian Seven per Cents, 101⅝ ex div.; Ditto, Second Issue, 101⅝ ex div.; Greek, 39½; Ditto, Coupons, 19½; Mexican Three per Cents, 42⅞; Moorish, 95; New Granada, 16⅛; Peruvian Four-and-a-Half per Cents, 1862, 89; Portuguese Three per Cents, 1862, 49½; Ditto, 1853, 50; Russian Four-and-a-Half per Cents, 90½; Ditto Five per Cents, 1862, 93¼; Sardinian Five per Cents, 90; Spanish Deferred, 48⅝; Ditto Certificates, 13½; Ditto, Passive, 35; Turkish Old Six per Cents, 95; Ditto, 1858, 70 ex div.; Ditto, 1862, 70½; Venezuela Three per Cents, 25⅝; Ditto Six per Cents, 58⅞; and Italian Five per Cents, 73½.

The shares of the leading Joint-Stock Banks have changed hands at enhanced quotations, and the market has presented a very firm appearance :—Agra and United Service have sold at 115; Alliance, 40½; Chartered of India, Australia, and China, 34; Imperial Ottoman, 19⅝; London and Brazilian, 45½; London Chartered of Australia, 23; London and County, 49; London and Westminster, 79; Metropolitan and Provincial, 17; Scinde, Punjaub, and Delhi, 5½; Standard of British South Africa, 21⅝; Ditto, New, 16½; Union of England and France, 9; and Union of London, 37.

A fair average business has been transacted in Colonial Government Securities :—Canada Six per Cents, 1877-84, 103; Ditto, Five per Cents, 93½; New South Wales Five per Cents, 1871 to 1876, 101⅞; Ditto, 1888 to 1892, 102⅝; and Victoria Six per Cents, 114½.

The Miscellaneous Market has been moderately active. Berlin Waterworks have realised 8⅞; Hudson's Bay Company, 9½; International Financial Society, 11; Italian Irrigation—Canal Cavour, 4⅞; Ditto, Six per Cent Bonds, 89; Joint-Stock Discount, 6½; London Financial Association, 13; London General Omnibus, 2½; Madras Irrigation and Canal, 4½; North British Australasian, ¾; Trust and Loan Company of Upper Canada, 5⅞.

American Government Securities have continued firm. Illinois Central Seven per Cents, 1875, have sold at 81; Ditto, 100 dol. Shares, 83½; New York Central, 100 dol. Shares, 94; and Pennsylvania Bonds, 1st Mortgage, 73½.

Very little change has taken place in the value of Railway Shares. A limited business, however, has again been transacted. The "calls" falling due this month amount to £1,285,266. Annexed are Thursday's official closing quotations :—

Ordinary Shares and Stocks.—Great Eastern, 51½; Ditto East Anglian Stock, 25; Great Northern, A Stock, 121½; Great Southern and Western (Ireland), 100½; Great Western, 67; Lancashire and Yorkshire, 113½; London and Blackwall, 73½; London and Brighton, 113½; London, Chatham, and Dover, 42½; London and North-Western, 101⅞; London and South-Western, 102; Metropolitan, 121½; Midland, 127½; North British, 55⅞; North-Eastern—Berwick, 106⅞; Ditto, Leeds, 57½; North Staffordshire, 81; South-Eastern, 94½; Staines, Wokingham, and Woking, 9½; Taff Vale, B, 12⅞; Ditto, C, 5⅞.

Preference Shares.—Great Eastern, Norfolk, Five per Cent 106; Great Northern Four-and-a-Half per Cent, 105½; North Staffordshire, 22⅞; South Eastern Four-and-a-Half per Cent, 101½; West Midland, Guaranteed Shares, Five-and-a-Half per Cents, 5½.

Lines Leased at a Fixed Rental.—London, Tilbury, and Southend, 100; Shrewsbury and Hereford, 136.

British Possessions.—Eastern Bengal, 110; East Indian, 103⅞; Grand Trunk of Canada, 20½; Ditto, 1st Preference, 71⅞; Great Indian Peninsula, 108½; Great Western of Canada, 10½; Scinde, 107⅞; Delhi, 107⅞; Punjaub, 107⅞.

Foreign.—Dutch Rhenish, 18; Great Luxembourg, 14½; Recife and San Francisco, 18⅞; San Paulo, 22⅞; Turin and Savona, 2⅞.

The return of the Bank of England for the week ending Sept. 9 shows the following results, when compared with the previous statement :—

A decrease of circulation of ..	.. £273,911	A decrease of bullion of ..	.. 148,731
An increase of public deposits of	.. 179,290	An increase of rest of ..	.. 37,147
A decrease of other deposits of	.. 352,028	An increase of reserve of ..	.. 115,584
A decrease of securities of ..	.. 260,841		

The total circulation is £21,646,811; public deposits amount to £6,997,402; and private deposits to £12,900,434; securities are £29,919,543; and the stock of bullion is £15,345,148.

THE MARKETS.

Corn Exchange, Sept. 7.—The supply of English wheat on offer in to-day's market was only moderate. For all kinds the demand ruled steady, at an advance in the quotations of from 1s. to 2s. per quarter, and at which a good clearance was effected. Foreign wheat commanded more attention, at 1s. per quarter above previous rates. Floating cargoes of grain were quite as dear as last week. There was an improved sale for most descriptions of barley, and the currencies had an upward tendency. Malt was in moderate supply, and fair request, at full prices. Good sound oats were quite as dear as last week; but inferior samples met a dull inquiry. Both beans and peas have changed hands somewhat freely, at quite previous rates. Flour has sold at very full prices.

Sept. 9.—Wheat and all other kinds of produce moved off steadily, and Monday's currency was well supported.

English.—Wheat, Essex and Kent, red, new, 41s. to 48s.; ditto, white, 43s. to 50s.; Norfolk and Suffolk, red, 41s. to 47s.; rye, 34s. to 37s.; grinding barley, 26s. to 28s.; distilling ditto, 29s. to 34s.; malting ditto, 29s. to 40s.; Lincoln and Norfolk malt, 60s. to 66s.; brown ditto, 50s. to 55s.; Kingston and Ware, 60s. to 66s.; Chevalier, 66s. to 68s.; Yorkshire and Lincolnshire feed oats, 18s. to 23s.; potato ditto, 23s. to 27s.; Youghal and Cork, black, 17s. to 22s.; ditto, white, 18s. to 23s.; tick beans, 30s. to 32s.; grey peas, 35s. to 36s.; maple, 38s. to 40s.; white, 37s. to 39s.; boilers, 38s. to 39s. per quarter. Town-made flour, 37s. to 43s.; town households, 30s. to 32s.; country marks, 28s. to 32s. per 280 lb. French, 35s. to 38s. per sack. American, 19s. to 23s. per barrel.

Arrivals this Week.—English and Scotch: wheat, 680; barley, 20; malt, 150; flour, 220. Foreign: wheat, 1650; oats, 8510; flour, 320 sacks.

Seeds.—Mustard seed has moved off steadily, at very full prices. Otherwise, the seed trade has ruled heavy, at late rates. Cakes are tolerably firm.

Linseed, English, crushing, 62s. to 68s.; Calcutta, 66s. to 68s.; hempseed, 44s. to 48s. per quarter; coriander, 14s. to 16s. per cwt.; brown mustard seed, 9s. to 12s.; white ditto, 7s. to 8s.; tares, old, 4s. to 5s. per bushel; English rapeseed, 62s. to 65s. per quarter. Linseed cakes, English, £9 10s. to £10 10s.; ditto, foreign, £9 10s. to £10 10s.; rape cakes £5 to £6 per ton; canary, 48s. to 52s. per quarter; red clover seed, 33s. to 48s.; white ditto, 54s. to 58s. per cwt.

Bread.—The prices of wheaten bread in the metropolis are from 7d. to 7½d.; of household ditto, 5d. to 6½d. per 4lb. loaf.

Imperial Weekly Averages.—Wheat, 44s. 2d.; barley, 34s. 8d.; oats, 22s.; rye, 32s. 11d.; beans, 38s. 10d.; peas, 37s. 2d.

The Six Weeks Averages.—Wheat, 45s. 9d.; barley, 32s. 3d.; oats, 22s. 10d.; rye, 34s. 3d.; beans, 39s. 8d.; peas, 35s. 8d.

English Grain Sold Last Week.—Wheat, 83,175; barley, 3796; oats, 7593; rye, 344; beans, 1235; peas, 740 quarters.

Tea.—The demand for nearly all kinds is in a sluggish state; nevertheless, compared with last week, very little change has taken place in the quotations.

Sugar.—Most raw qualities move off slowly, and in some instances prices are a shade lower than last week. Refined goods are inactive, at 45s. per cwt. for common brown lumps. The stock in warehouse consists of 113,272 tons, against 89,719 tons at the same time last year.

Coffee.—The market generally is firm, and the currencies are well supported. Stock, 10,649 tons, against 10,510 tons in 1862.

Rice.—Buyers are operating somewhat freely; but no change has taken place in prices. The supply in warehouse amounts to 51,188 tons, against 61,248 tons last year.

Provisions.—Most kinds of butter are in moderate request, at about stationary prices. The bacon market is firm, at late rates. Hams and lard are quite as dear as last week. Other provisions are inactive, but not cheaper.

Tallow.—The market is very inactive. P.Y.C., on the spot, is selling at 40s. 6d. to 41s.; and for delivery during the last three months, 42s. to 42s. 6d. per cwt. Rough fat, 2s. 1½d. per 8 lb.

Oils.—Linseed oil moves off slowly, at about previous rates. In other oils very little is doing on former terms.

Spirits.—The demand for rum is somewhat restricted. Proof Leewards, 1s. 5d. to 1s. 6d.; proof East India, 1s. 5d. per gallon. Brandy and grain spirits are unaltered in value.

Hay and Straw.—Meadow hay, £3 to £4 10s.; clover, £4 to £6; and straw, £1 8s. to £1 16s. per load.

Hops.—The supply of new hops is increasing, and the demand for them is steady, at from £5 5s. to £8 per cwt. Yearlings are tolerably firm in price.

Wool.—English wool is in good request, at full prices; but foreign and colonial qualities rule heavy.

Potatoes.—The supplies are seasonably extensive, and the demand is steady, at from 60s. to 105s. per ton.

Metropolitan Cattle Market, Thursday, Sept. 10.—The supply of beasts on sale here to-day was only moderate. Prime breeds sold freely, at fully Monday's advance in prices; but inferior stock was in slow request, at that day's rates. The top quotation was 5s. per 8 lb. With sheep the market was but moderately supplied. Prime Downs and half-breds changed hands at the extreme rates of Monday, the top price being 5s. 4d., in some instances 5s. 6d. per 8 lb. Inferior breeds met a slow sale, but at full prices. The few lambs on offer changed hands at about previous rates. Calves—the supply of which was but moderate—moved off slowly, at previous currencies. The highest quotation was 4s. 8d. per 8 lb. Pigs and milch cows were a slow sale, on former terms. Per 8 lb., to sink the offal:—Coarse and inferior beasts, 3s. 6d. to 3s. 10d.; second quality ditto, 4s. to 4s. 6d.; prime large oxen, 4s. 8d. to 4s. 10d.; prime Scots, &c., 4s. 10d. to 5s.; coarse and inferior sheep, 3s. 8d. to 4s. 2d.; second quality ditto, 4s. 4d. to 4s. 8d.; prime coarse-woolled ditto, 4s. 10d. to 5s.; prime Southdown ditto, 5s. 2d. to 5s. 4d.; large coarse calves, 3s. 6d. to 4s. 2d.; prime small ditto, 4s. 4d. to 4s. 8d.; large hogs, 3s. 6d. to 4s.; neat small porkers, 4s. 2d. to 4s. 6d.; lambs, 5s. to 6s.; suckling calves, 14s. to 21s.; and quarter-old store pigs, 20s. to 29s. each.

Head of Cattle on Sale.—Total supply: Beasts, 970; cows, 128; sheep and lambs, 7600; calves, 290; pigs, 305. Foreign: Beasts, 404; sheep 2500; calves, 148.

Newgate and Leadenhall.—Prime meat is firm in price; but inferior qualities are a slow sale:—Beef, from 2s. 8d. to 4s. 2d.; mutton, 3s. 4d. to 4s. 6d.; lamb, 4s. 8d. to 5s.; veal, 3s. 8d. to 4s. 4d.; and pork, 3s. 8d. to 4s. 8d. per 8 lb. by the carcass.

Robert Herbert.

THE EARTHQUAKE IN MANILLA.

(From a Correspondent.)

I hasten to send you further photographs, which will illustrate the ravages caused by the earthquake, which I fully described in my last letter. The one representing the interior of the palace shows the present condition of the large reception-room. The wife and daughter of the Governor-General were the only members of the family present in the palace at the time of the calamity. They were seated in a room at the further end of the sala. They left it just in time to escape the fall of the roof, and as they ran through the reception-room on their way to the staircase the rafters and tiles fell crashing in behind them. The Governor and his son were out driving, and, having felt the earthquake, although but slightly in comparison with those who were in the city, they were hurrying back to see what had happened when, at the entrance of the city, they met the ladies of their family, escorted by halberdiers, flying from the scene of destruction.

I send you also a View of the church of St. Domingo. One of the towers is, as you see, completely destroyed; the other was so badly cracked that it has been since pulled down. The monastery is likewise almost destroyed, as well as the convents of Sta. Clara, Sta. Rosa, and Sta. Catalina, all belonging to the community of Dominican friars.

The third View shows the river frontage of the Government tobacco-store. The wooden building and flagstaff near the river denote the offices of the captain of the port.

Reports from the province of Batangas state that the volcano of Taal is very active. Each week since the great calamity of last month slight shocks have been felt, some very sensibly, and others, like the one which occurred two hours back, so slight as to be scarcely perceptible.

HALIFAX AND CALDER VALE AGRICULTURAL ASSOCIATION.

On Saturday, the 29th ult., the twenty-fifth annual exhibition of this association took place in Clare Hall Park, Halifax, which had been lent for the occasion by Joshua Appleyard, Esq. Clare Hall Park is a fine piece of ground in close proximity to the town, and yet well suited to the purposes of an agricultural show. The day was beautifully fine, and this favourable circumstance, combined with the reasonable price of admission, drew to the showground an immense number of spectators. The arrangements of the committee of management were of the best possible kind, and such as completely secured the comfort of all concerned. The courtesy and attention of Mr. Irvine, the secretary, are also deserving of notice. Under Mr. Irvine's management the Halifax cattle show has come to rank among the best in the north of England. The entries for the show were 1217 in number. This was 300 in excess of last year, though last year's show was regarded as the best ever held in Halifax. Among the entries this year were 24 bulls, 77 cows, 165 horses, 106 pigs, 213 dogs, 370 pens of poultry, 125 pens of pigeons, and 93 implements.

By far the most attractive and also the most exciting part of the show was judging the horses for the prize of being the best leaper, for which there were many competitors, the horses running in a ring, and having to clear four barriers, the first—the highest and

RUINS OF GOVERNMENT TOBACCO-STORE.—SEE PRECEDING PAGE.

most difficult, being raised after all had gone over; so that at last it rose to 5 ft. 6 in., which height puzzled not a few. Then came the long jump: then the in and out; and, lastly, the very wide jump, one horse clearing 27 ft. The judges, who were seated on the top of the posts on each side of the grand leap, stood some chance of broken bones, as one horse, swerving, made Mr. Booth's place vacant by knocking him off his perch. Seats were erected for the ladies and others willing to pay a shilling for a good view of the proceedings, and were rapidly filled, as was also every other availing place for seeing the contest. The cheers and loud cries from the "Yorkshire lads" of "Let 'em lope, lads," fully expressing the deep interest they took in the matter. As well as being a useful prize for the class of hunters, there is no doubt that it greatly benefits the exchequer of the society, more than twelve thousand persons being present, many of whom came from long distances, and, no doubt, will come again on a future occasion, as all seemed so thoroughly to enjoy the scene. The whole show of horses was remarkably good, one roadster stallion was superb, both in action, form, and colour, as was also a very grand drayhorse. We give an illustration of the principal leap, with the judges in their places.

The cattle department was well filled, and contained some very good beasts, as also did the pigs and dogs. The pigeons were not quite up to the mark, the Yorkshire breeders seeming to neglect one great point in their birds—that of feather; but, on the whole, the show was highly successful, both as to quality, attendance of visitors, and also in a pecuniary point of view. In consequence of the latter being the case, the society intend next year to raise the amount of their prizes.

WELLINGTON COLLEGE CHAPEL, WOKINGHAM.

THE foundation-stone of the new chapel which has just been completed at Wellington College was laid about two years ago by the late Prince Consort, and the building has been erected by Mr. Myers, from the designs of Mr. Gilbert Scott. Though essentially standing detached from the college, a communication is effected by means of an arcaded cloister, which leads directly to the western door. The chapel is six bays in length, with the addition of an apsidal chancel, and a vestry and organ chamber on the north side. Above the eastern bay rises an octagonal bell-turret, or flèche, of lead, the slender spire of which, as well as the gablets below, are crocketed. The walls are built of red brick, with stone dressings, and this feature is preserved also internally, there being no plastering. Great care has been

THE CHAPEL, WELLINGTON COLLEGE.

bestowed in the designing and execution of the various carvings and capitals with which the chapel is enriched, especially in the entrance-doorway, the roof corbels, the cornice within the apse, and the arcade below the window-string externally. This department of the work was intrusted to Mr. Farmer, of London. Internally, the effect is noble, owing to the loftiness of the proportions and the boldness of its single-panned roof. The seats are ranged longitudinally, and the centre passage is tiled with red and black patterns. The west end and part of the return sides are filled with handsome canopied oak stalls, which are a special memorial to the late Prince Consort, whose crest and ciphers are appropriately introduced in the enrichments. These stalls have been executed by Ruddle, of Peterborough.

HALIFAX AND CALDER VALE AGRICULTURAL ASSOCIATION: JUDGING HUNTERS.—SEE PAGE 273.

*** *The charge for the insertion of Births, Marriages, and Deaths is Five Shillings for each announcement.*

BIRTHS.

On the 28th ult., at Pembroke Dock, the wife of Deputy Assistant Commissary-General Prissick, of a daughter.

At Edinburgh, Lady Campbell, of Dunstaffnage, of a daughter.

At Godmersham Park, Canterbury, Viscountess St. Vincent, of a son.

MARRIAGES.

On the 3rd inst., at St. Stephen's Church, Westbourne-park, by the Rev. John Alexander Jacobs, William John Fairbairn, Esq., M.D., to Georgiana, eldest daughter of George Reid, Esq., M.D., and Donna Maria Isabel de Figueiredo, his late wife, of St. Antonio estate, Macahé, province of Rio de Janeiro, empire of Brazil. The bride was given away by Sir Alexander Reid, Bart., and Robert Reid, Esq., of Wisbeach, her uncle. No cards.

On the 3rd inst., at Butterton Church, by the Rev. Frederick Henry Long, M.A., James Barclay Montgomery, Esq., M.D., of Penzance, Cornwall, to Margaret, only daughter of the late John Boyle, Esq., of Wolstanton, Staffordshire. No cards sent.

On the 9th inst., at St. Mary's, Hemel Hempstead, by the Vicar, the Rev. T. P. Hutton, M.A., assisted by the Rev. W. Cathcart Murphy, M.A., Frederick Nelson, Esq., of Edgbaston, Birmingham, to Eliza, daughter of Robert Merry, Esq., M.D., of Marlowes House, Hertfordshire. No cards.

On the 1st inst., at St. Mary's, Moseley, by the Rev. J. Cordeaux, M.A., Incumbent of Hoyland, Yorkshire, assisted by the Rev. C. P. Good, Vicar of Eccleshall, Staffordshire, and the Rev. J. R. Davison, M.A., Incumbent of St. Mary's, Charles Wm. Bell, Esq. (late 15th King's Hussars), of Newbus Grange, in the county of Durham, to Louisa Maria, second daughter of Wm. Henry Dawes, Esq., of Moseley Hall, Worcestershire. No cards.

On Thursday, the 10th inst., at St. Bartholomew's, Sydenham, by the Rev. Charles English, M.A., William P. Eagle, Esq., of 6, Pembridge-crescent, Bayswater, and Cannon-street West, to Harriett, only daughter of Henry Withers, Esq., of No. 3, Wellington-street, London Bridge. No cards sent.

DEATHS.

On the 3rd inst., at Llangatlock House, Abergavenny, Matthew Towgood, Esq., aged 76.

At Lowesby Hall, Leicestershire, the Dowager Lady Fowke, aged 74.

At Benares, Janet Louisa, daughter of Captain William Hamilton, Bart., Royal Horse Artillery.

On the 15th of July last, at Shanghai, China, of cholera, after a few hours' illness, Vaughan Thomas MacNiel Purrier, midshipman on board the ship Hanover, the beloved son of Thomas Purrier, Esq., of the Mall, Chiswick, aged 18.

DR DE JONGH'S
(Knight of the Order of Leopold, &c.)
LIGHT-BROWN COD-LIVER OIL,
prescribed by the Faculty as the purest, most efficacious
and the most palatable form
in the world as the safest, speediest, and most effectual
CURE
CONSUMPTION, BRONCHITIS, ASTHMA, COUGHS, RHEUMATISM, GOUT, GENERAL DEBILITY, DISEASES OF THE SKIN, RICKETS, SCROFULA, AND ALL SUCH AFFECTIONS,
as have their origin in a disordered state of the system.

SELECT MEDICAL OPINIONS.
Sir ROBERT CHRISTISON, M.D.
Physician in Ordinary to the Queen in Ireland.
"I consider Dr. de Jongh's Light-Brown Cod-Liver Oil to be a superior oil, and in high degree useful, and a therapeutic agent of great value."
DR. GRANVILLE, M.D.
Author of the "Spas of Germany."
"Dr. Granville has found Dr. de Jongh's Light-Brown Cod-Liver Oil genuine, and has indeed often had a chance to prescribe it. Hinds, and that it does not cause the nausea and indigestion too often accompanying the administration of Cod-Liver Oil."

EDWIN CANTON, Esq., F.R.S.,
President of the Medical Society of London, &c., &c.
"For several years past I have been in the habit of prescribing Dr. de Jongh's Light-Brown Cod-Liver Oil, and have found it much more efficacious than other varieties of the same medicine which I have also employed with a view to the same therapeutic results."

DR. DE JONGH'S LIGHT-BROWN COD-LIVER OIL is sold only in Imperial half-pints, 2s. 6d.; pints, 4s. 9d.; quarts, 9s.; capsuled and labelled with his stamp and signature, WITHOUT WHICH NONE CAN POSSIBLY BE GENUINE, by respectable Chemists.
ANSAR, HARFORD, and CO., 77, STRAND, LONDON, W.C.

Quilted, Lined, and Bound, 15s. 6d. to 35s.
E. PHILPOTT, 37, Piccadilly.

CRINOLINE.—The Patent ONDINA, or Crystal Crinoline, is the most graceful production of the ordinary hoop; and to perfect are the wavelike bands that a lady may sit down in it, and rise from it, without the slightest fear of its embarrassing her in the slightest degree. It is to be had in every size in a carriage, without inconvenience to herself or others, or preventing the safe ventilation of the interiors, and nothing is so incongruous, so ungraceful, as those protuberances hitherto to destroy the symmetry of the figure. Price 10s. 6d. Sold by all Drapers throughout the world. Price 10s. 6d.
E. PHILPOTT, 37, Piccadilly, W.

LADIES' FIRST-CLASS KID ELASTIC Treble-sided Kid Elastic Boots, for the Country, 12s. 6d.
Second-quality Kid Elastic Boots, for Country Wear, 10s. 6d.
THOMAS D. MARSHALL, 192, Oxford-street, W.

Thoughts of Thee	J. Blumenthal	3s. 0d.

CRAMER, BEALE, and WOOD, 201, Regent-street.

CRAMER'S ENGLISH PIANETTE, 22 guineas. Cramer and Co. manufacture this capital small instrument. It has all the requisites of the best Pianoforte—check action, solid touch, agreeable tone. The case is of polished ash or pine. In practising on this Pianoforte the fingers of the player will be strengthened much more rapidly than on an old instrument, loose in the key and worn in the hammer. In rosewood, 25 guineas; in walnut, 26 guineas.
Purchasers are particularly requested to observe that this instrument has not the common or single action, but the double or check action; and that Cramer and Co. are the only manufacturers of it in England.—207 and 209, Regent-street.

CRAMER'S INDIAN PIANETTE, in solid Mahogany, for warm climates. The most portable Pianoforte yet made. Price 35 guineas.
207 and 209, Regent-street.

CRAMER'S PIANOFORTE GALLERY offers peculiar advantages for the choice of a first-rate Pianoforte. There is a profusion of every description, from the smallest Pianette to the largest and finest Grand, and by all the eminent makers of England and the Continent. Nothing but the very best instruments are selected from the factories, all that are deficient in tone being carefully avoided. Purchasers from CRAMER and CO. may therefore rely on having placed in their hands whatever may be reasonably expected from a selection made with competent practical skill.
Cash purchasers will receive the usual discount.
Every Instrument fully guaranteed.
Cramer and Co. deliver their Pianofortes at any railway station in the kingdom without risk to the purchaser, and at a very trifling cost.
Cramer and Co.'s Pianoforte Gallery (the largest in Europe), 207 and 209, Regent-street.

PIANOFORTE RENOVATION.—CRAMER and CO. have organised a separate staff of the most skilful workmen for the repairing and renewing of the mechanism of pianofortes worn out by years of constant practice. Cramer and Co. do not pretend (as is very commonly done) to make the instrument "equal to new," but they guarantee that, if originally good, it will be restored to great freshness of tone, and in other respects made to be perfectly satisfactory. Cramer and Co. give estimates of cost, and say whether the instrument be worth the outlay.—Pianoforte Gallery (the largest in Europe), 207 and 209, Regent-street.

CRAMER and CO.'S GREAT SALE of SECONDHAND PIANOFORTES, at their Gallery, 207 and 209, Regent-street. The instruments are all by the very best makers, have been returned from the season's hire, and will be sold at the most moderate prices. The Sale will continue until the 3rd of October. The number of instruments to select from is quite unprecedented.

SELF-ACTING ORGAN, with Six barrels, playing Three Overtures and selections of Operatic Music. This magnificent instrument, built a very few years ago at a cost of 300 guineas, is now to be sold for 100 guineas. It is in the most perfect condition. Apply to CRAMER and CO., 207 and 209, Regent-street.

NOTICE.—HALF-PRICE.—All Music, and the best Editions, at half the published price, sent post-free for postage-stamps or Post Office order.
HOPWOOD and CREW, 42, New Bond-street, W.

The prettiest drawing-room piece is

London: B. WILLIAMS, 11, Paternoster-row.

SECONDHAND PIANOFORTES. CHAPPELL and CO. have a large Stock of SECONDHAND PIANOFORTES for Sale, by BROADWOOD, COLLARD, ERARD, &c., &c., that have been hired for the season, at very reduced prices. Also, new Instruments of every description.—Chappell and Co., 50, New Bond-street.

PIANOFORTES at CHAPPELL'S.—The largest Stock in London, by Broadwood, Collard, Erard, &c., for Sale or Hire.—50, New Bond-street.

CHAPPELL'S FOREIGN PIANINO (the only Pianino to which the Prize Medal was awarded).—A very elegant Pianoforte, of small size, the full compass, check action, and most perfect touch, admirably adapted to small rooms, yachts, boudoirs, &c. Warranted to keep in tune, and to be the best and cheapest Pianoforte, with check action and all the latest improvements.
Price, in mahogany, rosewood, or walnut, 25 and 26 guineas. A great variety may be seen at
Chappell and Co.'s, 50, New Bond-street.

CHAPPELL and CO.'S ENGLISH MODEL COTTAGE PIANOFORTE.—To amateurs preferring the pure English tone of the Broadwood or Collard quality, the English Model will be found the most perfectly satisfactory instrument, at a moderate price. The action is of the same simple description as the above makers', and therefore especially adapted to the country, where the more complicated actions are objectionable to many of the tuners. In elegant rosewood case, with full fret, similar in every respect to other instruments at 50 guineas, price 35 guineas; in walnut, 40 guineas.
Chappell and Co., 50, New Bond-street.

CHAPPELL'S FOREIGN MODEL PIANOFORTE, price 50 guineas in rosewood; or in walnut, 60 guineas. This Instrument has Three Strings and the fullest grand compass of Seven Octaves. It is strengthened by every possible means to endure the greatest amount of wear, and to stand perfectly in any climate. The workmanship is of the best description; the tone is round, full, and rich; and the power equal to that of a Bichord Grand. The touch is elastic, and the repetition very rapid. No pianoforte, in all respects comparable, has hitherto been made in England at the same price. Every instrument will be warranted, and (if desired) exchanged within six months of the purchase.
Chappell and Co., 50, New Bond-street.

BROADWOOD, COLLARD, and ERARD. The best Pianofortes of every description, including all the newest kinds by these celebrated makers, may be tried side by side (and hired with option of purchase) at the new Showrooms of
CHAPPELL and CO., 50, New Bond-street.

ALEXANDRE'S DRAWING-ROOM MODEL HARMONIUM, the best that can be made, price 60 guineas; other varieties at 25 and 35 guineas. Illustrated Catalogues of Pianofortes and Harmoniums upon application to
CHAPPELL and CO., 50, New Bond-street.

SIX-GUINEA HARMONIUM by ALEXANDRE, with five octaves, two footboards, and in oak case. These instruments are lower in price and superior to all other cheap harmoniums. Descriptive lists on application to
CHAPPELL and CO., 50, New Bond-street.

SECONDHAND HARMONIUMS by ALEXANDRE, nearly (if not quite) as good as new, at greatly-reduced prices, at CHAPPELL'S, 50, New Bond-street.

ALEXANDRE'S PRIZE EXHIBITION MODEL HARMONIUM, for the CHURCH, 13 stops, 4 rows of vibrators, and Venetian swell, worked by the heel of the right foot, in oak case, 32 guineas. A large assortment may be always seen at CHAPPELL and CO.'S, 50, New Bond-street.

BOOSEYS' MINIATURE PIANOFORTE, price 17 guineas, in walnut, French polished:—"We have had occasion to examine a new description of Pianoforte manufactured by Boosey and Sons, which combines quality and cheapness in a degree which has not previously been ever attempted. When heard it creates such surprise as would be caused by a child 'discoursing most eloquent' music with the voice of a full-grown man. It has a rich, brilliant tone, quite strong enough to fill the largest drawing-room; and the whole mechanism of the instrument seems to be firm and durable. No piano at so small a price has ever before been presented to the public."—Vide ILLUSTRATED LONDON NEWS, Feb. 28, 1863. This Piano is well adapted for the cabin of a ship or an extreme climate.—Boosey and Sons, 24, Holles-street, London.

ENGLISH CONCERTINAS, by LACHENAL, Full Compass, with all the latest Improvements, warranted for Hot Climates, and to keep well in Tune, from Two guineas, with Case, Lock and Key, &c.
HOPWOOD and CREW, 42, New Bond-street.

The New Training Schools, at South Kensington, will be Opened on the 5th of October.
For information respecting Fees, &c., apply at each School, or to the Secretary, South Kensington Museum, W.
By order of the Lords of the Committee of Council on Education.

HASTINGS.—The QUEEN'S HOTEL, conducted by the Queen's Hotel Company (Limited), Hastings-on-the-Sea, close to the rail. Tariffs of Mr. RAINGER, Manager.

ISLE OF MAN.—HILL'S ROYAL HOTEL, DOUGLAS. Board, Lodging, and Attendance, 5s. 6d. per day. Inclose a stamp for an interesting Guide and Map of the Island.

SALTBURN-BY-THE-SEA, CLEVELAND.
THE ZETLAND HOTEL, at this delightful Marine Watering-place, is NOW OPEN, and is studiously arranged in all Departments to meet the requirements of comfort and luxury. It contains about Ninety Rooms, comprising large coffee and dining rooms for gentlemen; ladies' coffee and drawing rooms; drawing, dressing, and bed rooms en suite; spacious reading-room, billiard-room, smoking-room, bedrooms, &c. Attached are excellent stables and coachhouses, with bedrooms for livery servants. A platform connects the station with the Hotel, and porters attend the arrival of every train. The scenery around Saltburn is most charming and varied; whilst the beach, unrivalled in extent and firmness, offers all the attractions desired by visitors at the Seaside. Inquiries may be addressed to, and all particulars obtained from, WILLIAM BANKS, Manager (late of the New Club, Edinburgh).—Saltburn-by-the-Sea, July 27, 1863.

GREAT NORTHERN RAILWAY. TOURIST TICKETS, at Cheap Fares, available for one calendar month, are issued from King's-cross and other principal stations to EDINBURGH, Glasgow, Stirling, Dunkeld, Perth, Dundee, Forfar, Brechin, Montrose, Arbroath, Aberdeen, Keith, and Elgin; and also
To SCARBOROUGH, Whitby, Redcar, Filey, Bridlington, Withernsea, Harrogate, and the Isle of Man.
For further particulars see programmes, to be obtained at King's-cross Station, at all the receiving offices in London, and at the stations in the country. SEYMOUR CLARKE, General Manager.
London, King's-cross Station, August, 1863.

MIDLAND RAILWAY. TOURIST TICKETS at Cheap Fares, available for One Calendar Month, are ISSUED at the Midland Booking Office, King's-cross, and other principal stations, to
SCOTLAND—Edinburgh, Glasgow, Stirling, Perth, Aberdeen, &c.
IRELAND—Belfast, Portrush, for Giant's Causeway.
LAKE DISTRICT—Windermere, Furness Abbey, Ulverstone, Coniston, Penrith, Morecambe, Ingleton, &c.
SEASIDE and BATHING-PLACES—Scarborough, Whitby, Filey, Bridlington, Harrogate, Matlock, Buxton, &c.
Programmes and full particulars may be obtained at all the Company's Stations and Receiving Offices.
Inquire at King's-cross for Tickets via Midland Railway.
Derby, 1863. JAMES ALLPORT, General Manager.

MONEY ADVANCED by Mr. LUXMOORE, Silversmith, &c., of 92, St. Martin's-lane, W.C. (opposite New-street, Covent-garden), on plate and jewellery, at much less interest than is usually charged.—N.B. Jewels and plate bought.

"RECONNOIT'RER" GLASS, 9s. 6d.! This Tourists' Favourite weighs 8 oz., is achromatic, and so strong that ships, houses, trees, &c., ten miles off; Jupiter's Moons, &c., are distinctly seen by it; and when used as a landscape glass is valuable on a twenty-five mile radius. "I think the Reconnoiterer very good."—The Marquis of Carmarthen. "I never before met an article that so completely answered its maker's recommendation."—F. H. Fawkes, Esq., Farnley, Otley. "Regarding the glasses supplied by Messrs. Salom, I am well pleased with them."—From a report by the Head Gamekeeper of the Marquis of Breadalbane. "The economy of price is not secured at the cost of efficiency. We have carefully tried it at an 800-yard rifle-range against all the glasses possessed by the members of the corps, and found it fully equal to any, although they had cost more than four times its price."—The Field. Post-free, 10s. 10d. The Hythe Glass, showing bullet marks at 1200 yards, 31s. 6d. These Glasses are only to be had direct from SALOM and CO., 98, Princes-street, Edinburgh, who have no agents.

GOLD CHAINS and FINE GOLD JEWELLERY.—A very elegant STOCK of GOLD CHAINS, 18s. to 20 gs.; Gentlemen's Albert Chains, 21s. to 18 gs.; Gold Brooches, 20s. to 15 gs.; Gold Bracelets, 55s. to £20; Wedding and Keeper Rings, 10s., 15s., and 20s. Gem ditto, 12s. 6d. to 20 gs.; Gold Earrings, 12s. 6d. to 5 gs. per pair. Gold Lockets, 10s. to 16 guineas. Gold Scarf Pins, 5s. to 10 gs.—FREDC. HAWLEY, Goldsmith, 148, Regent-street, W. Jewellery repaired and Diamonds reset.

WATCHES, TIMEPIECES, and CLOCKS. Elegant GOLD WATCHES, jewelled in four holes, £2 15s. to £35; Silver Watches, £1 5s. to 12 guineas; eight-day Timepieces, 12s. 6d. each; Clocks going 14 days, three guineas and upwards.—FREDERIC HAWLEY, Watchmaker, 148, Regent-street, W. (from 75, Strand, and Coventry-street). Established nearly a Century. List of prices free. Old Watches, Gold, Silver, Diamonds, &c., purchased or taken in exchange. Merchants and Captains supplied on liberal terms. Watches and Clocks repaired.

MAPPIN BROTHERS,

TO LADIES. — GREEN TISSUE IVY LEAVES, for ornamenting Chimney-glasses and preserving them from flies. Elegant and useful. 18 stamps per set of 72 slips, with instructions, post-free.—R. PETERS, Tovil, Maidstone.

CHUBBS' LOCKS and FIREPROOF SAFES with all the newest improvements. Street-door Latches, Cash and Deed Boxes. Full Illustrated Price-lists sent free.
Chubb and Son, 57 St. Paul's-churchyard, London.

MEETING OF THE BRITISH ASSOCIATION AT NEWCASTLE-ON-TYNE: SIR WILLIAM ARMSTRONG DELIVERING THE OPENING ADDRESS IN THE TOWNHALL.

EXHIBITION AT THE CENTRAL EXCHANGE, NEWCASTLE.—SEE PAGE 271.

MEMBERS OUT OF PARLIAMENT.

It is so difficult a task to preserve individuality in the House of Commons that only a few members can manage to give gratification to their constituents by their acts in that swamping assembly. Hence the after-parliamentary interviews between electors and elected, in which the latter show what they could do if they had the proper chance; and which were probably the invention of some of the great unheard at Westminster. But the result has naturally been that the most potent signors of the national congress have been drawn within the influence of the custom; and even Cabinet Ministers are not always exempted from being "brought up" before their constituents. Something like this occurred last year at Halifax, when Sir Charles Wood had to come down, under the special patronage of the junior, very junior, member for the borough, and to show cause why he should not be turned out at the next election. For the time, things were made safe;, and, subsequently, they were made safer still by the netting of the junior member into the Government; so that, at any time that he goes about in a triumphal canvass, he is, in fact, working hard for his right hon. friend. It seems, however, that the Minister for India thinks it advisable to pronounce again this year, in the West Riding of Yorkshire, and to let Halifax see that Sheffield delights to honour him. Of course, there is a very good reason for what is called the annual "Cutlers' Feast" in Sheffield; even if there was a no better one, why they can show how sharp their table-knives are. At the feast the labour of carving for the guests is, of course, made more one of love in proportion to their celebrity. It was therefore announced, with proper emphasis, that this time, and for the first time, there was a Cabinet Minister in presence; and it was expected that the novelty would be appreciated. No doubt, if it had been stated that "caviare," or "bird's-nest soup," or any other gastronomic rarity which implies an acquired taste, was supplied at the banquet, every one would have been anxious to taste it; but how many would have liked it is quite another thing. One would perhaps wish to know exactly what was the opinion of the guests of the specimen of our immediate governors which was provided for them as an intellectual and oratorical rarity. Let us, however, not too curiously inquire. It seems that Sir John Ramsden, one of the members for the West Riding, was another first appearance amongst the Cutlers. Well, Sir John is an ex-Under-Secretary and hopes to be an Under-Secretary again; and as he holds his seat for a great constituency in virtue of territorial rather than personal qualities; and as he strives vigorously, but not wholly successfully, to dissipate the notion that he is about seventeen years of age, judging from his personal appearance, there was every justification for his being invited to the Sheffield autumnal show. Enthusiasm, stirred up by after-dinner oratory, is rather inconsistent with digestion; and Sir John was careful to soothe rather than to rouse the nerves of his auditory; but that is his normal manner, for he never but once created a sensation in the house, and that was by a phrase which was supposed to have been interpolated by Mr. Horsman, his brother-in-law, into one of his set speeches! Mr. Remington Mills was at this feast, too; but although the hero of half a dozen electioneering defeats, and at length a member only by not appealing to a popular constituency, he remained there, as he does in the house, remarkably undistinguished. There have been rumours of an intrigue to oust Mr. Roebuck from the representation of Sheffield. If this be true, the reception he met with on this occasion proved that his seat is not yet even insecure, much less in danger. He may not accurately represent Sheffield; he may not, as he asserts, represent all England; but at least Mr. Roebuck is unique as a member, and any constituency that keeps him in the midst of dull, neutral-tinted Parliaments confers an obligation on that large portion of the community which, perhaps unconsciously, looks on legislative proceedings rather from an entertaining point of view. Whatever Mr. Roebuck is, none but himself can be his parallel; and surely that is claim enough to a seat in our Parliament, where oddities are as indispensable as jesters once were to Courts. Mr. Roebuck this time developed a new quality in his speech—namely, discretion; for he only hinted and insinuated what he could say if he liked, and sarcastically left it to be inferred that he was awed by the imposing presence of Sir Charles Wood, and therefore hesitated to commit the company, of which that great statesman was one, to any comprehensive and decisive sentiments. Mr. Hadfield was not there, so every luxury was not provided.

These be dull times, and one may as well breakfast without a newspaper as with it; and therefore we find large print given in the journals to a meeting of the Sparkenhoe Farmers' Club, with Mr. Newdegate for its chairman. The Sparkenhoe Club meets at Nuneaton, and Nuneaton is in Warwickshire, and Dr. Parr declared that Warwickshire was the Bœotia of England, its production of Shakspeare notwithstanding. Nevertheless, as agricultural meetings go, this was as much worth notice in London as most. Its feature, however, was the appearance of Mr. Newdegate as he figured on his "native heath." The metropolitan notion of the gentleman is, that he is a kind of Protestant Parliamentary policeman, and distinguished by the stolidity and dogged pertinacity which is supposed to characterise the policeman proper. It is believed that the House, if it is obliged at a critical moment to stay, does not listen to, and, if it is at liberty to go, runs away from Mr. Newdegate with singular unanimity of opinion and action. Something of this is true; but the reason for it is not all absolute. The House has rather a distaste for any one with real convictions, and, though it is in a manner commanded to attend to Mr. Bright or Mr. Cobden, who are believed to have convictions, they listen only for titillation, and never are convinced even by efforts of genius. But a dull man and a prosy speaker with convictions is an impossibility on their patience. Now, it is Mr. Newdegate's misfortune that he always begins his speeches in a lachrymose, almost whining, tone, and adopts an air of sentimentality which verges on the grotesque, and so would create a bad impression and prevent his getting a hearing, even if he did not suffer from the predeterminate notion of his dulness and illiberality. Nevertheless, it is the case that he often, very often, warms up to the utterance of fine sentences, delivered with creditable energy, and in numerous instances containing opinions and suggestions which are worth consideration. Of the melancholy earnestness of the man in all that he advances there can be no doubt, and that he is in his peculiar sphere a power a glance at him at a meeting in Warwickshire would prove. There are theories that, despite his desponding tones and lugubrious aspect, when he is wailing over outraged Protestantism, that in private life he is a jolly fellow, as he is known to be a worthy and estimable man. It is not credible that one of the best goers across country after hounds in his county can be always a victim to that metaphysical cholic from which he invariably appears to be suffering in Parliament.

If the class of comedy which used to include retired East Indians—Nabobs they were designated—amongst its conventional characters had not passed away, we should recommend to the delineators of those parts a study of the personal appearance of Colonel Sykes, M.P. for Aberdeen. Physically, the gallant and scientific Colonel is the very type of what used to be called the "Bengal tiger." Be this as it may, no man seems so thoroughly imbued with devotion to his duty as a member of Parliament. He is regular and assiduous in attendance; an evening never passes that he does not give a notice for a return of enormous length, or asks a question of portentous prolixity; he makes a motion, or intends to bring one on, every Tuesday night during the Session; and on Friday evenings his Parliamentary anxieties for the time which intervenes until the following Monday must be allayed by information sought from the Secretary for India; and, lastly, from unpleasant experience, no member ought to have the fear of being counted out more steadily before his eyes. And yet the member for Aberdeen hardly comes within the category of bores. He is earnest and vivacious in manner and quaint in speech; and, when he does get an opportunity of making a statement, he is not unnecessarily long or specially tedious. But, somehow, every-one has the notion that he deals only in crotchets; and, as he produces and reproduces his subjects somewhat contracted in their nature, time after time, and seems to expect every one to regard them as new, he somehow or the other always finds himself wrecked upon a Parliamentary no-man's-land. The Colonel has been foregathering with his constituents at Aberdeen, and really made an excellent practical speech, interspersed with gleams of grim humour, which one did not suppose him to possess. His views on the temperance question were amusingly stated, and though, like an old soldier, he has a proper horror of intoxication, also, like an old soldier, he must have shuddered when, having by accident got into a teetotal hotel, he sat down to dinner, for the first time in his life, without wine-glasses. Colonel Sykes is an active member of the British Association, and his voice is always frequent in the sections. At present his hobby is scientific ballooning, he being the chairman of a committee of the association which has been for two or three years appointed to carry out experiments in aerostation. He has been heard to express surprise at people's hesitating to ascend to any height into the atmosphere; but he has not yet volunteered to make an ascent in his own person.

MUSIC.

The Worcester Musical Festival (the meeting of the three choirs of Worcester, Gloucester, and Hereford) has been held during this week. It began on Tuesday last and ended yesterday. Next week we shall give some account of the various performances. But we may say, in the meantime, that the festival has been, on the whole, very successful, and that its pecuniary result has apparently been as satisfactory as usual in furthering the excellent object of these triennial meetings—that of increasing the narrow incomes derived from the small Church benefices in the above dioceses. As usual, the programmes of the festival have presented little novelty, or rather none at all; for the only thing that had any pretension to be called a novelty, Schachner's oratorio, entitled "Israel's Return from Babylon," had already been performed at Exeter Hall. All the rest of the pieces, without exception, both at the morning performances and the evening concerts, were familiar to the musical public. They were, however, admirably performed, the solo singers being of the highest class, and the instrumental orchestra and the chorus being select and powerful.

The Norwich Festival takes place next week. We have already detailed its arrangements, which, as usual, are on a magnificent scale, and embrace various novelties of the greatest interest. We shall give this great festival the attention due to its magnitude and importance.

Mdlle. Titiens has appeared at the Grand Opéra, Paris, in the character of Valentine, in the "Huguenots," performing the part in the original French. She had already performed it in German and Italian; and, in now singing and acting it in a third language, she accomplished this arduous task not only with the greatest apparent ease, but with unimpeachable purity of elocution and accent. Her success was triumphant, her reception by the Parisian public being enthusiastic in the extreme.

THE THEATRES.

Princess'.—This theatre still progresses under Mr. Montgomery's management; and, since his opening, he has successfully appeared in Shylock, Othello, King John, Richard III., Hamlet, and Macbeth. Of these, the last is decidedly the best. The getting-up, indeed, was not very complete, the rehearsals having evidently been deficient; but there was so much evident care in Mr. Montgomery's general manner of supporting the character of the usurping Thane, besides some meritorious acting in detail, that he is fully entitled to a distinct notice. The dagger soliloquy was especially well delivered; but it was in the fifth act that he was most triumphant. He deserved the applause that he received, prolonged and vehement as it was. The farce of "The Rough Diamond" followed, and is noticeable on two accounts—the appearance of Mr. Sefton Parry, from the Cape of Good Hope Theatre, in the character of Cousin Joe, and the very promising style in which Miss Lizzie Harrison acted the pleasant part of Margaret. Mr. Parry's broad comedy is exceedingly good. He kept the audience in a roar at the rusticities of Cousin Joe, which were depicted in an indisputably natural manner, and which distinguish Mr. Parry as an artist in low eccentric parts capable of doing justice to the invention of the author and carrying the audience with him to any extent.

Sadler's Wells.—The business at this house is now likely to be steady, as it reopened on Saturday under a regular management. Miss Marriott, who, for some time, has had the direction of the Standard Theatre, has assumed the reins of management, and will, no doubt, employ them judiciously. The play selected for the occasion was that of "Love's Sacrifice," written by Mr. Lovell, and was well adapted to show to advantage the company. The part of Matthew Aylmer was ably supported by Mr. Henry Marston, whose return to this stage was welcomed by the audience with a vehement and prolonged manifestation that strongly showed the esteem in which this valuable actor is held. In his performance of this character he was both careful and efficient, and in the scenes of emotion wherein Aylmer's inmost feelings are called forth, either by his daughter, by Lafont, or by Eugene de Lorme, there were traits of true feeling and passion which stamped him as an actor of great power disciplined by true taste. As the survivor of the Kemble school Mr. Marston occupies a marked place in the profession which he nobly occupies. Miss Marriott was, of course, Margaret, and in the scenes of violent passion was genuine and natural. Miss Mandlebert was excellent in Herminie. The part of Eugene de Lorme was well played by Mr. Henry Haynes; and Mr. Edmund Phelps, as St. Lo, was lively and impressive. Much in this play always depends on the manner in which Paul Lafont is personated, and Mr. W. D. Gresham deserves credit for the telling style in which he executed his task. The performance was greatly applauded. An address in rhyme, written by Mr. Bruton, and treating of the past history of the theatre, was delivered by Miss Marriott with great effect, and was followed by plaudits which left no doubt that the management had made an impression, and that the season had commenced under auspices which promised well. During the week "The Hunchback" and "Othello" have been performed, and "The Corsican Brothers" is underlined. A new play is also announced. The farce "Of Age To-morrow" has been the afterpiece, Mr. Edmund Phelps supporting the part of the Baron Frederich.

Olympic.—A new production by Mr. Tom Taylor was produced on Monday, under the title of "An Awful Rise in Spirits," in which the author has attempted a piece of pleasantry on the Pepper and Dirck's apparitional invention. Instead of adopting the contrivance, like other houses, this theatre has tried a sort of musical burlesque, in which the two professors are supposed to be roaming a churchyard at midnight in search of ghosts, and, while thus employed, are visited by the spirits of the Bleeding Nun, Hamlet, Banquo, and others, until the stage is crowded with the old conventional apparitions. In the end, Shakspeare appears, and, after fulminating his wrath against bad actors and second-rate dramatists, expresses his preference for the scientific ghost of the professors, as a great improvement on the clumsy attempts of the bygone times. The piece is in rhyme, and the story of the Bleeding Nun is told with musical accompaniments, but at too great length. We cannot, indeed, compliment Mr. Taylor on his success. With such a subject it was almost impossible to be funny.

Twenty-six new statues, intended for the façade of the Cathedral of Milan, are being exhibited in the court of the Archbishop's palace of that city. They are executed in Gandoglia marble, and by Milanese sculptors. One half of these statues at least are described as being master-pieces. St. Astero, by Bernascomi, is considered the best.

A photographic expedition started lately from Vienna for the Glockner, and the formidable glaciers surrounding the system of the Saltzburg and Tyrolese Alps. The enterprise has been hitherto crowned with signal success, and promises to yield a considerable number of faithful delineations of the upper world. Of the Glockner, eight different views have been taken, at the height of 11,000 feet.

The steamer Sahel was recently lost on the coast of Catalonia. Among the passengers were six Sisters of Charity. When assistance came to the vessel they were requested to go into the first boat, but they refused, saying, "First save the other women, children, and every one else; we shall be the last to quit the vessel."

The Great Eastern experienced some tremendously heavy weather during her passage to New York, and shipped some heavy seas, which stove one boat and damaged others. The New York steam fire-engine No. 8, that was taken over for trial with the English apparatus, was considerably injured by the seas. The third officer and one other man had legs broken. No serious damage was done to the ship.

THE MAGAZINES.

The *Cornhill* is positively as good this month as if there were somebody left in town to read it. If required to indicate the most agreeable paper, we should point out the very pleasant little bit of Swiss travelling experience, "How we Slept at the Châlet des Chèvres." After all we have read about the perils of adventurous tourists, it is a gratifying surprise to be asked to accompany a party without the remotest prospect of a broken neck, or, indeed, anything broken but a night's rest, by reason of the unaccommodating hardness of sundry logs. A more buoyant, pleasant, and thoroughly enjoyable account of the little adventures of a party of young people it would be hard to imagine. "Anti-Respectability" and "Going to the Dogs" are papers in the regular *Cornhill* style, or rather styles; for they are in no way alike, the first closely reasoned, but hard and dogmatic; the second, a "morality" in the old sense of the term, when moralities were lively and dramatic as well as salutary. "The Opera in 1833—1863" is a sound and useful summary of the history and prospects of the lyrical stage, written with much acumen and refinement. Mr. Hamerton's paper on art-criticism is full of useful remarks, though not exempt from that touch of cockscombry which usually characterises his productions. The new tale, "Out of the World," is most probably by the authoress of the "Story of Elizabeth." It is so far sweet and natural, distinguished by much tenderness of feeling and a clear presentment of the principal characters. It does not as yet approach the vigour of "Elizabeth," and we fear there are some symptoms of its becoming one of those dismal stories of domestic suffering in which so many authoresses delight, and which are painful and tedious just in proportion to their fidelity to actual life. The comparative feebleness of "The Small House at Allington" shows how entirely the interest of the story is concentrated in Crosbie, who does not appear this month. We have no doubt that this pitiful but also much-to-be-pitied delinquent will rank in the first class of Mr. Trollope's delineations, which is more than can be said of any other of the *dramatis personæ*.

The crack paper in *Macmillan*—or, indeed, in any of the magazines—is the "Competition Wallah's" narrative of the defence and relief of Arrah during the Indian mutiny—exploits which attracted considerable attention at the time, but have since been somewhat obscured by achievements even more memorable. Sixty-six men, two thirds natives, defended a small house against many thousands until relieved by a hundred and fifty, heroically led by Vincent Eyre, who had, indeed, enough work to do, and might possibly have been defeated had not "a young officer named Hastings, not relishing the idea of standing still to be shot down, run forward, sword in hand, towards the point where the enemy stood thickest, with a dozen volunteers and twice as many soldiers at his heels. This appeared to the sepoys a most unaccountable proceeding; but they were not ignorant of the great military truth that, when two hostile parties find themselves on the same ground, one or the other must leave it; and as Hastings and his companions kept coming nearer and nearer, with the expression on their faces which the Sahibs always wear when they don't intend to turn back, they had no choice but to run for it. That charge saved Arrah." Mr. Arnold's paper on French education is as yet (a second part is promised) chiefly valuable for its sketch of Lacordaire, that noble specimen of what a zealous Catholic priest may be made by free institutions and the necessity of respecting the opinions of others. Under other circumstances his ardour would have degenerated into bigotry, and he would have been an austere fanatic and persecutor. Another paper of great interest is the "Russian Patriot's Account of the Sunday School Movement of 1860-2," ultimately suppressed by the Government, but which went far enough to show not merely the eagerness of the lower classes to be instructed, but, which is of still more consequence in Russia, the willingness of many of the better educated to raise them to their own level. A great future must assuredly await the land where so true a fraternity of feeling prevails to the extent described. Mr. Ludlow's dialogue on "Servitude for Life" is a brief but unanswerable exposure of Mr. Carlyle's paradoxes. Mrs. Norton's review of the "Angel in the House" and "Goblin Market" is very useful, in so far as it tends to bring two books of such genuine poetical merit before the public. It is, however, a mere string of extracts, with scarcely any attempt at critical appreciation. The poem, "Assuerus," appears to us a weak imitation of Tennyson's "St. Simeon Stylites."

With something of the character of an amateur magazine, the *Victoria* is still very able and interesting. Mr. Hutton leads off with with a notice of Rénan's "Vie de Jésus," written from the standpoint of a scholar of Mr. Maurice. Like all the writer's essays, it is profound, candid, and eloquent, but not wholly exempt from the reproach of abstruseness and obscurity. The conclusion of Mrs. Oliphant's "Story of a Voice" is rather disappointing. Mr. Macdonald's "Songs of the Autumn Days" are too vague in their mystic sweetness to gratify any one but poetical readers—the only public, perhaps, of whose suffrage the author is ambitious. Everybody, we suppose, has read Mr. Nassau Senior's minute in the *Times* of his conversation with the American Minister at Paris, and whoever has done so will find his reminiscences of Egyptian travel and interviews with the eminent men of that country distinguished by the same pithiness, ability to elicit what is really interesting, and adherence to the point. Mr. Dicey contributes an able review of the history and results of the American war. He sums up thus:—"A nation overburdened with prosperity, intoxicated with success, demoralised by wealth, has learned how to die as well as how to live, and that lesson is surely worth the learning."

Temple Bar is unusually good this month. "Mammoth Hotels" and "Dwelling-houses in Munich" are model magazine articles, very entertaining, and full of useful information, and there are others approaching them in merit. Mr. Kennedy, of Swinfen celebrity, but known long before as an excellent classical scholar, contributes an able refutation of some errors which have hitherto prevailed with reference to Hannibal's tactics at the Battle of Cannæ. We are heartily glad to welcome this gentleman back to literature, which he is in every way calculated to adorn. "My Travelling Companion" is a good story of the melodramatic class.

By far the most interesting article in *Blackwood* is a description of the battle of Gettysburg and accompanying operations, from the pen of an English officer present as the guest of General Longstreet. Naturally, he writes with a bias towards the cause of his associates; but his account is very frank and straightforward, and, we have no doubt, reliable in the main. He mentions some errors and unforeseen occurrences which, he thinks, may have contributed to bring about the defeat of the Confederates, but mainly ascribes this to the unreasonable contempt in which they had come to hold their adversaries. Elated by a long course of successes, they forgot that these had all been obtained by acting on the defensive, or by taking advantage of some error of their opponents, and found too late that, when the conditions of conflict were reversed, the result was altered with them. The blow was tremendous. The wounded of the vanquished army, streaming back from the batteries they had vainly attempted to carry, are compared by an eyewitness to a crowd in Oxford-street; and even this was nothing to the number of the entirely disabled, 15,000 of whom were abandoned on the field of battle. Nevertheless, the army was not discouraged, and continued to anticipate a triumphal entry into Washington, until the order came to retreat. The contemptuous tone in which the writer speaks of the Confederate cavalry will amaze those who put faith in the brilliant romances of the *Times'* Virginian correspondent. The article is not only excellent in itself, but comes seasonably for the credit of the magazine, which has nothing else worthy of note, except the continuation of Mrs. Oliphant's very agreeable story and a splendid description of Italian scenery in a tale not otherwise eminently meritorious—"The Spectre of Milaggio."

Fraser is varied and excellent this month. The most important papers are "A Plea for the Free Discussion of Theological Difficulties," very cogent and temperate, and the account of the present condition of the Lancashire manufacturing districts, which is very instructive and at the same time very entertaining. There is a capital story, to this effect:—"At the time of the Peterloo riots, the Government of the day was very unpopular here. Now, about that period the minister of a chapel in Manchester, among other blessings which he asked, prayed that the members of her Majesty's Government might 'all hang together by one cord!' This was followed by a perfect chorus of 'Amens!' 'So be its!' 'Yeas!' and 'Glorys!' when, finding out his equivocal petition, he changed his expression, and said, 'May they all hang together in con-cord!' Here a dead silence ensued,

till an old woman, in a shrill treble, shouted, 'Any cord, any cord, so it be strong enough!' which was backed up by a hailstorm of 'Amens!' 'So be its!' 'Yea, sos!' and 'Glorys!'" "A Chapter on Madagascar" contains much interesting information, clearly and compactly put together. "A Fortnight in Belgium" is also a good article; and there are agreeable miscellaneous essays by A. K. H. B., and an anonymous writer who seems to have selected him as a model. We fancy we recognise the quaint and erudite pen of the Rev. William Barnes in the paper on "The Credibility of Old Song-History." There is a beautiful translation from Propertius by Sir Edmund Head; and the instalment of "Laurence Bloomfield" is much the best hitherto vouchsafed to us.

The *Dublin University* continues its brace of novels with considerable spirit; but we must own that they are both getting too melodramatic for our taste. The best paper is "Glimpses of Cæsarean Rome," a series of brilliant and lifelike pictures. There is another very interesting article on "Ghosts," where some excellent stories are narrated, no better authenticated than usual. Ghosts also form the subject of the most readable paper in *Bentley's Miscellany*; while the *New Monthly* is preserved from absolute dulness by a good summary of Adolph Stahr's monograph on Tiberius. *London Society* is, as usual, a pleasant repertory of light reading; and the *St. James's* has one excellent story, "A Polish Adventure." The *Churchman's Family Magazine* improves, having this month several articles of fair average merit. *Good Words* has several beyond the average, especially Mr. Macdonald's beautiful little poem, Miss Thackeray's new story, and Mr. Ludlow's masterly exposure of the slaveholding religious denominations in the United States. Mr. Millais's illustration for the month is also among the best he has ever designed.

OBITUARY OF EMINENT PERSONS.

EDWARD STANLEY, ESQ.

Edward Stanley, Esq., of Dalegarth and Ponsonby, in the county of Cumberland, a magistrate and Deputy Lieutenant for that county, the head and representative of a branch of the great house of Stanley, Earls of Derby, was the elder son of George Edward Stanley, Esq., of Ponsonby and Dalegarth, by his second wife, Elizabeth, daughter of Morris Evans, Esq., of Middlesex, and was grandson of Edward Stanley, Esq., of Dalegarth, by his wife, Mildred, youngest daughter of the Right Rev. Sir George Fleming, Bart., Bishop of Carlisle. He was born in 1790, and was educated at Eton and Christ Church, Oxford. He was High Sheriff of Cumberland in 1823, and M.P. for West Cumberland, in the Tory interest, from 1833 to 1852. He married, in December, 1821, Mary, daughter of William Douglas, Esq., an East Indian Judge, and has had (with three daughters) three sons; Edward, who died young, in 1825; William, his successor; and George Edward. Mr Stanley died on the 19th ult., and is succeeded by his eldest surviving son, William Stanley, Esq., now of Dalegarth and Ponsonby. This branch of the illustrious family of Stanley has been located in the north of England for several centuries, and possesses estates which have descended in unbroken succession over a period exceeding five hundred years. The branch springs from John Stanleigh, second son of John Stanleigh, Lord of Stanley and Stourton, and younger brother of Sir William Stanley, ancestor of the Earls of Derby. The direct descendant of the Lord of Stanley's son, John Stanleigh, Edward Stanley, Esq., of Dalegarth, was High Sheriff of Cumberland at the Revolution, and proclaimed William III. His great greatgrandson was the Mr. Edward Stanley just deceased.

WILLIAM WILLANS, ESQ.

This gentleman, whose sudden death has just occurred, was born at Leeds in 1795, but removed to Huddersfield in his youth, and established himself in business, first as a commission agent, and afterwards as a wool merchant. By mercantile talent, prudence, and high integrity he gained a character which raised his house to a first-rate position and yielded him a handsome fortune. His abilities as a commercial man were held in the highest respect, which was shown by his being chosen (after the death of Mr. Sutcliffe) to be president of the Huddersfield Chamber of Commerce—a position he filled with efficiency till his death. Mr. Willans became extensively known, not only in Yorkshire, but throughout England, as one of the principal wool merchants of the West Riding; and also as a leading member of the Liberal party at Huddersfield, and a zealous supporter of education connected with religion. He took an active part in Sunday schools, in the British and Foreign School, in the affairs of the Congregational Church in Ramsden-street, in the London Missionary Society, the Bible Society, the Religious Tract Society, the Town Mission, and almost every public association for the promotion of objects of a similar nature. He was one of the founders and most active benefactors of the Huddersfield College, and for many years its president; and he also gave his aid to the Huddersfield Mechanics' Institute.

WILLS AND BEQUESTS.

The will of the Hon. Robert Curzon, the elder, of Hagley Hall, near Rugeley, Staffordshire, and Parham Park, near Steyning, Sussex, was proved in the London Court by his eldest son, the Hon. Robert Curzon, the sole executor. The testator, who died at the age of ninety, had represented in Parliament the borough of Clitheroe, which seat he retained for a period of thirty-four years. He was formerly Colonel of the Staffordshire Volunteers, and had held the office of High Sheriff for Sussex, and was Deputy Lieutenant for that county. The testator was the younger son of the late Viscount Curzon, by Dorothy, sister of the first Earl Grosvenor, and cousin of Earl Howe, and married, in 1808, the Right Hon. Harriet Anne, thirteenth Baroness de la Zouche, to whom he leaves a life interest in all his movable effects, which, upon her Ladyship's decease, will devolve to the eldest son, who is residuary legatee of the real and personal estate. There is a provisional charge made upon the estates in favour of the testator's younger son, the Hon. Edward Cecil Curzon.

The will of General Sir John Hanbury, K.C.H., of Charles-street, Berkeley-square, was proved in the London Court by his relict, Lady Hanbury (the daughter of Sir N. Rycroft, Bart.), sole executrix. The personal property was sworn under £20,000. This gallant military officer was Colonel of the 99th Foot, and attained the age of eighty-one. His will bears date April 22, 1862. Sir John bequeaths to his relict, Lady Hanbury, a life interest in his funded property and other securities, and appoints her Ladyship residuary legatee of the rest of the personalty. His military orders and medals he leaves to his nephew, Lord Bateman; other specific bequests are left to his sister, nephews, nieces, and cousin; bequeathing his funded property, on the decease of Lady Hanbury, amongst certain of his nephews.

The will of Charles Hitchcock, Esq., of Hornsey, Middlesex, was proved in the London Court under £100,000 personalty. The executors are his brothers, Thomas Hitchcock, Esq., M.D., and Frederick Hitchcock and Alfred Hitchcock, Esqrs. The will was executed in February last, and is purely of a family nature. After making a provision for his wife, he leaves her a life interest in the residue of his personal property. To each son he leaves £13,000, and has made a liberal provision for his daughter, appointing his said sons and daughter reversionary residuary legacies. There are legacies bequeathed to his father, brothers, and sister, and to each of his brothers who are executors a further sum of £1000 for their trouble in the execution of the trusts.

By an Act passed on the day of the prorogation, it is made an offence for a trader falsely to represent that he has obtained a medal or certificate from the Exhibition Commissioners of 1851 or 1862.

The returns of the emigration officials at Liverpool show that, notwithstanding the condition of America, the United States continue to receive a larger number of emigrants than any other country. It is also stated that the total number of emigrants who have left Liverpool during the past eight months is 93,904.

There are several important provisions in the New Telegraph Act, passed at the end of the last Session. A person in the employ of a company wilfully or negligently omitting to transmit or deliver a message, or divulging the purport of a message, can be fined £20. The Board of Trade can direct a company to erect a telegraph for the exclusive use of her Majesty, and in case of an emergency the Secretary of State can by warrant seize a telegraph and have the same worked. A warrant is only to last for a week; but successive warrants may be issued. The Treasury in such a case is to pay the company for the loss sustained.

The Emigration Commissioners have chartered the Erin-go-bragh, of 1111 tons, belonging to Messrs. James Baines and Co., Liverpool, to convey emigrants to Sydney, New South Wales, at £14 4s. 9d. per statute adult. The Erin-go-bragh is to be ready to receive her passengers at Birkenhead about the 12th of October next.——Messrs. Lidgett and Co.'s ship Sir John Lawrence left Plymouth on Saturday with 312 souls, Government emigrants, for Adelaide; and Messrs. Peacock, Seymour, and Co.'s ship Hotspur left Plymouth on Sunday with 437 souls, Government emigrants, for Sydney.

The revision of the lists of voters in England and Wales must be completed within the 15th inst. and the 31st of October. The sum allowed for the current year is £17,850, allowing 200 guineas to each revising barrister. By the new Circuit Act (26th and 27th Victoria, cap. cxxii.) it is enacted that, upon any alteration being made in any of the circuits of the Judges by her Majesty in Council, it shall be lawful to order and direct that the number of revising barristers to be appointed for the several counties, cities, boroughs, and places within any circuit affected by the alteration shall be increased or diminished as to her Majesty, by the advice of the Privy Council, may seem meet, anything in the Act 6th and 7th Victoria, cap. xviii., notwithstanding, provided that the number of the revising barristers be augmented in accordance with the 29th section of the Act mentioned.

FINE ARTS.

MR. HAMERTON'S PICTURES.

SOMEBODY says that if any one would write a perfectly frank account of his life it would be more interesting than a novel. Not long since we reviewed a book in which this was partially, at least, done; and the work had a corresponding freshness and charm. Mr. Hamerton's "Painter's Camp in the Highlands," described, with little apparent attempt at concealment of any kind, an artist's experience during some years of study, chiefly in the neighbourhood of Loch Awe. The author had the advantages of an artistic and even poetic temperament, much sagacity, considerable humour, and he wrote perspicuously; but, except that he contrived a particular kind of hut and employed a tubular boat or raft, his experience was not greatly unlike that of other students of nature. Indeed, his range of observation must have been much more limited and his mode of life less rich in adventure than in the case of Turner, John Lewis, David Roberts, and a host of other landscape-painters. The opinions with which he set out, many which might have seemed most original, and which colour nearly all he afterwards says and does, were plainly derived from Mr. Ruskin—confessedly so in several instances. The "thoughts about art" and its principles, which he gathered from sitting down face to face with nature, are for the most part those which every artist will recognise as having been really forced upon him during what Mr. Ruskin calls the "period of studentship." Mr. Hamerton did, however, what few artists have done, except with their pencil—he preserved a written record of his impressions and the growth of his art-knowledge; and this record, added to a narrative of adventure and (among other things) a number of smartly-expressed opinions on a variety of social questions from a recluse's point of view, constituted a book which must be found novel and entertaining by the general public. We could not, however, help expressing a regret that in "The Painter's Camp" much wholesome truth which might have been received without hesitation was rendered unpalatable by the author's unconcealed egotism. It seemed to us a great pity that a reverence for nature (which ought to bring humility in the greatest artist) should appear to actuate chiefly to the assertion of self-sufficient superiority to other men; and it seemed still more strange that with this proud consciousness of superior merit any one could condescend to what might look to many like abject puffery of himself.

In one place in his book Mr. Hamerton talks thus:—"Mr. Newton is the truest painter of Highland landscape, *except myself*, who ever lived"! We were naturally desirous, therefore, to see the works of such a transcendent master, never having had the opportunity. Accordingly, some time since, finding that Mr. Hamerton had opened a gallery, at 196, Piccadilly, for the exhibition of his works, we paid it a visit. In a room, which it should be stated is badly lighted, we found two largish landscapes—"Ben Cruachan, with Clouds Rising: Morning," and "A Gamekeeper's Cottage, Lochaweside." Two smaller works have been added since, "Returning Home," a yacht on Loch Awe after sundown, and "The Black Isles, Loch Awe." The pictures are in charge of the man "Thursday" of Mr. Hamerton's book, no longer a rough Lancashire lad, but in all the pride of plated buttons and white choker, a pattern for West-end footmen. The first impression of these pictures is sadly disappointing; and for this Mr. Hamerton has to thank himself. It is only just to other artists to say at once that they are not much above amateur's work (which Mr. Hamerton so much contemns) in any of those technical qualities which constitute nearly all the value of a work of art, whatever the subject; although they certainly present far more evidence of "study on the spot." They have, as far as they go, the local truthfulness upon which the painter lays so much stress; but this kind of truthfulness becomes insignificant in the absence of generic truth. Water, for instance, may be painted of the colour, and the reflections upon it in the situations incidental to a particular locality; but, if the greater facts of the balanced movement and liquidity of surface common to water under all circumstances are not primarily represented, the lesser truths are even almost negatived. A portrait, whether of a face or a scene, is of little value if it present merely a dry, diagram-like resemblance. The obvious road to the acquirement of the power of expressing general truths is the study of the works of other men. From them may be gleaned the use of the material, methods and processes of expression—all that constitutes the grammar of art as evolved from the practice of thousands and the experience of ages. When we have learnt to express ourselves clearly, nature will find plenty for us to say, and, if we have the soul, will warm us into eloquence. Mr. Hamerton has still to learn much before he can express all he feels on canvas. At present his paintings have little power of drawing or variety of characterisation, whether of foliage, land, or water. The colouring, though atmospheric and well graduated in passages, is generally cold and poor, and singularly opaque. They are "painty," and have little subtlety or descriptiveness in the handling. Contrary to what might be expected, they have neither the peculiar merits nor defects of pre-Raphaelite landscape; for the touch is broad and careless, and the opaque method seems to be adopted from the French school. Nevertheless, these pictures have, especially to readers of Mr. Hamerton's book, much—if we may use the word—psychological interest as plainly indicating the painter's feeling for the sometimes tender, but generally sad and awful, glories of Highland scenery, and because they show painting betraying a minimum of influence from contemporaries, though isolation has certainly more disadvantages than advantages.

We must not part from these pictures without remarking that we have heard it very unfairly insinuated against Mr. Hamerton that because he can write well, and because he undoubtedly possesses the analytical faculty, *ergo* he cannot paint. Such an inference argues a total forgetfulness of the history of art. In every school, at every period, artists of all grades have written on their art, including Leonardo da Vinci, Vasari, Raphael Mengs, and innumerable Italian, Spanish, and Northern painters; Sir Joshua Reynolds, Northcote, Sir Charles Eastlake, and many living painters, sculptors, and architects we might name. We believe that both their writings and their paintings have gained mutually, and it is only to be regretted that artists do not more often diffuse by their pens juster ideas of their art than are commonly circulated at present.

THE ARUNDEL SOCIETY.

The Arundel Society is extending is sphere of usefulness from Italian to Northern art—although in regard to the latter there is not the same urgent need of preserving some record of works of art rapidly hastening to irremediable decay. The society has just received a copy, executed by M. Schultz, of the famous triptych, known as "The Adoration of the Magi," in the Hospital of St. John, Bruges, a work only second in interest to the paintings by this early Flemish painter on the chasse of St. Ursula, in the same hospital. Unhappily, however, the latter has been much rubbed down and injured. The society acted wisely, therefore, in commissioning a copy of the more perfect work. The central compartment of the triptych represents the Adoration of the Magi. On one wing is "The Virgin adoring the Infant;" on the other, "The Presentation in the Temple." On the outside of one wing is the seated figure of St. John the Baptist; on the other, St. Veronica. The copy is executed in body colours, and finished with extremely delicate stippling. It would be difficult to praise too highly the fidelity of this copy to everything which characterises the original; and, as we understand M. Schultz is also a chromo-lithographer, the intrusting the entire execution of the facsimile which is to be published to a gentleman so thoroughly competent as an artist would probably secure the best chromo-lithograph hitherto published, even by this society. To secure a perfect reproduction, the fewer the hands through which it passes the greater, of course, the probability of success.

The last "extra" or "occasional" publication of the society is a chromo-lithograph of "The Marriage of S. Cecilia"—to Valerian (or, as Count Malvasia says, to Tiburtius), after Francesco Francia—one of the frescoes in the ancient church of Sta. Cecilia, at Bologna, which was so shamefully damaged by the French. This, together with "The Burial of S. Cecilia," also published by the society, are two of the best works of the great Bolognese painter. In the chromo-lithograph the grace and sweetness of Francia, especially in the female heads, has been reproduced; but a yellowish-buff tone is apparently too prevalent in the shadows and in local colours where they could hardly have been found in the original.

At a moment when the art of illuminating engages so much attention, and is so extensively practised by amateurs, it should be known that the Arundel Society proposes, if sufficient encouragement is afforded, publishing, in chromo-lithography, a complete alphabet of illuminated initial letters selected from the Piccolomini Library, Siena; the Convent of St. Mark, Florence; and similar sources famous for their illuminated MS. treasures. Already the alphabet has been published in outline, and three "large letters" with miniatures in chromo-lithography; and if the entire alphabet is produced in a style similar to these three letters it will collectively form probably an unrivalled illustration of the favourite art of the cloisters in mediæval Italy.

We are glad to find that the Arundel Society continues to prosper. The last report shows a balance in hand of £799 3s. 6d. The society has so far overtaken, so to speak, its liabilities, that it is hoped in future the publications for each year may be issued within the year, and not the year after, as heretofore. The prosperity of this society has, however, necessitated a change of its rules since our last notice of its operations. The subscribers have so greatly increased in number that it has been found one set of stones would not furnish the required, or at least a larger, number of chromo-lithographs all of the same excellence. With a scrupulosity which might be emulated by some art-unions, the council decided, therefore, to limit the number of actual members. A new class, called "Associates," was created, unlimited in number; and from their ranks, by right of seniority, the vacancies among the members are filled up. The Associates do not pay the annual guinea subscription, but give, on entering their names, a donation of not less than one guinea to the "Copying Fund." They have the right of purchasing "supernumerary" (which include most of the past annual publications) and "occasional" publications at reduced prices, with all other privileges of membership except the receipt of the annual publications. Agreeably to the intention of the society to issue the annual publications within a moderate interval from the time of subscribing, the publications for 1863 are announced to appear in November. They consist of a copper-plate engraving in continuation of the series from the frescoes by Fra Angelico, in the Chapel of Nicholas V., in the Vatican; and five chromo-lithographs, in continuation of the series from the frescoes by Masaccio and Filippino Lippi, in the Brancacci Chapel of the Carmelite Church, Florence. The occasional publications to appear at the same date are two elaborate chromo-lithographs, one from the fresco by Mantegna, "The Conversion of Hermogenes," the other from the "Annunciation," by Fra Angelico.

Since our last obituary notice we have to record the death of two well-known and esteemed artists, both of whom were taken away in the very prime of life. About a fortnight since died Mr. Lee Bridell, a young landscape-painter of varied power and a particularly brilliant colourist, known chiefly by large Italian views. On the 5th inst. died, aged only forty-six, Mr. Duffield, the eminent painter of still-life, whose pictures of dead game—more especially birds and fowls—diversified with fruit, pottery, and weapons, have been long prized by collectors, and who is to be ranked among our most distinguished painters in this department. The widow of Mr. Duffield is one of our best flower painters.

It is proposed to form in the spring of next year, at the South Kensington Museum, an exhibition of as complete a collection of the works of Mulready as it is possible to get together. The assistance of proprietors of the artist's works is invited. An exhibition of Mulready's drawings and pictures took place in 1848 at the Society of Arts, Adelphi; but since then his works, and especially his life-studies, have largely increased. A nucleus of a complete collection already exists at South Kensington in the numerous pictures and drawings given to the nation by Mr. Sheepshanks and Mr. Vernon. We may add to this announcement that Mr. Creswick, one of Mulready's oldest friends, is at the head of a committee formed to get up a memorial to the deceased artist.

We should have added to our last week's notice of the splendid series of fifty-three photographs of the principal monuments of Rome, Venice, Pisa, Florence, and Milan, lately taken by the eminent photographers, Messrs. Bisson Frères, that the publisher of the series for England is Delarue, Chandos-street, Strand.

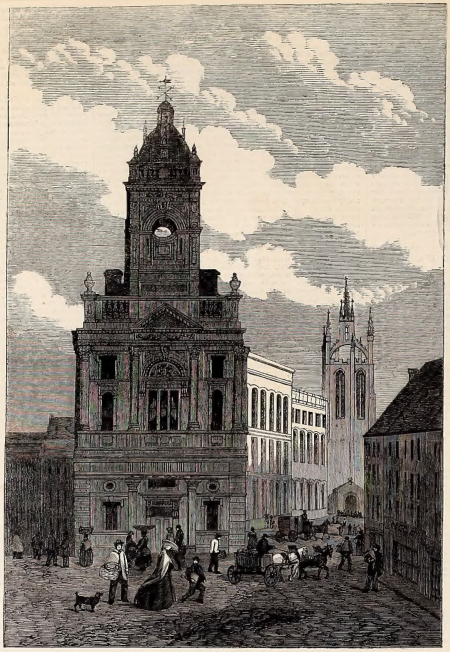
We stated last week that Lord Clyde sat for his bust to no other sculptor than Mr. Ewing, but we now learn that Mr. G. G. Adams also had that honour.

Business in the county courts of England, as in the superior courts of law, was a little slack last year. The returns show that the number of plaints entered fell from 903,957 in the previous year to 847,288, which, however, is more than eight times the number of the writs of summons issued by the superior courts of common law. The number of cases that came on for trial in the county courts fell from 474,274 to 467,451.

Post Office money orders are issued at all money-order offices in the United Kingdom on Bridgetown, Barbadoes, at the same rates of charge, and under the same regulations, as those established with respect to other colonies. Money orders will also be issued at Bridgetown, Barbadoes, on all money-order offices in the United Kingdom.——The postage upon letters for Hayti is increased from sixpence to one shilling the single rate (half-an-ounce), the scale of progression being simultaneously modified by substituting for the existing scale a scale of weight having half-an-ounce as a unit throughout, with the postage advancing by single rates, as follows—viz., not exceeding half-an-ounce, one shilling; for every additional half-ounce, one shilling. The postage upon letters for Hayti must be paid in advance.

ILLUSTRATIONS OF THE MEETING OF THE BRITISH ASSOCIATION AT NEWCASTLE-ON-TYNE.

SIR W. ARMSTRONG DELIVERING THE OPENING ADDRESS.



THE inaugural meeting—the first of the public proceedings of the session—took place in the New Townhall, when the president for the present year, Sir W. G. Armstrong, C.B., delivered the opening address. We extract from the *Newcastle Daily Journal* some particulars of the ceremony:—"The preparations made for the vast concourse of members who were expected to be present were of the most complete description. At each entrance to the hall a canopy was erected to shield the company from the weather should it prove unfavourable, and in the interior all that could add to the comfort of the company had been effected. The chair of the president had been removed from the spot which it usually occupies on the platform to the centre of the east side elevation. It was there placed upon a dais, whilst an elegant canopy by which it was covered concentrated the sound of the speaker's voice, and made it audible throughout the room. Long before eight o'clock, the hour appointed for the commencement of the proceedings, every seat was occupied. During the interval before the opening of the meeting Mr. W. Rea performed upon the organ with his wonted ability, and the time therefore passed pleasantly with the vast audience. Just a few minutes before eight the President Elect entered the hall, accompanied by the Mayor and Sheriff of Newcastle in their official robes, and many of the leading members of the association, and the gentry of the surrounding district. He at once proceeded, amid the enthusiastic cheers of the assembly, to the dais, where the retiring president—the Rev. Professor Willis—was awaiting him. When all were seated a few moments were permitted to elapse, and then the National Anthem was played on the organ by Mr. Rea, the whole company of course standing. At this moment the appearance of the hall was most picturesque and interesting. In the large area was gathered together a dense mass of ladies and gentlemen, whose many-coloured dresses formed a brilliant groundwork to the scene. The west side elevation and the gallery were similarly filled, whilst on the platform was a large number of ladies, the élite of the brilliant company assembled in the hall. Around the chair of the president were grouped men famous in every branch of science—the Murchisons and Lyells, the Sabines and Richardsons, the Sopwiths and Phillipses, and a host of others whose names are 'familiar in our ears as household words,' who have for long years been engaged in promoting the good of their fellow-men, and who but seldom come forward into public notice. Nor must we omit to mention the decorations of the hall itself, which were of the most handsome description, and which imparted a warmth and brilliancy to the scene. The audience having resumed their seats after the playing of the National Anthem, the retiring president, Professor Willis, opened the proceedings by saying that, as president of the association, for a few minutes at least, his duty was very plain and simple; and he should spend very little time about it, because he knew very well that they were all impatient to hear that which would be the great event of the even-

ing—the opening address by his successor, Sir Wm. Armstrong, whom he should have the pleasure of introducing, was so well known to them that it was quite unnecessary for him to waste time by expatiating upon his great merits, his untiring energy, and the the invaluable services he had rendered to his country. He would, therefore, very briefly terminate his duties for the year by yielding the chair to that highly-distinguished individual, Sir Wm. Armstrong then took the chair, and delivered the inaugural address."

THE TOWNHALL.

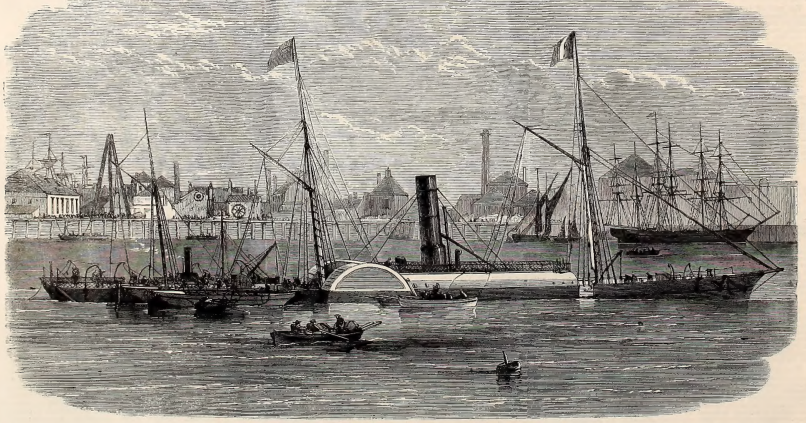
The new Townhall buildings comprise the townhall, corn exchange, council chamber, corporation offices, farmers' club, bank, and other public offices. These buildings cost the town nearly £100,000, and fill the space occupied by Middle and Union streets. The main building is of Roman character; the ground floor being Doric, the first floor Corinthian, and the attic Composite. The building contains first-class shops on the ground floor, mezzanine floor over the shops, and capacious exchange; also, banking-offices, and an hotel in connection with the corn-market and music-hall. The council-chamber is on the first floor, facing the church. It is 44 ft. long by 24 ft. broad, and 24 ft. high. The roof is coved, and finished with Corinthian entablature and ornamental ceiling. The principal committee-room adjoins the council-chamber on the east side, and the town clerk's office adjoins on the west side. Along the corridors on each side are placed the several corporate offices. On the second floor and attic are other public offices. The corn market is on the ground floor, extending northwards. It is 173 ft. long by 61 ft. broad, and 21 ft. high, and is lighted by eleven windows on one side and ten on the other, at an elevation of 20 ft. from the ground; and by the same number of entresol windows over these, at a 12 ft. higher level. The music-hall is above the corn market. It is 147 ft. long (exclusive of the organ-loft) by 60 ft. broad in the mean, and 46 ft. 6 in. high. The floor is supported by wrought-iron girders on cast-iron pillars and brackets, and socketed in the side walls, so as to prevent the possibility of a lateral movement of the walls. The roof is also constructed of wrought iron. The ceiling is divided into panels, and enriched with plaster-work. The hall is lighted in the daytime by ten Venetian windows on each side, and at night from the ceiling by sun-burners: at each alternate junction of the beam is fixed a sun-burner, in all ten in number, by Mr. Bradford, of Manchester, gas engineer: these "sun-lights" consist of rings of gas-jets terminating ornamental bosses, that hang from the ceiling. Side galleries run the whole length of the building. There is also a gallery at the north end. The hall will seat 1100 in the area, 500 in the side galleries, and 750 in the north gallery—in all 2400, exclusive of the orchestra. The arrangements, however, will admit of the accommodation of 4000 persons. There are four entrances to the hall, two at the north end and two at the south; and there are four stone staircases at different parts of the building. The organ is by Messrs. Gray and Davidson, of London.

The buildings were erected from the designs and under the personal superintendence of Mr. Johnstone, of Newcastle, architect.

MEETING OF THE BRITISH ASSOCIATION AT NEWCASTLE-ON-TYNE: THE TOWNHALL.

EXHIBITION AT THE CENTRAL EXCHANGE.

Both for its size and its internal architecture the Exchange News-room would do credit to any part of the metropolis: in truth, the metropolis has nothing of the kind like it. Built in the form of a large semicircle, and lit from above, with its fine roof, supported on a series of handsome columns, it is one of the largest, and certainly one of the finest, interiors to be found in any building in Newcastle. In this room soirées and conversaziones were held during the sitting of the association. Here had been gathered together a sort of local exhibition—model specimens of mining and steam machinery, fossils from the coal and limestone, and magnificent samples of lead and iron ores, and works of art-manufacture in aluminium, the chemical process necessary for the reduction of which are carried on almost entirely in this town, and chiefly at the works of its most popular Mayor, Mr. Bell, who exhibited so largely at South Kensington last year.



In such a rich mineral district it is almost unnecessary to say that the selected specimens of ores were wonderfully fine, worthy of a place in any national collection. One single ingot of silver was shown rough as it came from the mould, which weighs 1¼ cwt., and is worth upwards of £8000. This splendid ingot was all recovered by the late Mr. Dennison's desilvering process, applied to the common pigs of Spanish lead as imported into this country. During the excursion to Mr. Beaumont's great lead mines at Allenheads this simple process of desilvering the lead to its last grain was shown to the visitors.

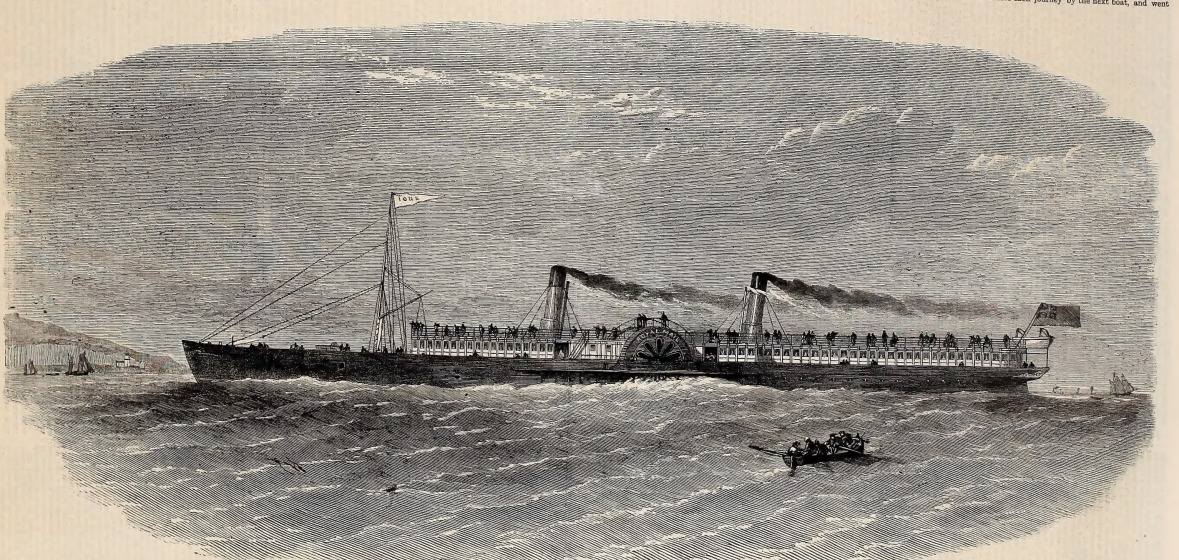
Sir William showed a beautiful series of sections of his percussion and time shells with a section of one gigantic 600-pounder shell, a number of which have recently been manufactured at Elswick for the approaching trials with the great 600-pounder at Shoeburyness.

The Mayor showed some splendid specimens of works of art in aluminium, and these, with a variety of fine models of various apparatus used in the different mines and manufactures of the district, made this portion of the exhibition exceedingly interesting.

There was one small wrought-iron model of what the pumping-beam to mines should be if coalowners wish to guard against a repetition of the tremendous Hartley catastrophe. That terrible pit is now disused and drowned in water; but there are other single-shafted pits in this neighbourhood over which the great cast-iron pumping-beams still swing slowly, and are ominously suggestive of other similar calamities if cast iron is used for this purpose.

The earthenware manufacture of the district was illustrated by a series of plates and other objects of crockery, showing the various processes and stages through which they pass—a marmalade jar, sufficiently large to contain 100 lb. weight, said to be the largest pot made by machinery, occupying the position of a trophy in the centre. Several excellent and attractive groups of wax flowers also adorned a corner of this stand. The fossils of the American and British coal measures occupied a considerable portion of the third stand. Several elaborate examples of

WRECK OF THE BARON OSY IN LIMEHOUSE REACH.—SEE NEXT PAGE.



Norwegian carving; a case of specimens of the oak and hazel, collected with a view to show how botany may be illustrated in provincial museums, on the plan of Professor Henslow; and a collection of letters and portraits of celebrated personages, the stand being surrounded with some magnificent preparations of stuffed birds, principally falcons, by Mr. Hancock, complete a most interesting and attractive section of the exhibition.

Another stand contained a fine collection of Bewick's wood engravings, partly contributed by Miss Bewick and partly by Mr. Robert Robinson, bookseller, Pilgrim-street. Amongst the contributions of Miss Bewick were several of her father's original drawings, which bear the marks of the block in which the graver made his tracing; and there was no inconsiderable number of the blocks themselves, including the very last on which Bewick was engaged, a very characteristic one, entitled "Waiting for Death," and which remains unfinished, an affecting monument of his persevering toil.

In addition to these objects, a collection of paintings, lent for the occasion, also adorned the walls of the Exchange Rooms. These works were by no means of a local character, but, on the contrary, included some of the masterpieces of Turner, Louis Gallait, Gainsborough, De Wint, Hunt, Millais, Faed, Ezty, Patrick Nasmyth, Ward, Copley Fielding, Goodall, &c., with a small but fine collection of water colours. All these, as we have said, were lent by the gentlemen of Newcastle, for in there, as in Manchester and Birmingham, art finds its most liberal patrons in the possessors of the great wealth which is here won as freely from collieries and iron mines as from mules and spindles.

WRECK OF THE BARON OSY STEAM-VESSEL IN THE THAMES.

ABOUT mid-day on the 3rd inst. the iron paddle-wheel steam-ship Baron Osy was proceeding up the river laden with passengers and general merchandise from Antwerp, and when in Limehouse Reach, nearly opposite the Commercia Dock Pier, the steamer diverged towards the Middlesex shore to avoid a small craft, when the fore part of her keel struck heavily upon a hard substance, breaking her iron plates, and causing the water to rush into her forecabin and machine-room. Immediately after she struck, the vessel turned round and her stern rapidly sunk. Great alarm prevailed amongst the hundred passengers who were on board; but fortunately the Naiad, Woolwich steamer, Captain Robinson, came near at the time on her up passage, and the captain promptly landed the whole of the Naiad's passengers at the Commercial Dock Pier to continue their journey by the next boat, and went

THE NEW SALOON-STEAMER IONA, BELONGING TO MESSRS. DAVID HUTCHESON AND CO., OF GLASGOW.

to the assistance of the Baron Osy. The whole of the passengers of the latter vessel, and a large amount of luggage, were rapidly transferred to the Naiad, and conveyed to the St. Katherine's Docks; the Naiad immediately returning with a numerous body of men to assist in removing the cargo from the wreck. At eight o'clock in the evening her fore-cabin, engine-rooms &c., were entirely under water, a considerable amount of property being still in the vessel.

On Monday operations were commenced for the purpose of raising the Baron Osy. Several powerful chains have been got under her bottom, and the weighing lighters of the Thames Conservancy Board are in attendance to assist in lifting the vessel. Beyond the fracture in her iron plates, it is thought that the ship has not sustained any severe injury. Her masts, rigging, funnel, &c., are standing apparently uninjured.

The Baron Osy is an iron-built paddle-wheel vessel, and has only been launched a few years. She is the property of the Antwerp Steam Navigation Company, and was a favourite ship on the Antwerp station. She is upwards of 400 tons burden, and was very elegantly fitted up.

THE SALOON-STEAMER IONA.

THE new Iona, the property of Messrs. David Hutcheson and Co., of Glasgow, was launched from the building-yard of Messrs. J. and G. Thomson, Govan, about a month ago. She was constructed to ply between Glasgow and Ardrishaig, the south-eastern terminus of the Crinan Canal. She had her engines fitted in and was finished at Lancefield. Recently she made a trial-trip over the usual course, between the Cumbrae and Cloch Lighthouses, with great success. She is built of iron. Her actual length is 245 ft., and her breadth of beam 25 ft. She has a depth of 9 ft., and she draws little more than 4 ft. of water. Her engine-room, which is uninclosed on three sides save by rails, is a little palace in its airiness and perfect cleanliness. Everything is formed after the newest and most excellent models, her engines being of the oscillating species, and fitted up with tubular boilers, superheaters, and every new and well-tried improvement. The paddle-wheels, 29 ft. in diameter, are most skilfully constructed, and are furnished with patent feathering floats. But the most singular and attractive feature which distinguishes the new Iona is the extensive and comfortable accommodation provided for passengers throughout the whole extent of the vessel. The cabin end of the steamer is fitted up and finished in the most magnificent style of art, combining indeed the beauty, comfort, and all the facilities of a perfectly furnished private mansion. The dining-room is 75 ft. in length. The steerage end of the vessel, although necessarily fitted up in a less luxurious style of art, is, nevertheless, correspondingly furnished with all requisite comforts. But the original feature in the new Iona is the deck-saloon, some 180 ft. in length, which affords sheltered accommodation for vast numbers of first and second class passengers. The cabin portion of the deck-saloon is furnished and finished in the richest and most superb style. A range of white and gold pillars runs through the centre; and the windows, which are curtained, are constructed so as to be capable of being opened or shut at will, according to the condition of the weather. The steerage-saloon is also furnished with taste and comfort. There is a post office on board, in front of the saloon. The roof of the saloon, or what might be called the upper deck, forms a safe and splendid promenade. In good sea weather this lofty and extensive observatory will be as luxurious a lounge as the saloons beneath will be in weather of a rainy or tempestuous character. In brief, the new Iona is a floating mansion in which a person may go to sea without losing the scene of home.

THE FARM.

Proceeding gradually southwards from the Orkneys so as to be in time for Mr. Brydon's biennial Cheviot tup sale at Beattock and the annual sale of Leicesters at Kelso, we found barley rather a failure in Sutherlandshire, oats an average, and turnips good. Still, the late heavy rains will rather retard the harvest all over Scotland. The sale of three and four shear Cheviot tups at Bonar (which was only established last year) proved a success, and twenty lots were brought, making up about one hundred in all. The prices were very fair, and the show is likely to become permanent. Sheep generally, throughout the Highlands, have averaged about eighteenpence a head more than last year. A few of the best four and five shear cast ewes—Mr. Houston's, for instance—have made 28s., and some of the old wedders belonging to the same gentleman 38s.

The foxes are increasing on the Sutherlandshire farmers, and they are dreading a recurrence of disease among the grouse, which are thrice as numerous as they were last year.

In Ross-shire the oats are light, wheat and barley a full average, the turnips uncommonly good, and the potatoes rather blighty. In spite of the drought in July, the grass was never better, and beasts have "freshened" upon it so wonderfully that four of the bullocks at the Tain show, belonging to Mr. Edward Tew, of Allness, realised £30 each, or exactly a pound per month from their birth.

The Poisoned Grain, &c., Prohibition Act has been published. Persons are forbidden, under a £10 penalty, to sell or use grain, seed, or meal steeped or dipped in poison; but by section 4 "nothing in this Act shall prohibit the offering or exposing for sale, or selling, or the use of any solution or infusion, or any material or ingredient for dressing, protecting, or preparing any grain or seed for bonâ fide use in agriculture only, or the sowing of such last-mentioned grain or seed so prepared."

Mr. Stewart Marjoribanks, the celebrated shorthorn-breeder, died on Aug. 31. He was in his ninetieth year, which he would have completed next month, and is succeeded in his Bushey Grove property by his nephew, Mr. Edward Marjoribanks. Under the skilful management of Mr. Tallant, the Bushey-grove herd took four first prizes with Great Mogul, Harkaway, Rose of Bushey, and Whipper-in at the Royal Agricultural meetings in 1857-62, and the averages of the sales in the first and last of those years are very memorable ones. Mr. Stratton has hired Mr. Crosbie's celebrated Lamp of Lothian, of the Athelstaneford blood, and he arrived at Broadhinton on the 20th. His stock have been as successful at "the Irish Royal" as they were at Dublin Spring.

Shows have come very thick lately in the northern districts. Colonel Towneley and Mr. Booth had each two firsts at The Craven, where Soldier's Bride beat Pride of Southwicke, and Rosedale vanquished 2nd Queen of May, for about the eleventh time this season. The cream of the show was the meeting of three crack lots, of "not less than four each," for the twenty-guinea cup. Colonel Towneley brought out, amongst others, Royal Butterfly, 11th Royal Butterfly, and Frederick's Farewell; Mr. Booth, Queen of the Ocean, her son Prince of Battersea, Soldier's Bride, 2nd Queen of May, &c.; and Lady Pigot, her Pride of Southwicke, Rosedale, Castanira, &c.; and in this order they were finally placed by the judges. Mr. Benjamin Baxter, of Elslack, was quite invincible in the tenant-farmers' classes. At Halifax, Royal Butterfly won the cup, as the best bull in the yard; and Queen of the Ocean, after defeating Pride of Southwicke in her class, had to bow to Rosedale when all the winning females came together for their cup, the first time she has ever been defeated. We have seldom known a week of such spirited contests among the really tiptop animals; and 22 prizes, 14 firsts and 8 seconds (some of them in classes where their herd-fellows were first), have fallen to Colonel Towneley's lot.

Shorthorn sales are rife this autumn. All the world and his wife will mount the waggons round Mr. Wetherell's rostrum, at Branches, the week between the St. Leger and the First October Meeting; and Mr. Strafford sells Mr. Lane's herd on Sept. 24, Mr. G. Miles's on Sept. 25, a selection from the Marquis of Exeter's on Oct. 7, and Mr. W. H. Baker's the next day. With the exception of the Marquis's, these sales are "without reserve." *On dit* that part of the Towneley herd may be sold next spring.

The *Journal de Rouen* says:—"The abundance of stone fruit in Normandy is this year so great that all the markets are glutted with it. The same may be said of pears and summer apples. A good half crop of cider apples is expected, and a full crop of pears. There is every reason to believe that the pears will be of good quality this year."

A fire broke out three days back in an extensive wood store and dock at Viarenna, a suburb of Milan. In a short time the flames extended to a basin in which there were twenty barges laden with timber; these also took fire and were totally destroyed. The conflagration was at length got under. Prince Humbert, with the Prefect and the municipal authorities, were on the spot encouraging the workers. The damage is estimated at £80,000.

The Guild of Literature and Art has published its general balance-sheet. From this it appears the guild possesses a clear capital of £5323 to start with; that it proposes to erect a number of free residences upon the land given by Sir Edward Bulwer Lytton, and that its functions will be to grant pensions, or donations, or free residences to members of its own body or their widows. The right of membership is obtained by the subscription of an entrance fee of one guinea, and an annual subscription of a like sum.

The Rohan Necklace.—The Civil Tribunal of the Seine was engaged during six sittings last week in trying an action brought by the heirs of M. Deville, a creditor of Cardinal de Rohan, against the Princes de Rohan-Rochefort, as representatives of Princess Charlotte de Rohan-Rochefort, the Cardinal's residuary legatee and executrix, for the recovery of sums amounting, with interest, to above two millions of francs. The debts in question originated in the purchase by the Cardinal of the celebrated diamond necklace as a present for Queen Antoinette, which occasioned so much scandal in the latter years of Louis XVI.'s reign. The circumstances are briefly as follow:—Towards the close of 1784, Bœhmer and Bossanges, jewellers to the King, made a magnificent necklace of brilliants, estimated to be worth 1,600,000 francs, which all the great ladies of the Court were anxious to possess. The necklace was offered to Queen Antoinette, who declined to purchase it on account of its high price. At that time Cardinal de Rohan was in disgrace at Court, and the Countess de Lamotte persuaded him that if he could purchase the necklace for the Queen it would ensure his return to favour, and that the money would ultimately be refunded to him. On the 24th of January, 1785, the Cardinal went to the jewellers, examined the necklace, and said that he was authorised to purchase it for a high personage whom he could not then name. Some days later, he returned, and purchased the necklace for 1,600,000f., in the Queen's name, and arranged the conditions of payment. He took the necklace away with him, and on the 1st of February gave it to the Countess de Lamotte, who was to convey it to the Queen, but her Majesty never received it; and what became of it has ever since remained a mystery. The fraud was discovered in the following August; and the Cardinal, the Countess de Lamotte, Count Cagliostro, and others supposed to be accomplices, were arrested and sent to the Bastille. The prisoners were tried in December, and all acquitted, except the Countess de Lamotte, who was condemned to be flogged, branded with a hot iron, and imprisoned for life. Meanwhile, the Cardinal had made arangements to pay the jewellers from his own resources, by transferring to them the greater part of the income of his ecclesiastical benefices; and especially of the Abbey of St. Waast, which produced 225,000f. a year. Some time after, MM. Bœhmer and Bossanges, who owed M. Nicholas Deville, the King's secretary, 900,602 livres, assigned to him the revenues of the above-named abbey for the extinction of their debt. But before any payment had been made, the French revolution occurred, and all church property was transferred to the nation. The Cardinal, being forced to leave France, went to Ettenheim, on the right bank of the Rhine, a dependence of his bishopric of Strasburg, lying beyond the French frontier. Owing to these events and the failure of MM. Bœhmer and Bossanges, M. Deville never received any part of his money. The Cardinal died at Ettenheim, in the year 1803, leaving a will, in which he made the Princess Charlotte de Rohan Rochefort his residuary legatee, and she accepted administration of the estate on condition that she should not be held responsible to the creditors for any deficiency that might exist. At the time of his decease the Cardinal possessed landed property in Baden, and personal property to a considerable amount, part of which was money lent to his relatives, the Prince and Princess de Guémenée and the Duke de Montbazon, which the Princess neglected to recover, and it was consequently lost. The Princess sold the lands in Baden, and divided the proceeds among a few favoured creditors, but Deville obtained little or nothing. After the Restoration, when the property remaining unsold was returned to its former owners or their heirs, and an indemnity was also granted for what had been sold, the Princess, according to the statement of the plaintiffs' counsel, neglected the interests of the creditors by omitting to recover the sums due to the Cardinal's estate, especially those owing from the Guémenée family. For this neglect of her duty as executrix the learned counsel maintained that the Princess was responsible in the persons of her heirs, notwithstanding the conditions under which she had undertaken to administer to the Cardinal's will. For the defence, it was argued that the Cardinal's estate had been properly administered by the Princess, that the plaintiffs had received the same share as the other creditors, and that they had no claim on the defendants in the present action. The Tribunal took this view of the case, and accordingly rejected the plaintiffs' demands, with costs.

THE FLORIDA AND HER COMMANDER.

"J. L.," writing from Brest, Aug. 31, furnishes the *Times* with some interesting details respecting the Florida and her commander. After speaking of the excitement and lively gossip which her presence has created, "J. L." says:—

To-day the weather was most propitious, and early morning found us alongside the Florida. We sent our cards to Captain Maffitt, and were immediately admitted on board, the Captain himself coming to the top of the companion to receive us. Directly Captain Maffitt understood that we were British subjects he invited us below into his little cabin, and when I told him that there were many people in England who regarded his career with great interest he entered very freely into a recital of his adventures. I will here subjoin a copy of some notes which Captain Maffit subsequently handed to me relative to the career of the Florida, promising, at the same time, a continuation, which has not yet arrived. They are as follow:—

"The Confederate States' steamer Florida, Commander J. N. Maffitt.—This steamer was built in Liverpool and sent to Nassau in April, 1862; was put in the Admiralty Court; cleared on the 6th of August, when her present commander took charge, with some eighteen men, went to sea, met her tender, and received guns, &c. On the 16th of August the yellow fever appeared on board, and Captain Maffitt had to perform surgeon's duty until necessity forced the vessel into Carducas. There she lost nearly all her crew, her paymaster, and third engineer. She ran the blockade off Havannah in and out, and on the 4th of September appeared off Mobile. The entire blockading fleet put after her. Captain Maffitt was brought up from a bed of sickness (yellow fever) to take her in. For two hours and forty-eight minutes she was under a close fire. All the crew were sent below, and the officers only remained on deck, for she had but eleven men on duty, and her guns were not furnished with rammers, quoins, beds, or sights; in fact, she was almost helpless. Three heavy shots struck her hull. One shell struck her amidships, and passed through, killing one man and wounding seven. Her standing rigging was shot away, and some 1500 shrapnel-shot struck her hull and masts."

Of the Captain himself, I may say that he is a slight, middle-sized, well-knit man, of about forty-two; a merry-looking man, with a ready, determined, and full of life and business; apparently the sort of man who is equally ready for a fight or a jollification, and whose preference for the latter would by no means interfere with his creditable conduct of the former.

His plainly furnished little state-room looked as business-like as a merchant's office. The round table in the centre was strewn with books and innumerable manuscripts, and on the shelves were formidable-looking rows of account-books, charts, &c. I may observe of the cabin, as of every part of the Florida, that none of it appears to have been built for ornament—all for use. "You see," said the Captain, pointing to the heaps of papers, letters on files, account-books, &c., which literally littered the table—"you see I have no sinecure of it. Since my paymaster died I've had to be my own paymaster. There's a young man named Davis—no relation to our President—who does paymaster's duty, but he is not quite up to the work." Captain Maffitt forthwith began an animated recital of his career and adventures. He is the oldest officer on board. All the officers were born in the Confederate States, and most of them were officers in the United States' navy before the outbreak of the war. The oldest of the officers is not more than twenty-three. The men are more mixed. There are one hundred able seamen on board the Florida and about thirteen officers. Four fine fellows are from the neighbourhood of Brest. Captain Maffitt says that he has hardly ever taken a prize but what some of the crew of the prize have come forward to say, "Should like to serve with you, Sir." Generally speaking, he has to refuse; but if he sees a very likely fellow he takes him on.

Captain Maffitt was a Lieutenant of the United States' navy before the outbreak, and in that capacity distinguished himself greatly. In 1858 he commanded the brig Dolphin, when he captured the slaver Echo, with 400 slaves on board, and took her into Charleston. For this feat his health was drunk at a public dinner at Liverpool; and it is a curious fact for those who maintain that the civil war in America is founded upon the slave question that the commander of this important Confederate cruiser should be the very man who has distinguished himself actively against the slave trade. In 1859 Captain Maffitt commanded the United States' steamer Crusader, and captured four slavers. The Captain had a great deal to say about his successful feat at Mobile. In his opinion it has been the greatest naval feat of modern times. He dwelt long and warmly upon the incidents of the affair, and pointed proudly to the marks of shrapnel, which are numerous enough, upon the masts and smoke-stacks. The Florida was struck with three heavy shots on that occasion, and one can easily perceive in the side of the ship where the mischief caused by the 11-inch shell has been repaired. The Florida made no endeavour to reply to the fire which she received, the sea running too high to admit of steady aim, and her small crew being too much occupied in the management of the ship. The Captain showed us a water-colour sketch (very well drawn, by one of the midshipmen) of the Florida running the blockade. It would not have disgraced a professional artist.

The only broadside which the Florida has fired in anger was against the Ericsson, an armed merchantman, which she encountered some forty miles from New York. The Ericsson, a very large vessel, did not reply, but made the best of her way off, and succeeded in escaping. When they ventured within forty miles of New York they did not know that the arrival of the Tacony (one of their "outfits") had put the New Yorkers on their guard, and they soon found that there were about seventy armed vessels out searching for them, and so were glad to retreat. "We never seek a fight, said Captain Maffitt, and we don't avoid one. You see, we've only two vessels against 1500, so we should stand a poor chance. Our object is merely to destroy their commerce, so as to bring about a peace. We've taken altogether seventy-two prizes, and estimate the value at about 15,000,000 dols. The Jacob Bell alone was worth 2,100,000 dols." The Captain exhibited a book, in which all the prizes were regularly entered and all particulars relating thereto. He explained that their mode of procedure was to burn and destroy the property of the Northern States wherever they found it. I asked if they took gold and precious articles, and the reply was "Pretty quick, when we get them." The papers of the burnt prizes are all kept, and a valuation is made before the destruction of the vessel, in the expectation that, when peace is restored, the Confederate Government will make an appropriation of money equivalent to the claims of the captors. In consequence of this arrangement there is very little actual treasure on board the Florida, and the officers and crew are working mainly on the faith of the future independence and solvency of the Confederacy. "Any way," said Captain Maffit, "we have cost the Government very little, for we've lived on the enemy. Oh, yes; we've served them out beautifully." In reply to some questions as to the method of capture, the Captain said, "We only make war with the United States' Government, and we respect little property. We treat prisoners of war with the greatest respect. Most of those whom we have captured have spoken well of us. To be sure we have met with some ungrateful rascals; but you meet with those all the world over. The last prize we took was the Anglo-Saxon, which we took in the English Channel the other day, in mid-channel, about sixty miles from Cork. She had coal on board, and we burnt her. The pilot was a saucy fellow, and maintained that he was on his piloting-ground. He insisted on being landed in an English port, but we could not do that. I brought him and twenty-four men here (to Brest) and sent them to the English Consul. If the pilot has any just claim upon us it will be settled by the Confederate Government. That's not my business. My business is to take care of the ship."

When the Florida came into Brest she had been at sea for eight months, without spending more than four entire days in port. Before entering the port of Brest she had not been more than twenty-four hours in any one port, although she had visited Nassau, Bermuda, Pernambuco, and Sierra (Brazil). "Yes, indeed, Sir!" said the Captain, "245 days upon solid junk, without repairs or provision." During all this time hey have only lost fifteen men, including those who were killed and wounded at Mobile, the paymaster (who died of consumption), and one officer (who was accidentally drowned). They have come into Brest to repair the engines, which are somewhat out of order, the shaft being quite out of line. The Florida mounts only eight guns—six 48-pounders of the Blakeley pattern, made at Low Moor, and stern and bow chasers.

On taking our leave I asked whether he expected to be intercepted on leaving Brest, pointing at the same time to the Goulet, the narrow passage which affords the only ingress and egress to and from the Rade. "Well," replied he, "I expect there will be seven or eight of them out there before long; but I am not afraid. I have run eight blockades already, and it will go hard but I will run the ninth."

The Sandwich Islands are decreasing in population and business. The number of foreign vessels which had arrived at Honolulu during the first half of the present year was less by half than during the corresponding period of last year. There is a great scarcity of labourers for the sugar plantations, and parties are earnestly urging the Government authorities to import coolies from Polynesia. The population of the islands is decreasing more rapidly than at any former period. It is now estimated that they contain only 66,000 inhabitants.

The *Patrie* publishes news from Madagascar stating that political parties still confront each other in the capital. The Commander-in-Chief of the Hovas has received reinforcements, but they are insufficient. In an engagement which took place on the 13th of July 4000 Hovas were killed. The Sakalavas are desirous of avenging the assassination of King Radama I., and it is feared that they will shortly invade Tananarivo, from which they are but two and a half days' march distant. The Sakalavas occupy the hills around the town and its environs to prevent the arrival of cattle.

A singular case has occupied the attention of the tribunal of Pontoise, France, on the subject of the inviolability of letters. M. Girandeau was the postmaster of St. Leu. He found that his bureau had been opened and that he had been the prey of thieves. After some little time had elapsed and the affair almost forgotten he called at the house of the plaintiff, M. Commeny, and demanded to see his daughter, and then accused her of the robbery on the faith of an anonymous letter that had been sent to her father. The seal of this letter was unbroken, and the postmaster was asked how he knew its contents, as it appeared never to have been opened. His reply not being satisfactory, further investigation of the state of the letter showed that, although unopened, it had been so manipulated that the whole of it could be read. The Court decided that there had been a violation of the law, and that it had prejudiced the character of the family Commeny, and therefore condemned the postmaster to pay 200 francs and to fifteen days imprisonment.

THE DISTRESS IN THE NORTH.

The usual meeting of the Central Executive Committee was held on Monday in the Townhall, Manchester, when the Earl of Derby presided.

The hon. secretary stated that £154 had been received during the week; the balance in the bank was £301,767, and no clothing had been sent off.

Mr. Commissioner Farnall's report stated—On the 29th ult. there was a decrease of the number of persons receiving parochial relief in the 27 unions in the cotton-manufacturing districts, as compared with the number so relieved in the previous week, of 531. Since the 6th of December last there has been a total decrease of 127,534. There were on the 29th ult. 144,449 persons receiving parochial relief in the 27 unions. In the corresponding week of 1861, 46,639 persons were so relieved. In the same week of 1862, 139,990 persons received parochial relief; but, independently of the 144,449 persons who are now receiving parochial relief, there are also 70,403 persons who are maintained by local committees of charity, making a total of 214,852 persons. The total weekly cost of outdoor relief on the 29th ult. was £8842; in the corresponding week of 1861 it was £2257; in the corresponding week of 1862 it was £7937. The amount of money in the hands of the treasurers of the above unions on the 29th ult. was £97,307.

Mr. Maclure, the hon. secretary, presented his report for the month of August, 1863. Amongst other matters to which it referred were the following:—The Central Executive Committee have the satisfaction of reporting that the condition of the operative population employed in the cotton districts of Lancashire and the neighbourhood has considerably improved since July last. Of those who are still without employment in connection with their regular occupation, there are not a few who have been enabled to remain in the neighbourhood by availing themselves of the various forms of labour which have arisen from the liberality of landowners, as well as from the plentiful harvest which is now being gathered in. The various offers of work from even distant places have been gladly seized; and it is with no little satisfaction that your committee are able to state that the reports received as to the conduct and intelligence of the persons engaged are of the most gratifying character. The pressure upon the funds of the committee, and upon the rates, has undergone a considerable reduction since June, the present expenditure of the local committees being at the rate of £38,456 per month; but it must not be inferred that this change will necessarily be of long continuance, as the near approach of winter may increase the claims upon both channels of relief. The sums granted by the Central Executive Committee up to the 29th ult. amounted to £498,367, and the balance in the hands of Messrs. Heywood Brothers and Co. is now £301,767. The weekly loss of wages by factory operatives was, on the 28th of February last, reported to be £185,733; whilst at present it is believed to be only at the rate of £130,171 per week. Mr. Rawlinson, the engineer appointed to report upon the works proposed to be undertaken by the local authorities, has favoured your committee with the following statement of amounts, for borrowing which, under the recent Act of Parliament, applications have already been made:—Bollington, £9859; Glossop, £3500; Macclesfield, £47,570; Blackburn, £78,300; Dukinfield, £11,010; and Preston, £28,500—making a total of £178,739: of which £118,669 were ordered by the Poor-Law Board before the 25th of August. It has also been intimated that loans will be applied for by the corporations of Manchester and Salford, besides upwards of £500,000 by various other places in this locality. Of the loans reported, amounting to £178,739, the sum of £9500, about 5½ per cent, is proposed to be devoted to public buildings. The larger part of the proposed works consist of sewerage, paving, and flagging streets. In the Macclesfield Union some very useful works are proposed in straightening and widening public roads. These works will employ a very large percentage of unskilled labour, and in all cases the land for the proposed improvement has been given by the adjoining landowners. The present condition of the cotton operative population in the districts may be stated as follows:—Working full time, 242,446; short time, 120,251; out of work, 171,535: against 141,587 full time, 166,225 short time, and 239,751 out of work at the end of February last.

The Mansion House Committee held their fortnightly meeting yesterday week at the Mansion House, under the presidency of William Cubitt, Esq., M.P. The amount received up to Thursday was £510,770, of which £440,497 had been already remitted for distribution to the distressed districts. The sum received during the past fortnight was £1559, of which £1524 was received from colonial resources. The following grants, besides several smaller ones, were made:—Ashton-under-Lyne, £1000; Preston, £400; Wigan, £300; Stockport, £250; Hyde, £200; Tintwistle, £150; Bolton, £150; Hurst, £100—making a total of £3515.

The views of her Majesty's Government on some of the means that have been suggested for alleviating the distress arising out of the cotton famine have just been set forth in a reply which has been given to the Glasgow operatives' memorial, presented to Lord Palmerston on the occasion of his Lordship's visit to Scotland in March. The document states that, however desirable such measures may appear to persons suffering from the want of employment, "it is seldom expedient, and seldom ultimately advantageous, even to the parties themselves, that general alterations affecting the large subjects of employment, poor relief, and emigration should be made in consequence of temporary pressure." Parliament have accordingly confined their operations to the cotton-manufacturing districts in the counties of Lancaster, Chester, and Derby.

On Wednesday week Messrs. Farnall and Rawlinson attended the monthly meeting of the Bury Improvement Commissioners, and explained the provisions of the Public Works Act. A discussion followed, during which it was stated that £73,000 might be usefully employed for the improvement of the town. Mr. Farrar, the town surveyor, produced an estimate, showing that about £10,000 would be required for sewering purposes. Ultimately it was decided to adopt the Public Works Act, and a committee was appointed to carry that determination into effect.

Mr. Robert Arthur Arnold has been appointed Assistant Commissioner for carrying out the provisions of the Public Works Act.

A balance sheet and statement of accounts has been received by Mr. J. W. Maclure from Mr. Richard Irvin, treasurer of the New York British residents' fund for the relief of the Lancashire operatives. The amount of cash contributions was 21,921 dols. (£4384), of which 7296 dols. (£1459) was remitted in cash, and the remainder, with the exception of the sum required to meet the expenses and a balance of £6 kept in hand for other charges, was remitted in provisions; in addition to which, private contributions of provisions were forwarded, amounting in value to 3879 dols. (£776): making a total of 25,800 dols. (£5160) contributed from the United States.

The Queen has appointed Dudley Edward Saurin, Esq., Third Secretary, to be a Second Secretary in her Majesty's diplomatic service.

The Berlin Faculty of Medicine has commenced an onslaught on the drinking of Bavarian beer, which they declare to be the cause of innumerable cases of apoplexy. Bavarian beer, which was not known in Prussia twenty years ago, is now largely consumed in that country.

We are informed (says the *Sémaphore* of Marseilles) that, upon the demand of M. Ferdinand De Lesseps, director of the Suez Canal Company, three engineers are shortly about to proceed to Egypt charged by the French Government with the mission of examining the state of the works and making a report on the subject.

A fire broke out in the night of the 17th ult. at Scio, capital of the island of that name in the Archipelago, and destroyed the bazaar, 400 shops, 45 large stone-built houses, and the custom-house, as well as a great quantity of merchandise. The loss is estimated at twenty million piasters. The Austrian Lloyd's establishment escaped destruction by the exertions of the men employed in it, who saved all the money and more than 300 packages lying there ready for shipment.

First Ascent of Les Diablons.—Mr. Sedley Taylor, A.C., and Mr. George D. Whatman, write to the *Times*, giving an account of their ascent of this peak, which they believe to be the first, remarking that it is extraordinary it has hitherto escaped the attention of Alpine travellers:—"Les Diablons (they say) is the culminating point of the range which separates the Val d'Anniviers from the Turtman Thal. Its height, according to Mr. Ball, is 11,836 feet. Both from the isolated position and the very considerable altitude of the peak, it was evident that it must command an unusually extensive view, and on making inquiries at Zinal we were told that it had never been climbed save by a few guides and chamois-hunters. Having determined to attempt its ascent, we engaged Joseph Viennin, of Ayer; besides whom we had with us Franz Andenmatten, of Saas. Starting from Zinal at 4.15 on the morning of Aug. 24, we took the path which leads to the Arpitetta Alp, and then, leaving it on our right, walked for some distance up easy grass slopes. At half-past six we reached the Moraine of the small glacier which descends from Les Diablons; an hour was occupied in traversing this, and we then bore away obliquely to the left across the Névé, until we reached the rocks at its side. From this point our route lay over alternate rocks and snow slopes of constantly increasing steepness. Before reaching the last rocks we passed a singular notch overlooking the vertical precipices which form the eastern face of the mountain. The only real difficulty of the ascent occurred just below the summit, where the rocks are so very steep, and afford so little foothold that the utmost caution is necessary. At eleven o'clock we had cleared this difficulty and reached the top, a ridge barely broad enough to afford safe sitting room, and falling away precipitously in all directions. In the way of a panoramic view it is hardly possible to imagine anything finer than that which now presented itself. In the immediate foreground were the glorious precipices of the Weisshorn, and the line of peaks extending from that mountain to the Gabelhorn. These concealed that portion of the Monte Rosa range which stretches from the Alleleinhorn to the Breithorn, including, unfortunately, Monte Rosa herself, though the summit of the Lyskamm, oddly enough, peered over the shoulder of the Schallhorn. Looking further to the right came the Matterhorn and Dent Blanche, and then the entire chain of Mont Blanc, without a single break, though most curiously foreshortened and crowded together. In the direction of the Col de Cheville the blue expanse of the Lake of Geneva was clearly visible. Perhaps the most wonderful part of the view remains to be described. From the point last mentioned a perfect wilderness of peaks extended in one continuous line over at least 125 deg. of the horizon from the Diablerets through all the well-known Oberland Mountain, the familiar shapes of which could be most easily recognised till it seemed to fade away in the extreme distance in the ranges of the Tyrol. Still further to the right appeared the Laquinhorn and Fletschhorn; and, to complete the circuit, the jagged peaks of the Saasgrat, from the Balferin to the Alphubel. We spent an hour or so at the top in examining the superb view, of which we have given so inadequate a description, and descended in the most leisurely manner, reaching Zinal at four p.m."

COLUMN FOR THE CURIOUS.

An early autumn gale of wind brought to the ground the shattered trunk of "Herne's Oak," in the Home Park, on the morning of the 31st ult. The famous tree was fenced in with paling about twenty years ago, when was blown off a large branch, now preserved in Windsor Castle; and attached to the trunk was a plate, inscribed with these lines, from "The Merry Wives of Windsor:"

> There is an old tale goes, that Herne the hunter,
> Sometime a keeper here in Windsor Forest,
> Doth all the winter time, at still midnight,
> Walk round about the oak with great ragg'd horns.

We need scarcely add that the identity of Herne's Oak has been disputed by many writers. Mr. Jesse, in the Second Series of his "Gleanings," published in 1834, contends for the oak just blown down, which, however, a writer in the *Quarterly Review*, in 1838, treated as an apocryphal story, adding that "the tree in question was cut down one morning by order of King George III., when in a state of great but transient excitement. The circumstance caused much regret and astonishment at the time. The oak which Mr. Jesse would decorate with Shakspearean honours stands at a considerable distance from the real Simon Pure. Every old woman in Windsor knows all about the facts." To this Mr. Jesse replied, in the *Times*, Nov. 30, 1838, that George IV. was accustomed to repeat the above story, but always added, "that tree was supposed to have been Herne's Oak, but it was not." A person was then alive who heard the order given by George III. to fell a tree in the Little Park, about which some angry words had passed with the Prince of Wales; and he stated that the tree was an elm, that it stood near the castle, and he pointed out the spot where it grew. Soon after this circumstance three large old oak trees were blown down in the Little Park, one of which was asserted to be Herne's Oak, and the wood was cut into pieces and sold to carpenters and cabinetmakers, who profitably made it into Shakspearean relics; and this, Mr. Jesse maintains, gave rise to the *Quarterly* reviewer's story that Herne's Oak no longer existed. Mr. Jesse proceeds:—

> To set the matter at rest, however, I will now repeat the substance of some information given to me relative to Herne's Oak by Mr. Ingalt, the present respectable bailiff and manager of Windsor Home Park. He states that he was appointed to that situation by George III., about forty years ago. On receiving his appointment he was directed to attend upon the King at the castle, and on arriving there he found his Majesty with "the old Lord Winchilsea." After a little delay, the King set off to walk in the park, attended by Lord Winchilsea, and Mr. Ingalt was desired to follow them. Nothing was said to him until the King stopped opposite an oak tree. He then turned to Mr. Ingalt and said, "I brought you here to point out this tree to you. I commit it to your especial charge, and take care that no damage is ever done to it. I had rather that every tree in the park should be cut down than that this tree should be hurt. This is Herne's Oak." Mr. Ingalt added that this was the tree still standing near Queen Elizabeth's Walk, and is the same tree which I have mentioned and given a sketch of in my "Gleanings in Natural History."
>
> * * * * * * *
>
> King William III. was a great planter of avenues, and to him we are indebted for those in Hampton Court and Bushy Parks, and also those at Windsor. All these have been made in a straight line, with the exception of one in the Home Park, which diverges a little, so as to take in Herne's Oak as a part of the avenue—a proof, at least, that William III. preferred distorting his avenue to cutting down the tree in order to make way for it in a direct line, affording another instance of the care taken of this tree 150 years ago.

However, these circumstantial statements were contested by Mr. Charles Knight; and, in the "Journey-book of Berkshire," published by him in 1840, it is stated:—

> In the "Pictorial Shakspeare" (Local Illustrations of Act v. of "The Merry Wives of Windsor") the controversy respecting Herne's Oak is brought together, and, on the authority of George III., it is stated that this famous tree was inadvertently cut down when the King was a young man. Fortunately, a sketch had been made of it before it was felled. (It is engraved in the "Journey-book," p. 59.)

We recorded last week that in a "Plan of the Castle and Town of Windsor," published at Eton in 1742, the position of the oak is clearly shown as "Falstaff's Oak," the tree which has just fallen.

The High Cross at Winchester, after having been for many years dilapidated and decaying, is about to be taken down and rebuilt. It is engraved in Mr. Parker's beautifully-illustrated volume of the "Proceedings of the First Annual Meeting of the Archæological Institute in 1845," when, we remember, the Cross received little attention from the archæologists. Mr. Parker describes it as "a light and elegant design of the fifteenth century, but the detail has been almost entirely destroyed by injudicious repairs." The upper portion has altogether disappeared; and three of its four statues are gone. The complete restoration of the Cross has now been decided on, and Mr. George Gilbert Scott will furnish the requisite drawings and superintend the work; the total cost, not less than £500, to be raised by subscription. We hope to see the inhabitants of the city of Winchester and of the county of Hants contribute liberally to the preservation of this very interesting memorial of former ages.

The burial-place of the Christian philosopher, John Locke—the church of High Laver, four miles from Ongar, in Essex—is now in course of restoration. Locke was buried on the south side of the churchyard, under a black marble gravestone inclosed by iron rails; and on the wall of the church above is a Latin inscription, written by himself and printed in his works. Some thirty years since the tomb and monument were repaired at the expense of the Rev. R. Budworth. They are now again out of repair, and the worthy Rector of High Laver proposes to restore them by subscription; and, if sufficient funds can be raised, to erect some more fitting memorial of Locke, whose philosophical and religious labours entitle him to grateful remembrance; and whose love of freedom in thought and action led him to refuse a pension which was offered to him, and which his services in the public cause had amply merited. Mackintosh has well said of Locke that he did more for the improvement of the understanding, and not less for the progress of knowledge, than the author of the most brilliant discoveries. The resting-place of such a benefactor to mankind should be more signally distinguished than it is.

Some strange old notions in natural history were mentioned at the recent meeting of the British Association at Newcastle-upon-Tyne, when the Rev. H. B. Tristram related that the gentlemen of Durham and Northumberland believe that the hedgehog eats the partridge-eggs; and a short time ago when he (Mr. T.) remonstrated with a man for shooting a cuckoo, the defence was that it was well known that sparrow-hawks turn into cuckoos in the summer!

The Abbé Cucherat, in the *Journal de Saone-et-Loire*, describes a discovery recently made about half a league from Razay, Saone-et-Loire, by some workmen who were digging in a field which, only last year, formed part of the neighbouring forest, and was then broken up for the first time At about a foot from the surface, beneath a large Roman tile, were found seven metal dies, such as were used by the Romans for coining. The Abbé describes these dies as of mixed metal:

> Some are in the form of truncated cones 1·77 in. in height, 1·38 in. in diameter at the large end, and ·079 in. at the other, on which the impression is engraved. The smaller dies are of nearly equal size at the two ends, and thickest in the middle. They belong to the reigns of Tiberius, Caligula, and Claudius, and bear respectively the following inscriptions:—Ti. Cæsar Div. Aug. F. Augustus (Tiberius Cæsar, divi Augusti filius, Augustus); C. Cæsar Aug. G. Fra. . . (Caius Cæsar Augustus, Germanicus Fra. . . .); T. C. Cæsar Aug. Romæ Tr. Pot. III. Cos. III. (Tiberius Claudius Cæsar Augustus, Romæ tribunitia potestate functus tertio; consul tertio). There are two dies of Tiberius, but one of them is broken. The three Princes all bear laurels over their diadems. The fifth die represents a goddess seated, with the inscription Juno J . . . placed vertically on the right side. "Two of the dies," says the Abbé, "appear never to have had any inscription, but I believe the head to be that of Augustus. The Emperor is not crowned with laurels, but has the radiated crown with five points reserved for Emperors after their apotheosis. The die for the reverse presents a ram, the emblem of the sacrifices offered to the deified Emperor."

The Abbé does not doubt the authenticity of these dies. It is well known that the Romans coined money during their military expeditions; and the Roman armies, which overran all parts of Gaul before the time of Constantine, in all probability visited the above region.

The hot and thirsty earth and its in-dwellers induce us to ask what becomes of the delicious perry, such as our ancestors had good reason to boast of. It must have greatly declined in quantity as well as quality. In a letter from a subaltern officer of the Earl of Essex's army, dated 1642, we read: "Worcestershire is a pleasant, fruitfull, and rich countrey, aboundinge in corn, woods, pastures, hills, and valleyes, every hedge and heighway beset with fruits, but especially with peares, whereof they make that pleasant drinke called perry, wch they sell for *a penny a quart*, though better than ever you tasted at London."

CHESS.

TO CORRESPONDENTS.

VOLPONE.—You will find the article on "Chess Books borne in the Arms of the Rookwood Family," and many other papers illustrative of the game of Chess, in the *Archæologia*.

EUGENE.—It is true that the treatise on Chess by Greco, and that by Philidor, have passed through more editions than any subsequent work of the kind; but it does not follow that the sale of either has been greater than that of some Chess treatises of our own time.

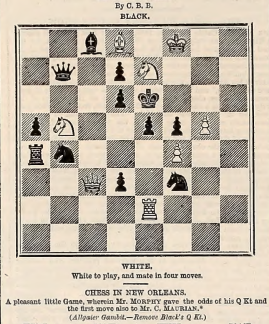
A. C., Cheltenham.—The author of Problem No. 1017 has made no mistake. It is you who are in error. If Black make a Queen at his first move, White obviously takes the Queen with his Bishop, discovering check, and mates next move.

F. R. S.—Mr. Buckle, at one period of his life, was passionately devoted to Chess; but we are not aware that he ever made a collection of his games.

T. R. B.—To say that Damiano took a certain number of problems from Lucena's treatise is not sufficient. The case is this. In Lucena's time the game appears to have been in a transition state, oscillating between the old and the reformed style of play, and, accordingly, some of the problems he introduces are formed upon the principle of the old and some upon that of the new game. In Damiano's day the new game, such as we now play, had nearly superseded the ancient one; and he therefore borrowed from Lucena only those problems which are based upon the modern movements of the pieces. You will find both works in the library of the British Museum.

SOLUTION OF PROBLEM NO. 1018 by Septimus, F. R. S., T. V. K., Omicron, Fidele, S. P. S., Charley, M. P., Felix, Vernon, Q. E. D., Percy, W. M. G., H. S., Miranda, Ernest, B. J., Cora, Old Joe, A Subscriber, T. D., Victoria, Box and Cox, Pip, L. S. D., 1863, Medicus; B., of Malvern; Trio, Hastings; Quidnunc, Milo, A. Z., Alasco, a German, C. M. B., Leon, Max, W. B., Estevan, Boston Stump, Lionel, St. Omer, Philo S.; D., of Liverpool; Histrion, Sigma, R. B., Saxon, H. W. C., G. M., Norman, Query, S. R. D., Kenneth, T. A., Garryowen, Stella, R. O. B., Nemo, A Student, F. A. S., Elene, Dux, T. G. K., F. N., G. W., Hermes, Matador; I. F., Paris; Wilmington, D. M., Rook, Gorilla, I. H. B., X. Y. Z., T. S., Laura, I. G. A., Delaware, H. K., Adelphi, T. G. S., F. P., Le Comte de V., T. Peters, Iota, Robin Hood, J. M., E. C. E.; S., Kensington; L. N., A Clerk, G. B. G., C. B., Violet, A Forester, Marcus, Stanley, Rex, Clericus, Delta, Fergus, R. A., L. H. B., Œdipus; C. D., of Bruges; G. Nithdale, A Rifleman are correct. All others are wrong.

SOLUTION OF PROBLEM NO. 1019.



WHITE.	BLACK.
1. R takes P (ch)	K takes R (best)
2. Kt to Q 4th	K takes Kt

WHITE.	BLACK.
(If any other move, then White plays 3. Q to Q B 3rd, or Q to Q Kt 3rd. Mate.)	
3. Q to Q 5th. Mate.	

PROBLEM NO. 1020.

By C. B. B.

BLACK.

WHITE.

White to play, and mate in four moves.

CHESS IN NEW ORLEANS.

A pleasant little Game, wherein Mr. MORPHY gave the odds of his Q Kt and the first move also to Mr. C. MAURIAN.*

(Allgaier Gambit.—Remove Black's Q Kt.)

WHITE (Mr. MAURIAN.)	BLACK (Mr. MORPHY.)
1. P to K 4th	P to K 4th
2. P to K B 4th	P takes P
3. Kt to K B 3rd	P to K Kt 4th
4. P to K R 4th	P to K Kt 5th
5. Kt to K 5th	Kt to K B 3rd
6. B to Q B 4th	P to Q 4th
7 B takes P	
(The usual move is P takes P, to which the second player replies with B to Q 3rd.)	
7.	Kt takes B
8. P takes Kt	P to K B 6th
(B to K 2nd is perhaps a better line of play at this juncture.)	
9. Castles	Q takes K R P
10. P to Q 4th	P to K B 7th (ch)
(Very ingenious. If he had advanced the *K Kt Pawn* first, White would have captured this Pawn and have escaped without damage.)	
11. R takes P	P to K Kt 6th
12. R to K B 4th	Q to K R 7th (ch)
13. K to B sq	Q to K R 8th (ch)
14. K to K 2nd	Q takes P (ch)
15. K to Q 3rd	Q to K R 6th
16. Q to K sq	
(Well conceived; threatening a terrible "check by discovery," and thus preventing Black from opening a similar check by the advance of his K Kt Pawn.)	
16.	B to K B 4th (ch)
17. K to Q B 4th	Castles
18. Q to Q R 5th	P to Q R 3rd
19. Kt to Q B 3rd	B takes Q B P
20. R takes K B P	
(P to Q B 4th, with the view of afterwards playing Kt to Q Kt 5th, appears to be preferable.)	
20.	B to Q 3rd
21. Kt to Q Kt 5th	
(He ought first to have played the Pawn to Q R 4th.)	
21.	P takes Kt (ch)
22. K takes P	
(The correct move seems to be K to Q B 3rd. After that, we do not see how Black would have saved the game.)	
22.	K to Q Kt sq
23. B to K Kt 5th	B takes Kt
24. B takes R	R takes B
25. Q to Q B 3rd	R takes Q P (ch)
26. K to Q B 4th	R takes Q P (ch)
27. Q takes R	Q to K 3rd (ch)
28. Q to Q 5th	B to Q 6th (ch)

And Black won the game.

* These odds were soon found to be too heavy, and latterly Mr. Morphy could only give the Knight, reserving the first move to himself.

CHESS AT BRIGHTON.

A stubborn Contest between Mr. STAUNTON and the late Dr. TURNER, the former giving the odds of his Q Kt.

(Evans's Gambit.—Remove Black's Q Kt from the Board.)

BLACK (Mr. S.)	WHITE (Dr. T.)
1. P to K 4th	P to K 4th
2. Kt to K B 3rd	Kt to Q B 3rd
3. B to Q B 4th	B to Q B 4th
4. P to Q Kt 4th	B takes Kt P
5. P to Q B 3rd	B to Q R 4th
6. Castles	P to Q 3rd
7. Q to Q Kt 3rd	Kt to K R 3rd
(This looks hazardous, but it may be ventured when the other side gives such large odds as a Kt.)	
8. P to Q 4th	Castles
9. B to K Kt 5th	Q to K sq
10. Q R to Q sq	B to Q Kt 3rd
11. B takes Kt	P takes B
12. Q to Q Kt sq	
(With the object, apparently, of playing her to Q B sq.)	
12.	B to K Kt 5th
13. Q R to Q 3rd	K to R sq
14. Q to Q B sq	P to K B 4th
(An excellent stroke of play.)	
15. K P takes P	P to K 5th
16. R to K sq	R takes P
17. Kt to Q 2nd	P to Q 4th
18. R to K Kt 3rd	Kt to K 4th
(The position is complicated, and demands the nicest attention.)	
19. B takes Q P	Kt to Q 6th
20. R takes Kt	R takes B
21. K R takes K P	Q to Q 2nd
22. Q R to K 3rd	B to K R 4th
(An admirable move, and one which effectually frustrates Black's designs.)	
23. R to K 7th	Q to Q sq
24. Q to K sq	P to Q B 4th
(Again White plays with singular foresight and discretion.)	
25. Q R to K 5th	P takes Q P
26. Q to K 4th	
(Here Black's attack seems overwhelming, and it must have proved so, but that White's precaution in retreating his Bishop to the K R 4th now enables him to bring that piece to the rescue.)	
26.	B to K Kt 3rd
27. Q to K B 3rd	
(This is not so good, perhaps, as taking the Rook with Queen; but, in any case, White has the best of the battle. For example, suppose—	
27. Q takes R	Q takes Q
28. R takes Q	P takes Q B P
29 Kt to Q Kt 3rd	R to K B sq,
and White should win.)	
27.	Q to K B sq
28. Q takes R	P takes P
29. R to K 3rd	
(He might have prolonged the game by playing Kt to K B 3rd, but no move would have saved it.)	
29.	B takes R
30. Q to K 5th (ch)	K to Kt sq
31. Q takes B	P takes Kt
32. R to Q 7th	Q to K B 3rd
33. Q takes Q P	Q to Q R 8th (ch)
34. Q to Q sq	Q takes Q (ch), and wins.

CHESS ENIGMAS.

No. 1349.—By Mr. SCHULTZ.

White: K at Q R 5th, Q at K Kt 4th, R at K B 5th, B at K Kt sq, Kt at Q B 4th.
Black: K at Q 4th, R at K R 8th, B at K R sq, Kt at Q R 5th; Ps at K Kt 6th, K 4th, and Q Kt 2nd.

White to play, and give mate in four moves.

No. 1350.—By Mr. C. BAYER. (*La Régence.*)

White: K at K B 2nd, Q at Q 2nd, Rs at K R sq and K Kt 5th, B at Q 5th, Ps at K Kt 2nd and K 7th.
Black: K at K B 3rd, Rs at K sq and Q Kt 2nd, B at K B sq, Kts at K R sq and Q B 2nd; Ps at K R 4th, K 4th, Q B 5th, Q Kt 6th, and Q R 5th.

White, playing first, to mate in five moves.

SCIENTIFIC NEWS.

THE CULTIVATION OF NEW SILKWORMS IN FRANCE.—The director of the Zoological Garden of Acclimatisation at Paris, M. Rufz de Lavison, has reported to the Academy of Sciences the results of the cultivation of the eggs of the Japanese silkworm, which feeds on the oak, and is termed Yama-maï, or worm of the mountain. The newly-hatched worms were fed on the common oak (Quercus pedunculata) which grows in the Bois de Boulogne. The five grammes of eggs (sent by M. Eugène Simon) produced eighty-three worms, from which seventy-seven cocoons were obtained. The worms began to spin on June 1, and finished on June 25. Twelve cocoons produced two grammes of silk, which were laid before the members of the Academy. The cocoons wind off with as much facility as those formed by the mulberry silkworm, and yield about the same quantity. Twelve or fourteen kilogrammes of cocoons give one kilogramme of silk (about 2lb. 3oz.) The silk is much stronger than the ordinary silk, but rather less brillant. We learn that energetic measures are being taken for the extended propagation of the new silkworm.

THE SHOOTING STARS OF AUGUST, 1863.—M. Coulvier-Gravier has laid before the French Academy of Sciences his annual report on these meteoric phenomena. The results of the examination of his table show that, setting out with two observations on the 17th and 19th of July last, there were, for the mean hourly number at midnight, with a clear sky, only 7·3 stars. Afterwards, taking the mean of three observations, we have, for July 22, 26, 27, 10·3 stars; for Aug. 3, 4, 5, 20·4 stars; for Aug. 6, 7, 8, 24·1 stars. The numbers for Aug. 9 were 30·5; for Aug. 10, 121·2; for Aug. 11, 48·6; for Aug. 12, 46·1; for Aug. 13, 38·2; and for Aug. 14 only 20·8. In August, 1861, M. Coulvier-Gravier drew the attention of the Academy to the fact that the year 1858 marked the term of the descending march of the phenomenon since the epoch of its greatest height,—the year 1848 when the mean hourly number for Aug. 9, 10, 11 was 110 shooting stars. In 1858 the number had descended to 39·3; in 1863 it has risen to 66·7, an increase of 27·4 stars. "We may now," says M. Coulvier-Gravier, "hope for the re-appearance of these phenomena of August in all their magnificence."

COMPOUNDS OF THALLIUM POISONOUS.—M. Lamy a short time ago informed the Academy of Sciences of certain injurious consequences which he experienced after working on compounds of the new metal—extreme lassitude and pains in the lower extremities. Since then he has administered a compound of the metal to eleven animals—two fowls, six ducks, two young dogs, and a bitch of middling size succumbed to the action of five grammes of sulphate of thallium. A fowl languished three days under the effect of the poison. When then killed M. Lamy was able to affirm the presence of the thallium in the intestines in very small quantity; but no traces were found in the other organs. In order to be still further convinced of the energy of the poison he gave one decigramme only of the sulphate to a young dog, which died forty hours after taking the poison. Bearing in mind that thallium itself was discovered by means of the spectrum analysis, it becomes sufficiently obvious that this method may eventually become extremely valuable, both in physiology and in medical jurisprudence.

NO SPONTANEOUS GENERATION.—M. Donné has reported to the French Academy of Sciences a series of experiments on eggs, some being exposed to the action of the atmosphere, others protected from it. In the uncovered eggs, at the end of eight days, a powerful microscope revealed the growth of numerous filaments of penicillium, accompanied, when the weather was warm, by a kind of compound fructification of yellow bodies, accompanied by other changes. The protected eggs remained perfectly unaltered for weeks, but when once the eggs were brought into free contact with the air decomposition proceeded with great rapidity, with its usual accompaniment of infusorial and misroscopic beings. M. Donné gives many details which prove the absolute necessity of the intervention of the germs present in the atmosphere in order to give birth to these minute beings.

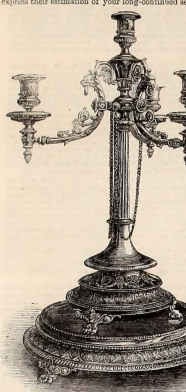
THE WHITE-WHISKERED LEMUR (L. Leuco mystax), a female specimen of which is now in the Zoological Gardens, Regent's Park, is described by Mr. A. D. Bartlett, in a note in the *Annals of Natural History*. After careful comparison, he feels satisfied that this lemur belongs to a new species. In size it nearly equals the ruffed lemur (L. Macaco), which it also much resembles in form and habits. Mr. Bartlett gave it its name from its long and perfectly white whiskers, in which its ears are almost entirely concealed; the face is greyish black, darkest on the nose and back part of the head; the feet are brown, inclining to black on the toes; the prevailing colour of the body, limbs, and tail is reddish-brown, on a grey ground. At the base of the tail is a white patch; the tail is lighter in colour than the body, the under side and tip nearly white; the belly is greyish white; the eyes are yellow-brown. The voice is a kind of hoarse, croaking bark, rapidly and frequently repeated. Probably the male produces a louder and more powerful note. The ruffed lemur utters a very unpleasant series of loud, grunting, grating barks, sufficient to alarm a nervous traveller, should he be in the forests at dark and unacquainted with the size and nature of the animal producing these loud and dismal sounds. The white-whiskered lemur was purchased for the Zoological Society from a dealer in Liverpool, in October, 1861. He stated that the natives of Madagascar, from whom he obtained it, said that it was of a very rare kind, and had been kept as a pet upwards of two years.

THE RADIATION AND ABSORPTION OF HEAT BY GASES in relation to their spectra has been examined by Mr. Balfour Stewart, of the Kew Observatory, who has communicated a note on the subject to the *Philosophical Magazine*. After considering how atmospheric air is situated with respect to an arrangement in which the source of heat is boiling water, and the temperature of the thermo-pile 60 deg. Fahr., and in which the vacuum-tube is closed with plates of rock-salt, while it is presumed that there is absolutely no atmospheric air in the arrangement except that which is the subject of experiments, he says:—"1. If it be supposed that the heat which atmospheric air radiates and absorbs is that of a very low refrangibility, it is evident that the total radiation and absorption of such air will be less increased by raising the temperature from 60 deg. Fahr. to 212 deg. Fahr. than those of another gas which radiates heat of a high refrangibility; the reason of this being that the rays between 60 deg. Fahr. and 212 deg. Fahr. are of a comparatively high refrangibility, and that atmospheric air radiates and absorbs these only to a small extent. 2. Moreover, part of the radiant heat is stopped by the plate of rock-salt; but it is possible that many of the rays which rock-salt stops are those which are also stopped by atmospheric air. The rock-salt would, therefore, in this case sift the radiant heat, and reduce it to that quality which is passed without absorption by atmospheric air." Mr. Stewart thinks that this arrangement is unfavourable for exhibiting the absorptive power of atmospheric air, the effect being apparently to diminish this property of air; but that this arrangement will apparently increase the radiation of aqueous vapour, and also of many of those vapours which possess high boiling points. Owing to these and other considerations, he hesitates to conclude that the results hitherto obtained regarding the radiative and absorptive powers of gases and vapours afford ground for that hypothesis which asserts that the absorptive and radiative powers of simple bodies are less than the corresponding qualities of compound bodies. But, inasmuch as aqueous vapour would appear to absorb a different description of heat from atmospheric air, the very important meteorological conclusion deduced by Professor Tyndall would still appear to hold good on the present hypothesis; that is to say, air with vapour will probably stop more of the heat radiated by the earth than air without vapour. It is even possible that there may be an additional safeguard against the cooling of our globe by radiation into space, in the fact that when the temperature falls very low, and there is scarcely any vapour in the air, the heat radiated is then of a description which is stopped by dry air; which would thus serve as a cloak or covering, performing the same office as that which is performed at a higher temperature by air loaded with aqueous vapour.

Mr. George Peabody has endowed Yale College, United States, with a new geological cabinet, at a cost of £25,000.

The Hansa, which left Southampton on Thursday week with the American mails, took out 6000 packages of tea to New York, each package weighing 40 lb.

Mr. William Coningham, writing to one of the papers, says that Sir Fitzroy Kelly has undertaken to prepare a petition from Mrs. Ryves—a claimant to royalty—to the Home Secretary, calling attention to the hardship of her case, and to the justness of a portion, at least, of her claims.



The Queen has approved of Mr. J. H. Sherman as Consul at Prince Edward Island for the United States of America; and of M. Orazio le Boutillier as Consul for the district of Gaspé, and the provinces of New Brunswick, Nova Scotia, Prince Edward Island, and Newfoundland (to reside at Gaspé Basin), for his Majesty the King of Italy.

In the year 1700 mails were only made up in the General Post Office thrice weekly for England, Scotland, Germany, Sweden, and Denmark; and twice weekly for Ireland, France, Spain, and Italy. Eighty clerks were employed in the General Post Office, and there were only 230 post towns in the United Kingdom. The postal revenue was between £40,000 and £50,000 a year. In the foreign branch of the General Post Office there was a comptroller at £150 a year, a chief clerk at £100, and eight others at £50 a year each.

The forthcoming horse-races at Constantinople, under the immediate patronage of the Sultan, is likely, says the *Levant Herald*, to be one of the most interesting spectacles of the kind witnessed in that capital for many years past, since it is his Majesty's desire that no effort shall be spared to make the occasion a perfect success. The first preliminary meeting to carry out the necessary arrangements was held on the 25th of August, and later in the day a careful survey of the proposed course, at the Sweet Waters of Europe, was made by the chairman of the committee, Serfer Pacha, Messrs. R. T. Buck, and A. Ivannoff, the hon. secretary. The ground appears to have been admirably chosen, a level valley of sufficient range, encircled by gently rising ground, affording ample accommodation for spectators to command a perfect view of the running. At a comparatively trifling expense, the course may be railed off and stands placed; but, as the meeting is to be a special "Imperial" one, that will be a minor consideration. The selection of the Sweet Waters is also well judged, from the valley possessing the great advantage of being easy of access from town both by land and water.

TESTIMONIAL TO MR. SPENCER WELLS.

LAST month a handsome silver candelabrum, valued at £114, was presented to Mr. Spencer Wells at a meeting attended by a considerable number of the contributors to the testimonial. The following address, written by Dr. Conolly, was read :—"The friends who have the pleasure to present the accompanying testimonial to you are influenced not only by sincere personal regard, but by a desire to express their estimation of your long-continued services in the editor-

TESTIMONIAL TO SPENCER WELLS, ESQ.

ship of the *Medical Times and Gazette*. They are strongly impressed with a sense of the importance of the duties of an editor of a medical journal, and of the influence of the periodical press on the medical profession in general. The judicious and impartial selection of facts and observations, from whatever honourable quarter proceeding, the liberal appreciation of the literary efforts of medical writers, the direction of the public mind on questions interesting in regard to the public health, or in relation to medical jurisprudence, and the promotion of the general interests of the medical profession, and of good and kind feelings among its members, are among the objects requiring the constant and vigilant attention of an editor, and their performance demands high qualifications of intellect, and a disposition to promote whatever is true and whatever is useful. His duty scarcely less requires a courageous determination to discountenance whatever is mean, and pretentious, and valueless. We are convinced that views of this character have animated you throughout your editorial labours; and it affords us much gratification thus to record the expression of our respect, and express our continued good wishes for your professional success and your happiness."

Mr. Wells, in reply, said that when he heard, soon after his retirement from the editorship of the *Medical Times and Gazette*, that some of his friends wished to present him with some testimonial of their regard, he was naturally very much gratified, but he expressed his strong desire that the testimonial should be in no respect a public one. He knew that the practice of presenting public testimonials to private persons had become absurdly common during the last few years. He thought that expressions of public gratitude should be reserved for great public benefactors; but he also felt that if gentlemen who had been associated with him as contributors to the journal which he had edited for more than seven years were kind enough to present him with some permanent record of their regard, he might accept their goodwill offering, not only without impropriety but with pride and great satisfaction. And when he found that 110 gentlemen, not one of whom had been asked, and without the publication of a single advertisement, but simply on receiving from one or two of his friends an intimation that there was an opportunity of joining in it if they wished to do so—gentlemen holding the very highest rank in the profession—had contributed, he felt that such a testimonial from such men was indeed to be prized and handed down to his children as a most honourable heirloom. The value of the gift was greatly increased by the address which accompanied it—and the value of the address was very greatly increased by the fact that it was written by one so much loved and revered by his brethren as his kind friend Dr. Conolly. Mr. Wells also expressed the hope that this would not be the last testimonial to a medical editor. Few who had not tried had any idea of the amount of labour and anxiety involved in the literary management of a weekly journal; yet there was no labour so generally ill-rewarded, or so often followed by the reverse of reward. If none such tokens of approval were a little more frequent there would be more encouragement for men of ability and high character to undertake the heavy responsibilities and anxious cares of journalism.

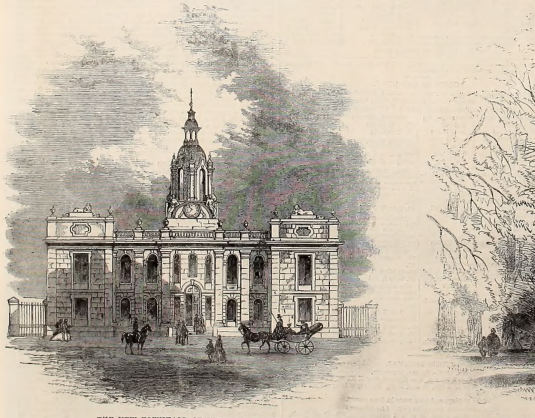
On the base of the candelabrum is the following inscription :—"Presented to Thomas Spencer Wells, F.R.C.S., by 110 contributors and subscribers to the *Medical Times and Gazette*, on his retirement from the editorship, 1862, as a testimony of their estimation of his services to medical science, and of his honourable character."

THE GREAT KILKENNY CATTLE SHOW.

THE National Cattle Show for 1863, recently held with such success at Kilkenny, was duly opened on Wednesday, the 26th ult., by the Lord Lieutenant of Ireland. His Excellency's carriage arrived at the gate of the showyard shortly after two o'clock, and, driving up to the central flagstaff, in the midst of the great avenue dividing the temporary buildings, the members of the council and local committee received his Excellency, the band of the 86th Regiment playing "God Save the Queen," and the assembled visitors, a vast concourse of gentlemen and ladies, cheering loudly. We give an Illustration of the lively scene from a sketch taken at this moment, from the prison gate tower, by E. Fitzpatrick, A.R.H.A. The ceremonial of the Lord Lieutenant's reception being over at the central flagstaff, and his Excellency having exchanged greetings and congratulations with the members of the council and committee on the admirable effect of the exhibition and the obvious success of the Kilkenny meeting, he proceeded to make a general survey of the showyard, passing from class to class, and evidently taking a warm interest in everything he saw.

Owing to the admirable way in which the buildings were arranged overcrowding was avoided, and every possible accommodation was afforded to the animals, to the exhibitors, and to the public; the showyard, indeed, was pronounced by competent judges to surpass in its arrangements anything seen before, even at the metropolitan exhibitions. The display of machinery as visitors entered also had a very striking effect, and the broad banners which hung out in every direction from tall flagstaffs gave the coup-d'œil a most brilliant and imposing aspect.

"The best general view of the showyard," says the *Kilkenny Moderator*, "was to be obtained from the tower over the gateway of the county gaol. Standing in this elevated position, and looking down on the gay and animated scene below, the beholder soon forgot the unpleasant associations connected with his vantage-post—the platform connected with the 'drop' for the execution of criminals—in the deep interest of the living picture before him. It would have been impossible, without gaining this elevation, to form an idea of the great beauty and picturesque outline of the locality selected for the erection of the showyard buildings. Those buildings, with their gay and fluttering flags, and the varying throngs of visitants engaged in inspecting their contents, of course formed the main objects of the foreground of the picture, which showed behind a most striking background consisting of a fertile and splendidly-undulating country, rich and mellow with magnificent and hope-inspiring tints of a plenteous harvest. But nearer, along the whole length of the background, stretched the buildings of the city, occupying the summit of an elevated ridge, which was bounded to the extreme right by the crenelated parapets of Kilkenny Castle; and on the left by the grey round tower and belfry of the Cathedral of St. Canice, with here and there in the space between the towers and spires of various buildings, such as the venerable, battlemented summits of the Dominican and Franciscan Abbeys, the finial of St. Mary's Church, the Tholsel cupola, &c., shooting up into the azure sky and breaking the uniformity of the masses of buildings that crowd about their bases; whilst as a central striking object rising above the showyard, in the midst of the scenes, and conspicuous above all, is the tall tower of the Roman Catholic Cathedral, serving as the spar that gives to the picture that pyramidal effect which forms in the artist's eye the *sine qua non* of perfect grouping. And here, on the platform of the



THE PALMERSTON CUP, SHOT FOR THIS WEEK BY THE MARGATE RIFLE VOLUNTEERS.—SEE PAGE 262.

prison gate tower, the Artist of the ILLUSTRATED LONDON NEWS had ensconced himself in a convenient angle of the parapet, and was transferring to paper the outlines of the scene of which we have attempted a feeble description."

THE NEW TOWNHALL AT INVERURY.

THIS building, in the Italian style, after a design by Mr. J. R. Mackenzie, architect, Aberdeen, the foundation-stone of which was laid a year ago, has been formally opened by a banquet given by the magistrates and town council, followed by a public dinner and ball in the evening. The front, which is in the Italian style, is of dressed granite. The dimensions of the building, externally, are 89 ft. by 63 ft.; the height being 48 ft. to the base of the spire, or 88 ft. to its top. A female figure reclines on each side of the clock, while the wings are relieved by lions couchant. The door in the centre leads into an entrance-hall about 12 ft. square, and a stone staircase leading to the second floor. The council chamber, committee-room, town-clerk's room, record-room, &c., are towards the front; while towards the back are the corn-market hall, &c., on the ground floor, and the townhall proper, &c., on the second floor. The corn-market hall is 27 ft. by about 28 ft., and has writing-offices, &c., for the transaction of business. The Townhall is 55 ft. by 28 ft., having a height of 22 ft. The entire cost of the building will be about £3000.

THE NEW TOWNHALL OF INVERURY, SCOTLAND.

HERNE'S OAK, HOME PARK, WINDSOR.—SEE "COLUMN FOR THE CURIOUS," PAGE 275.

LONDON: Printed and Published at the Office, 198, Strand, in the Parish of St. Clement Danes, in the County of Middlesex, by GEORGE C. LEIGHTON, 198, Strand, aforesaid.—SATURDAY, SEPTEMBER 12, 1863.

THE ILLUSTRATED LONDON NEWS.

No. 1222.—VOL. XLIII. SATURDAY, SEPTEMBER 19, 1863. WITH A SUPPLEMENT, FIVEPENCE

PEOPLE'S PARKS AND PEOPLE'S HOLIDAYS.

Now that the Americans have taken to that which used to be proverbially designated as the pastime of Kings, England may be accepted as the hardest working nation in the world. With us labour often seems to be undertaken as much for itself as for its rewards; and there are few amongst us who would not esteem a decree which sentenced us to have nothing to do as involving a refinement of punishment. Even the idlers by profession, the votaries of fashion, the devotees of amusement, and the seekers after new pleasures are not exempt from a certain amount of toil. As to the great manufacturers and traders, the successful lawyers, and all those who attain to the aristocracy of wealth, they are to be classed amongst the labourers proper, and are as much the slaves of work as the merest breadwinner in the humblest rank; whilst, as regards the members of that fraternity which

FRESCO IN THE PALACE OF WESTMINSTER, "JANE LANE ASSISTING CHARLES II. TO ESCAPE AFTER THE BATTLE OF WORCESTER," PAINTED BY E. M. WARD, R.A.—SEE PAGE 294.

exercises its talents in the cultivation of the science of appropriation of other people's goods, whether they belong to the ranks of the bookmaking turfites, the systematic swindlers, or the direct transgressors against the eighth commandment, in all their various gradations and phases, it may be well taken that they, so far from being gentlemen at ease, are the hardest workers of all. It can only be the fact that great work in great places is great pleasure, which gives us Ministers of State and members of Parliament, as a body, the energy which might be supposed to be independent of labour. In short, voluntarily or involuntarily, idleness, in the sense in which a sybarite would construe the term, is practically unknown in this country.

This being so, from the very necessity of the case we recognise the principle of holidays, although it may well be asserted that we carry that principle out into practice in all cases upon a somewhat unsatisfactory system; and, in reference to the whole population, very partially and inadequately.

It is the custom of the privileged classes, who, having the arrangement of the business of the country pretty much under their own direction, order also the periods of relaxation, to crowd the work of the year into ten months, and to throw off labour and all its associations wholly for the other two. In that interim strenuous efforts are made to oxygenate those physical systems which have been for so long deprived of their due share of the first accessory to health, and to give rest to brains and muscles which have been subjected to incessant strain from November to September. The advantage of this habit is undeniable, but the question is whether it is in exact conformity with the principle which every one recognises—that holidays are necessary for the wellbeing of every member of the community, and that it is nothing less than a duty to observe them at stated and proper times. It is by no means clear that a system of more moderate work, spread over a larger space of time, and frequently interspersed with brief holidays, would not operate at once more advantageously to the worker, and eventuate in getting work better done. In some of the reports of the Inspector of National Schools it has been stated that scholars who attend three hours a day are generally, if not always, quicker at learning than those remaining for a whole day who attend six. The philosophical deduction from this fact is obvious, and we commend it to those who, because they work in more or less high places, are not strictly included in the generic term labourers.

But the subject of needful relaxation and recreation, in its national sense, has a much wider scope than that in which we hitherto treated it. It is necessary to consider the question in its direct relation to the millions who must toil six days in every week in every month of the year, and to whom autumn is the sole season for rest, and for whom there is no change in winter and spring, so far as their way of life is concerned; to whom a day's repose represents so much immediate money loss, and who, if they are prudent enough to eschew the worship of St. Monday, know of no real holidays but Christmas Day and Easter and Whit Monday. Here is a branch of the social problem more difficult of solution than that which involves the affording of more holidays to the working classes without at the same time diminishing their means of subsistence. The Saturday half-holiday, if it has not exactly become an institution in this country, has been established to a very general extent; but we have never yet been able to ascertain whether even this has not been achieved solely at the expense of the worker. The relations between employer and employed are so peculiar and so delicate that it is hardly possible to interfere with them without affecting, in a degree, the material interests of the latter; and we confess to a hopelessness of any arrangement which will, without any pecuniary sacrifice on his part, guarantee to the working man any increase to his holiday proper.

This being so, the next best thing to do is to afford to the operatives of great cities, of whom alone we now speak, the means of availing themselves of such after-work hours as they now possess, and giving to them the pleasant advantages of air and space for locomotion beneath the shade of trees, by the margin of flowing waters, and on the soft sward of green grass. In short, without further circumlocution, let there be no people's town or district without its people's park. Happily this idea has been recognised, and is in process of being carried out. In London, though all the parks are open to the public, in the strictest sense of the word, yet the real people's park is the one which hitherto, in the variety of its features and in all its arrangements, may be held to be the best, and that is Victoria Park. The success of this well-ordered "pleasance" in the vicinity of a densely-populated neighbourhood is a continuous argument in favour of a park for Finsbury, and, that once established, the system for London would be almost complete. The public spirit of corporations or the munificence of individuals has gone far to supply this desideratum to many of the cities of our manufacturing industry. Manchester has its Peel Park, Birmingham its Aston Park, Halifax its People's Park, and last week witnessed the inauguration of another of these boons to the labouring community at Dundee. The feeling which induced one of the manufacturer-princes of that city to devote a portion of that wealth which was gained for him by the skill and labour of his humbler townsmen to the establishment of a park for their recreation and enjoyment is, of course, most creditable to him; but it also augurs a spirit and a course of conduct on the part of the operatives of the town which is equally creditable to them. It speaks of sympathetic relations between the donor and the donees in the past, and is a guarantee for the continuance of good feeling between them in the future. Sir David Baxter has followed in the steps of other eminent benefactors to their native towns, such as Sir Francis Crossley, at Halifax, in this matter of people's parks; and it is to be hoped that such a mode of contributing to the common weal, which is at once graceful, comprehensive, and enduring, will be adopted by others who entertain a laudable desire to go down to posterity as contributors to the public good. To place the means of healthful and simple enjoyment within the immediate reach of toiling thousands is going far towards the increase of the people's holidays.

FOREIGN AND COLONIAL NEWS.

FRANCE.

M. de Persigny has been created a Duke, in testimon y of "regard for the services he has rendered to the State, and for his personal devotion to the Emperor." His title is to be Duc de Persigny.

The Duc de Montebello, French Ambassador at St. Petersburg, has received permission, on his own request, to stay two months in France, where care for the health of the Duchess requires his residence. The leave of absence for the Duke will coincide with the stay of the Emperor Alexander in the Crimea and at Moscow.

Lord Cowley, our Ambassador, left Paris on leave of absence yesterday week.

An Imperial decree appoints M. Rouher, Minister-President of the Council of State, to be Minister of the Interior, M. Baroche, Minister of Justice, and M. Fould, Minister of Finance.

The *Moniteur* gave a sign of political life on Wednesday by informing the public that the Florida, Confederate steamer repairing in Brest Harbour, is not a privateer, but an ordinary vessel of war belonging to the military marine of the Confederate States. This official declaration of the Florida as a man-of-war will relieve her commander from any embarrassment which might have been caused by such assistance as the Duke will consider necessary for a vessel belonging to a foreign Government is exempt from seizure, although privateers may be subjected to it.

The Commission for observing naval mems :—"The iron-clad frigate Magenta has terminated her experimental trips at Brest in presence of the commission presided over by Commander Dupuy de Lôme, and they have been completely successful. On the 9th she took on board 300 seamen and officers, and went into the roadstead. On the following days she left for Toulon, to take part in the naval manœuvres which are to take place there. The Magenta is, like the Solferino, armed with a spur, and great interest consequently attaches to the manœuvres she will go through." The committee appointed to report on the experimental trip of the Gloire at Cherbourg consists of Admiral Penaud, M. Dupuy de Lôme, Rear-Admiral Labrousse, M. Piron eau, Post-Captains Chevalier and Bourgeois, and M. de Robert, Engineer-in-Chief.

The Annamite Ambassadors have arrived in Paris. They have commenced their ceremonial visits. The Emperor will receive them early in October. They are the objects of great curiosity to the Parisians. Their appearance, we are told, is far from being prepossessing, and consequently they must be very ugly indeed.

Accounts from the south state that the landed proprietors, who suffered severely from the oidium, or vine disease, a few years since, are now visited with a new scourge. The olive-trees present all the appearance of having been blighted. The evil will greatly diminish the crops of olives. The trees are covered with a black dust like powdered charcoal. Old trees are more particularly attacked, and those planted in warm situations. The cause of the disease is ascribed by authorities to an insect of the family of the cochineal, covered with a black shell, and the eggs of which are hardly noticeable.

Hop-picking has commenced in the north and east; the crop is small, though of good quality.

The Exhibition of Works of Industrie was again opened to the public for the exhibition of manufactured articles from Paris and the departments.

The corner-stone of the American Episcopal Church of the Holy Trinity, in the Rue Bayard, Paris, was laid with appropriate ceremonies at noon on Saturday last. The building is to open with an antique vase. The light springs from an imitation candle, and at the top is a white porcelain reflector. These lamps give a much more economical light than the old-fashioned ones.

The inauguration of the railway from Lorient to Quimper took place on the 9th, and the latter town has thus become the head of the Orleans line.

BELGIUM.

The International Social Science Congress was opened on Monday in the Academic hall of the University at Ghent in the midst of great éclat. The president of the congress is M. Vervoort.

The Queen of the Belgians, Marie Henriette, was inaugurated at Ghent by the King of the Belgians, who was accompanied by the Duke and Duchess of Brabant, and the Count and Countess of Flanders, in presence of an immense and enthusiastic multitude. At the close of the ceremony a banquet of 250 covers took place in the ballroom of the Grand Théâtre, which is now the property of the Belgian Government, who rose and said :—"Gentlemen,—In the name of the city of Ghent, I have the honour to propose a toast to our beloved King, whom Belgium adores and Europe venerates."

His Majesty replied as follows :—

"I thank you for the cordial reception you have given to the toast proposed to me by the Burgomaster. I am happy to find myself again amongst you. Ghent, a city which possesses a municipal law such as I have been moved by the patience and constancy with which the Burgomaster has explained its provisions to me, is a city of progress beyond our control. It is known to you that for thirty years Belgium has enjoyed the blessings of the Government of representative men. We have to-day paid honour to the memory of an energetic man, who at an early age, full of confidence in the future, has given proof of his political conscience. These facts belong to far distant centuries, but the independence of peoples has always found a voice and intelligent hearts that in no good country neither valour nor intelligence will ever be wanting; and so we shall secure for ourselves a long future of peace and prosperity."

DENMARK AND GERMANY.

L'Europe, of Frankfort, publishes the following :—"We have just learnt that the federal execution against Denmark is determined upon. Holstein is to be occupied by the Saxon and Hanoverian troops. The strength of the corps of occupation is not known to us. We can also announce, on the subject of the arrangements entered into between Prussia and Austria, that the Government of Berlin, in the discussion of the grave decision come to by the Germanic Confederation, has concentrated an army of from 15,000 to 20,000 in that part of Swedish facing Copenhagen. This Swedish corps d'armée will pass over to Denmark as soon as Holstein is occupied by the German troops."

The new Diet of Holstein met in Copenhagen on Wednesday morning on Thursday. He is about to pay a round of visits to European Courts to announce his accession to the throne. The new sovereign proposes that the agreement relating to the succession to the Danish throne on London, shall be signed by himself, King George of Greece, and by the succession in favour of his younger brother and his heirs. King George himself and his own line then become last in order of succession to the Danish crown.

PRUSSIA.

His Majesty, after a moving interview with the Crown Princess, rested a few hours, and then took his son and daughter, the Prince and 8th Princess Victoria rode with her venerable wife to review troops, visiting the Arsenal and the new barracks in Moabit.

On Saturday the King arrived at Gueldern, a town of Rhenish Prussia, in order to celebrate the 150th anniversary of the day on which the southern or Spanish division of this territory came under Prussian dominion, which event occurred in 1713, when the country was given by the Congress of Utrecht to Frederick William I., King of Prussia, in compensation for his claim on the principality of Orange. His Majesty was not received with much warmth.

The Statistical Congress at Berlin has completed its labors.

In view of the coming general election, a letter from Count Schwerin, one of the ex-Ministers, has been published, in which he takes upon himself to direct the electors that, however unanimous all parties in Prussia may be in favouring the Austrian project of federal reform, this question must not be taken into consideration. "Only the Constitution and internal organization of the country can influence the mutual position of parties towards each other and towards the Government at the approaching elections."

THE POLISH QUESTION.

The replies of Russia to the notes of the Western Powers were delivered on Monday to the respective Governments.

The reply to the French note, we are told, is conceived in even more courteous terms than the previous ones, and expresses sentiments favourable to the good relations existing between France and Russia. Prince Gortschakoff concludes his despatch in a manner which precludes any allusion to the early resumption of the discussion between Russia and the three Powers. It is believed that the despatch in no way contains the initiation of others.

The reply of Prince Gortschakoff to the Austrian note on the Polish question is less favourable than that a more detailed memorandum will follow. Prince Gortschakoff considers the 10 points to have been settled by the previous declaration of Russia. He gratefully acknowledges the friendly sentiments displayed in the Austrian note, and shares Austria's wishes for the welfare of Poland. Prince Gortschakoff regrets, however, that the expressions used in the diplomatic discussions and their results had not been fulfilled, and that the differences of opinion had not been removed. Prince Gortschakoff thinks, therefore, that a further prolongation of these discussions appears superfluous. He finally states that Russia assumes the full responsibility of her acts.

The despatch of Earl Russell to the Russian Government (in reply to which Prince Gortschakoff's letter has arrived) was published in Tuesday's *Gazette*. Earl Russell repudiates the assertion of the Russian Vice-Chancellor that the Polish insurrection mainly derives its strength from foreign support, briefly recapitulates the arguments founded on the meaning of the Vienna articles, expresses his regret that the Russian Government should not accept the essential parts of the proposals made by England, France, and Austria, and finally declares that by the refusal Russia has rendered herself responsible for any evil consequences to the whole which may spring from the disorders in Poland.

The organ of the Polish National Government at Warsaw declares that, diplomacy having failed, Poland will persevere in her armed struggle to the last.

Telegrams and special reports continue to announce desultory fights, without any decisive results, between the Russians and the Poles. The insurgent cause has obtained a serious loss in the death of the leader Lelewel, who fell in a battle at Batorz on the 3rd inst., pierced by two bullets.

The Russian Government on Monday commenced its compulsory exaction of the taxes in Warsaw, by closing the places of business till the impost due was paid. The gates of Warsaw have been closed for ten days to any person entering or going out. Two hundred inhabitants have been transported to Siberia.

The *Patrie* urges the recognition of the Poles as belligerents by the great Powers.

AMERICA.

WAR NEWS.

The steamer City of London brings intelligence from New York, by telegraph to Cape Race, to the evening of the 5th inst.

The siege of Charleston does not seem to have made much progress. Fort Sumter had not yet surrendered. General Beauregard was determined to hold it by means of temporary fortifications. The bombardment of Charleston had not been continued, owing, possibly, to the breaking of the siege gun. On the last day of August the Federal ironclads advanced without opposition from Forts Sumter and Wagner, and engaged Fort Moultrie. On the 1st, it was thought that the fleet would be able to move up the harbour. A brief telegram, however, informs us that on the 1st of September the monitors and ironclads were under attack. Forts Sumter and Moultrie were remounting guns on Sumter. General Gilmore had pushed forward his trenches within 1,700 yards of Fort Wagner and had signalled, consequently it was returned unanswered, notwithstanding which General Gilmore had fired a few shots during the night of the 31st of the city in the middle of the night, whilst the inhabitants were sleeping. Gilmore has replied that he regretted the necessity to Beauregard against the bombardment without warning. He says it was absurd to expect formal notice of an intention to throw shells into a place which had been menaced by land and sea for two years and had for forty days been the object of a direct and energetic attack. The monitors Montauk, Patapsco, and Nahant, and the Federal General is not confirmed by later accounts; nor is it mentioned in Beauregard's despatch complaining of the bombardment without due notice.

In Virginia there had been no movements of note; but the story of an intended flank movement round General Lee was revived. It was reported that General Stuart had crossed into Maryland for another raid. Confederate reports stated that General Longstreet and A. Hill had been defeated, with the loss of 150 prisoners and a gun, at White Sulphur Springs, Virginia; whilst according to Federal despatches they were retiring on Lewisburg, pursued by Averell. The casualty captured by the Confederates on the Rappahannock, have been sunk by Kilpatrick's artillery, murdered by guerillas, mutilated for corpsets, have been shot for desertion from General Meade's army.

A great expedition was preparing to leave New Orleans, and was supposed to be intended for Mobile.

There had been a good deal of fighting in Arkansas, without any great advantage to either side.

The Confederates are said to occupy no part of East Tennessee save the Chattanooga territory, and Burnside on the one hand and Rosecrans on the other, are pressing on it upon both. Rosecrans was endeavouring to destroy the Georgia Railway.

The advance of General Banks' army has driven the Confederates, 7000 strong, across the Bayou Metaire bridge in Kansas, killing and wounding 150 and capturing 200. The Confederate loss was light.

The steamer Warrior has been captured north of Tortugas. The blockade-running schooner Alexander Cooper, from New York for Port Royal, has been captured off the Cape Fear. Correspondence from Key West to the 22nd of August gives information of the capture of several valuable prizes. The gun-boat De Soto last week took a fine steamer called the Alice Vivian in the Gulf, about 200 miles east of Mobile, with 880 bales of cotton on board. She has also captured the side-wheel steamer Gertrude from Key Vale, last from Havannah, with an assorted cargo of merchandise. An English topsail schooner has also recently been brought in as a prize. The Admiralty Court is still without a presiding officer, and a large amount of prize property is consequently awaiting adjudication.

THE POLICY OF THE FEDERAL GOVERNMENT.

The New York Republican State Convention has passed resolution against separation and against foreign intervention, promising to support the Government in the prosecution of the struggle for the American Continent, and approving the emancipation proclamation.

President Lincoln has addressed a letter to the convention in which he says he does not believe that a compromise embracing the maintenance of the Union is now possible. The strength of the rebellion is in its army, and the offer of terms by men within the rebel military army is nothing, such men having no power to enforce a compromise. An effective compromise must be made either with those controlling the Confederate army or with the people under its dominion. No intimation from the Confederate army, or from the men controlling it, in relation to a peace compromise has ever come to President Lincoln's knowledge or belief. "If it does come, it shall not be rejected or kept secret." The President says that he has supported Emancipated emancipation, but the people objected to taxation to buy negroes. He then continues :—"The emancipation proclamation is constitutional. If valid as a law, it cannot be retracted; if invalid, it needs no retraction. The war progresses as favourably since the issue of the proclamation as before. Peace does not appear as distant as it did; still, let us not be sanguine of a speedy, final triumph, but be quite sober, diligently applying our means, never doubting that God will give the rightful result."

GENERAL NEWS.

The draught throughout the eastern and central States will, it is said, produce very few men. In New York, it is estimated, it will

not produce over 2000 men. A case was being tried in the New York Supreme Court to test the constitutionality of the conscription. Private advices from New York mention that not only has the draught been abandoned in Ohio, but in Illinois, and that it was inferred Indiana will also be exempted, the opposition of the western States being too powerful for Mr. Lincoln's Government to contend with, in the absence of a sufficient army to exercise the same control in each of those States as in New York.

The Governor of Kentucky, in his inaugural address, says that the Confederate States cannot be remitted to a territorial condition—all they have to do is to return to their fealty. He objects to the arming of negroes.

The Union ticket has been elected in Vermont and California.

The New York, Boston, and Philadelphia banks had agreed to lend the Federal treasury 50,000,000 dols., to be repaid in November in legal-tender notes bearing five per cent interest.

There was a panic in the New York stock market on the 2nd and 3rd inst., but it has subsided.

No direct confirmation has been received of the report that President Jefferson Davis had issued a proclamation ordering 500,000 negroes to be enlisted and armed. But the Washington correspondent of the *New York Tribune* professes to know that such a measure had previously been considered by the Confederate Government; that since the Confederate disasters in the south-west General Beauregard and the Governor of Alabama had urged its adoption; and that at a conference of Governors held at Richmond it had been resolved to call out 400,000 negroes, but to keep the resolve a secret until President Jefferson Davis's summons should actually be issued.

Another noteworthy statement is that an Envoy had been sent by the Confederates to Mexico to negotiate an alliance with that country and to recognise the Archduke Maximilian.

Mr. J. B. Floyd, one of the ablest authors of Secession, is dead. Previous accounts had reported his serious illness, together with that of Mr. Yancey. Mr. Floyd died of the effects of typhus fever and jaundice in their worst forms.

CANADA.

Mr. Sicotte's motion of a want of confidence in the Ministry has been defeated in the Assembly by a majority of 63 against 60 votes.

Mr. Macdonald has introduced a Militia Bill as distinct from the Volunteer Bill, the aim of it being to so organise the militia as to place it in a position to respond to any call which the Governor-General might have to make.

Lord Lyons has been the guest of the Governor-General at Quebec, and was present at a review of volunteers on the 2nd inst.

INDIA.

The mail brings but little news. India is tranquil (says the *Hurkaru*) and prosperous throughout her wide borders. Fruitful rains fall abundantly, and the husbandman looks forward with complacency to reap the ample harvest due to his industry.

On Wednesday, the 29th of July, the foundation-stone of the new college, which is to be the scene of the future educational efforts of the native youth of the district of Moorshedabad, was laid at Berhampore by the Lieutenant-Governor. There was a large concourse of natives present, and the proceedings passed off with much spirit.

The cholera is raging in the districts of Behar and Shahabad. It has also broken out in the gaol at Patna, but timely precautions and skilful treatment have reduced the mortality to a minimum. The prisoners were to be removed from the gaol into tents.

CEYLON.—The *Colombo Observer* of the 17th of August heads its summary in the following manner, and says that it thereby indicates very fairly the principal items of news:—"Opening of the Legislative Council—Financial prosperity of the colony—Surplus of £132,500—Progress of the railway—Unprecedented export of coffee: probable out-turn for the season 780,000 cwt."

CHINA.

By telegram from Suez we have news from Shanghai to Aug. 4. Major Gordon was victorious on the 27th ult., and captured Vaking (Nankin?) Burgevine, with 500 rowdies, has joined the insurgents.

JAPAN.

Lieutenant-Colonel Neale, the Chargé d'Affaires, since receiving the indemnity money, has obtained a written apology from the Japanese Government, which was, it appears, the more difficult matter of the two to achieve. The British fleet, with the Chargé on board the flag-ship, are now going southward to Kagoshima to demand redress from the redoubtable Prince of Satzuma in his own dominions, and, no doubt, the Prince will yield to all asked of him.

According to a telegram just received the Japanese Princes were giving trouble, and the Semiramis had landed a force at Negate (?), and engaged and defeated the Japanese troops.

News had been received at New York that the Japanese had fired into a British and also an American ship, whereupon an English and an American steamer proceeded to the scene of the outrage and destroyed the town forts and spiked the guns.

The Dutch papers state that news has been received from Japan to the effect that the Consul-General of Holland had been ordered by the Mikado to quit the empire immediately with all the Dutch. The Consul-General protested against such conduct as contrary to the right of nations and specific convocations. Orders have been issued for the dispatch of four vessels of war to Japan, to be employed as the Consul-General might deem advisable; or, if thought desirable, to act with them in concert with England.

AUSTRALIA.

(From our own Correspondent.)

We have received news from Melbourne, Adelaide, Sydney, and Brisbane to July 25.

VICTORIA.

The political crisis which existed when I wrote last month has resulted in the formation of one of the strongest, ablest, and most respectable Cabinets that has held office since the inauguration of responsible government in Victoria. The following is the list:—Mr. M'Culloch, Chief Secretary; Mr. Michie, Minister of Justice; Mr. Higinbotham, Attorney-General; Mr. Verdon, Treasurer; Mr. Heales, President of the Board of Lands and Survey; Mr. Hervey, Commissioner of Public Works; Mr. Grant, Commissioner of Railways; Mr. Francis, Commissioner of Customs; Mr. Sullivan, Minister of Mines; Mr. Fellows, without office. On appearing before their constituents for re-election all were returned unopposed. Mr. Michie has not been in Parliament for two years; but Mr. Nixon, the member for Polwarth, retired to make room for him. Although opposed, there is little fear of Mr. Michie's return. The House will meet on the 4th proximo, when the Ministry will have to face a strong Opposition, augmented by deserters from the Liberal cause, who, on the formation of the Cabinet without them, fancied their talents and their claims (or perhaps both) so signally overlooked that they can only show their sense of slighted patriotism by appearing in full fledge upon the Opposition benches. The Ministry, however, will meet Parliament backed by the goodwill and approval of the country. Should there be a strong and factious Opposition—as it is not improbable there will be—a dissolution will materially alter matters, and be the means of inducing some of our disappointed patriots to turn their attention to something else than politics for a livelihood.

The cause of acclimatisation is making rapid progress here. The Royal Park, a fine reserve of upwards of 500 acres, has been given up by the Government to the Acclimatisation Society, for the purpose of promoting the objects of the society. Between £3000 and £4000 has, within the last two years, been spent in the improvement of the grounds, which have hence become one of the most attractive and interesting spots in or around Melbourne. Whilst the beautiful and the ornamental have not been overlooked in the society's efforts at acclimatisation, yet their labours are essentially in the direction of the practical and the useful. At present attention is concentrated upon the acclimatisation of the Angora goat, the alpaca, the llama, and the Cashmere goat. The Société d'Acclimatation de France has sent to the Victorian society a valuable shipment of Angora goats, which are, indeed, very handsome animals. Experiments are being made in crossing these with the common goat; and, so far, the results are encouraging. An interesting sketch of the society's operations in the *Argus* of this day thus closes:—"Although there is much to be noted, the extent of the society's operations is not to be judged of from a visit to the Royal Park. At the Botanical Gardens, singing birds are being acclimatised at the old zoological reserve; fish are being propagated at Port Philip Island, where quietness and security can be obtained; game fowl are breeding, and hives of Ligurian bees are doing well about the city; while good accounts are continually being received of the increase and the healthy progress of the animals and birds liberated."

QUEENSLAND.

Parliament met on the 21st of July, after the elections.

Cotton cultivation was increasing, large blocks of land having been applied for within a few months.

NEW ZEALAND.

News from this colony to the 14th of July has been received. The Waikatos, one of the most formidable and warlike of the New Zealand tribes, have risen in arms and threatened to attack Auckland. All the troops that could be spared from Taranaki have been sent to defend Auckland. Outbreaks are apprehended in other parts of the island.

A disgraceful riot has occurred at Wellington by a band of the 14th Regiment, stationed at that town.

A steam-boat collision occurred near Port Chalmers, on the 4th of July, by which about twenty lives were lost, amongst them the Rev. Mr. Campbell, wife, five children, and servants. They had only arrived from England shortly before the accident, in the ship Matouka. Mr. Campbell was to take the position of head-master at the High School. An inquest was held on the bodies recovered, when a verdict of manslaughter was returned against the captain and mate of the steamer Favourite, which had run into and sunk the Pride of the Yarra—the captain of which was also censured. As a mark of respect to those who had met with such an untimely end, a public funeral was ordered by the Government. The procession extended nearly a mile in length. There was an evident feeling that a public calamity had happened.

DONCASTER RACES.

THE advent of the Sledmere sale portion of the visitors made Doncaster unusually full thirty-six hours before the modern orthodox time; and such was the additional influx that, when the Corporation Secretary cast up his Grand-Stand books on Tuesday night, they showed receipts to the amount of £3157, or £254 more than last year, which had by far the most lucrative opening day on record. The entries were this year taken, not behind a little saddler's shop, but in a lower chamber of the Guildhall; vast improvements had been made in the Grand-Stand inclosure, and the ladies' stand was worthy of the moor; and nothing remained of the worn-out *régime* except the old guy in scarlet. There was no great furore respecting any of the St. Leger favourites. Many thought Queen Bertha much of the Canezou stamp, "a good mare but not a smasher;" and it was known that the stable ran her untried, but considered her at least half a stone better than she was on the Oaks day, when a Goodwood Cup winner was fourth, and yet barely beat three parts of a length. Lord Clifden was "a man of mystery" still. "He has done no work," said the touts, "for nearly a fortnight." "Why did he stop all night at Peterborough, and only walk since he came here?" "Will that line of business win a Leger?" &c. On the other hand, he had plenty of stanch friends, who considered that he was rather a delicate horse, and none the worse of being eased a little at last, and that Edwin Parr and his noble owner (who was described by one of the papers as watching his work for weeks, and dwelling for that purpose "in a cottage of almost Arcadian simplicity at Rottingdean") had succeeded in giving him gallops at unhallowed hours, when even "the horse watchers" were at rest.

Be this as it may, on Tuesday morning they took courage, and the horse, with a five-stone boy up, and in heavy bandages, went two miles well on "the moor" at last, and pulled up as fresh as when he started. Sim Templeman, the celebrated ex-jockey, had seen the performance, and was satisfied, and his opinion was confirmed by Captain White's assurance to his friends that he too had seen him in and out of the stable, and that, if looks and condition were any criterion, he was even fit to meet a Macaroni. Still there were sceptics to be found in plenty. In the rooms on Tuesday night, or rather midnight, neither he nor anything else among the favourites went like a positive winner. Ranger's position hardened, but there was no coming outsider. In fact, "there were no cards to handle;" and as Lord Stamford did not bear up for Avenger, as many expected he would after Dulcibella's victory, we seldom remember speculation more flat.

The night was only in keeping with the day. Even in the horse fair, where we sadly missed Sir Tatton (with his umbrella under his arm) from his old haunt on the left of Mr. Tattersall, things were dreadfully slack. It was said that Sledmere had drained all the loose coin; but, really, there was but little to bid for. Three yearlings had been too much injured in a fire the night before to make their appearance, and the only sales of importance were Raxer by Rataplan, from Newcastle's dam, for 360 gs. to Count Batthyany, and Sir Charles by Newminster, from one of the old Sir Charles Monck's Cast Steel blood, for 300 gs., to Mr. Naylor.

Both the sheet-list for the week and the card of the day did not look especially promising, but still the Tuesday's sport turned up pretty well, and fifty-eight horses ran. In the Fitzwilliam Stakes, Carnival, a grand-looking Sweetmeat, whom Mr. Naylor purchased along with Macaroni, received only 12lb. from Johnny Armstrong for his year, and beat him cleverly by half a length; and it is worth noting that the first three were the only ones which carried winners' penalties. The Doncaster Plate gave us another winning peep of the ever-popular Kettledrum colours, and then the afternoon received a rare fillip in the turn up for the Champagne. The two "flying mares," Linda and Fille de l'Air, frightened everything save two out of the field, and, true to orders, they raced against each other till beyond the distance, where Ely's owner (who had only taken the odds to £20 about him) had the pleasure of seeing them compound, the moment Aldcroft took his colt by the head, and thus achieved the first "brilliant surprise" of the meeting by two lengths. It was one of the grandest coup de mains we ever witnessed, and the winner, who is the image of his truly-lamented sire, found some warm supporters for the Derby at 20 to 1. His defeat by Molly Carew and Hengist this year had caused him to be virtually overlooked, and even his trainer, Tom Oliver, the hero of many a hundred steeplechase and hurdlerace victories and tumbles, had no prophetic conception of such a triumph for his half-brother to Fairwater. After a good deal of trouble, there was a beautiful start for the Great Yorkshire Handicap; but the six-year-old Dulcibella, a whilom winner of the Cesarewitch, and with only 7 st. 8lb. on her, had made everything safe by the bend, and the St. Leger nags, Blondin and Dr. Syntax, toiled after her in vain. Lady Clifden won in her old form under 9 st. 9lb., over the Red House in, and the elegant Saragossa revived the failing fortunes of the Aske stable, whose training-bill for the year she must have nearly paid single-handed.

The afternoon of Tuesday was fine, though rather lowering, but still the glasses predicted a fine St. Leger Day, and a more pleasant or more crowded one has never been seen at Doncaster. The test is to watch how far the crowd extends towards the Intake turn, and this year they went right beyond it, half way down to the Red House, and the police fairly hewed the course for each race out of a solid, living mass. At one time we rather expected a repetition of the Voltigeur and Russboro' dead-heat scene at the turn; but the crowd was a Yorkshire one, and knew how to behave themselves at such a crisis, and the police force was thrice as strong as it was in '50. The sales in the horse fair were pretty good, but the attendance was far smaller than usual. The Rataplan blood was in some favour, as Scarboro' (340 gs.), Wedding Peal (300 gs.), and Christmas Carol (280 gs.) were all by him; and Sloth, by Idle Boy (320 gs.), a Trumpeter colt (360 gs.), Pulsatilla, by Orlando (230 gs.), and Sister to Musjid (160 gs.) were also among Mr. Tattersall's other returns. Mr. Merry gave 930 gs. for Zambesi by Saunterer. The racing opened with the Municipal Stakes and the Corporation Plate, both of which were won by Sir Joseph Hawley, with a son and daughter of Charleston, his American sire. It is seldom that a new trainer makes such a successful début for an owner. Twenty-eight were coloured on the card for the St. Leger, but Actæon, Fiancée, Stockowner, Cheerful, Woldga, Bonny Bell, Erin-go-Bragh, Newmarket, and Scamander were deaf to the call of time; and Prince Le Boo's appearance from among the uncoloured ones brought up the number of starters to nineteen. Onesander and Avenger were the first to show—the latter a light, corky horse, and looking more suited for Ascot hill work than the grand flat business now before him. Golden Pledge seemed rather leggy and not improved; and the little "light sherry bay" Borealis bore herself bravely, and looked all that training could make her. Lord Clifden was quiet and calm as ever, darker in his coat than when he won the Derby, and considerably thickened, but still a little light in his back ribs. Queen Bertha was, perhaps, in still brighter trim, but she had not the cut-and-come-again look of her antagonist. The Ranger had Prince Le Boo for his attendant; but he seemed very shelly and not "proppy" as well, and there was a pretty general impression that he would hardly get through the race without breaking down. Blue Mantle looked as handsome as ever, and was singularly quiet, although, of course, he bore his part in two or three breaks away. Serf galloped well, and National Guard's peacocky style convinced the tykes more than ever that his powers of staying would belie his name. Nothing went better than Queen Bertha, and those who wished to have seen Lord Clifden "act" with rather more freedom remembered for their consolation what an idle horse he has always been deemed, and grimly bided their time. This year the parade, which had been very foolishly given up, was renewed, and the scene as the nineteen filed solemnly past the Grand Stand—Borealis third, The Ranger fourth, Lord Clifden ninth, Avenger eleventh, and Queen Bertha twelfth—was one of the most impressive Corporation ceremonies (lacking the Mayor and mace at their head) that was ever enacted at Doncaster, and in the presence of a most silent and reverent assembly. The majority had backed "Scott's mare," but still they had a secret sympathy with Lord Clifden as a great hero in misfortune; they remembered how, like Don John, he had earned his preliminary St. Leger diploma by winning the Champagne and Two-year-old stakes, and they had a sneaking feeling that he might come out a great horse yet for his young owner's and his granddam's (old Beeswing's) sake. When the flag dropped it seemed all over with him. Dr. Syntax set the field their lesson at once, with Queen Bertha well forward; and there was Lord Clifden "dead last of all," with only one companion. Before they had got to the Neatherd's House he was left alone, the field going away from him like a flight of pigeons, farther and farther every stride, and hardly a betting man would have taken 100 to 1 about him. Over the hill they flew, the bay ten lengths behind, the very last horse of the ruck. At the T. Y. C. post it was still the same tale; people had almost ceased to think of him, when just at the Rifle Butts two horses came back to him; then another—then another—and then, like a shot from a rifle, he went right up, and the chocolate jacket and white cap were lost in the many-coloured mass, as they came sweeping round the Red House turn. There was a dead silence—not one name was shouted, a sort of shock seemed to paralyse the crowd for an instant—and then they burst out with the wild "Hurrah!" with "Lord Clifden wins!" And true enough he was winning, hands down. Round the Intake turn they came, and at the distance only Queen Bertha was left next the rails to fight it out with him; but the Scottites had no heart to shout. The long steady stride of the bay had got her into trouble like the other seventeen, and Johnny Osborne had only to sit and land him home an easy winner by half a length, and with his head well up this time, for Mr. Clarke's especial benefit. Borealis was third, beaten four lengths, and Golden Pledge as far behind her; but Lord Clifden was never even "extended." Since Voltigeur's year no winner has been received more rapturously on his return to scale, and the oldest racing men declared it was a "sensation race" such as they had never known. It was Mameluke and Matilda over again, with this little difference, that he caught the Whitewell mare cleverly, whereas Mameluke did not. However, no one spoke in higher terms of the performance than John Scott himself. Fifteen years ago his favourite mare, Canezou, had been beaten by Lord Clifden's horse, and now the horse, Lord Clifden, forced him into second honours again. Until he reached the Rifle Butts, about three quarters of a mile from home, the horse never seemed to get into his stride, and hence we can imagine what he must have suffered from the style in which he was driven in the front rank almost from end to end through the deep ground at Epsom. The patient way in which Johnny Osborne "suffered" on him, never oversetting him or trying to reach his horses till their pace began to weed them out, and then sending him out when he had fairly warmed to his work, with his "stride of vengeance" on the outside, and "getting" favourite after favourite, was a never-to-be-forgotten specimen of Yorkshire horsemanship. After a hard saddle experience of fourteen or fifteen seasons, Osborne has attained his St. Leger rank, and never did man deserve it more. The noble owner, who, it will be remembered, gave £6000 for the horse, and bore his Derby hard luck without a murmur, has well earned his honours. The stakes alone are only a thousand short of that sum, and it is said that he has won a very good stake into the bargain. No one has done his duty more efficiently than Edwin Parr by the horse; and here, on a course more suited to him, with sound ground, and a jockey carrying out his instructions to the letter, he showed that he was able to put the touts, and even "the Whitewall polish," at defiance. The Manchester men are said to be very hard hit. And so ended one of the most remarkable St. Leger Days on record, without a spot of rain. The Grand Stand receipts for the first two days of 1862 amounted to £5128, and this year they reached £5800!

DONCASTER MEETING.—TUESDAY.

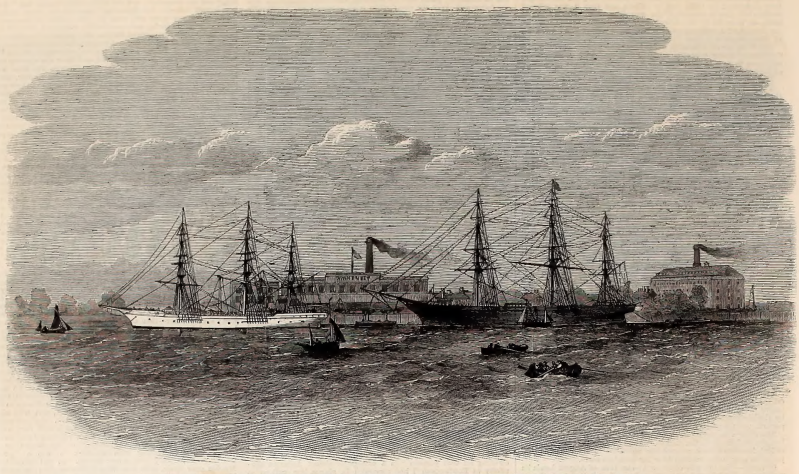
Fitzwilliam Stakes.—Carnival, 1. Johnny Armstrong, 2. Lady of Coverham, 3.
Doncaster Plate.—Newchurch, 1. Despair, 2. Knave of Trumps, 3.
Champagne Stakes.—Ely, 1. Fille de l'Air, 2. Linda, 3.
Selling Stakes.—Folly, 1. Daniel, 2. Disdain, 3.
Great Yorkshire Handicap.—Dulcibella, 1. Drummer Boy, 2. Blithfield, 3.
Revival Plate.—Lady Clifden, 1.—Tattoo, 2. Mother Carey's Chicken, 3.
Filly Stakes.—Saragossa, 1. Gondola, 2. Syren, 3.
Glasgow Stakes.—Midnight Mass walked over.

WEDNESDAY.

Municipal Stakes.—Washington, 1. Clarissa f., 2.
Corporation Plate.—Columba, 1. Despair, 2. Man-at-Arms, 3.
ST. LEGER STAKES.—Lord Clifden, 1. Queen Bertha, 2. Borealis, 3.
Handicap Sweepstakes of 10 sovs.—Rose, 1. Kapunda, 2. Wild Thyme, 3.
Sweepstakes of 10 sovs.—Persuasion, 1. Light, 2. Livingstone, 3.
Her Majesty's Plate.—Jack of Hearts, 1. The Knave, 2.
Stand Plate.—Creole, 1. Stockowner, 2. Newmarket, 3.

THURSDAY.

Zetland Stakes.—Onesander, 1. Sauterelle, 2. Jarnicoton, 3.
Sweepstakes of 10 sovs.—Coast Guard, 1. Prince Arthur, 2. Fille de l'Air, 3.
Portland Plate.—Welland, 1. Bohemia, 2. Peignoir, 3.
Selling Stakes.—Usher, 1. Prescription, 2. Daniel, 3.
Cleveland Handicap.—Johnny Armstrong, 1. Polynesia, 2.
Eglinton Stakes.—Carnival, 1. Vanessa, 2.
Scarborough Stakes.—Newmarket walked over, and divided the stakes with Macaroni.



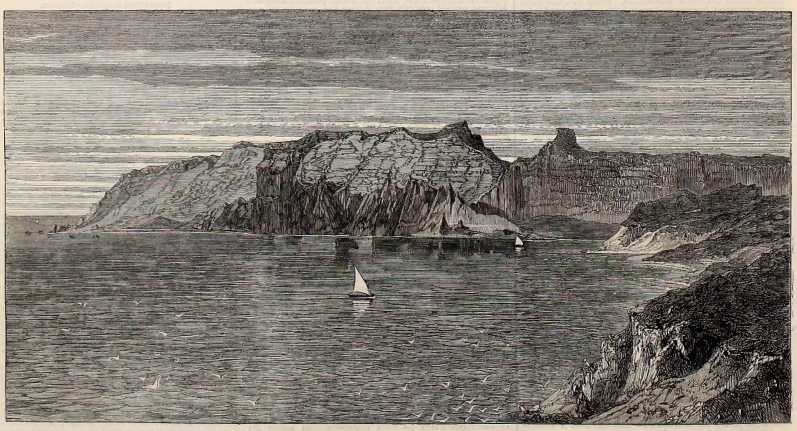
Accounts from Naples state that an adventurous youth, in exploring Vesuvius, advanced too close to the crater and fell into the abyss.

The annual meeting of the Warwickshire Agricultural Association was held in the neighbourhood of Leamington on Wednesday, and was attended by most of the gentry of the county. The show of every description of stock was large and fine, and was visited by a vast concourse of people. A flower and fruit show, in conjunction with the agricultural show, was held in the Jephson Gardens. The annual dinner was held in a spacious marquee on the ground, and was presided over by the Earl of Warwick.

The annual harvest home of the Philanthropic Society's institution, Redhill, was held on Wednesday at the Farm, Redhill, Surrey, and was attended by a large number of the friends and supporters of the school. At seven a public meeting was held in the large hall, Mr. S. Gurney, M.P., taking the chair. During the proceedings about fifty of the boys received prizes. An address was afterwards delivered by the Rev. Mr. Walters, resident Chaplain, who said that since the last harvest home they had sent out twenty-two boys as emigrants, sixteen to Australia, and six to Canada, from the whole of whom good accounts had been received from their employers. During the last three years forty-nine boys had gone to Canada, of whom, with three exceptions, good reports had been sent home.

The annual General Session for the county of Lancaster, under the presidency of Lord Stanley, was held at Preston on Thursday week. The attendance of magistrates was very large, and the noble Lord was re-elected.—In the evening Lord Stanley presided at the distribution of prizes to the Preston School of Art, and spoke at great length on the benefits of art-education. He noticed the recent great strides made in the introduction of art into our manufactures, so that the French dreaded their loss of pre-eminence in the domain of taste, while our private buildings might compete for splendour and purity of design with similar works in any part of the world—instances of the fact that England, in every branch of art, had made rapid progress in the present generation. Schools of design, therefore, intended for the better culture of art, supplied a real want.

NEW TELEGRAPH TO INDIA.



THE KIRKHAM AND THE ASSAYE TAKING IN TELEGRAPH CABLE AT MR. HENLEY'S WORKS, NORTH WOOLWICH.

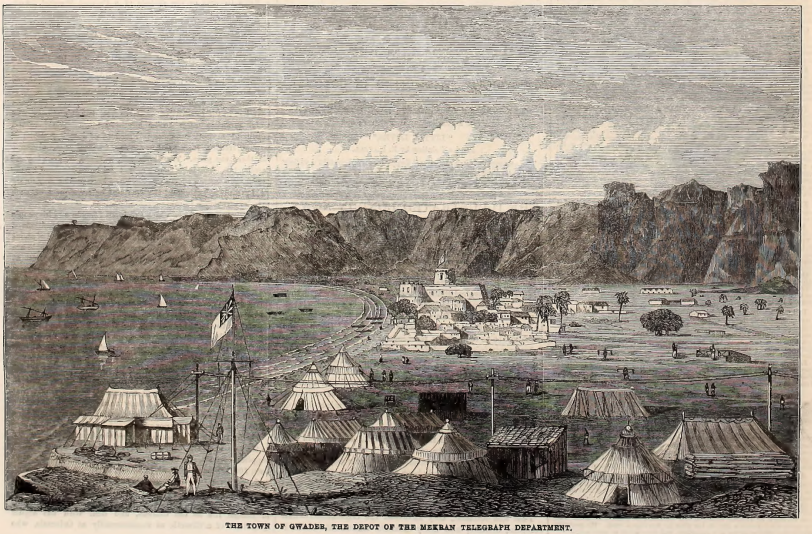
THE failure of the attempt to establish electric communication with India via the Red Sea has induced the Government to take the construction of a line to India into their own hands. The India Board has placed the general superintendence and control of the line under Lieutenant-Colonel Patrick Stewart, R.E., an officer as well known for his gallantry during the Indian mutiny as for the great services he rendered the Government by the construction and maintenance of the telegraph lines through the wildest districts of Central and Eastern India. For the immediate electrical and engineering superintendence of the line, and also for the arduous task of submerging it, the Indian Government have selected Sir Charles Bright and Mr. Latimer Clarke, and under such auspices and supervision its manufacture is approaching completion at Mr. Henley's telegraph-works, North Woolwich.

This line may be called the Persian Gulf line, as it is down that route it is to be laid to connect Kurrachee with the present land line to Constantinople. Colonel Stewart has himself during two years travelled through and examined the various overland routes which have been from time to time suggested for a part of this line across the Turkish portions of Asia Minor. One of these has been selected from the greater ease with which land lines are erected and kept in repair as compared with submarine wires, and also because along at least three fourths of the entire route the Turkish Government have already established and keep in admirable working order a telegraph from Constantinople to Bagdad. This land line runs from Scutari on the Bosphorus across Asia Minor to Diarbekir, thence to Mosul (the ancient Nineveh), and thence to Bagdad. It happens, however, that over the broad tract of country which intervenes between Bagdad and the head of the Persian Gulf, along which this submarine cable to India is to be laid, various predatory tribes of Arabs claim a sovereignty, and fight for it with more or less success; and over these lawless vagabonds of the desert the Porte has no manner of control. These people will require skilful handling, and the land line from Bagdad will probably be taken along the frontiers of Arabia, through the territories of the most powerful of the tribes, who are able to protect it against all comers, and whom a subsidy of £1000 a year will at once render most zealous. By this route, for a length of some 300 miles, it will pass to the head of the Persian Gulf at the estuary which marks the junction of the Tigris and Euphrates—a miserable Eastern township called Shat-el-Arab. It is not intended, however, to rely solely upon this land route. Another land line will probably be taken from Bagdad over the frontier of Persia to Teheran, thence to Ispahan, and so on by Shiraz down to the shore of the Persian Gulf at Bushire. Thus, even in case of the Arabs proving refractory, there will always be the land line through Persia to Bagdad, and so on to Constantinople and England. From the estuary at Shat-el-Arab the submarine portion of the line is to be laid in three sections; for, though the length of the whole is only 1250 nautical miles, yet the Government have most wisely determined to avoid the fatal dangers which always beset telegraphy through long deep-sea routes by making no less than three breaks at the stations at which the cable will be landed. The first length will be from the head of the Persian Gulf at Shat-el-Arab to Bushire, a distance of 170 miles, along which the cable will be submerged in from 20 to 25 fathoms of water. The next length will be from Bushire to Mussendom, a bold, desolate, stony headland on the coast of Arabia. This section will be 640 miles long, and submerged in from 30 to 35 fathoms of water. The third length will be from Mussendom to Guader, or Guadel, a small city on the Mekran coast, on the frontier of the Kelat territory. This portion will be 400 miles long, and laid in from 40 to 50 fathoms of water. From Guader a short length of land line is now almost complete along the coast, giving direct communication with Kurrachee, and thence all over India, to the very frontiers of Burmah.

THE ILLUSTRATIONS.

Our first Illustration shows the Kirkham and the Assaye lying off Mr. Henley's works, at North Woolwich, to receive the telegraph cable. Two vessels have left for the Persian Gulf with cable, their destination being Bagdad. The remaining lengths will be conveyed in three sailing-vessels and a steamer. The entire length required is more than 1200 miles, the weight of which will be about 5000 tons. The copper conducting-wire is composed of four segments, drawn into a hollow tube in such a manner as to appear like a solid wire. By this means all the advantages of a strand-wire are combined with the condensed bulk and small surface of a solid one. This wire, which is nearly ¼ in. in diameter, is then covered by the Gutta-Percha Company with four distinct coats of gutta-percha and four coats of Chatterton's compound, laid on alternately. This "core," as it is termed, is then tested in cold water, at a temperature of 90 deg., and then under a pressure of 600 lb. to the square inch. Before being sheathed at Mr. Henley's works the coils of gutta-percha core, which are in three-

VIEW OF THE GREAT MALAN, ON THE COAST OF MEKRAN.



NEW TELEGRAPH TO INDIA

WORKING PARTY AT ARGOBE: WAR-DANCE OF THE AFGHAN COOLIES.

mile lengths, are again tested under water for insulation and for resistance of conductor. The first coating outside the gutta-percha is twelve thick strands of wet hemp, and over these again comes twelve solid No. 7 gauge wires, which have been most carefully galvanized by Mr. Henley, at his works, North Woolwich. The outer covering of iron wire is generally the last which a cable receives, but in this instance, as the line is to be laid in comparatively shallow water, the wires themselves, though galvanized, are to be still further protected from their most formidable enemy—rust. The whole finished cable is thickly coated with two servings of tarred hemp yarn, overlaid with two coatings of a patent composition, invented by Sir Charles Bright and Mr. Latimer Clarke. The composition consists of mineral pitch or asphalt, Stockholm tar, and powdered silica, mixed in certain proportions, and laid on in a melted state. While yet warm it is passed between circular rollers, which give it a round, smooth surface. When cold this forms a massive covering of great strength and perfect flexibility, totally impervious to water, and incapable of being destroyed by the minute animalcules which exist in such abundance in warm latitudes, and which, when the cable is not protected against their attacks, eat every atom of the hemp, as in the case of the cable laid between Toulon and Algiers. During the whole time the cable is at Mr. Henley's the current is always kept through it, so that the slightest possible defect in the wire can be detected. In addition to this the electrical staff test every portion regulary twice a day for insulation and resistance of conductor. When everything has been done which the most jealous care and the most fastidious scientific skill can suggest, it is passed out on the river side of Mr. Henley's factory and coiled away in tanks filled with water; and even here it is perpetually watched and tested. The total cost of the submarine section of the line will not exceed £350,000 including the expenses of laying it.

The Great Malan, on the coast of Mekran, forms the subject of our second Engraving. The telegraph wires are thrown over this moun-

THE TOWN OF GWADER, THE DEPOT OF THE MEKRAN TELEGRAPH DEPARTMENT.

tain, and have a fall of 1256 feet, whence they are carried down to the beach by another descent of 500 feet. Much difficulty was experienced here in overcoming the many obstacles in the way of the telegraph; but they were eventually surmounted, and the line is in good working order. The highest point of the Mekran is 8200 feet above the level of the sea. Mekran is the most extensive and westerly province of Beloochistan. It is bounded on the north by Afghanistan and the province of Sarawan, on the east by the provinces of Jhalawan and of Les, on the south by the Arabian Sea, and on the west by Persia.

The scene depicted in the third Engraving is the flying or advanced camp of No. 1 working party of the Mekran telegraph department at Aygore, or the Idus to Hingool, via the Persian Gulf and Bushire, in Asia Minor. In the foreground the Pathan or Afghan coolies are engaged in their usual dance. Aygore is a flat plain, covered with brick in the hills, about three miles from Huddoo. There are no habitations here; but an enterprising suttler has erected a sort of temporary shop, where the fanatical pilgrims on their way to Hingloe stop and procure food and those other articles which are required by them. Hingloe, the large mountain shown in the background, is considered by the Hindoo devotees, who come from all parts of India to make pooja or prayer, as holy, and is called by those people Nance Dar, or Holy Mountain. The river of Aygore, or Hingol, is also considered holy, and to drink of its water is esteemed a blessing. The river runs through a gorge 200 yards in width, overhung by broken crags. The view here is magnificent. Beyond is a dark range of sandhills, and, towering above the basin, the blue mountains of Hinglaj, precipitous and wild. The holy mountain rises 1000 ft. in one sheer precipice from the bed of the river. It is estimated that 30,000 Hindoos visit the shrine at Hinglaj annually, paying to the Jain of Beylas two rupees each for permission to do so, as the latter is lord of the country. The span across the River Hingol is not less than 1630 yards—i.e., from the Hars Hills to those of Dillooch. The conical and furnished shaped hills are called the Shoors, or White. They are quite fantastic in their appearance, running up to points as sharp as needles. The River Hingol ("vermilion") is full of alligators, which luxuriate in the pools along the bed of the river, and many a luckless pilgrim falls a victim to those monsters. The tree here shown is the wild date, and the fruit (of) is by a few old honeycombed cannons, more dangerous to the inhabitants than to an enemy. A political agency is established here, and iron barracks are being erected for the accommodation of a body of police and troops. The erection of the wire-fence, for the lines will, in all probability, greatly alter the appearance and convenience of this scene. The climate for six months is the very delightful; but during the other six months it is scarcely endurable on account of the intense heat. The trade of Gwadur consists of salt fish, dates, and ghee. Its population is about 8000.

The three last Illustrations are from sketches by Mr. C. H. Crowe, assistant inspector of the line.

CHURCH AND UNIVERSITIES.

The Bishop of Peterborough will commence his visitation on Monday, Oct. 5.

There is to be a choral festival in York Minster on the 13th of next month.

The second annual festival of parochial choirs of the diocese of Llandaff is to be held in Llandaff Cathedral on the 23rd inst. Fifty-one choirs have given in the service, numbering altogether 1200 voices.

The Rev. W. Stuart, M.A., Curate of Maldon, has been unanimously elected Master of the Grammar School of the Ancient Corporation of Plume Lecture in that town, in room of the Rev. S. Dunn, A.M., deceased.

The local journals states that the drawings for the splendid east window which has just been placed in St. Mary's Church, Nottingham, were prepared by Mr. George Maycock, formerly a pupil in the Nottingham School of Design.

A beautiful church recently erected at Cold Hanworth, Lincolnshire, by Commander Cracroft, R.N., in memory of his father, Colonel Anderson, has been consecrated by the Bishop of Lincoln. The church, dedicated to All Saints, consists of nave, chancel, vestry, tower, and spire.

On Wednesday the Archbishop of Canterbury consecrated a new church which has been erected at Finstow, in the parish of Bromley, Kent, and which, with the formed sites and endowment, is the first cost will accommodate about 500 persons, and the Rev. Mr. Graham has been appointed incumbent.

A great meeting of parish choirs was held on Thursday last in the cathedral church of Durham, with a view to the formation of a choral association on a large scale, for the general improvement of the musical portions of Divine service in the churches of this great northern diocese. About 100 choristers, representing the principal churches, were present.

The Archbishop of Canterbury has addressed a letter to the clergy of his diocese, requesting them to set apart an early day for a harvest thanksgiving. He recommends them to have an offertory, and to devote the proceeds as a thank-offering to the Church Building Society. The Bishop of Winchester has issued a letter of like nature.—Harvest thanksgiving services have also been held in several churches; among others, St. Peter's Chapel, Buckingham-gate. On Sunday last, special choral services were performed, and appropriate sermons preached, in the parish church, by the Rev. B. Davidson, the incumbent. Hymns were sung suitable to the occasion. One hundred children decorated with flowers and evergreens, together with barley and wheat, two small sheaves of the latter being upon the communion-table. This was succeeded by several ladies connected with the congregation.

THE UNIVERSITIES AND PUBLIC SCHOOLS.—The *Dublin Advertiser* says that the David Baxter has founded £3000 for the purpose of establishing two scholarships in the University of Edinburgh, of the value of £60 each per annum. They are to be encouragement of studies in mathematics and mental philosophy.

The Michaelmas Term College will terminate on Wednesday next, when the lower boys return to the College. On Thursday the fifth-form boys return; and on the following day the boys of the sixth form will return. On the third holidays, when the whole school, numbering upwards of eight hundred scholars, will have assembled, after a vacation of nearly four months, the following:—The Rev. S. T. Irelen, late Master of the Commercial School, Gosport, near Oxford, has been appointed by the governors of the Hoxton Academy.

The Head Mastership of the Royal Asylum of St. Anne's Society's School has been conferred upon the Rev. William Lyster Cartwright, B.A., of St. Edmund Hall, Oxford.

PREFERMENTS AND APPOINTMENTS.—The Rev. S. Everard, Vicar of Swaffham; Rev. R. F. Hankinson, Rector of Lynn; Rev. C. Shorting, Rector of Downham; and Rev. W. J. L. Warner, B.A., Caius College, Cambridge, Rural Dean, to be Honorary Canons in Norwich Cathedral. *Ecclesiastic Titles Commission.*—Gainsborough: Rev. T. Wright to be Tullinghealthy: Rev. R. G. Swayne to St. Edmund's, Salisbury. *Incumbency:*—The Rev. J. Bowstead to Gateshead, Meath. *Preferments:*—Rev. Thomas J. Bartlett to Milbrook Mather; Rev. J. B. Crowther to Longner; Rev. G. Grey to Bray; Woodleigh Salterton, Devon; Rev. J. Wilson to Marshall Wedmeath; Rev. H. Stone to Cury and Gunwallow, Cornwall; Rev. T. Wetherall to Kinnegad, Wedmeath.—*Guardian.*

Tuesday's *Gazette* contains an official announcement that Parliament is further prorogued from the 14th of October to the 1st day of December. Convocation is also further prorogued to the 2nd of December.

A thunderstorm broke over the city of Brussels and its suburbs on Sunday week. The damage reported to be done to property in consequence is very considerable. At a quarter before four a flash of lightning struck the spire of the Hôtel de Ville of Brussels, and broke one of the turrets of St. Michael's Tower into pieces. This is the third time within the last few years that the Hôtel de Ville has been struck by lightning.

A paradise of a printing-office is thus described in the *Boston Cove Herald*, en which females are employed as compositors :—"Our rooms are well carpeted, and the girls do not come till nine or ten o'clock in the morning, when they find good seats, seldom making more than one or eight hours a day. Smart connections can in that time earn 61 15s. a week. They are also encouraged to read, as there are no copies. Added to this, the hall has been occupied by a female editor, as our assistant, at a salary of £200. She has spent a week a day in the office for five days a week. We generally have in our office an organ or a pianoforte, and have music at noon hours."

CALENDAR FOR THE WEEK ENDING SEPT. 26.

SUNDAY, Sept. 20.—Sixteenth Sunday after Trinity. Battle of the Alma: defeat of the Russians by the allied English and French, 1854. Daily taken from the inaugural sepoys, 1857. The thousandth anniversary of the foundation of the Russian monarchy by Rurik, kept at Novgorod, &c., 1862. Moon's first quarter, 1h. 33m. p.m.

MONDAY, 21.—St. Matthew, Apostle and Evangelist. Anniversary of Christ's Hospital, London, founded 1552. Sir Walter Scott died, 1832.

TUESDAY, 22.—The Panatæa Athenaia by the Greeks on the same day at Platea and at Mycale, B.C. 479. The Hegira, or flight of Mahomet, A.D. 622.

WEDNESDAY, 23.—Battle of Assaye; Scindia, the Mahratta, defeated: Wellington's first great victory, 1803. The planet Neptune discovered by Galle, in conformity with the calculations of Le Verrier and Adams, 1846.

THURSDAY, 24.—Revival of the ancient Spanish Legislative Assembly, the Cortes, 1854.

FRIDAY, 25.—The Solemn League and Covenant between England and Scotland, 1643. Death of Sir Sidney Smith, 1840. Death of Samuel Butler, author of "Hudibras," 1680.

SATURDAY, 26.—St. Cyprian, Archbishop of Carthage and martyr, 258. The "Holy Alliance" between the Sovereigns of Russia, Austria, and Prussia ratified, 1815.

Price One Shilling, beautifully Printed in Colours,

THE ILLUSTRATED LONDON ALMANACK
FOR 1864

will be published on the 28th inst., containing Fresh Water Fish, from Paintings by T. L. Rowbotham, with interesting descriptions by James de Carteret, Esq.; the highest style of the Chromatic Art by Leighton Brothers; Twelve Fine-Art Engravings; Astronomical Diagrams of Remarkable Phenomena, with Explanatory Notes; and Twelve Original Designs as Headings to the Calendar, by F. W. Keyl.

It contains also Lists of the Royal Family of Great Britain; the Queen's Household; the Ministry; and Public Offices and Officers; Law and University Terms; Fixed and Movable Festivals; Anniversaries and Remarkable Days; Tables of High Water at London Bridge; Tables of Stamps, Taxes, and Government Duties; the Christian, Jewish, and Mohammedan Calendars; Astronomical Symbols and Abbreviations; and a considerable amount of useful and interesting information, rendering the ILLUSTRATED LONDON ALMANACK an acceptable elegant companion to the library, boudoir, or drawing room; whilst, as regards price, it is the cheapest Almanack published.

The ILLUSTRATED LONDON ALMANACK is inclosed in an elegant cover printed in colours.

Published at the Office of the ILLUSTRATED LONDON NEWS, 198, Strand, and sold by all Booksellers and Newsvendors.

TO ADVERTISERS. — Advertisements for the ILLUSTRATED LONDON ALMANACK for 1864 must be received at the Office on or before the 22nd inst. Office, 198, Strand, Sept. 12, 1863.

On SATURDAY, OCTOBER 3rd, will be published

A DOUBLE NUMBER
OF THE
ILLUSTRATED LONDON NEWS,
WITH WHICH WILL BE ISSUED

TWO PICTURES, PRINTED IN COLOURS,
ENTITLED

"THE VILLAGE OF ARGENIO, LAKE COMO, ITALY," From a Painting by G. PETTITT; and

"LITTLE LOVES," From a Painting by E. HAVELL.

The accompanying Number and Supplement will contain a variety of Fine-Art and News Illustrations.

Two Whole-Sheets and Coloured Supplement, price 10*d*; Stamped, 1*s*.

THE ILLUSTRATED LONDON NEWS.

LONDON: SATURDAY, SEPTEMBER 19, 1863.

THE choice reading of the President of the United States is said to consist of two well-thumbed and well-worn books which he keeps in his pockets—"Joe Miller's Jests" and "Æsop's Fables." The last-mentioned is his particular favourite, as in all occasions of logical difficulty he draws his moralities from that source, to illustrate or enforce an argument, or to turn a laugh against an opponent. It would be interesting to know whether he has ever studied the well-known fable of the "Dog and the Shadow," so as to apply it to the history of the last year of unhappy administration of Federal affairs. If he have done so, might not some useful reflections suggest themselves to his mind?

Like the dog of Æsop, he is doubtless convinced that the shadow at which he grasps—the subjugation of a proud, sensitive, valiant, and determined people, who ask nothing of him but to be let alone, to work out their own destiny unimpeded by the interference of pragmatical philosophists and theorists, who would free nine millions of slaves and then leave them to starve or be exterminated—is no shadow, but a substance. But shadow or substance, as events may determine, he and the American people have already lost in pursuit of it more than any nation ever lost before that was not overrun by a foreign foe and held in the iron grasp of a military conqueror.

First and foremost, they have lost the Constitution—that complex, delicate, and finely-balanced instrument—which it took Washington, Jefferson, Hamilton, and their illustrious compeers such patient study, such consummate statesmanship, and such enlightened knowledge of human character to adapt to the wants as well as to the prejudices of a free and jealous people; a Constitution which guaranteed the right of local self-government; which found each component State of the Union a Sovereign within its own sphere, and left it so, and set bounds to all possible usurpation on the part of the Central Power. That Constitution is destroyed; every one of its wise provisions has been set at naught; the local authority has been denied and superseded; the State Judges have been arrested on the bench by armed men, for no other offence than an exposition of State law according to their consciences and their oaths, but which happened to be distasteful and inconvenient to the Central Government; the members of the Legislature of Sovereign States have been dragged from their homes and beds at the dead of night, and imprisoned in bastilles, subjected to disgusting indecencies and humiliations, and worse treatment than falls to the lot of convicted felons, not for anything that they had done, but for something which it was supposed they might do. Mr. Seward has rung a bell on his right hand, and ordered the imprisonment, by telegraphic message to a Provost Marshal, at a guiltless citizen of New York—guiltless of anything but hatred of the war and fidelity to the Constitution; and has rung a bell on his left and ordered by similar agency the imprisonment of another citizen in Ohio for the same offence. The privilege and right of the writ of habeas corpus has been overthrown in thousands of instances, without other pretence or justification than the tyrant's plea of necessity. Forts Warren, Lafayette, and M'Henry have been crammed with prisoners of State, as ignorant for the most part of the grounds of their incarceration as any of the unhappy victims who were released from the Bastille of Paris on its destruction by the infuriated French people in 1789. The right of free speech has been denied: a and a gentleman, a scholar, a patriot, and a statesman—openly addressing twenty thousand of his countrymen in public meeting—for uttering words (and even the oaths of paid military spies could twist or pervert into anything worse than words of confidence in the Administration, and of disbelief in war as an instrument for the restoration of a defunct Union, was seized two hours after midnight in his bedchamber and torn from the arms of his agonised wife and family by a mob of soldiers, tried by court-martial, found guilty of plain speaking, and sentenced to banishment from his native land, in defiance of an express provision of the Constitution of the United States and of the State laws of Ohio. Military dictators like General Butler, at New Orleans; General Schenck, at Baltimore; and General Burnside, at Cincinnati, have rivalled the insolence, brutality, and lawlessness any Dey of Algiers or Pacha of Asia Minor that was ever appointed by the most ruthless Sultan that ever reigned in Constantinople. The liberties of the American over the whole length and breadth of the continent have been either abrogated by proclamation, or altered by force in some exceptional places, such as New York, Boston, and Philadelphia, to exist upon sufference, until such time as it should please the caprice or suit the supposed necessities of the Administration at Washington to supersede them by the stroke of the pen of a Major General or the dictum of a Provost Marshal. And, last degradation of all—degradation hitherto unknown among men of Anglo-Saxon blood and lineage—a ruthless and unnecessary conscription has converted a nation once proud of its free men into a horde of military slaves, and compelled every citizen within certain ages either to leave his home, his family, and his business, and serve as a private soldier against his own countrymen contending for their independence, or to buy his liberty—as a slave buys his freedom—by a money-payment. These are among the *substances* which the Americans have lost in the pursuit of what, as yet, is but a *shadow*, and which promises never to be anything more. The least list admits of a short summary :—Freedom of speech, freedom of writing, freedom from arbitrary arrest, freedom of the person—all these are gone. They may not, perhaps, be gone beyond recall; but, certainly, they have been sacrificed by the present generation without struggles as keen and as sanguinary as have always attended the conquest or recoupment of such priceless treasures in other civilised nations.

The second substance which President Lincoln and his people have lost for a shadow is the millions of two thousand millions of dollars, or £400,000,000 sterling, already expended; and of about half as much more, for which the Government and people are liable, on current and outstanding account. As the interest at which this vast sum has been, and will have to be, borrowed ranges between fifteen and six-and-twenty per cent, it will entail upon the Americans, if they do not repudiate it, as they threaten, a permanent annual tax of one hundred and fifty millions of dollars, and a consequent taxation such as no country in the world endures except Great Britain and France, and which will inevitably involve enormous liabilities in foreign and not domestic wars extending over a couple of centuries.

The third substance—lost for ever in the stream because the too greedy dog would snap at a shadow—is the labour of one million of men for upwards of two years of war—labour in agriculture, in mechanism, in commerce, in everything that enriches a nation, and the money value of which would be greatly under-estimated in such a teeming country as America at fifty millions sterling per annum.

The fourth loss of substance, which the Americans—drawing as they do upon the over-peopled regions of Europe for fresh supplies—are always inclined to undervalue, is the loss of at least 500,000 men, by death in battle, by diseases in the camp, and by all the fatigues, miseries, and privations incident to a state of war. The record is an awful one, but has no terror for the Americans. They look upon the waste of this account of human life as the Chinese, and deal with the higher quantities of arithmetic as unconcernedly as Orientals, who

talk of millions with as much nonchalance as sober Europeans talk of thousands. The whole scale of this war is gigantic—in its cost of treasure, of life, and of liberty; and all for a shadow, all for the desire of extended territory, for universal empire over the American continent, for pride, vainglory, and for the power hereafter to overawe and humble what they term the insolence to call such effete and decaying nations as England and France.

The longer their unhappy war continues the more conclusively events continue to prove that the attempted coercion of the southern by the Northern States was the greatest blunder, if not the greatest crime, of our age. Themselves the product of a successful rebellion, they have fought what they call Southern rebellion with a vindictiveness and obstinacy which make poor George III. appear, in comparison with Abraham Lincoln, a mild, a conscientious, and a reasoning ruler. Asserting in their Declaration of Independence that Government could only and ought only to rest upon the consent of the governed, they denied their own principle the first time that their Southern countrymen endeavoured to put it into practice. Mr. Lincoln admitted, on assuming office, that the Constitution had put no power of coercion into his hands. Had he and his advisers remained true to that belief—had they recognised the dogma of the consent of the governed as essential to the existence of Government, and simply contented themselves with declaring that they would at all events have secured the substance which they have lost in pursuit of a shadow, and done more by their inactivity to prove that Southern independence was a dream than they have ever done or ever can do by war, however long continued and fiercely waged. Time, commercial intercourse, and the subsidence of angry passions might have operated together to restore the broken compact. But now it is too late. What has been never can be again. The "United States of America" is but the name of a thing that is past. It is consigned to the page of history, along with the Roman Empire, the Heptarchy, and the kingdom of Bryan Boroihme. It once was and never can be again; and these words are alike its history and its epitaph.

THE COURT.

The Queen, accompanied by Princess Helena, Princess Louisa, Princess Beatrice, Prince Alfred, Prince Arthur, and Prince Leopold, left Windsor Castle for Balmoral on Monday evening. The suite in attendance upon her Majesty consisted of Lady Augusta Bruce, Lieutenant-General the Hon. C. Grey, Major-General Bruce, Colonel Cowley, Mr. Duff, and Dr. Jenner. Lady Churchill, who succeeded the Marchioness of Ely as Lady in Waiting, joined the Royal train at Ascot, and travelled with the Queen to Scotland. The Royal cortège arrived at the Windsor station of the Great Western Railway at ten minutes before seven o'clock p.m., and was received by Mr. Saunders, of the Great Western line, and Mr. Cawkwell, general manager of the London and North-Western line. The Royal train was received over the Great Western line to Leamington, which place it reached at ten minutes past eleven o'clock. Here a stoppage of half an hour was made for refreshments. The train then continued its journey to the Rugby junction, where it arrived at forty-two minutes past ten. Here the Royal train changed, and the rest of the Royal train was handed over to Mr. Cawkwell, who travelled with it northwards, over the London and North-Western and the Lancaster and Carlisle section. to Carlisle. There the train continued its route along the Caledonian line to the Dunkeld junction, and proceeded over the Scottish Central Railway to Perth, where it arrived at forty minutes past eight o'clock on Tuesday morning. The Queen, after partaking of breakfast, left Perth at 9.15, passing over the Royal train at Blair Atholl, to pay a visit to the Duke of Athole, who has for some weeks been rapidly declining in health. The members of the Royal family were left at Perth, and joined her Majesty at Stanley junction, on her return from Blair Castle. The Royal train then continued the journey with all haste to Ballater, where the Queen was met by Princess Louise and Princess Arthur and Leopold paid a visit to the Earl of Mansfield, at Scone Palace. The Duke of Athole accompanied the Queen from the castle to the railway station. Her Majesty took an affectionate leave of the Duke and Duchess. The Royal train reached Aberdeen at 3.13, and her Majesty arrived at Balmoral at 6.15. The public were admitted to the railway station at Windsor to witness the departure of the Queen, and a platform at the station slowly proceeded along the line. The remainder of her Majesty's journey was strictly private.

On Saturday the Queen held a Council, which was attended by Earl Granville, the Duke of Newcastle, Viscount Palmerston, and the Right Hon. Sir G. Grey. At the Council the Queen was ordered to be further prorogued from the 14th of October to the 1st of December. The Duke and Viscount Hardinge had private audiences of the Queen. The Ministers left Windsor by a special train at four o'clock on their return to town. The Duke of Rutland presented to her Majesty at an audience. Sir Andrew Buchanan also had an audience of the Queen.

On Sunday the Princess Helena, Princess Louisa, Prince Alfred, Prince Arthur, and Prince Leopold attended Divine service in the private chapel.

THE PRINCE AND PRINCESS OF WALES.

The Prince and Princess of Wales continue at the Castle of Abergeldie. On Sunday in last week their Royal Highnesses attended Divine service at Crathie in the morning. The Rev. Archibald Robertson, the officiating clergyman. In the afternoon the Prince and Princess drove to the top of Craigendarroch, and took tea among the heather. On Tuesday the Prince was among the hills and broughs down a fine stag, which was afterwards dressed for the table. The Princess and her attendants drove to the Garrawalt and took luncheon. On Wednesday the Prince and Princess and suite drove to Garmouth, on the west side of Balmoral, and partook of their luncheon, returning late in the afternoon. In the evening a ball was given to the servants and gillies of the Prince at the castle. On Friday, in the previous week, the Prince and Princess and suite drove by Ballater to Invercauld, formerly called Rob Roy's Cave. A few of the servants from Abergeldie having arrived previously with provisions, a fire was lighted, potatoes and other vegetables cooked, and tea was prepared on partakers of by the Royal party beside the cavern. Afterwards her Royal Highness was employed sketching the cave, and Mr. Duncan, also, a pleasing scenery. Their Royal Highnesses returned through Ballater in the afternoon, when they were warmly welcomed by the visitors assembled to greet them.

PRINCE AND PRINCESS LOUIS OF HESSE.

Prince and Princess Louis of Hesse, with the infant Princess Victoria, attended by Baroness Schenck, Captain Westerweller, and Dr. Becker, landed at Dover on Tuesday morning, at half-past three o'clock, from the Continent. Colonel the Hon. A. Liddell received their Royal Highnesses upon their arrival. After partaking of a dejeûner at the Lord Warden Hotel, their Royal Highnesses proceeded to London by a special train, and arrived at Buckingham Palace at seven o'clock. The Prince and Princess and Princess Victoria, attended by their suite, left the palace at eight o'clock the same evening and proceeded to the Euston terminus of the London and North-Western Railway, en route for Scotland, on a visit to the Queen at Balmoral. Their Royal Highnesses will remain with her Majesty during her stay in the Highlands, and return with the Royal family to Windsor Castle.

His Royal Highness the Duke of Cambridge returns to Gmunden on Wednesday to Gloucester House from a tour in Germany.

His Royal Highness the Grand Duke of Baden has arrived at Government House, Devonport, from Portugal.

The Marquess of Hartington has left Holkar Hall on a visit to Colonel Smyth, at Heath Hall, Yorkshire.

Earl Granville has arrived at his residence in Bruton-street from Scotland.

MARRIAGES IN HIGH LIFE.—The marriage of Count Bodo Heyden with Miss Ida Morris, daughter of Horace Morris, Esq., and granddaughter of the late General the Right Hon. Lord Edward Somerset, G.C.B., will take place this day (Saturday).—The marriage of Mr. Crawshay Bailey, only son of Mr. Crawshay Bailey, M.P., with the only daughter of Count and Countess Mercara, will take place on the 29th inst. at Cheltenham.

MUSIC.

THE NORWICH MUSICAL FESTIVAL.—This great provincial music meeting—next to that of Birmingham the greatest of them all—began on Tuesday last, and has continued during this week, terminating yesterday. Our necessity for going early to press prevents us from saying more, this week, than that the festival began most auspiciously, and that its prosperity promises to be more than usually favourable. We have recently given an account of the preliminary arrangements and the names of the host of vocal and instrumental talent whose services have been called into action. We have now to add that the festival began, on Tuesday evening, with Handel's oratorio, "Judas Maccabæus," which was magnificently received with enthusiasm by an audience principally composed (as is usual on the first evening of the meetings) of those for whose sake a reduced scale of prices was adopted. The first morning performance of sacred music took place on Wednesday, when Spohr's new oratorio, "Calvary," was given, together with a selection of miscellaneous pieces. Of the merits of this work, as well as of the proceedings of the festival down to its conclusion, we shall have something to say next week.

THE THEATRES.

DRURY LANE.—The reopening of this house, as the national theatre, is always at this season an important event. Embellished as it has been by Mr. Edmund Falconer, so that it presents one of the prettiest interiors in London, and by Mr. Gye, so that its stage is decorated in the manner in which it is conducted. The public have evidently faith in the present management, and on Saturday awaited the performances with excellent satisfaction. The new piece announced for the commencement of the season. This drama, which is in three acts, is from the pen of "the labour-and-a-wife man"—"Robert's share, Jack's Romance of the Nursery." Like all Mr. Falconer's dramas, there is in it much domestic pathos, relieved by the quaint humour of art. The principal aim appears to have been to fit Mr. Belmore with a suitable part. The author has imagined a young man of humble birth, who has married the daughter of a nobleman, and, through his belief of the true offspring, and brought up as such in the ancestral hall. But, as "Jack" says, "make a silk purse out of a sow's ear" is accordingly, his courses are erratic. Sent by his supposed parents to travel in the East, he contrives to spend his time in the lowest haunts of London and Paris, and is discovered in a garret in the latter capital by a prize-fighter, Bill Puddick (Mr. Addison), and a man about town, Mr. Scudder Wilkins (Mr. W. Lacy). The latter has just left his father for him, and with such effect as to gain frequent remittances from him through Mr. Bagshaw (Mr. Ryder), at the opening of the play, is expecting the return of the youth from the East. The first act thus appears instead of him, apologising for Edgar's delay by describing the state of his affairs, and receiving a bill for £500 to be paid by Bill Puddick soon follow, and are announced by the screams of the servant girl, who is terrified at the sight of the prize-fighter. He enters, the chambermaid, too, Sally Stiggins, recognises Edgar as her hero of Cremorne, and throws the whole family into astonishment. The second act commences with a long conversation between Wilderspoon accosts in explaining; but his wiles are penetrated by Mrs. Cuddle (Miss Cuddon), the housekeeper, who, by her words, causes to a private understanding with him. At length a knock at the door announces the arrival of Edgar, who is the brother of Mr. Mordaunt, is deceased wife, and is the bearer of some startling revelations. He communicates to the family that the child of Mr. Mordaunt's daughter is not his, and that Miss Cuddle was privy to the transaction. This the wily woman confesses, and Wilderspoon, finding that the only hope left him of getting his money to marry the lass in her poor estate, she, now that the tables have been turned, retaliates, though in the end she relents. Mrs. Caudle, however, is not appeased, and, in the finale, Wilderspoon is discovered making scenes to Mrs. Caudle, who declares that she will be his wife. The piece is full of incident, and is well acted throughout. Mr. Belmore has endeavour to explain all this to the satisfaction of all parties, Bill Puddick is so perplexed that he communicates his difficulty to the audience, who strongly sympathise in the embarrassment, and mingled laughter and applause. There is some capital dialogue in this comedy, and the performance of Mr. Addison as the prize-fighter the long harangues of Wilderspoon is exceedingly creditable to him. The part of Mrs. Caudle is played to the satisfaction of the audience by Mr. Ryder. We could have wished, however, that Edgar and his prize-fighting friend had been more strongly drawn and more highly coloured. The latter is a character which, in the hands of Mr. Addison, ought to have been more fully developed. Altogether, however, we judge that the new piece will be found a valuable addition to the stock not of the best of Mr. Falconer's productions, has specific merits. The scenery, by Mr. T. Grieve, which principally consists of the interior of the chambermaid, is of remarkable excellence, and worthy of being universally appreciated.

SURREY.—Mr. Shepherd, having associated himself with Mr. James Anderson in the management of this theatre, has resolved on more ambitious aims than usually characterise the performances on the transpontine boards. Last night he produced a drama, which, as a heroic play in five acts, entitled "The Scottish Chief; or, The Maid of Wallace." Mr. Anderson, it appears, has compiled his drama from Miss Porter's romance, Mr. Sheridan Knowles's tragedy, and Mr. Planché's theatrical adaptation of the story, formerly acted at the Coburg under the title of "Wallace, the hero of Scotland." In developing the meagre plot to the dimension of five acts, Mr. Anderson has shown much skill in grouping the incidents of the story. The first act concludes the third represents the escape of Wallace from his brothers' prison by means of a rope which swings him from his chamber-window to a bridge that crosses a deep ravine in his mountain dwelling. In the next act, the death of the traitor Monteith relieves the hero of his worst situation. Wallace is not equally to the taste of the audience, who resented strongly the desertion of Wallace, or rather his exhibition of his back after his decapitation. This termination has now been altered, the production of the hero's bleeding features being no longer held up to the audience, gain. The exhibition of his head acted and illustrated with scenery of rare beauty, it will doubtless attract the prolonged success. To the drama in verse is rather bald, and the poetry commonplace; nevertheless, it is a move in the right direction. Mr. Anderson, as the representative of Wallace, and Mr. Fernandez, as Bruce, are as picturesque as could while Miss Pauncefort, as Helen Mar, showed true passion in the trying perils to which she is exposed. We should, however, prefer a less declamatory style of delivery than that adapted by the performers in general.

SHAKSPEARE CELEBRATION.—On Monday the performance at the POLYGRAPHIC HALL in aid of the funds for the Shakspeare monument will take place, when Miss Edith Heraud and Herr Krueger will deliver their various recitations from Shakspeare's plays. The passages will be linked together by some original music, composed by G. C. Bonheur, Esq., and sung by Miss Brent, Signor Napp, and other solo singers.

METROPOLITAN NEWS.

Mr. Hanson, the barrister, has fixed Wednesday, the 23rd inst., to begin revising the list of voters for the City.

The Jewish new year commenced on Monday, and was strictly observed. The Jews resumed business on Tuesday evening. The day of atonement, or "white fast," will take place in about three weeks.

The jury lists for next year have been placed upon the church doors, and unless persons of sixty years and upwards at once send in their claims to have their names struck off they will be liable to serve another year.

The Baron Dey, which recently sank in the river at Lincheuse Reach, has been raised and removed to the shore. Steps will at once be taken to submerge the vessel in her bottom, when she will be hauled into dry dock to undergo repair.

The citizens of London have been cited to attend at the Guildhall on the 29th inst., for the purpose of proceeding to the election of a Lord Mayor for the year 1864-5, in succession to Mr. William Anderson Rose, whose term of office will expire on the 8th of November.

Two hundred children belonging to the Clare-market Ragged School were on Thursday taken by steamer from Hungerford Stairs—they enjoyed themselves in the park until late in the afternoon. Through the exertions of the indefatigable Mr. Rose, the school a substantial dinner had been provided for the children in the park.

At the weekly meeting of the City Commissioners of Sewers on Monday, Dr. Letheby reported that during the week the officers had condemned 760 lb. of meat as unfit for human food. It consisted of five sheep, four calves, two pigs, and fifty-five joints of meat. Sixlbs. were diseased and 698 lb. were from animals that had died from natural causes.

Last week the births of 1922 children—938 boys and 985 girls—were registered in London. In the ten corresponding weeks of the years 1853-62 the average number increased by 1862.—The deaths in London in the week that ended last Saturday were 1257. The average number in the thirty-seventh week of each of the ten years 1853-62 became 1138, when deaths from cholera in 1854 are excluded from the calculation and correction made for increased population. The mortality from smallpox is now greatly reduced; the deaths from it in the last three weeks having been 24, 21, and 19. The deaths from diarrhœa, which reached 619 in the third week of July, have fallen to 80. Scarlatina is at the present time the most formidable of the zymotic diseases. It was fatal in 124 cases in that week, while measles was returned in only seven cases.

COUNTRY NEWS.

At a public meeting held at Bacup, under the presidency of Mr. Joshua Lord, it has been decided to adopt the Local Government Act.

Lord Alfred Paget, M.P., has been elected chairman of the Harwich Harbour Conservancy Board, constituted under an Act of last Session.

The south side of the Southampton bar-gate is being restored. It is believed to have been built by Edward I. in the year 1300.

On Saturday last four men, named Benjamin Thomas, José Maria Alvarez, John Hughes, and James O'Brien, were hanged in front of Kirkdale Gaol for murder. O'Brien died defiantly; the others appeared resigned.

The Chancellor of the Exchequer has promised, if his engagements permit, to lay the foundation stone of the Liverpool Museum, on Oct. 20. The Committee of Council contribute £500 in aid of the building.

The total proceeds of the Worcester Musical Festival were £1044 11s., the largest sum ever realised at Worcester, except when it was £1214 5s. 8½d. It is expected, however, that the receipts this year will be considerably increased by the Sunday collection.

The freedom of the town of Inverness was on Thursday week presented to Mr. Matheson, M.P., Mr. Ross, M.P., Mr. Fraser, chairman of the Inverness and Aberdeen, the latter as chairman of the Inverness and Nairn Railway Company.

A woman has been committed for trial at Side Hedingham, Essex, for causing the death of an aged Frenchman, named Dumay. She deserted herself her children, and Dumay docked him in a garret and this was so much exhausted that he died.

The annual examinations for science certificates for teachers in connection with the science and art department of the Committee of Council on Education are to take place in London, Dublin, and Edinburgh, in the month of November next.

Rendcombe Manor, which is one of the finest in the county of Gloucester, and contains upwards of 6000 acres, has been sold by Mr. Goldsmid, Bart., Q.C. M.P., for £160,000. It was purchased of General Sir John Wright Gotte, Bart.

A gentleman of Liverpool has offered to give the sum of £1000 towards a sum of £10,000, which he estimates will be required to purchase all the miserable and unhealthy property which still remains to be pulled down, and which constantly generates fever and other infectious diseases.

Yesterday week Mrs. Hall, the wife of Mr. Bulkeley Hughes, Esq., Flax Croft, Anglesea, cut the first sod of the Central Anglesea Railway. The spot selected for the ceremony was a landmark which was daily decorated, and a procession of the public bodies, &c., was formed.

Two female bathers at Penzance were carried out by the tide last week, when a trustworthy boatman, at imminent personal risk of his own life, rescued them. The latter became frightened and returned, but Mr. Dove persevered, and ultimately succeeded. The gallant act was witnessed by many on shore, who showed their appreciation of it by loud cheers.

A public meeting was held on Monday to raise the old romance of a rich uncle in India leaving a fabulous fortune has just become a pleasing reality to Mr. George Legg, carpenter, Maddiley. The uncle, Mr. Johnson, an Rash India merchant, has bequeathed £5000 to the nephew aforesaid, and the three sums of £10,000 and one of £5000 to other relatives, and £500 a year to the widow.

The greater part of the crew of the Florida have arrived in Liverpool. They seem to have enjoyed their cruise. For months they have seen no wages, and when they got to Brest they became clamorous for pay. Captain Maffitt gave them all their wages, and left Brest for Calais, with an order on Fraser and Co., of Liverpool, for their wages. Messrs. Fraser and Co. refuse. It is said, to honour the order as soon as the families are full of anger.

St. Patrick's Church, Cork, commenced about twenty-five years since by the celebrated Father Mathew, and partially erected at an immense cost, is about to undergo, from the designs of Messrs. Pugin and Ashlin. The original design show a large tower and spire in the centre of the west end; this is not to be entirely dispensed with, and replaced by a simple front, in conformity with the rules of the Ogmachin order.

A public meeting was held on Monday evening, in the Lecture Hall, Stroud, for the purpose of awarding the prizes to the successful pupils of the various classes held in connection with the Mutual Improvement Society. S. S. Dickenson, Esq., J.P., occupied the chair, and the meeting was addressed by the chairman, Mr. Bannister, the Rev. J. Silver, the Rev. Mr. Sawyer, and Dr. Paine. These classes were established in 1859, under the science and art of the Department of Committee of Council.

Another fatal balloon accident has occurred at Halifax. Early in the ascent the machine became entangled in the telegraph wires, and nearly lodged against a chimney, but escaped foul high. By means of rope and pulleys the aeronaut, a Mr. Young, descended safely, but the balloon remained in a blight on the chimney, and Mr. Young's son made the attempt to recover it. One of them, a man named Charles Rawson, had reached the top, when, the rope snapping in two, he fell to the ground and was taken up dead.

TRAVELLING IN INDIA.

RECENT statistics, showing the astonishing success of railways in India and their satisfactory effect on the budget of our great Eastern Empire have induced us to present to our readers a tableau exhibiting the principal modes of travelling in that country, which, existing from time immemorial, will have to give way before the great modern invention which has effected such important changes in Europe. From the pilgrim, travelling by the slow process of measuring his length over and over again for many hundreds of miles, together with all the intermediate contrivances of getting over the hot, dusty roads of India—the Rajah on his elephant, or the Englishman in his dandy phaeton—all classes alike are gladly availing themselves of the new method of travelling, thus settling a question which at the outset of the undertaking caused many forebodings and unsuccessful speculations, especially as to the question of cost, and its bearing upon the speculation. The statistics show that, on 700 miles of railroad now open, the number of passengers for the year 1861-2 were, first-class, 61,817; second, 299,820; and no less than 6,477,055 of the third class. This, of course, is but a beginning; and as the lines extend we may confidently look for an enormous increase, for the natives, ever keenly alive to gain, in whatever shape it presents itself, feel the advantages of the new mode of travelling to be so immense that their conservative prejudices readily give way before it, and we may reasonably look forward to the result in changes most important to the advantage of the country and people.

MODES OF TRAVELLING IN INDIA.

"SCENE ON BOARD A FRENCH STEAMER FROM HAVRE TO HONFLEUR," BY M. BIARD.—SEE PAGE 294.

ECHOES OF THE WEEK.

The recent execution at Liverpool of four wretched men who, at high noon and in the presence of a hundred thousand spectators, were strung up to one gallows, has, not unnaturally, excited a feeling of intense horror throughout the country. It has been forcibly pointed out, however, that this quadruple execution was due, not to any unusual rigour in the administration of the law, but to a curious concurrence of criminality of the deepest dye, and which, in the present temper of the public with respect to penal legislation, it was all but impossible to pardon. All these four men were murderers; and between the atrocity of the crimes for which they severally suffered there was but little to choose. The Society for the Abolition of Capital Punishment made commendable exertions to obtain a reprieve for two of the convicts—for one on the ground that he was a foreigner, for another that his sanity was at least questionable. The Spanish Ambassador also pleaded for Alvarez, the sailor who "knifed" a man in the streets, representing that he would not have suffered capital punishment for such a crime in his own country; but the precedent set by the Lord Protector Cromwell, in the case of Don Pantaleon Sa, who—all brother as he was to a foreign Minister—was beheaded for the crime of assassination, must be regarded in this country as irrevocable. A foreigner must be held amenable, in precisely the same degree as an alien, to the laws of the country of which he is temporarily the denizen. Scores of aliens have experienced the supreme doom of the law for that which Alvarez suffered; and to have reprieved him would have been a negation of justice. There is no getting over, in these cases, the logic of George III., when he was intreated to remit the capital sentence on a fashionable and clerical forger. "If I pardon Dr. Dodd," said his Majesty, "I have murdered the Perreaus," alluding to two unfortunate brothers of that name who had lately been hanged for an offence similar to that of Dodd.

The inevitability of last Saturday's wholesale hanging does not, however, to our thinking, entirely dispose of the question as to whether it might not be found expedient to abolish capital punishments. The most pregnant argument in favour of abolition is this—*that we have been hanging men and women for hundreds of years without sensibly diminishing the crime of murder, but that we have never tried the effect of a secondary punishment.* Would it be worth while to experimentalise? There is the rub. The anti-abolitionists adjure us to keep "hanging away," just as the exterminating party in America incite Mr. Lincoln to keep "pegging away;" yet the result of a different system might in either case astonish the world. It might in the end be found that such a sentence as perpetual entombment or hard labour for chains for life in a mine would be more dreaded than the halter. The benevolent Howard tells us how, in Denmark, the crime of infanticide, which had grown to frightful proportions, was all but extirpated by a new law, abrogating capital punishment, but sentencing the offender to lifelong captivity and a yearly flagellation on the anniversary of the crime, and at the very place of its commission. It is, at all events, certain that no tentative efforts are available after we have hanged the criminals, and society hitherto has been content to adhere to the decision, more witty than logical, of the Frenchman who said he was quite ready to abolish capital punishment if *Messieurs les Assassins* would set the example of abolition by refraining, themselves, from killing.

Since alluding to the controversy respecting Napoleon's residence at St. Helena, a lady has been kind enough to send us some relics of Longwood, which assuredly go the rather to prove that the place was fitter to be a barn than the mansion of a "Lieutenant-Governor," much less that of a man who had inhabited the most sumptuous palaces of Europe. The relics comprise a bit of the covering of the bedroom, which is mere "pithy dowlas;" a scrap of the hangings of the study, the commonest nankeen; and a morsel of wall-paper from the drawing-room, "ornamented" with a pattern such as the poorest mechanic would consider a disgrace to paper-staining. The hangings of the billiard-room are of a like shabby character. These relics were accompanied by a ground-plan of Longwood, measured by a Captain in the British Navy (not by an indignant Frenchman) who was at St. Helena in 1824. The bedroom was originally thirty feet by twenty-four; but this was divided into four, and these cabined, cribbed, and confined spaces must have fully borne out the title of Cruikshank's pathetic little etching, "Change for a Sovereign." Some of these days we intend to have the relics and ground-plan facsimiled in chromo-lithography, that the English public may judge whether the complaints of Napoleon at the unworthy treatment he received were exaggerated or not. We may add that when the naval officer we speak of visited Longwood, barely three years after the death of the captive, a portion of his dwelling had become a cowshed. The "Lieutenant-Governor," it would seem, did not care to live there again.

The silver coinage of France, we learn, is threatened with a startling revolution. The Council of State are "seized" with a project for calling in all the pieces of two francs, one franc fifty centimes, and twenty centimes. A fresh emission of silver money, decimally divisionable, and amounting to two hundred and fifty millions of francs, is to be made; and the standard of value is to be lowered to 835 per mille, the remaining 165 to be alloy. The French plead that silver in England and copper money in France pass current at a nominal rate sensibly superior to their intrinsic metallic value, and that the object of the projected debasement of their coinage is to prevent foreign and native speculators from draining France of her precious metals. It is curious to mark how, for once in a way, the French have stolen a march upon us as a practical people. Our currency philosophers, such as the accomplished Mr. Fawcett, are only theorising on the depreciation of gold; but our shrewd allies, taking the bull by the horns, are about to depreciate their silver for themselves.

The Leigh Sunday haymaking case has given rise to a flood of acrimonious criticism, and the justices and police officers who ordered and enforced the seizure of the goods of a few poor farmers for the seemingly trifling offence of getting hay in—menaced, as it was, by an impending storm—on a Sunday, are far from being just now the most popular people in the kingdom. The prosecution assuredly appears to have been a most frivolous and vexatious one; but, after all, would not the most dispassionate way of looking at it be to sweep the obnoxious Act of Charles II., under which the penalties were levied, from the statute book?" Yes; it was in the reign of Carolus II.—that virtuous Monarch whom Mr. John Evelyn saw, *on the Sunday evening before his death*, toying with Mazarine and the rest, with his courtiers gambling, and "a French boy singing love-songs in that glorious gallery"—that it was made an offence punishable by fine and imprisonment to do harvest work on the Sabbath. There is another lively enactment, we believe, in force, by which a man can be fined or sent to gaol for not going to church on Sunday. The observance of the Sabbath in England is happily very much on the increase; and our quiet Sundays contrast, as a rule, most favourably with the riotous and depraved orgies of thirty years since; but we should do much better to trust, for the development of moral reformation, to the good sense and right feeling of the public than to obsolete and intolerant statutes.

We have heard a great deal—enough, and to spare, it may be—about Italian brigands lately; but to the peaceable English public a brigand is always more or less of a myth. We cannot help thinking of Mr. Wallack in Massaroni, and Mrs. Stirling as Pascal Bruno, and the late Mr. Braham as Fra Diavolo. The arrest of Cipriano La Gala and his villanous companions on board the Aunis, at Genoa, their strange rescue at the hands of the French, and their fortunate delivery on Mont Cenis to a well-deserved fate, have brought the actual brigand nearer and clearer before the English mind. But the last Neapolitan "echoes" tell us of a band of real live brigands in the Basilicata who have surrendered themselves to the authorities and obtained a few days' safe conduct in order that they may persuade the remainder of their confederates to submit to the law. The notorious Crocco, the infamous Ninco Nanco, have been seen in the flesh; and it would much conduce, we think, to the diminution of the last lingering remnants of admiration for the brigand as a romantic and picturesque character if engravings could be published from the photographic portraits of some of these ruffians. It is quite time that the mythical idea of the brigand, with his steeple-crowned hat ornamented with ribbons, his turn-down collar, silver-buttoned jacket, velvet small-clothes, parti-coloured leggings, and embroidered sash full of shining weapons, should be scattered to the winds, and the brigand as he is—a dirty, ragged, hideous vagabond—held up to public abhorrence.

NAVAL AND MILITARY INTELLIGENCE.

The Channel Fleet, which had anchored last week in Belfast Lough, arrived safely in the Mersey on Monday, and took up their moorings in the Sloyne.

Mr. Samuel Read, formerly member of the Admiralty School of Naval Architecture, and more recently master shipwright of her Majesty's dockyard at Sheerness, died last week at his residence, Grove-road, Walthamstow.

It is rumoured that the state of affairs in Japan has determined the Government to increase the force in China by one regiment, which will be available for the protection of British subjects in the dominions of the Tycoon.

Colonel Henry Yule, late of the Royal (Bengal) Engineers, and late Secretary to the Government of India in the Public Works Department, has been appointed a Companion of the Bath.

On Wednesday week a review and general field-day took place at the Curragh. About 8000 troops were paraded, under the command of Major-General Ridley, C.B. The first brigade was under the immediate command of Major-General Gordon, C.B., and the second under that of Brigadier-General Ellice. The cavalry were under the command of Major-General Key, and the artillery under that of Colonel Philpots. The troops paraded in heavy marching order. The first brigade consisted of the 10th, 32nd, and 45th Regiments, whilst the second brigade was formed of the 12th, 29th, and 84th Regiments. The 4th, 10th, 11th, and 15th Hussars made up the cavalry contingent, and the artillery was represented by the I and K batteries of the Royal Horse Artillery, and the D, F, and H batteries of the eighth brigade of Royal Artillery. General Sir George Brown and Staff arrived at the Kildare station about 9.40, were received by a guard of honour, and proceeded to the ground where the troops were paraded. After the usual inspection the bands of the several regiments fell to the rear and the ordinary evolutions were proceeded with. Though there was not a "sham fight," properly speaking, the presence of an enemy was supposed, and some admirable manœuvres were executed. The General commanding the forces expressed himself highly pleased at the precision with which the various movements were made, especially with the marching past. Sir George Brown was subsequently entertained by the officers of the 32nd Regiment, of which corps he is the Colonel.

THE VOLUNTEER MOVEMENT.

A brigade field-day of several metropolitan regiments, in combination with the corps of the county of Essex, will take place on Wanstead Flats to-day (Saturday).

The monthly competition between the members of No. 2 Company of the 22nd Middlesex (Queen's Westminster), for a silver cup presented by Corporal James Clothier, took place on Thursday week at the range on Wormwood Scrubbs. The winner was Private Pridmore, and this is the third time he has won the prize.

The annual regimental and company prize-shooting of the 36th Middlesex (first, second, and third companies) was recommenced on Monday, the fourth company prizes having been competed for on the previous Monday. Some good scores were made. The principal prize was the challenge cup of the corps, to be competed for annually, and to be the property of the one who shall win it three times. Ensign Vickerman made the highest score.

The annual prizes for No. 3 Company of the 46th Middlesex (London and Westminster), were shot for at Plumstead on Saturday last. After some very excellent firing, the first prize, a piece of plate presented by F. H. Lyne, Esq., late Captain of the company, value five guineas, was won by Private Everson; the second, a piece of plate, value three guineas, presented by Captain Salmon, won by Corporal Wilson; the third, a piece of plate, presented by Lieut. Brocklebank, value two guineas, won by Private Newman.

The following are the winners of prizes subscribed for by the officers at the annual regimental prize-shooting of the 37th Middlesex (Bloomsbury) Rifles, recently held at the rifle-ranges of the corps, Willesden:—Privates Mark, Dolamore, Discours, Cooke, Thurston, Ferris, and Berridge. A silver medal, the gift of Mr. T. Taylor, was next contended for; Corporal Gould became the winner. The second competition was for prizes given by the officers, for non-commissioned officers; these were won respectively by Corporal Harris, Sergeant Constable, Corporal Nicholls, Sergeant Coxon, and Corporal Gatfield. The silver medal of the corps was won by Corporal Gould. The chief prize was the challenge gold medal and badge, the gift of Mr. James Patrick, to which was added a small gold medal to be kept by the winner. Private Mark became the winner. Several other prizes were competed for.

At the Government ranges, Plumstead, on Tuesday, the members of the Finsbury Corps (39th Middlesex) held their second annual competition for a challenge vase, presented by the ladies of the borough. It was won by Colour-Sergeant While.

The members of No. 7 Company (London Scottish), Captain the Marquis of Abercorn, K.G., competed for their company prizes at Wimbledon Common on Saturday, with the following results:—First prize, a drawing-room clock and glass shade, won by Private Michie; second prize, Private E. W. Scott; third prize, Private D. Smellie; fourth prize, Sergeant Cormack; fifth prize, Private Fraser; sixth prize, Private Currie. Two consolation prizes were then shot for:—First prize, won by Sergeant Ross; second, by Colour-Sergeant Mew. The members of the company afterwards supped together at Elder's Hotel, Adelphi, when Lieutenant Scott presented each of the successful competitors for Lord Elcho's company challenge cup—won by No. 7 Company at the late regimental prize meeting—with a tankard with his name engraved thereon.

The second battalion Essex Rifles, comprising the 5th and 9th Essex Rifles, under Lieutenant-Colonel Capper, was officially inspected by Lieutenant-Colonel Ibbetson on Saturday last, in Plashett Park, near Upton. There was a strong muster, 700 being on the field, which, with 276 absentees, make up the total effective strength of the regiment. After receiving the inspecting officer in the usual manner, the regiment marched past in open column and afterwards at quarter distance. They were then inspected in file and volley firing, and a few battalion manœuvres were performed in a very creditable manner. Lieutenant-Colonel Ibbetson, addressing the battalion, expressed the pleasure he felt at being able to report favourably from what he had seen. In no respect had they fallen off, but rather improved since he inspected them last year.——The members of the Stour Valley company have had a competition at the Dedham butts for a challenge cup, presented by Captain Davey, and some money prizes subscribed for by a few friends. Ensign Mingaye won the cup after shooting off a tie with Private King.

On Monday the 3rd Administrative Battalion of Surrey Rifles, comprising the 24th and 13th Guildford, the Bramley, the Godstone, and the Dorking companies, met at Dorking for inspection by Lieutenant-Colonel Luard. The total number of effectives present was 200. The inspecting officer was prevented from attending on account of the illness of his father; in consequence, the combined corps were put through battalion drill, with firing, under the command of Lieutenant-Colonel Gill, who afterwards complimented them on their general efficiency.

On Wednesday week the 1st Battalion of the Sussex Volunteers was inspected by Colonel Luard, the Government Inspector of Volunteers. Colonel Luard found some fault with their drill.

The 1st Corps of Kent Artillery Volunteers (Gravesend), commanded by Captain Hilder, underwent their annual inspection at Sheerness on Wednesday week, by Lieutenant-Colonel Talbot, commanding 1st Dépôt Brigade Royal Artillery. The men were first put through the manual and platoon exercise, after which they were formed in six detachments and proceeded to the batteries facing the sea for heavy-gun practice with solid shot and common shell at a target distant about a mile. The guns used were 68 and 32 pounders, and the practice made was uniformly good, in one instance the target being struck and shattered to pieces. At the conclusion of the practice the corps was addressed by the gallant Colonel inspecting, who complimented the officers and men on their general steadiness and efficiency particularly in the heavy-gun drill.

In Wiltshire two interesting competitions occurred during last week. The Warminsters (10th Wilts) held their annual contest on Thursday. The first competition was for a gold watch, value £15, presented by the Marquis of Bath; a second prize of £7, and a third of £3. Sergeant Rees won the first prize, Sergeant White being second; and in shooting off a tie Private Flux beat Private Luke. The second competition was for a challenge cup, value £10, presented by the officers of the corps. Sergeant Rees was again winner, and a purse of money subscribed by the ladies was divided between him and the second best shot, who proved to be again Sergeant White.

The prize meeting of the Suffolk County Rifle Association was concluded yesterday week. The fifth and last contest was open to the members of the association and volunteers of the county. It was distinguished from the other contests by the length of the ranges, the distances being 800 and 1000 yards, seven shots at each. The prizes were—1st, a cup, given by the president of the association (Colonel Adair); one of the value of £14, given by the association, for the second best score; and another of the value of £7, given by the association, for the third best score. Private Tickner won the first prize, Captain J. F. Bishop (commander of the Colchester Corps) the second prize, and Lieutenant Bates the third. At the conclusion of this match the prizemen were called to the front, and their rewards presented to them by the Earl of Stradbroke, the Countess of Stradbroke, Mrs. Berners, and Colonel Adair, as follows:—Colour-Sergeant Belts, Sergeant S. Matthews, and Private S. Baker, representing the Stowmarket company, £20 company money, for the best aggregate scores at 300 and 600 yards; Sergeant W. Dawson, Private Walto Burrell, and Private A. Burrell, representing the 1st Bury St. Edmunds company, £15 company money for the best score at 600 yards; Lieutenant Read, Private J. Read, and Colour-Sergeant Jarman, representing the Beccles company, for the best score at 600 yards; Private C. Johnson, the county members' plate, for the best score at 200 and 500 yards; Private A. Berners, for the best score at 500 yards (second contest); Private J. Edwards, first prize of £20, or cup, in third contest at 300 and 600 yards; Private C. Williams, second prize, £15; Private Walton Burrell, third prize, £10; Sergeant S. Matthews, fourth prize, £5; Private Walton Burrell, the cup offered by the Countess of Stradbroke in the fourth contest; and Private J. Read, the £10 prize given by the Lord Lieutenant; and Private Tickner, Captain Bishop, and Lieutenant Bates, as indicated above. The proceedings of the meeting were brought to a close with a ball.

In Cambridgeshire the challenge cup of the 1st Cambridgeshire corps has passed, for the fourth time, into the hands of Lance-Corporal Hitzman, and should he win it twice more it will become his permanent property. In a match between sides selected from the first and eighth corps of the 2nd Cambridgeshire Administrative Battalion, the former made 496 and the latter 510 marks at 200, 300, and 400 yards. A return match is to come off on the 22nd inst.

Lord Aveland, Lord Lieutenant of Lincolnshire, has authorised a field-day of the various corps of that county, both rifles and artillery, at Boston, on the 1st of October. The review will take place in a large field near Hussey Tower, and his Lordship will, as at Lincoln last year, provide dinner for the entire body of volunteers, who, it is expected, will muster to the extent of nearly 1300.

The English marksmen in the match between England and Australia had their shooting on Tuesday at the Sudbury range, Derbyshire, the property of Lord Vernon. This match was the result of a challenge sent by Captain Macfarlane, of Milang, South Australia, whose company possessed the greatest number of marksmen in the colony in the year 1862; and the challenge was that ten of his company would shoot ten of the company claiming similar honours in England. One of the conditions of the challenge was that each side should shoot on a range where they had not been accustomed to practice. Captain Mundella's company, the 1st Robin Hoods (Nottingham), sent in a certificated statement, which having been submitted to Colonel M'Murdo, Captain Mundella was informed that his ten were expected to compete with the colonial ten. The following is the complete score of the Robin Hoods:—

	200 yards.	300 yards.	400 yards.	500 yards.	600 yards.	700 yards.	800 yards.	900 yards.	Gross total.
Lieutenant Evans ..	23	18	17	19	20	19	8	9	133
Ensign Perry ..	17	18	19	21	9	20	6	3	113
Corporal Redfern ..	20	15	20	17	16	11	16	10	125
Corporal Smith ..	16	10	18	7	7	10	15	8	91
Private Bass	21	15	17	14	13	12	9	6	107
Private Shepperley	18	17	19	17	10	14	11	11	118
Private Noddall ..	16	13	23	17	13	10	10	10	108
Private Brewster ..	16	14	16	18	9	19	7	7	106
Private Coles ..	20	17	24	15	15	17	7	7	122
Private White ..	27	19	23	18	13	7	3	3	113
Totals ..	190	156	196	163	125	142	109	74	1155
Averages	19.00	15.60	19.60	16.30	12.50	14.20	10.90	7.40	115.50

Captain Mundella had charge of the firing party, and Captain Hay, late of the Meath Militia, and now Adjutant of the 2nd Derbyshire Volunteer Battalion, officiated as umpire.

The annual prize meeting of the Macclesfield corps took place on Saturday at the shooting range, Gawsnorth Moss. The first prize, the challenge cup, badge, silver medal, and £5 given by Captain Commandant T. A. Brocklehurst, was won by Sergeant Snelus. Having won the cup two years successively, it now becomes his property. The second prize, a Heppleston small-bore rifle, given by Mr. C. E. Procter, was won by Corporal Lovatt. The third prize, £5 given by Mr. E. C. Egerton, M.P., was won by Ensign Stancliffe. The fourth prize, £5, also given by Mr. Egerton, was carried off by Sergeant H. Green. The fifth prize, a stereoscope and stand, given by Lieutenant R. May, 1st Manchester Rifle Volunteers, was won by Lance-Corporal Clarke. Several minor prizes were competed for.

The members of the 1st Manchester Corps assembled on their ground, at Barton Moss, to compete for the annual prize, a watch, presented by Mr. Thomas Briggs. The shooting was very good, Sergeant Holmes, of No. 9 company, winning the watch.——On Saturday the 6th Lancashire Administrative Battalion, consisting of the Preston, Leyland, Longton, and Chorley corps, was inspected in Avenham Park, Preston. The battalion was under the command of Sir T. G. Hesketh, Bart., M.P., and was inspected by Colonel Bruce. The volunteers were put through various evolutions, all of which they executed in a very efficient manner. At the conclusion the inspecting officer uttered a few words of commendation to the officers and men.——The battalion prize-shooting of the 56th Lancashire (Salford) Rifle Volunteers took place on Saturday, at the range of the regiment at Clifton. The first prize was a silver cup, value £10, presented by the Major. There were three money prizes attached to the above, which formed the second, third, and fourth prizes. The next prizes were a silver cup, a pint tankard, and a half-pint tankard, presented by Mr. Marple, licensed victualler of Salford, with three money prizes to each. Sergeant Roberts won the cup; Sergeant Williamson winning the second prize. For the third prize Sergeant Jones and Private Bowring tied. On shooting off, Jones won the third prize and Bowring the fourth. Mr. Marple's cup was next shot for. Corporal Swarbrick won the cup, Sergeant Jones and Private Rees tieing for second prizes. On shooting off, the prize was won by Private Rees, Sergeant Jones taking the third prize and Sherratt the fourth. The pint tankard was won by Private Percival, Lance-Corporal Hughes winning the second prize and Corporal Hindley the third. The next prize, half-pint tankard, fell to Private White; Private Scholes winning the second prize and Private Raymond the third, after a tie, and Private Turner the fourth.

The Yorkshire volunteers were engaged last week as follows: The officers' money prizes given to the Hull companies were shot for, and the five prizes were won by Corporal C. Judge, Private England, Colour-Sergeant Meggett, Sergeant T. Kirk, and Private Brown.——The 35th West York have shot part of their annual contests. The challenge medal, open to first-class shots, was obtained by Private T. Aked. The challenge medal for the second class was obtained by Corporal Wall. The challenge medal for the third class was obtained by Private R. Wright. The Hon. Mrs. Ferrand's prize of £5 was won by Private Aked. Mr. John Butterfield's silver challenge cup was won by Private Scaife.——Other prizes remain for competition. The return match between the York and Tadcaster volunteers resulted in a victory for the Yorkists. The York eight registered 214 against 192 by their opponents.——On Tuesday week a match was shot at Tadcaster between six of the permanent staff of the 5th West York Militia and the same number of the 18th West York or Pontefract Volunteers for £5 a side. This match originated in a previous rifle contest between the 1st and 5th West York Militia at Pontefract, when the latter were victorious. The 5th West York Militia were again the winners by eleven marks. A silver mustard-pot, given to the head scorer of the 5th West York by Captain Balguy, was won by Colour-Sergeant Hoare.

On Saturday the annual inspection of the 2nd Durham Volunteer Artillery took place at Seaham Harbour, the inspecting officer being Lieutenant-Colonel Johnson, R.A. The regiment paraded at five o'clock, under the command of Captain P. Mann, the Major Commandant, Earl Vane, being unavoidably absent. The muster-roll of the regiment is 290, and out of that number there were only twelve absent without leave, this circumstance being commented upon by the inspecting officer with much emphasis, as holding out a pattern for other corps to follow. The regiment was put through a series of movements by the inspecting officer, who afterwards addressed the officers and men, and complimented them highly upon the efficiency of the corps.——The annual shooting contest among the three companies of the 15th Durham (Darlington) corps was held last week at their rifle-range at Neasham. On Tuesday a silver cup, given by Lieutenant-Colonel Scurfield (the commanding officer of the corps), was won by Corporal Jackson. Another cup, value £5, given by Mr. W. Scurfield Grey, was won by Private Wigham. Mr. E. Lowndes's cup was won by Private Snaith. On Wednesday Lieutenant-Colonel Scurfield and Private Priestman each scored 39 points at distances of 500, 550, and 600 yards, with five shots at each distance. The latter in shooting off the tie made a centre, the gallant Colonel a miss, consequently Priestman carried off the prize, which was a tea and coffee service, presented by Lieutenant Benson. Forty-three was the highest score for the cap and bullet prize (a silver creamjug), and Bugle-Major Crawford and Private Stabler having tied shot off the tie, which resulted in Crawford's getting two centres and Stablar one. Captain Sparks's silver cup, which was shot for on the same day, was won by Private Wigham. On Friday a silver challenge vase, value £30, was won by Lieutenant-Colonel Scurfield; a consolation prize by Colour-Sergeant Hall, a beautiful timepiece by Private Snaith, a gold albert watchguard by Private Stabler, and an electro flask by Sergeant-Major Wells. Other prizes are to be shot for during the present week.

The shooting in connection with the first meeting of the Northumberland and Newcastle Rifle Association came to a termination yesterday week, the whole of the proceedings passing off with great success. The weather being remarkably fine, the vicinity of the ranges throughout the day presented a busy and animated appearance, this being the case more particularly as the time fixed for presenting the prizes approached. The Morpeth volunteer band was in attendance during the afternoon and played several popular selections of music. Between three and four o'clock in the afternoon arrangements were made for presenting the prizes to the successful competitors. A gay and brilliant assemblage of the élite of the neighbourhood was accommodated in a large circular marquee, at the entrance of which the numerous prizes were presented to the winners by Lady Tankerville. After the presentation three hearty cheers were given for her Ladyship. The competition took place upon Morpeth Common. The first and most exciting competition was for a silver bugle presented by the Earl of Tankerville, and valued at £40. Second prize, by the association, £5; third, £4; fourth, £2. Ten men from each of the eight companies of the 1st Northumberland Rifles shot. The Hexham corps were first, Allandale second, Lowick third, and Belford fourth. Ensign Kirsopp subsequently won the association silver cup; the all-comers' prize fell to the share of Ensign M'Rae, of the Newcastle volunteers; the volley-firing prize was gained by the Lowick corps; and the Duke of Northumberland's cup was won by Private M'Gregor, of the 8th Northumberland Rifles. The first prize, presented by Lord Decies, was won by Private S. Parker, of the 6th Durham; Private M'Rae, of Newcastle, won the silver challenge cup presented by the Corporation of that town. He also carried off a silver cup presented by Mr. Hugh Taylor, of Chipchase Castle. Private Green, of the Newcastle corps, won a silver cup presented by Lord Decies; Corporal Carr, of the 8th Northumberland, the all-comers' prize; and several minor prizes were shot off and won before the conclusion of the admirable meeting the success of which was greatly due to the excellent arrangements made by the association.

MONETARY TRANSACTIONS OF THE WEEK.

(From our City Correspondent.)

A VERY moderate business has been transacted in all Home Securities this week. In prices, however, no change of importance has taken place. The quantity of Stock afloat is by no means extensive. Exchequer Bills have been firm, although the dealings in them have continued restricted.

There is a very large amount of capital on offer in the general discount market; but the demand for accommodation has been moderately active, at the annexed rates for the best commercial paper:—

Thirty days' bills	3¾ ⅞ per cent.	Four months' bills	4½ per cent.
Sixty days' bills	4 ,,	Six months' bills	4½ 5 ,,
Three months' bills	4¼ ,,		

In the Stock Exchange the rates have varied from 2½ to 4½ per cent, if for short periods.

The stock of bullion in the Bank of France having increased by over £500,000, the money market in Paris has become easy. On other parts of the Continent the rates are well supported. They are as follow:—

	Bank rate, per cent.	Open market, per cent.		Bank rate.	Open market.
Paris	4	3½	Amsterdam	3	3
Vienna	5	5	Turin	5	5
Berlin	4	3¾	Brussels	4	3½
Frankfort	3	2¾	Hamburg	—	2½
			St. Petersburg	6	8

About £500,000 in bullion has arrived from various quarters, and several parcels have been disposed of to the Bank of England. The shipments to India have been somewhat heavy—viz., £446,350.

Nearly the whole of the Continental exchanges are favourable, and there is still a profit on the import of gold from America. Mexican dollars have sold briskly, at 63¼d. per ounce. Bar silver is held at 61½d.

The Directors of the Ionian Bank have declared a dividend at the rate of 6 per cent per annum, and a bonus of 7s. 6d. per share.

Very little change took place in the value of English Securities on Monday. Consols were done at 93⅜ ⅞; Reduced and New Three per Cents, 92¼ ½; Long Annuities, 14⅝; Exchequer Bills, 2s. prem. On the following day Consols, for Transfer, were 93⅝ ½; Ditto, for Account, 93⅝ ¾; India Five per Cents, 108¼ ½; Ditto, Debentures, 99⅞ to 100. The Four per Cent Rupee Paper was 98½; the Five per Cent, 107½; and the Five-and-a-Half per Cent, 116⅞. On Wednesday very little change took place in the position of the market. Consols closed at 93⅜ to ½ for Money, and 93⅜ ⅞ for Account. The Reduced and New Three per Cents marked 92 to 92½; India Five per Cents, 108¼; and Exchequer Bills, par to 3s. prem. On Thursday prices ruled steady, at 93⅜ ½ for Transfer, and 93⅝ ¾ for Time. The Reduced and New Three per Cents remained at 92½. India Five per Cents marked 108¼ to ½; and Exchequer Bills, par to 3s. prem.

The biddings for £300,000 in bills on India took place at the Bank on Wednesday. The minimum price declared was 1s. 11⅜d. per rupee on Calcutta and Madras, and 1s. 11⅜d. on Bombay. The applications within the limits amounted to £2,230,000.

The Directors of the Bank of England have made no alterations in their discount regulations.

Greek, Spanish, Mexican, and Turkish Securities have continued firm:—Confederate Scrip, owing to the resistance to the Northern Army offered at Charleston, has advanced in price—the quotation being 26 to 25 dis.; but in the value of other Foreign Securities no material change has taken place. Brazilian Four-and-a-Half per Cents have marked 91½; Egyptian Seven per Cents, 102 ex div.; Greek, 38; Ditto, Coupons, 18¾; Italian Railway, 80½; Mexican Three per Cents, 44½; Moorish Five per Cents, 96; Portuguese Three per Cents, 49¼; Russian Old Five per Cents, 93½ ex div.; Ditto, 1862, 93¾; Ditto Four-and-a-Half per Cents, 90½; Spanish Deferred, 41½; Ditto, Passive, 36¾; Ditto, Certificates, 14; Turkish Old Six per Cents, 96¼; Ditto, 1858, 71½; Venezuela Three per Cents, 25½; Ditto Six per Cents, 59; and Italian Five per Cents, 72¾.

A full average business has been transacted in Joint-Stock Bank Shares, and the quotations have further improved. Australasia have realised 81½; Ditto, New, 37; Bank of Egypt, 27¾; Bank of Queensland, 14; British North American, 49¾; City, 110; English, Scottish, and Australian Chartered, 23; Hindostan, China, and Japan, 25½; Imperial Ottoman, 19½; Oriental, 59; Provincial of Ireland, 92; Scinde, Punjaub, and Delhi, 6¾; Standard of British South Africa, New, 16½; Union of Australia, 54¾; and Union of London, 38½.

The market for Colonial Government Securities has ruled steady. The following are the leading quotations for the week:—Canada Six per Cents, 105; Ditto Five per Cents, 92; New South Wales Five per Cents, 102¾; and Victoria Six per Cents, 114.

Miscellaneous Securities have been dealt in to a moderate extent:—Bombay Gas shares have realised 2⅜, General Credit and Finance of London, 4; Great Ship, ¾; Ditto, Seventeen-and-a-Half per Cent Preference, ½; Italian Irrigation, Six per Cent Bonds, 89¾; Joint-Stock Discount, 7; Madras Irrigation and Canal, 4; National Discount, 9¾; Oriental Inland Steam 3; Peninsular and Oriental Steam, 81½; Ditto, New, 49.

In Railway Shares a very moderate business has been transacted. Prices, however, have, in most instances, ruled firm, and no material change has taken place in them, compared with last week. Annexed are Thursday's closing prices:—

Ordinary Shares and Stocks.—Caledonian, 120¾; Cornwall, 7¾; Great Eastern, 51⅜; Great Northern, A Stock, 127½; Great Western, 66¾; Lancashire and Yorkshire, 118; London and Blackwall, 75¾; London and Brighton, 113½; London, Chatham, and Dover, 42½; London and North-Western, 101⅞; London and South-Western, 100¾; Metropolitan, 128½; Midland, 127½; Ditto, New, 1½ prem.; North British, 55¾; Ditto, York, 83½; North Staffordshire, 81; South-Eastern, 85½; Staines, Wokingham, and Woking, 10½; Stockton and Darlington, 37; West Midland—Oxford, 44½.

British Possessions.—Great Western Four-and-a-Half per Cent Preference, 101½; Ditto Five per Cent, 103½; Lancaster and Carlisle, 104½; London, Chatham, and Dover, 100½; Midland—Bristol and Birmingham, 139; Ditto, Leicester and Hitchin, 95½; North Staffordshire, 22¾; South Wales, 90½.

Lines Leased at Fixed Rentals.—Birkenhead, 91½; Buckinghamshire, 96¾; London and Chatham, 94; Midland—Bradford, 96; Nottingham and Grantham, 95½; Wilts and Somerset, 95.

British Possessions.—Atlantic and St. Lawrence, 61 ex div.; East Indian, 109; Grand Trunk of Canada, 20½; Ditto, 1st Pref., 72½; Great Indian Peninsular, 109; Great Western of Canada, New, 8; Madras Four and Three Quarters per Cent, 102¾; Scinde, 108.

Foreign.—Antwerp and Rotterdam, 9¾; Bahia and San Francisco, 20¾; Dutch Rhenish, 18; Recife and San Francisco, 19½; Sambre and Meuse, Five and a Half per Cent Pref., 10; San Paulo, 9½; Turin and Savona, 3½; Western and North Western of France, 21½.

The return of the Bank of England for the week ending Sept. 16 shows the following results, when compared with the previous statement:—

A decrease of circulation of	£159,706	An increase of bullion of	116,078
An increase of public deposits of	374,108	An increase of rest of	8,618
An increase of other deposits of	575,455	An increase of reserve of	263,833
An increase of securities of	682,397		

The total circulation is £21,487,105; public deposits amount to £7,371,510; and private deposits to £13,484,939; securities are £30,601,940; and the stock of bullion is £15,461,568.

THE MARKETS.

CORN EXCHANGE, Sept. 14.—Only moderate supplies of English wheat have been on offer this week; nevertheless, all kinds have moved off heavily, and prices have given way 1s. per quarter. Foreign wheats have changed hands slowly, and the currencies have had a drooping tendency. Floating cargoes of grain have ruled heavy, and rather cheaper. Malting barley has sold freely, at extreme rates; but grinding and distilling sorts have moved off slowly. The malt trade has continued healthy, at full currencies. Good sound oats have sold at quite late currencies; but heated samples have commanded very little attention. No change has taken place in the value of either beans or peas. The flour trade has been inactive. Prices, however, have been supported.

Sept. 16.—The inquiry for wheat and flour to-day was somewhat restricted, at Monday's currency. Spring corn commanded full prices.

English.—Wheat, Essex and Kent, red, new, 41s. to 48s.; ditto, white, 43s. to 50s.; Norfolk and Suffolk, red, 41s. to 47s.; rye, 34s. to 37s.; grinding barley, 26s. to 28s.; distilling ditto, 29s. to 34s.; malting ditto, 29s. to 40s.; Lincoln and Norfolk malt, 60s. to 66s.; brown ditto, 50s. to 55s.; Kingston and Ware, 60s. to 66s.; Chevalier, 66s. to 68s.; Yorkshire and Lincolnshire feed oats, 18s. to 23s.; potato ditto, 23s. to 27s.; Youghal and Cork, black, 17s. to 22s.; ditto, white, 18s. to 23s.; tick beans, 30s. to 32s.; grey peas, 35s. to 36s.; maple, 38s. to 40s.; white, 37s. to 38s.; boilers, 38s. to 39s. per quarter. Town-made flour, 37s. to 43s.; town households, 20s. to 32s.; country marks 28s. to 32s. per 280lb; French, 35s. to 38s. per sack. American, 19s. to 23s. per barrel.

Seeds.—Mustard, rape, and linseed have been in fair request, at full prices. Otherwise the seed trade has continued in a most inactive state. Cakes are a dull inquiry.

Linseed, English, crushing, 62s. to 68s.; Calcutta, 66s. to 68s.; hempseed, 44s. to 48s. per quarter; coriander, 14s. to 16s. per cwt.; brown mustard seed, 9s. to 12s.; white ditto, 7s. to 8s.; tares, old, 4s. to 5s. per bushel; English rapeseed, 62s. to 65s. per quarter. Linseed cakes, English, £9 10s. to £10 10s.; ditto, foreign, £9 10s. to £10 10s.; rape cakes, £5 to £6 per ton; canary, 48s. to 52s. per quarter; red clover seed, 28s. to 48s.; white ditto, 54s. to 58s. per cwt.

Bread.—The prices of wheaten bread in the metropolis are from 7d. to 7½d.; of household ditto, 5d. to 6½d. per 4lb. loaf.

Imperial Weekly Averages.—Wheat, 44s. 1d.; barley, 34s. 7d.; oats, 21s. 8d.; rye, 31s.; beans, 39s. 10d.; peas, 35s. 10d.

The Six Weeks' Averages.—Wheat, 45s. 5d.; barley, 32s. 10d.; oats, 22s. 8d.; rye, 33s. 1d.; beans, 39s. 8d.; peas, 35s. 8d.

English Grain Sold last Week.—Wheat, 100,030; barley, 11,615; oats, 8549; rye, 651; beans, 1381; peas, 639 quarters.

Tea.—The public sales have gone off slowly, at about previous rates. Privately the demand is inactive.

Sugar.—Most raw qualities have changed hands steadily, and the quotations have been supported. Refined goods are inactive, at 44s. 6d. per cwt. for common brown lumps. The stock is now 113,902 tons, against 86,712 tons at the corresponding period in 1862.

Coffee.—There is a fair average business doing in all kinds, at full currencies. Stock, 10,801 tons, against 9875 tons last year.

Rice.—This article is in moderate request, on former terms. Stock, 42,336 tons, against 60,170 tons in 1862.

Provisions.—There is about an average business doing in most kinds of butter, at about stationary prices. Bacon supports late rates, but the demand for it is by no means active. Hams and lard are firm in price.

Tallow.—The demand is inactive. P.Y.C., on the spot, 42s. 6d. to 43s., and for delivery during the last three months, 43s. per cwt. The stock consists of 42,050 casks, against 35,454 ditto last year.

Oils.—The market generally is steady, at about stationary prices. Turpentine has rather advanced.

Spirits.—Most kinds of rum move off slowly, at 1s. 6d. per gallon for proof Leewards, and 1s. 8d. for East India. No change has taken place in the value of either brandy or grain spirits.

Hay and Straw.—Meadow hay, £2 10s. to £4 10s.; clover, £3 10s. to £6; and straw, £1 8s. to £1 16s. per load.

Coals.—Best house coals, 17s. 9d. to 18s. 6d; seconds, 16s. 3d. to 17s. 3d.; Hartley's, 15s. to 16s.; and manufacturers', 13s. to 15s. per ton.

Hops.—New qualities are in fair request, at from 90s. to 140s. per cwt. All other kinds are inactive, but not cheaper.

Wool.—The market is in a healthy state, and the quotations are well supported.

Potatoes.—The supplies are on the increase, and the demand may be considered steady, at from 60s. to 100s. per ton.

Metropolitan Cattle Market (Thursday, Sept. 17.)—About an average supply of beasts was on sale here to-day, in but middling condition. Good and prime breeds moved off steadily, at fully Monday's currency; otherwise, the beef trade ruled inactive, at that day's rates. The supply of sheep was only moderate. However, the trade was less active than on Monday, yet previous quotations were well supported. The show of calves was moderately good, and the demand ruled inactive, at about previous rates. Suckling calves changed hands at very full prices. Pigs met a slow sale, on former terms. The top price of beef was 5s.; of mutton, 5s. 4d.; of veal, 4s. 8d.; and of pork, 4s. 6d. per 8lb. Per 8lb to sink the offal:—Coarse and inferior beasts, 3s. 6d. to 3s. 10d.; second quality ditto, 4s. to 4s. 6d.; prime large oxen, 4s. 8d. to 4s. 10d.; prime Scots, &c., 4s. 10d. to 5s.; coarse and inferior sheep, 3s. 8d. to 4s. 2d.; second quality ditto, 4s. 4d. to 4s. 8d.; prime coarse-woolled sheep, 4s. 10d. to 5s.; prime Southdown ditto, 5s. 2d. to 5s. 4d.; large coarse calves, 3s. 6d. to 4s. 2d.; prime small ditto, 4s. 4d. to 4s. 8d.; large hogs, 3s. 6d. to 4s.; neat small porkers, 4s. 2d. to 4s. 6d.; suckling calves, 15s. to 40s.; and quarter-old store pigs, 16s. to 25s. each.

Head of Cattle on Sale.—Total supply:—Beasts, 1100; cows, 130; sheep 6700; calves, 305; and pigs, 270. Foreign: Beasts, 404; sheep, 1120; and calves, 210.

Newgate and Leadenhall.—The supply of meat is moderate, and the trade rules steady, as follows:—Beef, from 2s. 8d. to 4s. 2d.; mutton, 3s. 6d. to 4s. 6d.; veal, 3s. 8d. to 4s. 4d.; and pork, 3s. 6d. to 4s. 6d. per 8lb. by the carcass. ROBERT HERBERT.

The Presidents and Vice-Presidents of Departments of the Social Science Association have now been appointed as follows:—First Department—Jurisprudence: President, the Hon. Lord Curriehill; Vice-Presidents, the Hon. Lord Mackenzie, Sir Christopher Rawlinson, the Solicitor-General, and Mr. James Hope, D.K.S. Second Department—Education: President, Mr. Nassau W. Senior; Vice-Presidents, Professor Pillans, Professor Kelland, Dr. Schmitz, and Mr. Campbell Swinton. Third Department—Punishment and Reformation: President, the Hon. Lord Neaves; Vice-Presidents, Sir Walter Crofton; Mr. M. Dunlop, M.P.; Rev. Dr. Lee, Rev. Dr. Guthrie. Fourth Department—Public Health: President, Professor Christison; Vice-Presidents, Dr. Craigie, P.R.C.P.; Dr. Newbigging, P.R.C.S.; and Provost Lindsay, Leith. Fifth Department—Social Economy: President, the Right Hon. Sir John M'Neill, G.C.B.; Vice-Presidents, Mr. E. Chadwick; Professor Playfair, C.B.; Mr. W. Chambers, and Rev. Dr. Alexander. Sixth Department—Trade and International Law: President, Mr. Collier, Q.C., M.P.; Vice-Presidents, the Master of the Merchant Company, the Chairman of the Chamber of Commerce, Mr. James Richardson, and Mr. C. Cowan. The reception committee have prepared a list of expected visitors, from which we observe that Lord Brougham, the president of the society, has been invited to become the guest of the Lord Provost during his stay.—*Edinburgh Courant.*

The *Sport* publishes an extract of a letter from Gérard, the lion-killer, who, it may be remembered, started last spring for the purpose of discovering a communication between the west coast of Africa and Algiers, viâ Timbuctoo. This letter, which is dated from Whydah, on the coast of Upper Guinea, June 24, contradicts a rumour that Gérard had been unsuccessful in his attempt. He says:—"I discovered, not without great difficulty, a road through the interior. In a few days I shall leave Polo-Popo, situated at a short distance west of Whydah. If nothing stops me, I shall reach the mountains of Kong in September, in three months after the sources of the Niger; Timbuctoo in the beginning of the spring, and Algiers at the end of the summer. I start full of confidence in the success of my undertaking."

INVERNESS AND PERTH RAILWAY.

IT is not recorded that Banquo received an answer to his question, "How far is't called to Forres?" But we learn in these latter days, from railway time-tables, that it is within a fraction of five-and-twenty miles of Inverness, the capital of the Highlands. It is a pleasantly-situated little town, near the River Findhorn, rich in gardens and orchards. The "blasted heath" that chilled the soul of Banquo and Macbeth, if it was near Forres at all, has long since been converted into smiling cornfields, as rich and productive as almost any in England; and the only "hurly-burly" now associated with the district is the arrival and departure of the Perth train. Forres is the point at which we quit the East Coast line of railway, on the new route from Inverness to Perth. Thence it proceeds in a south-westerly direction, threading the valley through which some of the tributaries of the Findhorn find their way to the Laigh (or low ground) of Moray, thence to Strathspey and across the Grampian Hills, and finally, following the downward course of the Garry, the Tummel, and the Tay, to the fair city of Perth. A line of more varied Highland scenery it would be difficult to name; and, from the utter change it presents to ordinary railway travelling, it is sure to become popular with tourists. Here are miles and miles of wild barren solitude, a great part of it the bleakest bit of moorland in the Highlands, with vast mountain ranges, scarcely ever without snow, stretching as far as the eye can reach on every side, and no sound to be heard but the brawling of cataracts and the cackling of grouse. At some of the stations not a house is to be seen except the little wooden bothie appropriated by the station-master, whose ponderous bell rings out a loud but most unnecessary injunction to passengers to take their seats. A quiet word to Donald or Evan and his collie-dog, telling him that the engine had taken in water, which was the sole object for stopping, would serve all the purposes of the company, and spare the neighbouring rocky corries the necessity of echoing the noisy clatter of the bell. The Kensington barracks would probably accommodate comfortably the whole population dwelling along some fifty or sixty miles of the line.

It may well be asked how it could have entered the mind of prudent Scotchmen to construct a line of railway through so desolate a land? The answer is easy. Beyond this cheerless desert, along the shores of the Moray Firth, and away through the counties of Inverness, Ross, Sutherland, and Caithness, there is a large and prosperous population, to whom speedy and convenient access to the markets of the south is a matter of the utmost importance. Just as, in the first days of railway construction, it was obvious that Liverpool and Manchester ought to be united by such a line of communication, although Chatsworth Moss intervened, so, on a more diffusive scale, ought the productive districts of the North to be brought into direct communication with the cities and markets of the Lowlands, in spite of the natural barrier which the Grampians interpose. The necessity was long obvious; but it is, perhaps, fortunate that it was not yielded to at first. During the railway mania of 1845 a bill was brought into Parliament for the construction of this line, but was rejected on account of the length of some of the gradients. Steeper ascents had been sanctioned before, but none so long; and, as the old story tells us that little boys should not be allowed to bathe till they have learned to swim, so it pleased Parliament in its wisdom to reject long ascents by railway until they were tested by experience. The delay has probably saved the shareholders all the difference between a paying and a losing line. At that time railways were made comparatively reckless of expense—in defiance of proprietors of land and irrespective of engineering difficulties. The process of time has taught wisdom, and this line of railway, which actually scales the Grampian Hills, the highest range in Scotland, has been made at an expense of less than £8000 per mile. The landed proprietors, instead of opposing, have been the most active promoters of the line; and the scrip is held, not in Capel-court, but by the landowners, farmers, shopkeepers, and tradesmen of the Highlands.

Another cause has promoted the construction of this line. When the Inverness and Perth line was rejected by the House of Commons, permission was given to an Aberdeen company to construct a railway to Inverness. They failed to make it even half way Inverness completed the communication years afterwards, but it was found impossible to induce the Aberdonians to cultivate quick travelling. Their own line from Aberdeen to Keith was yielding a high dividend (latterly 7 per cent), and they had no object in hurrying northern travellers and goods through the country. The rate of transit by this line averages from sixteen to eighteen miles an hour; and, as the detour by Aberdeen is fully sixty miles between Forres and Perth, it was not very agreeable to tourists to make it at so slow a rate. At the banquet given at Inverness last week, celebrating the opening of the direct route to Perth, there was great cheering and laughter when Mr. Henry Baillie, M.P., said:—"We have had some experience of slow railroad communication in this country, and I need not say that it has not given very general satisfaction." We are now promised that next spring the journey from Perth to Inverness will be performed in five hours, whereas hitherto it has taken six hours to travel from Aberdeen to Inverness, besides the journey from Perth to Aberdeen.

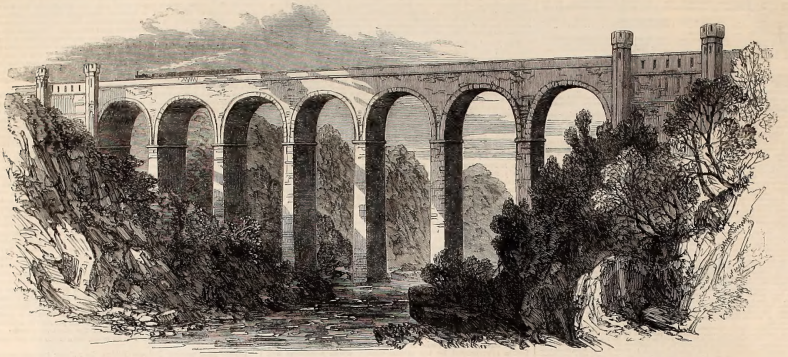
The engineer of the line is Mr. Joseph Mitchell, C.E., of whom it has been justly said that for carrying an iron road through the Highlands no engineer in Britain was so well qualified, no other person having such a knowledge of the country or such a staff of well-qualified assistants for carrying out the undertaking.

The country through which the railway passes is, as we have said, peculiarly mountainous in its character. Shortly after leaving Forres we commence a steady and severe ascent, which continues with little intermission for twenty miles. The lowest pass of the Monagh Liagh range of hills is here attained, at an elevation of about 1100 ft. above the level of the sea. We soon leave the cultivated land. After passing over an enormous embankment, more than half a mile in length and 52 ft. high, the line enters the pleasure grounds of Sir Alexander Gordon-Cumming, of Altyre, the representative of a family that once played a remarkable part in the history of Scotland. One of his ancestors was the Wolf of Badenoch, who burned the Cathedral of Elgin, in 1390; and another was the Red Comyn, stabbed by King Robert Bruce in the Greyfriars' Church of Dumfries. The roving spirit of the race does not seem to have died out. The present Baronet is a keen sportsman, the intimate friend and companion of the late Mr. Charles St. John, author of the "Wild Sports of the Highlands;" and his brother, Ronaleyn Gordon-Cumming, is the famous African lion-hunter, whose adventures in Cape Colony and Natal created so much talk some years ago. The Altyre woods contain some noble specimens of the native Scottish pine; but that portion which the railway passes through is a mixed plantation, in which oak and larch preponderate. Not far away is the Castle of Darnaway, the seat of the Earls of Moray, built originally by that grand old hero Randolph, the friend and faithful follower of the Bruce. Some interesting geological formations are revealed in the cuttings, which sometimes penetrate through sixty feet of gravel, clay, and rock, exhibiting the stratified old red sandstone, reposing unconformably on the ends of crystalline quartzite and gneiss. At other points the line cuts through deep beds of peat moss, through which project the roots of gigantic oak and fir trees that once formed the great Caledonian forest of which we read in "Tacitus." At one part of the ascent no less than 40,000 yards of solid rock had to be removed.

Near the Dunphail station we enter the property of Major Cumming Bruce, M.P., whose residence is situated, in a charming wilderness of natural birch-wood, on the banks of the river Divie. This stream is crossed on a viaduct 550 ft. long, consisting of seven splendid arches, each of 45 ft. span, founded upon solid rock, and rising from the river to the height of 108 ft. It is built of dark grey micaceous gneiss, from quarries opened in the neighbourhood, the turrets and arches being ornamented with light-coloured, hard freestone. The structure, of which we furnish an Engraving, forms an imposing feature of the landscape. Immediately beyond it we pass through another heavy rock cutting, 20 ft. to 35 ft. deep, whence 63,000 cubic yards of hard crystalline rock had to be taken away, and thence the railway fairly opens in the upland moors. The gradient here is 1 in 70 and 1 in 75; the line passes through moss and moor, unrelieved by almost a single tree, till we enter the district of Strathspey.

Now comes a great change of scenery. The last extensive view we had in ascending from Forres was to the north, embracing the Moray Firth and the distant hills of Ross and Sutherland. At the summit level of the first rise, we look southwards into the very heart of the highlands of Inverness-shire. In the centre of a great valley of purple moorland, in which here and there appear a few patches of corn and turnips, quite insufficient to give character to the landscape, runs the great river Spey. On the left are long ranges of low hills covered with pine woods, sloping towards the line of railway, near which the forest assumes a mixed character, and Castle Grant, the seat of the Earl of Seafield, head of a great highland clan, appears among a wide expanse of oak and elm. In front is the little village of Grantown; and beyond, stretching to the right as far as the eye can reach, are the Grampian Hills. We have given an Illustration of this wide panorama, from near the river Dulnain, a tributary of the Spey. Hope is entertained that the railway will be the means of working a great improvement in this part of the country. Hitherto the land has been abandoned to natural pasture, chiefly because of the difficulty and cost of importing those artificial manures and feeding-cakes which are essential to high farming. Hitherto these things have had to be carted from Inverness, a distance of more than thirty miles, at an expense which made their use unremunerative; but now it is expected that farmers will find it profitable to bring into cultivation thousands of acres that are comparatively worthless. Judging from appearances, this great section of Strathspey seems to be a very suitable subject for giving a fair trial to a system recommended in a very practical little work on the management of Highland property, published by Blackwood, which says that there is a great deal of land in the north, yielding only 4d. or 6d. per acre at present, which, if leased to industrious peasants at the same rate, would, at the end of nineteen years, prove to be worth from £1 to 30s. per acre per annum.

Shortly after passing Dulnain Bridge, the railway traverses what in Scotland must be held to be classic ground—the farms which give name to the reel of Tulloch and the song of Tullochgorum. Of this latter Burns says that it is the best song Scotland ever saw. It was written by a Jacobite Bishop of the Scottish Episcopal Church, and, though few admirers of Burns will endorse the criticism of the great national poet, everyone must sympathise with the genial, hearty sympathy of the poem, the burden of which is that Whig and Tory should all agree and join in dancing the reel of Tullochgorum. This district was the scene of about the last battle fought in Britain on behalf of King William. The Highlanders of that day knew nothing of the constitutional questions for which England was prepared to make the gravest sacrifices. They recognised Morayshire and the Lothians to be, as Lochiel expressed it, "all men's prey;" but political matters were left implicitly to the chiefs of the clan. On this occasion the tribes of Maclean, Macdonald, Macpherson, Cameron, and the Grants of Glen Moriston were gathered together on the Haughs of Cromdale; they were surprised by the partizans of King William at early dawn and utterly routed. The battle has been made the subject of a spirited ballad, called "The Haughs of Cromdale."

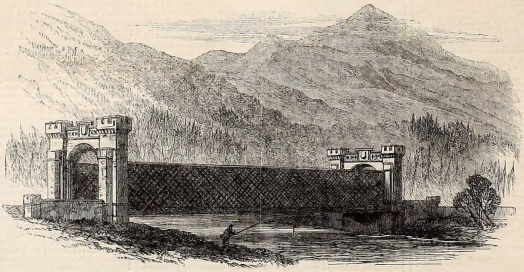


From Strathspey we pass into Badenoch, the district of the Macphersons. Between the two is the rock of Craigellachie, which has become the crest and motto of the clan Grant:—"Stand fast, Craigellachie." Mr. Ruskin makes eloquent reference to this picturesque crag in his "Two Paths," where he contrasts the peasantry of India, from none of whom are the knowledge and practice of art far distant, with the Scottish Highlander, to whom even the carving of a rude shepherd's crook is a matter of the utmost difficulty. He says:—"In one of the loneliest districts of Scotland, where the peat cottages are darkest, just at the western foot of the great mass of the Grampians, which encircles the sources of the Spey and the Dee, the main road, which traverses the chain, winds round the foot of a broken rock, called the Cray or Craig Ellachie. There is nothing remarkable in either its height or form. It is darkened with a few scattered pines and birch-trees, and touched along the summit with a flush of heather; but it constitutes a kind of headland or leading promontory in the group of hills to which it belongs—a sort of initial letter of the mountains, and thus stands in the mind of the inhabitants of the district—the Clan Grant—for a type of the country upon themselves. Their sense of this is beautifully indicated in the war cry of the clan, 'Stand fast, Craigellachie!' You may think long over these few words without exhausting the deep wells of feeling and thought contained in them—the love of the native land and the assurance of faithfulness to it. You could not but have felt if you passed beneath it at the time when so many of England's dearest children were being defended by the strength of heart of men born at its foot, how often among the delicate Indian palaces, whose marble was pallid with horror, and whose vermilion was darkened with blood, the remembrance of its rough grey rocks and purple heaths must have risen before the sight of the Highland soldiers—how often the hailing of the shot and the shrieking of the battle, would pass away from his hearing, and leave only the whisper of the old pine branches, 'Stand fast, Craigellachie!'"

The country opens out from this point southwards; the valley of the Spey becomes more cultivated, and between Loch Inch and Kingussie there are fields of oats and turnips that would do no discredit to any district of Scotland. It was here that the translator of Ossian, James Macpherson, took up his abode, and built a mansion which would have been handsome in another place, but here it is out of keeping with the character and traditions of the country.

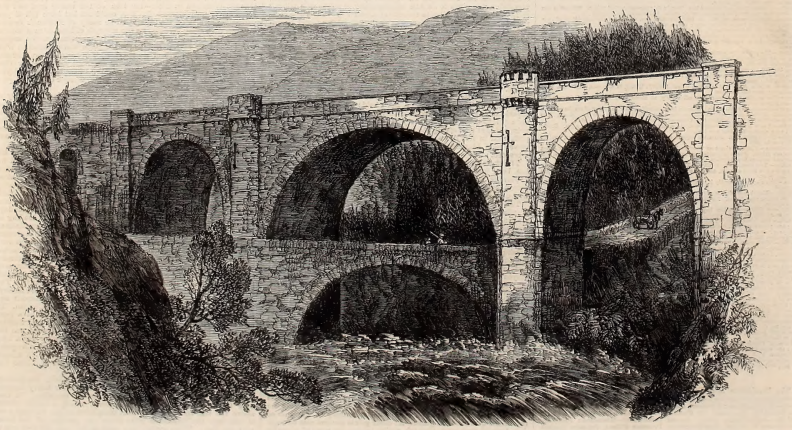
Macpherson seemed determined to keep up the mystery of his translations after his death as well as during his lifetime, and we suspect had a secret pride in hearing the authenticity of Ossian broadly called in question, for, of course, what was not translation was original, and whatever merit was taken from Ossian necessarily became due to Macpherson. All traces of the Gaelic MSS. were destroyed. A good many years ago his venerable son-in-law, Sir David Brewster, and Mr. Carruthers, of Inverness, spent some days in searching through his papers, but nothing was found tending in the least to throw light upon the vexed question of the translations. Until the country was opened up by roads, the district of Badenoch was peculiarly the seat of Highland lawlessness. It is further removed than any part of Scotland from the seacoast. Great natural mountain passes guard it on every side, and within the amphitheatre formed by the Grampians and Monagh Laigh is a great district, well suited for maintaining a population in the rude style of living which prevailed in former times among the people of the Highlands. The Lords of Badenoch were long a dominant family in Scottish history. The country is now chiefly in possession of the Macphersons and Macintoshes, the chief constituents of the powerful clan Chattan. In nearly all the rebellions and revolutions in Britain they had a part, and often distinguished themselves by rare hardihood and fidelity. One of the most gallant friends of Prince Charles Edward was the chief of the Macphersons. They "skulked" together for a long time among the caves of Craig Dhu, and for no less than nine years Cluny was concealed by his people after the rebellion of '45, though a troop of redcoats occupied the country and a reward of £1000 was upon his head.

Beyond Kingussie, until we reach Blair Athole, the country is singularly bleak and uninteresting. The River Garry tumbles along gaily in an interminable succession of cascades. It rises near the summit level of the railway, which is about 1500 ft. above the sea, and is the constant companion of the traveller until it falls into the Tummel, a little above the junction of the latter with the Tay. When we saw it, a week or two ago, the river was in great flood, and it would have been difficult to single out along



INVERNESS AND PERTH RAILWAY.

DIVIE VIADUCT.

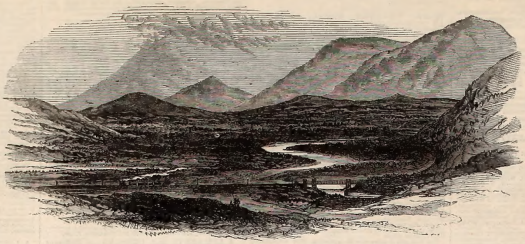


the route a more impressive sight than the Garry rushing beneath the double bridge by which it is spanned at Calvine. We subjoin an Engraving which shows the peculiar construction of this part of the railway—the viaduct crossing the stream, and embracing in one of its arches the old bridge of the roadway. Beneath both the river rushes with fearful impetuosity. Some of the huge planks used in the scaffolding were still planted firmly in the stream, and the water rushed up their sides to a height of 8 ft. or 10 ft., spreading out like a fan and falling from the crest in brilliant clouds of spray. The banks of the river are covered with birch-trees, which droop in graceful festoons to the water's edge; and the Duke of Athole has made miles of pathway, opening up the intricacies of this picturesque ravine.

It is with a sense of relief that one reaches the comfortable little station of Blair Athole. Here are smiling cornfields, breadth of fine woodland, and unexceptionable inns; the long dreary miles of stony moor and mountain through which we have passed—places to

TILT VIADUCT.

dream of and shudder in on a winter's night—prepare one to enjoy the substantial comforts of this Lowland resting-place. It is a centre of pretty excursions, including the Falls of Bruar, the Falls of Tummel, Glen Tilt, &c. But, if time is limited, the tourist had better forego the temptation to remain at Blair Athole and push on with the train to Dunkeld, one of the most charming little spots in Scotland. Immediately beyond the Blair station the train crosses the river Tilt on a handsome iron bridge of open ironwork, whence there is a fine view of the well-formed and richly-tinted hills of this part of Perthshire. The incline is now all down hill, and the train speeds rapidly along towards an ever-narrowing gorge. In a moment it is plunged into the darkness of a tunnel, on issuing from which the whole romantic beauty of the famous Pass of Killiecrankie stands revealed. It was at the entrance to this mountain fastness, in the cause of King James, that Viscount Dundee, variously styled "The Bloody Claverhouse" and "Bonnie Dundee," was slain in the moment of victory. He allowed King

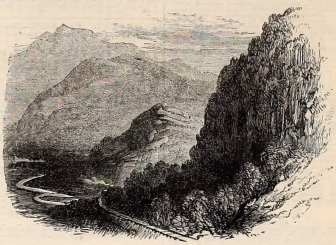


BRIDGE OVER THE GARRY AT CALVINE.

INVERNESS AND PERTH RAILWAY.

William's troops to pass through the narrow rocky defile in order that their destruction might be the more complete when routed. The Highlanders fell upon them with great impetuosity. They reserved their fire till at close quarters, and then, throwing away their guns, made savage use of the native broadsword. The Royalists were completely routed, and their destruction in the narrow gorge of Killiecrankie was great. But the death of Dundee rendered the victory abortive: the Highlanders scattered to their homes, and the remnant of the host was put to flight at the Haughs of Cromdale. A long viaduct runs along the foot of the pass, beside the rushing waters of the Garry; but one has scarcely time to admire the crags, the varied foliage, the precipitous sides of the ravine, and the black abysses through which the river cleaves a way, when the train issues in peace upon the wide-spread fertile valleys and distant hills of transparent blue that stretch away to the Lowlands from the banks of the beautiful river Tay.

The rest of the journey is through comparatively well-known ground. The beauties of the venerable little cathedral town of Dunkeld have been celebrated a hundred times. The whole district is one of surpassing beauty, and its rich soft aspect is all the more agreeable by the contrast with Dramochter and Dalwhinnie, which have been left behind. The whole distance from Inverness to Perth is 144 miles, and the saving effected, as compared with the détour by Aberdeen, is just sixty miles.



The carriages are new and comfortable, the officials have been trained under the Inverness and Aberdeen Junction Company, who work the Perth line, so that this new railway will speedily settle down as one of the recognised institutions of the country, destined, we trust, to enjoy the same immunity from accidents and misfortunes that has characterised the other lines under the same able management.

HAIR JEWELLERY.—ARTIST in HAIR. DEWDNEY begs to inform Ladies or Gentlemen that he beautifully makes, and elegantly mounts in Gold, Hair Bracelets, Chains, Brooches, Rings, Pins, Studs, &c., and forwards the same at about one half the usual charge. A beautiful collection of specimens, handsomely mounted, kept for inspection. An Illustrated book sent post-free.—Dewdney, 172, Fenchurch-street, London.

THE ALEXANDRA HAIR-WAVER, patronised by H.R.H. the Princess of Wales, is the invention of UNWIN and ALBERT, Court Hairdressers, 24, Piccadilly, of whom only they can be obtained at 1s. the pair; by post, 14 stamps.

UNIVERSAL MICROSCOPE. Price £5 5s.
SMITH, BECK, and BECK,
31, Cornhill, E.C. (late 6, Coleman-street),
Catalogues sent on receipt of six postage-stamps.

FIELD GLASSES.—W. and J. BURROW, Malvern.
London: ARNOLD, 72, Baker-st.; WALES and CO., 56, Cheapside.

KEYZOR and BENDON'S TWO-GUINEA BINOCULAR FIELD, RIFLE, or OPERA GLASS.—The extraordinary power of this instrument renders it adapted to define objects distinctly at ten miles' distance. Suitable for the theatre, racecourse, target practice, sportsmen, tourists, and general outdoor observation. Illustrated Price-lists of Optical Instruments for two stamps.—50, High Holborn, London.

POCKET BAROMETER, COMPASS, and THERMOMETER, all in one, the size of a watch, for telling the weather, the heights of mountains, direction of winds, and temperature of the air. Guaranteed for 12 months. Price £4 15s., sent free. S. and B. SOLOMONS, Opticians, 39, Albemarle-st., Piccadilly.

ACHROMATIC MAGIC and DISSOLVING LANTERNS.—The advantage of achromatic lenses over the common lenses now in use is brilliancy and beautiful definition. No additional charge is made upon this improvement, as a large sale is anticipated. Catalogue sent free.—S. and B. SOLOMONS, Opticians to the Government, 39, Albemarle-street, Piccadilly.

THE PLANETS and DOUBLE STARS seen distinctly by a new Telescope for £5, which will also distinguish the face of a sheep and features of a man four miles, the sign of a public-house five miles, shot marks upon a target two miles, and time by a church clock ten miles. This instrument is guaranteed in writing to perform the whole of the above, and to be equal in the most important respects to telescopes costing £70. It has a 3-in. superior achromatic object-glass, two eyepieces, &c., with portable metal tripod stand with jointed claw feet.—S. and B. SOLOMONS, 39, Albemarle-street, Piccadilly. Persons are invited to apply for a diagram with full particulars, sent free. Powerful small pocket telescopes, opera, field, and general outdoor glasses.

SPECTACLES.—The PATENT TINTED SPECTACLES are patronised by the majority of the nobility, including Viscount Palmerston. They give extraordinary relief by day and night to weak, dim, and defective vision. The adaptation of spectacles to imperfect vision by experienced persons is, indeed, of vital importance. One of the Firm who has had great experience and practice attends to this branch only.—S. and B. SOLOMONS, 39, Albemarle-street, Piccadilly. Opposite the York Hotel.

DEAFNESS.—The SOUND MAGNIFIER and INVISIBLE VOICE CONDUCTOR, for Deafness. It fits into the ear not perceptible, removes singing noises in the head, and enables deaf persons to hear distinctly at church and at public assemblies.—S. and B. SOLOMONS, 39, Albemarle-street, Piccadilly.

SALTBURN-BY-THE-SEA, CLEVELAND.

THE ZETLAND HOTEL, at this delightful Marine Watering-place, is NOW OPEN, and is studiously arranged in all Departments to meet the requirements of comfort and luxury. It contains about Ninety Rooms, comprising large coffee and dining rooms for gentlemen; ladies' coffee and drawing rooms; drawing, dressing, and bed rooms en suite; spacious reading-room, billiard-room, smoking-room, bedrooms, &c. Attached are excellent stables and coachhouses, with bedrooms for livery servants. A platform connects the station with the Hotel, and porters attend the arrival of every train. The scenery around Saltburn is most charming and varied; whilst the beach, unrivalled in extent and firmness, offers all the attractions desired by visitors at the Seaside. Inquiries may be addressed to, and all particulars obtained from, WILLIAM BANKS, Manager (late of the New Club, Edinburgh).—Saltburn-by-the-Sea, July 27, 1863.

HASTINGS.—The QUEEN'S HOTEL, conducted by the Queen's Hotel Company (Limited), Hastings-on-the-Sea, close to the rail. Tariffs of Mr. RAINGER, Manager.

FURNISH YOUR HOUSE with the best articles at DEANE'S Ironmongery and Furnishing Warehouses. Established A.D. 1700. New Illustrated Catalogue and Priced Furnishing List gratis and post-free.
Deane and Co., The Monument, London-bridge.

CHUBBS' LOCKS and FIREPROOF SAFES with all the newest improvements. Street-door Latches. Cash and Deed Boxes. Full Illustrated Price-lists sent free.
Chubb and Son, 57 St. Paul's-churchyard, London.

WASHING, WRINGING, DRYING, and MANGLING MACHINERY and APPARATUS, for Families, Hotels, Institutions, &c. Adopted by her Majesty's Government. Indiarubber Wringers from £1; Washing-machines, £3 10s.; Mangles, £2 10s.—WILLIAMSON, 133, High Holborn.

EVANS'S PRIZE KITCHENER.—This matchless Kitchener obtained a Prize at the Exhibition of 1862. It is adapted for the Cottage or Mansion, from £5 5s. to £30. Also, larger sizes for Hotels, Taverns, Private and Public Schools, Clubhouses, Hospitals, Unions, &c., with Steam Apparatus, from £50 to £100 and upwards.
Showrooms, 33 and 34, King William-street, London-bridge.
Manufactory, 10, Arthur-street West, adjoining.

HYACINTHS, TULIPS, CROCUSES, &c. BUTLER and M'CULLOCH'S choice Selections, suitable for the Decoration of the Greenhouse or Flower Garden, £5, £2 10s., £1 5s., and £1 1s., carriage-free, particulars of which are given in their Catalogue or Amateur's Guide, sent free upon application.
Butler and M'Culloch, Covent-garden Market, London.

GOOD SOUND CLARET, 14s. per Dozen; ditto, 1858 vintage, 18s.; bottles and railway carriage included.—HENRY BRETT and CO., Importers, Holborn-bars, and 30, Regent-street. Established 1829. Prices current on application.

HEDGES and BUTLER, 155, Regent-street, London, W., and 30, King's-road, Brighton, invite attention to their varied stock of choice OLD PORT, consisting of
Port of the celebrated vintage 1820 .. .. £6 0 0 per dozen.
Port of the vintage 1834 .. .. 5 8 0 "
Port of the vintage 1840 .. .. 4 4 0 "
Port of the vintage 1847 .. .. 3 12 0 "
Port for ordinary use, 30s., 36s., 42s., 48s., and 60s. per dozen.

DÉPOT of genuine HUNGARIAN WINES, 7, Mincing-lane, London, E.C. Open for tasting free of expenses. Assorted sample dozen cases to 24s., 30s., and 36s. Price-lists will be sent on application.—MAX GREGER (from Hungary).

WINE.—Cockburn's Port, 40s.; Sherries, 18s. to 60s.; and Clarets, 14s. to 80s. To be obtained pure and cheap of the IMPERIAL WINE COMPANY, which imports the choicest Wines, and sells to the public at reasonable prices.
Cellars—Marylebone Courthouse, W.
Stores and Offices—314, Oxford-street, W.
Export and Bottling Vaults—15, John-street Crutchedfriars, E.C., London.

INDIGESTION.— MORSON'S PEPSINE WINE, containing the digestive principle prepared from fresh calves' stomachs, combined with a rich stomachic wine, is a perfectly palatable form for administering this popular remedy for weak digestion.
Manufactured by T. Morson and Son, 19 and 46, Southampton-row Russell-square, W.C., in bottles at 3s., 5s., and 10s. each.

TURTLE.—McCALL'S WEST INDIA. Superior quality, prepared by new process. Flavour unsurpassed. Real Turtle Soup, quarts, 10s. 6d.; pints, 5s. 6d.; half-pints, 3s. Callipash and Callipee, 10s. 6d. per lb. Sold by leading Oil and Italian Warehousemen, Wholesale Chemists, and others.
J. McCall and Co., Provision Stores, 137, Houndsditch, N.E.
Prize Medal for Patent Process of Preserving Provisions without overcooking, whereby freshness and flavour are retained.

CAPTAIN WHITE'S ORIENTAL PICKLE, CURRY, or MULLIGATAWNY PASTE, Curry Powder, and Curry Sauce, may be obtained from all Sauce Venders, and wholesale of
CROSSE and BLACKWELL, Purveyors to the Queen, Soho-square, London.

A Delicious Sweetmeat. Sold by Grocers and Confectioners.
FRYS' CHOCOLATE CREAMS.
Medal awarded to Fry and Sons, 1862.

HORNIMAN'S PURE TEA CHEAPER. Full benefit of reduced duty obtained by purchasing Horniman's tea in packets; very choice at 3s. 4d. and 4s. "High Standard" at 4s. 4d. (formerly 4s. 8d.) is the best imported.

PRICE'S CHILD'S NIGHT LIGHTS are perfectly safe, and burn their time. The quality of these Night Lights can now be relied on.

SHERWOOD BED LIGHTS, Sixpence and Eighteenpence a Box. These candles are made to supply a want very generally expressed—a cheap, really good chamber candle. They will be found inferior only to "Price's Candles, which will not drop grease when carried," which are sold in Boxes, One Shilling and Three Shillings each.

GLYCERINE, which very simple tests show to be impure, is being sold on the statement that it is "in every respect equal to Price's." Most medical men prescribe PRICE'S GLYCERINE. Where purity is of importance, patients can ensure it by desiring to have their Glycerine in 1 lb., 8 oz., 4 oz., or 2 oz. bottles, with capsules over the stopper, marked "Price's Patent."—Belmont, Vauxhall.

STARCH MANUFACTURERS
TO H.R.H. THE PRINCESS OF WALES.
GLENFIELD PATENT STARCH, used in the Royal Laundry, and awarded the Prize Medal, 1862.

COALS.—COCKERELL'S COALS, price 24s., cash. Central Office, No. 13, Cornhill, E.C.

DINNEFORD'S FLUID MAGNESIA is an excellent remedy for Acidity of the Stomach, Heartburn, Headache, Gout, and Indigestion, and as a mild aperient for delicate constitutions. 172, New Bond-street, London; and all Chemists.

THE KING of BAVARIA has for many years sanctioned the manufacture of the most efficacious medicine, known under the name of the Essential Spirit of Melissus. Mr. Wilderich Lang continues to carry on the manufacture of this universal remedy for weaknesses of all kinds. For Headache and Toothache it is unquestionably one of the best cures, and, as a means for imparting vigour to the system, is unsurpassed. Sold in 1s. 6d. and 3s. bottles, wholesale and retail, by BUTLER and CRISPE, Chemists to the Royal Family, 4, Cheapside (corner of St. Paul's), London; and respectable Chemists throughout the country.

ALL afflicted with WEAK EYES may obtain instant relief by using Dr. WARNER'S EYE WATER; it removes all inflammation arising from cold, dust, or constitutional causes.—Sold in bottles, 2s. 9d., 4s. 6d., by Sanger, Oxford-st.; Prout, Strand; Barclay, Farringdon-street; Hooper, London-bridge.

ARTIFICIAL TEETH, exquisitely enamelled to nature, detection impossible, purest materials and best work, on Mr. ESKELL'S patented and painless plan of self-adhesion. His Treatise free for seven stamps.—8, Grosvenor-st., Bond-st., W.; and at 39, Bennetts-hill, Birmingham. Consultations free.

TEETH.—Messrs. GABRIEL'S INVENTION, OSTEO-EIDON (by her Majesty's Letters patent). Artificial Teeth, from one tooth to a complete set, without pain or extracting stumps, at half the usual charges, by Messrs. Gabriel, Dentists.
London: 27, Harley-street, W., and 34, Ludgate-hill, City (over Benson's); 134, Duke-street, Liverpool; 65, New-street, Birmingham. References to patients. Gabriel's "Treatise on the Teeth" gratis, or free by post. Diploma 1815. Consultation free.

LADIES NURSING.—ELAM'S NEW NIPPLE-SHIELD overcomes all difficulty in nursing, from whatever cause it may arise. Price 4s. 6d.; by post, 6d. extra.—Elam, 196, Oxford-street.

WANTED, LEFT-OFF CLOTHES, Uniforms, Furniture, Miscellaneous Property, &c. The highest price given. Ladies or gentlemen waited on by addressing to Mr. or Mrs. G. HYAM, 10, Beak-street, Regent-street, W.; or, Parcels being sent, the utmost value in cash immediately remitted. Established 1820.

THE LORD DUNDREARY EQUILIBRIUM CHAIR. Extremely comfortable, good, and very cheap. "There's the idea!"—A. SEDLEY and CO., 210, Regent-street, London, W., Patentees of Equilibrium Chairs.

SEDLEY'S Patent EQUILIBRIUM CHAIRS are the most comfortable and cheapest yet offered to the public. Capital for India, packing up in less space than any other chair. Also, first-class Furniture, Carpets, &c., at very moderate prices. 210, Regent-street, London, W.

DRAWING-ROOM FURNITURE, of the most superior design and workmanship, arranged in complete suites, and covered in brocaded silks, rice moquette, and Neuilly tapestry, in all colourings, always ready for inspection and delivery, at prices varying from 35 guineas per suite for cash.—A. SEDLEY and CO., Upholsterers, 210, Regent-street, W.

FURNITURE, CARPETS, and BEDDING (CARRIAGE-FREE), see our ILLUSTRATED CATALOGUE, containing Prices and Estimates for Furnishing Houses of different classes, which will be forwarded gratis. This book is universally allowed, for its practical utility, to be unique. LEWIN CRAWCOUR and CO., Upholsterers, 73 and 75, Brompton-road, Knightsbridge, London.—N.B. Fifty Drawing and Dining Room Suites, from 12 to 100 guineas. An assortment of Old Oak Furniture. Established 1810.

TO PARTIES ABOUT TO FURNISH. An elegant SUITE of DRAWING-ROOM FURNITURE, in fine Italian Walnut-wood, in perfect condition, for SALE, an unusual bargain. Price, complete, 38 guineas. It comprises a handsome settee, two easy chairs, and six prettily-shaped drawing-room chairs, in rich reps, en suite; fine centre and occasional tables, beautifully designed chiffonier, fitted with plate-glass back and doors and marble top; two fancy occasional chairs, and a large chimney-glass in gilt frame. Also, a superior DINING-ROOM SUITE in Spanish Mahogany, and covered in morocco, 30 guineas; and two handsome and complete Bedroom Suites in mahogany and American birch, including winged wardrobes and marble-top washstands, and new and superior bedding, at 30 and 28 guineas each suite. The whole nearly new, and well worth double. May be seen at LEWIN CRAWCOUR and CO.'s, Upholsterers, &c., 73 and 75, Brompton-road, Knightsbridge. See our Illustrated Catalogue, containing 380 designs, forwarded gratis.

ANTIQUE FURNITURE, for Dining-room and Library, old oak, of a very choice character, suitable for mediæval decorations; the carvings are chaste and elaborate. Dining-room set consists of ten high-backed chairs, a pair ditto elbow chairs to match, large telescope dining-table, with extra leaves, a dumb waiter, and a truly beautiful sideboard, with plate-glass back. Price, complete, 68 guineas—half its value. The library set comprises a magnificent 8-ft. bookcase, six Gothic chairs, library table en suite. On view at the BELGRAVE FURNISHING COMPANY, 12, Sloane-street, Belgrave-square.

LE SOMMIER ÉLASTIQUE PORTATIF. The foundation for all mattress bedding should be elastic, and the usual spring mattress is too heavy and cumbersome for general use. HEAL and SON'S new Patent LE SOMMIER ÉLASTIQUE PORTATIF is made in three separate parts, and is therefore light and portable; it is also cheap and durable, and as it has no stuffing on the top it cannot harbour moth.

EASY-CHAIRS, SOFAS, and COUCHES, best quality only, made to any shape, on approval, at T. H. FILMER and SON'S Manufactory, 31, 32, and 34, Berners-street, Oxford-street, W. An Illustrated Priced Catalogue sent post-free.

THE EYVA.
Registered at Stationers' Hall.
This remarkable garment combines a Lady's Jacket and Vest in an ingenious manner, producing a most elegant and pretty effect, and which by means of an elastic band fits any figure. The Garibaldi, introduced in the autumn of 1861, was generally welcomed and largely patronised as being a step in the right direction; but the Eyva exhibits an appearance of tastiness and finish, which is altogether wanting in the Garibaldi, and can be worn on any occasion in place of the high dress body. The Eyva, being the invention of Mr. Peter Robinson, cannot be furnished from any other house.
A complete assortment now ready.
PETER ROBINSON'S, 103 to 108, Oxford-street, W.

PATTERNS POST-FREE.
NEW FANCY SILKS,

FORD'S LADIES' JACKETS continue to form the spécialité of a large and increasing business, in which much skill and attention are devoted to produce the various novelties in shape and design constantly submitted to ladies at this establishment. In the Showrooms are exhibited numbers of beautifully-fitting Jackets, in shape and style quite unique, and unseen elsewhere. Lyons velvet, beautifully embroidered; silk and cashmere braided, or otherwise trimmed and ornamented; superfine or rough cloths, and materials of lighter texture, may be selected from with ease and at the moderate prices always adhered to.
Patterns and Illustrations post-free.
T. Ford, 42, Oxford-street (near Newman-street), London, W.

FORD'S LADIES' JACKETS.
Lyons Velvet, 42s., for indoors.

Cashmere, 16s. 9d., in all sizes.
Blue Serge, 15s. 6d., for the seaside.
Autumn Cloth, 10s. 6d., in various colours.
Warm Textures, 12s. 6d., for cold weather.
Eiderdown, 42s., for invalids.
Coloured Cloth, 21s., for archery.
Illustrations and Patterns free. The Showrooms contain every kind of Jacket usually required by Ladies. Private Fitting-rooms, with female attendants.—Thos. Ford, Ladies' Jacket and Habit Maker, 42, Oxford-street (near Newman-street), London.

FORD'S LONDON RIDING HABITS, 3 to 8 guineas. Riding Jackets, 21s.
Ladies' Riding Trousers, chamois leather with cloth feet, 21s. pair.
T. Ford, Habitmaker, 42, Oxford-street (near Newman-street).

GREBE SKINS EXTRAORDINARY. 10,000 Plumes, at 3s. 6d. and 4s. 6d.; 1000 Muffs, at 8s. 9d.; 2000 at 12s. 9d.; 2000 at 18s. 9d.; 1000 at 25s. 6d.; and 1000 at 35s. 6d.; 3000 pairs of Cuffs, at 4s. 6d. and 6s. 9d.; Collarettes, 8s. 6d. to 18s. 9d.; 20,000 yards of Trimming, at 10s. 9d., 13s. 9d., and 16s. 9d. per yard. Skins dressed and mounted. Furs of every description taken in exchange.—W. P. LILLICRAPP, Furrier by Appointment to H.R.H. the Prince of Wales, 19A, Davies-street, Berkeley-square, W.

THE IRON AGE! STEEL COLLARS! Perfect Whiteness! Perfect Comfort! Ladies' or Gentlemen's Collars, 1s. 6d. each; a Pair of Cuffs, 2s. 6d.; by post, 4d. each extra. Sold by Mr. YEATMAN, 158, Leadenhall-street, E.C.; and 91, Regent-street, W.

CRINOLINE.—The Patent ONDINA, or Waved JUPON, does away with the unsightly results of the ordinary hoops; and so perfect are the wavelike bands that a lady may ascend a steep stair, lean against a table, throw herself into an armchair, pass to her stall at the opera, or occupy a fourth seat in a carriage, without inconvenience to herself or others, or provoking the rude remarks of the observers, thus modifying in an important degree all those peculiarities tending to destroy the modesty of English women; and, lastly, it allows the dress to fall into graceful folds. Price 15s. 6d., 21s., and 25s. 6d. Illustrations free.
E. PHILPOTT, 37, Piccadilly, W.

LADIES' FIRST-CLASS KID ELASTIC BOOTS, Fancy Toes, 15s. 6d.;

CRAMER'S ENGLISH PIANETTE, in solid Mahogany Case. The most portable Pianoforte yet made. Price 35 guineas.
207 and 209, Regent-street.

CRAMER'S PIANOFORTE GALLERY offers peculiar advantages for the choice of a first-rate Pianoforte. Pianofortes by all the best makers, from the Great Exhibition, and the Makers of the Great Prize Medal, and the most eminent makers of England and the Continent. Nothing but the very best instruments are ever selected. Pianofortes, all their own, are fabricated in nine being carefully avoided. Purchasers from CRAMER and Co. may therefore rely on having the best Pianoforte that money can procure, and especially opposed from a selection made with competent practical skill.

Each pianoforte is warranted for three years, and CRAMER and Co. undertake to keep them in tune during that period. Every instrument fully guaranteed.

Pianofortes for hire, with easy terms of purchase at any railway station in the Kingdom without the risk to the purchaser usually attendant on such transactions. CRAMER and Co.'s Pianoforte Gallery (the largest in the world), 207 and 209, Regent-street.

DIANOFORTE RENOVATION.—CRAMER and CO. have organised a separate staff of the most skilful workmen for the repairing of pianofortes by the eminent makers whose pianofortes were out by years of constant practice. CRAMER and Co. do not pretend to make pianofortes equal to the best instruments "equal to new," but they guarantee that, if originally good, it will be restored to its original excellence. The charges for repairs will be as moderate as possible, and CRAMER and Co. will be glad to receive any orders for repairs, whether the instrument be worth the outlay.—Pianoforte Gallery (the largest in the world), 207 and 209, Regent-street.

CRAMER and CO.'S GREAT SALE of SECONDHAND PIANOFORTES, at their Gallery, 207 and 209, Regent-street. The instruments are by the very best makers, have been returned from the season's hire, and will be sold at the lowest possible prices. The sale will continue to the end of October. The number of instruments to select from is quite unprecedented.

SELF-ACTING ORGAN, with Six barrels, playing Three Overtures and selections of Operatic Music. To be sold, a bargain, this splendid Organ, which is in the best order, and has been used only by a private family. Will be sold at a perfect condition. Apply to CRAMER and CO., 207 and 209, Regent-street.

BOOSEY and SONS, Holles-street.

ISRAEL'S RETURN FROM BABYLON. The Evening Hymn, "Hark! 'tis the breeze." Duet, sung with great success by Miss Dolby and Miss Palmer, 3s. now ready. Price 3s.; also, as a Song, price 2s. 6d.
BOOSEY and SONS, Holles-street.

ISRAEL'S RETURN FROM BABYLON. The celebrated Evening Hymn, arranged for the pianoforte by Brinley Richards, 3s. now ready.
BOOSEY and SONS, Holles-street.

BOOSEY'S MINIATURE PIANOFORTE, price 2 guineas, is now published.—We have had occasion to examine a new description of Pianoforte manufactured by Boosey and Sons, which is remarkable for its compass in a degree which has not previously been ever attempted. When heard in connection with the size of the instrument, the tone is remarkably good and sympathetic with the touch. It is a full-grown root. It has a rich, brilliant tone, quite strong enough to fill the largest drawing-room, and yet it is so delicate that it is admirably adapted to the firm and chamber. No piano at so small a price has ever before been produced.—*Morning Post*, Dec. 8, 1862. Boosey and Sons, 24, Holles-street, London. Sold by the trade. To be had of the author at any of an extreme climate.—Boosey and Sons, 24, Holles-street, London.

NOTICE.—HALF-PRICE.—All Music, and the best Editions, at half the published price, and post-free for one-quarter of the price. Catalogues gratis.
HOPWOOD and CREW, 42, New Bond-street.

The prettiest drawing-room piece is
GANZ'S SOUVIENS TOI, Mélodie chantante. Price 3s. 6d.
A most pleasing melody, with a rich and elegant.—Illustrated News.—HOPWOOD and CREW, 42, New Bond-street.

THE GREATEST SUCCESS AT SELLON'S CONCERTS.

MOUNT ST. BERNARD. Characteristic Waltz for the Pianoforte. By JOHN FRANCIS BARNETT. Price 3s. Also, by the same Composer, THE LAND OF GUIDO. Price 3s.
COCK, HUTCHINGS, and Co., 64, New Bond-street.

KIRKMAN'S 7-octave trichord SEMI-OBLIQUE and CROSS-STRUNG PIANOFORTES, with double repeating action and all their very latest improvements. Price from 70 guineas. Every instrument warranted. For beauty of production of touch, and durability, these instruments are unrivalled.—COCK, HUTCHINGS, and Co., 63 and 64, New Bond-street, and Wardour-street, New Road-street, London, W.

PIANOFORTES, New and Secondhand, by all the eminent makers, for SALE or HIRE, at moderate prices, at COCK, HUTCHINGS, and CO.'S New Rooms and Depot, 63 and 64, New Bond-street (corner of Wardour-street).

KIRKMAN'S Celebrated 7-octave trichord PIANOFORTES at every description for SALE or HIRE, at COCK, HUTCHINGS, and CO.'S Pianoforte Warehouse, 63 and 64, New Bond-street, London.

SECONDHAND PIANOFORTES, By CHAPPELL and CO. SECONDHAND PIANOFORTES for Sale, by BROADWOOD, COLLARD, ERARD, and other eminent makers, at CHAPPELL and CO.'S Pianoforte Warehouse, 50, New Bond-street.

PIANOFORTES at CHAPPELL'S.—The largest Stock in London, by Broadwood, Collard, Erard, &c., for Sale or Hire. New Bond-street.

CHAPPELL'S FOREIGN PIANINO (the only Pianino to which the Prize Medal was awarded).—A Pianoforte of the Cottage Form, but with the Trichord Scale and most modern improvements, and fully adapted for the tropical climates, besides, &c. Warranted to keep in tune and to be the best and cheapest Pianoforte, with metal plate and trichord scale, for extreme climates.

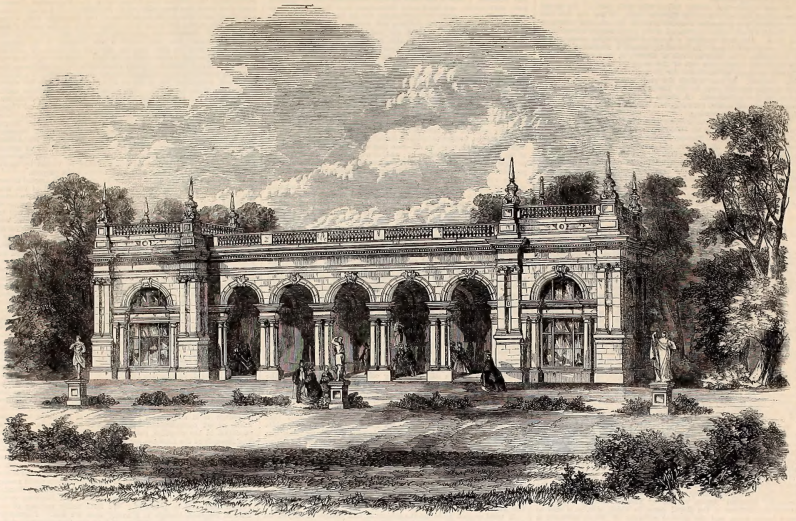
Price, in mahogany, rosewood, or walnut, 25 and 26 guineas. A great variety of cases to select from.
Chappell and Co.'s, 50, New Bond-street.

CHAPPELL and CO.'S ENGLISH MODEL COTTAGE PIANOFORTE.—The easiest preferring the pure and refined English quality of tone, and for which the Prize Medal was awarded by the great International Exhibition, at a moderate price. The action is of the same simple description as the above-named Foreign Pianoforte, and is equally adapted for those where the more complicated actions are objectionable by many of the faculty. Warranted to keep in tune. Price, in mahogany, rosewood, or walnut, 25 guineas; in oak, 23 guineas; in walnut, 26 guineas.
Chappell and Co., 50, New Bond-street.

CHAPPELL'S FOREIGN MODEL PIANOFORTE, price 20 guineas to rosewood; or in walnut, 20 guineas. This is a very superior Pianoforte of the same grand compass of Seven Octaves. It is strengthened by every possible means to stand any climate, and is made with the most perfect and modern improvements. It has a very sweet, pure, and refined tone, and the power equal to that of a Cabinet Grand. It is a most elegant piece of furniture, and will stand any climate. No pianoforte, in all respects comparable, has hitherto been made in England at the price. Warranted to keep in tune. Also, in mahogany, and (if desired) carbonised within six months of the purchase.
Chappell and Co., 50, New Bond-street.

BROADWOOD, COLLARD, and ERARD, The best Pianofortes of every description, bought, sold, or taken in exchange. Pianofortes for hire, on the most liberal terms, at CHAPPELL and CO.'S Pianoforte Warehouse, 50, New Bond-street.

ALEXANDRE'S DRAWING-ROOM HARMONIUM, with Two Rows of Vibrators, price 50 guineas; other varieties at 35 and 25 guineas. Illustrated Catalogues of Pianofortes and Harmoniums may be obtained gratis of CHAPPELL and CO., 50, New Bond-street.

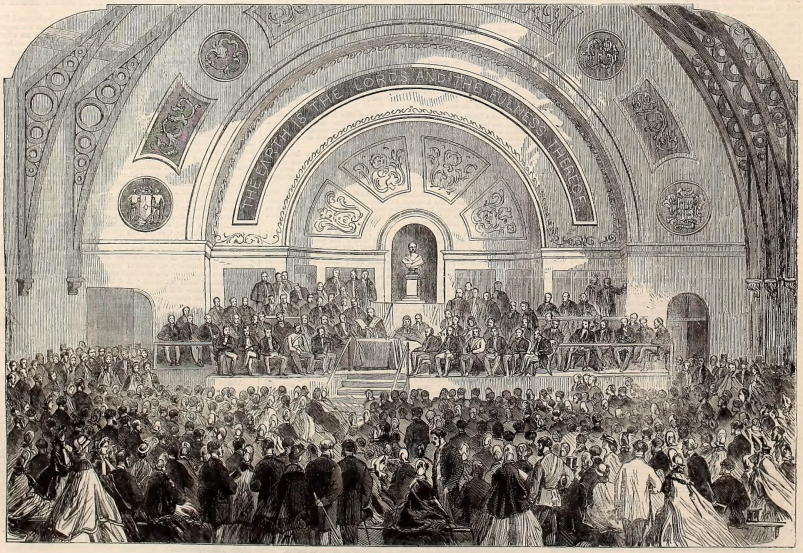


SECONDHAND HARMONIUMS, by ALEXANDRE, nearly (if not quite) as good as new, at greatly reduced prices.—CHAPPELL and CO., 50, New Bond-street.

ALEXANDRE'S PRIZE EXHIBITION MODEL HARMONIUM, for the CHURCH, 17 stops, 4 rows of vibrators, the full compass of 61 notes, CC to G in alt, in handsome oak case, 32 guineas. A large secondhand may be always had on hire, at CHAPPELL and CO.'S, 50, New Bond-street.

ENGLISH CONCERTINAS, by CHAPPELL. Full Compass, with all the latest improvements, 4 guineas. Rosewood, 5 guineas. Ditto, with Two Rows of Reeds, Three Pounds Ten Shillings.
Rosewood and Ebony, 4 guineas.

"RECONNOITRER" GLASS, 3s. 6d.! Invaluable to Sportsmen, Tourists, Yachtsmen, and all requiring a first-class glass, and so strong that ships, horses, deer, &c., can run after it. Jupiter's Moons, &c., are distinctly seen by it; and when used as a landscape glass is valuable on a twenty-five mile radius. "I think the Reconnoiterer the best glass I have ever looked through, and I have had many opportunities that so completely surround its maker's reconnoitring."—T. H. Fawkes, Esq., Farnley Colley. "Regarding the glasses supplied by Messrs. Solomon, I am well pleased with them."—From a report by the Head Gamekeeper of the Marquis of Breadalbane. "The accuracy of the glass I had of you is quite surprising. I have shown it to many who have it in use for marine purposes, and all are pleased, more especially the members of the corps, and found it fully equal to any, although they have had glasses at 5 guineas and upwards."—Capt. Wm. Peel, Preston, 12th, 1861. "The Hythe Glass, showing bullet marks at 1200 yards, is the best I have ever looked through."—Major BALCOMBE and Co., 96, Princes-street, Edinburgh, who have for sale.



OPENING OF THE PEOPLE'S PARK, DUNDEE.

THE PAVILION IN BAXTER PARK.

THE magnificent park presented by Sir David Baxter and the Misses Baxter to the people of Dundee was formally handed over to the trustees on Wednesday week. The day was kept as a close holiday, and the town was completely *en fête*.

In the forenoon Earl Russell met the Town Council in the Corn Exchange, and was presented with the freedom of the burgh and created a guild brother. His Lordship was accompanied to the platform by Countess Russell, Lady Georgiana Russell, the Earl of Dalhousie, Sir J. Ogilvy, and Sir D. Baxter. The Corn Exchange was crowded by the influential citizens of Dundee, who gave the noble Earl a most cordial welcome. The formal presentations having been made, his Lordship returned thanks, saying that in the course of his

PRESENTATION OF THE FREEDOM OF DUNDEE TO EARL RUSSELL IN THE CORN EXCHANGE.

Parliamentary life he had "been studious to build upon the ancient foundations." He concluded with a declaration of the intention of the Government to maintain strict neutrality between the parties engaged in the American conflict.

At one o'clock the various bodies who took part in the grand ceremony of the day met in the Barrack Park. When the line had been formed, the procession marched through the principal streets to the People's Park, which is situated at the north-eastern extremity of the town. The park occupies a space of thirty-eight acres, and is most tastefully laid out. In the centre stands a handsome pavilion in the Italian style, built at a cost of £2000; at each entrance there is a lodge-house; the cost of the park, its embellishment, and the sum set apart by the donor for its maintenance, cannot be less than £30,000. Three bells in the pavilion commemorate the Mayor and charter handed over by Sir David Baxter to Lord Dalhousie in behalf of the inhabitants. A statue of the munificent donor was inaugurated, and music, fireworks, and balloon ascents contributed to the festivities of the evening.

The first meeting of the trustees named in the deed of gift of the public park to Dundee by Sir David Baxter and the Misses Baxter was held on Thursday week—Provost Parker in the chair. The trustees named were nearly all present, and accepted office. A remit was made to the chairman, Sir John Ogilvy, and the clerk, Mr. D. Small, to draw up a resolution to be inserted in the minutes expressive of the trustees' appreciation of the munificence of Sir David and the Misses Baxter. It was unanimously resolved to name the park "The Baxter Park." A committee was appointed to frame rules and regulations, and report thereanent to the trustees. The £10,000 given by Sir David Baxter for the maintenance of the park.

"JANE LANE ASSISTING CHARLES II. TO ESCAPE AFTER THE BATTLE OF WORCESTER."

THE fresco by Mr. R. M. Ward, R.A. (engraved on the first page of our present Number), is one of the series of six paintings now in course of being executed by this artist in the Commons' corridor of the Houses of Parliament. Three bedroom scenes have already been painted—viz., "The Execution of Montrose," "The Last Sleep of Argyll," and Lady Lucie Assisting the Fugitives to Escape after the battle of Sedgmoor." The fresco engraved having been finished last—and probably still more because the artist has not, as in the case of former frescoes, exhibited a finished picture of the work at the Royal Academy—it is the least known of the popular series to which it belongs.

The incident represented is the most remarkable of the many hair-breadth escapes of Charles II. after his disastrous defeat by Cromwell's army. He fled immediately to the house of Gunter in Brighton—then Brighthelmstone. Not even any of the unguarded recognitions of friends, the suspicions of enemies, the inconsistencies in the "Royal cak" at Boscobel and other hiding-places, the throwing of many glass of sack-posset, and the consequent embark have so many elements of the dramatic and the picturesque, but this felicitous choice of the most dramatic subject is always one of the characteristics of Mr. Ward's historical pictures.

It is not much to be wondered at that the particular incident of this fresco is not to be found in the imperfect and almost inaccurate account of the King's escape, given in "The History of the Great Rebellion." Sir Walter Scott, in "Woodstock," has, it is well known, departed from historical accuracy in the narrative of the events after the battle of Worcester. Perfectly authentic descriptions of the incident are, however, to be found—First, in the letters and orders of wards dictated to Peppys, and carefully corrected and completed by the latter from living authorities; and then in the long-neglected but now famous "Boscobel" tracts, written by Thomas Blount, a Catholic lawyer and sufferer in the Royal cause, in which, also, he is said to have borne a part. The general accuracy of these narratives is proved by much collateral evidence. The idea of Charles's assumption of the disguise represented in the fresco originated in the following circumstance:—The Royalist Lord Wilmot, who had been informed of the King's concealment at Boscobel in the house of the Penderel family, left the house in disguise, accompanied by Penderel, another pure Royalist, whose house, Bentley Hall, in Staffordshire, was at no great distance. Here, at that Colonel Jane Lane, who had the painful task of setting out on a visit to her friend, Mrs. Norton, of Abbotsleigh, near Bristol, under a pass available for herself and one male attendant; and it was arranged that Lord Wilmot, disguised in this capacity, should convey her to this place in order that he should arrange some plan for the King's escape from that part of the country to the neighbourhood. This purpose was frustrated, however, by the King's inability to pass the Severn; and it was then decided that Charles himself, upon his arrival at Bentley Hall, should assume the disguise proposed to be taken by Wilmot. This he did; Colonel Lane supplying him with the suit of clothes already described, and a pass to convey him from Will Jones, the woodman of Boscobel, into William Jackson, a neighbouring tenant's son. The latter certainly played the part with remarkable tact and self-possession—equally distinct from overcaution and temerity—and with that easy goodhumour which was his best characteristic in after life. His whole conduct, through his great peril showed, indeed, the best side of the King's character; and the story of the part he took in the most romantic episodes of his career language and history. We cannot do better than give the adventure preserved in the "Boscobel" of the King's own words, as dictated to Peppys:—"But a mile," says Charles, "before we [i.e., himself and Mrs. Lane, and also Mrs. Lane's sister and her husband, Mr. Norton] met another 'damned horse' I came to ride upon: Avon [where they would have to cross the river and separate], we espied upon the top of hedge whose sides were very much cut down, and the horses, eating some grass by the wayside, staying there as I thought while their master-master was providing their quarters. Mrs. Lane's sister and husband went along with me as far as Stratford, seeing this troop of horse just in our way, said, that for his part he would not go by them for all the world, for he never was beaten by none of the Parliament soldiers, and he would not run the venture again. Hearing him say so, begged Mrs. Lane softly in her ear that we might not be known by us, for then we should see no turn. But all she could say in the world would not do, but her brother-in-law would ride round about to get by the other cross way. The troop of horse being then just getting on horseback, about twice their own pace, and, as I take it, we did meet the troop just but in the town of Stratford."

Mr. Ward has properly placed the King and Mrs. Lane most prominently in his fresco; the roundhead soldiers are sufficiently conspicuous to indicate the imminent peril he is escaping. The horse is about to feel the spur, and the place of Stratford Church appears in style, greatly resembles the portraits of Anne Boleyn in its thoughtful expression, as well as in the features and the colour of the hair. Part of this work has been executed in stereochrome, or water-glass, and this may be safely considered to be employed in Mr. Ward's other paintings at Westminster. The artist is now engaged painting "The Landing of Charles II. at Dover in the next compartment of the corridor; and there are still to follow "The Last of the Stuarts," "William and Mary Receiving the Lords and Commons at the Banqueting House, Whitehall," and "Mons. Declaring for a Free Parliament."

There are in England and Wales 19,352 blind persons and 12,236 deaf and dumb persons.

It appears from the sixteen population tables just issued that when the census was taken there were 74,482 foreigners in England and Wales.

More than 12,000,000 cockchafers have been destroyed this year in the canton of Bâle, in Switzerland. The authorities paid large premiums for their destruction.

"SCENE ON BOARD A FRENCH STEAMER FROM HAVRE TO ROSHILDE," PAINTED BY E. M. HARD.

SEA sickness, a cold in the head, and the toothache—not to speak of gout, nervousness, and disordered liver—have ever been held to be most legitimate causes of amusement for all but their immediate victims. Yet, selecting sea sickness, and running over "all the ills that flesh is heir to," is there one that renders us more utterly miserable (while it lasts) than this same *mal-de-mer*, the various stages of which M. Hard has depicted with such singular gusto and irresistible humour in the pictures, engraved not long since at Paris, and engraved on page 285. Why, we ourselves, only a little time ago, were reduced to such a dire extremity while hanging over the side of a ship that we wished—all the force of Christian Science—some humane person would kindly bolt us overboard, that we might become bodily food not for worms, but for monsters, such as those in the "Deep Sea," a remarkably athletic friend, "bearded like the pard," whose terror of sea sickness is so great that the very smell of a Thames steamer will give him the most alarming premonitory symptoms. As, however, probably many of our readers have quite recently enjoyed this *agrément*, and as many more are to come on a visit to Scandinavia, we must forgive. Laugh, then, we all—now that we are safe on terra firma—at the Egyptian fun before us; and, as a climax to our malice, let us hope that many unwary travellers bound for the Continent may provide themselves with a copy of our present Number to read on board!

The scene is that of the Roshilde as often as ugly one at the mouth of the Seine; and, as we see here, in a "sou-wester," and with the lead-line in hand, a Manche from the Atlantic, the steamer rolls heavily. This "rolling," too, is far more trying than the "pitching" movement to one's power of preserving the equilibrium, as well as one's digestive organs. Several of these passengers have plainly not yet got their "sea-legs" for such a trip. An officer on the right, who doubtless finds his berth insecure as little advantageous as a shaky deck as for climbing a tree, has either "sat down," as Lord Dundreary expressed himself, "before he was done," or, like the poor fellow in the steamer, has been capsized over an unsteady pile of luggage—the drollery of distress attending such a disaster to a courteous French-man being exquisitely rendered. Another, a poor Frenchman in white bib, cruching in irate old lady's bandboxes, and liberating a miscellaneous assortment of articles from the bag in his hand, is also probably of the sort proverbial for its unsoothing influence on the abdominal region—a brought to an abrupt, violently-executed finish. Some hard larger has been dragged under the bench, and held by apparently some unhappy passenger, whose arm alone is visible from beneath the seat, and who is in the last stage of suffocation. The only personage, however, who, being involuntarily prostrated, has not been rendered helpless for the time is the poor cat, who, in search of getting up, is the grave and reverend gentleman, the ancient dandy on the right, with closed eyes and hand placed uncomfortably on the abdominal viscera. The "sea-dog," as the jaunter represents, is quite impartial towards the sexes. Of the couple seated on the extreme left—we regret the impropriety—intended, we suspect, for English—the lady is again the better half. The poor gentleman she props is nearly in *extremis*; his cigar has been "cut," and he is "done for." The lady, on the other hand, mechanically between his teeth; his hat is nearly off; and, while grasping with the left hand the bench, she is, with the right, most mentally ejaculating, "Heugh! what can the child mean by asking for sour grapes at a moment!" To their right, a stout old monk-face, fanned, snuffraking lady, together with gentlemen, bourgeois, and other males in various parts of the boat, maintain a manly hardihood. One solitary exception to the general misery is the gentleman who descends on the beauty of the view to a youth whose aching head and vivid hue of face tell their own unmistakable tale of suffering. Turn where we will, we see, or find suggested, indeed, the effect of the civel inability of the vessel.

We have dwelt at length on the subject of this picture—a subject we have never seen ventured on by any English artists except those contributing to "Punch"—because the humour of representations of the polished and, as we consider, artificial French, is often noted as a phenomenon by the English. Now, whether this does or does not arise from the difference between the two nations in the matter of taste is not the place to decide. And this much we must concede to the French—namely, that, whether in literature, for instance, such a risqué subject as sea sickness, either in a picture or on the stage, they contrive to treat it comparatively decently. We are not prudes, as, and as all will remember who saw Levasseur's sea-sick Englishman in his "En Visite" entertainment—from an indefinable vulgarity too common among us. Indeed, we fear, in consequence, that the public is already favourably known in this country by a very amusing picture, exhibited at the Egyptian Hall some months ago, which fairly represented the deck of a pirate-vessel with the crew disguised as female passengers, &c. in order to get as near as possible without exciting suspicion to another vessel they were about to attack.

The Portuguese Government has built a gun-boat, which was launched recently. It carries only a single gun, but bears the imposing name of the Duvre d'Arc.

Advices from St. Petersburg regarding the Nizhny fair state that it has been characterised by great flatness. Kiachta tea, it is said, are finding excellent sale. The Russian Bank for Foreign Commerce has sold 10,000 silver roubles per chest came down to 90 silver roubles, and are now at 80 to 85 silver roubles.

A singular disturbance took place a few days back at Hammersmith. A man named Cooper came to the yard of a coal-hole inscribed on the programme a harmless bullock was introduced into the arena. A number of persons, it is said, had assembled to attack and torment, and finally broke into the ring and stoned the animal to death.

MR. M. H. Foster, Assistant Paymaster-General, and Mr. M. R. Ommanney, Assistant Accountant-General of the Post Office Department, have been appointed by the Indian Government to proceed to India as Commissioners to inquire into the present condition and working of the Indian Works Department in that country.

THE fifteenth annual report of the Poor-law Board has lately been issued to the public. It appears that during the year which ended on the 25th of March, 1863, the number of persons relieved exceeded by a million the number relieved in the year 1852, the year in which the relief of the poor, being an increase of 4,708,984, as compared with the sum expended during the year 1849, when the relief of the poor was unusually great, decreased expenditure during the period ere Suffolk, 6·2 per cent; Sussex, 9·6; Cumberland, 9·7; Durham, 9·8; Hertford, 10·1; and Kent, 10·2 per cent of the expenditure for the relief of the poor in England and Wales for the year ending Lady Day in 1863 was £6,044,971. Mr. Mackay, Secretary of the Department, has been appointed by the Indian Government to proceed to India as Commissioner to inquire into the present condition and working of the Indian Works Department in that country.

THE Chelsea bounty-land claims of the Poor-law Board has lately been issued to the public. It appears that during the year which ended on the 25th of March, 1863, the number of persons relieved exceeded by a million the number relieved in the year 1852, the year in which the relief of the poor, being an increase of 4,708,984, as compared with the sum expended during the year 1849, when the relief of the poor was unusually great, decreased expenditure during the period ere Suffolk, 6·2 per cent; Sussex, 9·6; Cumberland, 9·7; Durham, 9·8; Hertford, 10·1; and Kent, 10·2 per cent of the expenditure for the relief of the poor in England and Wales for the year ending Lady Day in 1863 was £6,044,971. Mr. Mackay, Secretary of the Department, has been appointed by the Indian Government to proceed to India as Commissioner to inquire into the present condition and working of the Indian Works Department in that country.

FINE ARTS.

MR. Telbin's diorama of the Holy Land, which formed a novel attraction in the evening's entertainment at the Haymarket Theatre some time since, has been enlarged by the addition of five new views, and is now exhibited in the large room of the Egyptian Hall, where the late Mr. Albert Smith so long administered to the mirth of the public. The diorama was originally brought out soon after the Prince of Wales's tour had created a new interest in the historic sites and scenes of the East; and the merit of the paintings (one of which we engraved) was evinced at the time in terms of well-deserved praise. The new views are equally remarkable for vraisemblance, for colouring scientifically calculated to convey the proper effect in artificial light, and, altogether, for a degree of artistic excellence far above the average of similar works. The pictures are from sketches made by Mr. Telbin, and by Mr. Grant, during his tour to Egypt, Palestine, &c., for the purpose of making them, and comprise views of Cairo, Thebes, Jerusalem, the Holy Sepulchre, the River Jordan, the Plain of Jericho, the Dead Sea, Nazareth, the Sea of Galilee, Mount Hermon, Damascus, a Turkish Interior, Baalbec, Beyrout, Smyrna, and Constantinople. A new feature became a rival by Mr. Arthur Matthison, and some of the views are illustrated by pieces of sacred music, sung by Miss Fosbrooke and other vocalists. From the very nature of the scenes the diorama will probably be visited by many persons who would object to attend a theatre for the purpose.

The problem for most of us how to get a statue erected to our memory has, it is said, been just solved. In the will of the late Mr. J. W. Gilbart, late manager of the London and Westminster Bank, is, it stated, a provision of £3000 to meet the expense of erecting a statue to himself. The direction of the testator will be carried out in strict accordance with his wishes, and the statue will be placed in Norwood Cemetery. The sum named is sufficient for an heroic-size; for a colossal statue.

The memorial to Mr. Mulready, alluded to in our last, is proposed to consist of a statue in the National Gallery, and a tablet on his tomb at Kensal-green.

A memorial, consisting of an obelisk eight feet high, surmounted by a Maltese cross, has been erected by public subscription to John Saunders, in the field at Stoke Mandeville, where the first assessment of the ship-money fell upon the township, as follows:—"Here stood the place on the cross :—" For these lands, in Stoke Mandeville, John Hampden was assessed in twenty shillings, ship-money, levied by command of the King without authority of law, the 4th of August, 1635. By resisting the claim of the King in legal strife he upheld the rights of the people under the law, and established the principle of impenitence. His works on earth ended after the conflict in Chalgrove Field, the 18th of June, 1643, and he died in Great Kimble Church." This is infinitely better taste than the digging up, by several professed admirers of Hampden, of a body believed to be his, and mutilating it, in order to decide how he died.

No less than twenty-six new paintings and several fine pieces of sculpture, some of which were exhibited this year at Paris, have just been placed in the Museum of the Luxembourg. These works have been purchased direct from the artists by the Government, and this patronage is in addition to the many annual purchases of other works of art commissioned by the State, and now in course of execution in the Louvre, the Tuileries, and other public buildings of France. The Museum of the Luxembourg is considered a kind of probationary place of deposit for modern works until they are removed to the museums of the Louvre, Versailles, or the Imperial residences. Within the last thirteen years it has received the greater number of the paintings and sculptures purchased by the Government; it now contains such a national collection of contemporaneous art in masterpieces by Ingres, Delaroche, Horace Vernet, Gleyre, Ary Scheffer, Diaz, Robert, Bougereau, Baudry, Français and Rosa Bonheur, as the French may well be proud of. We have really nothing of this kind in England, and it is surely time that we had. Money has never purchased from the living artist by our Government. A few works by deceased British artists have been bought from the great mass of British pictures in our so-called National Gallery have been given by private individuals. Compared to the public encouragement of art in France, the Government grants given to Scotchmen for the decoration of the Palace of Westminster sinks into insignificance. It is not time that the whole of the money of Goldsmith should be so spent as Scott Kensington had been diverted to procure some such a collection as that of the Luxembourg, we should not have an unreasonably promoted the development of art and the diffusion of refining pleasure among the people."

We stated recently in respect to obtaining a duplicate of Mr. Foley's equestrian statue of Lord Hardinge had failed from the requisite funds not having been raised. We would now state the effort could not be made to acquire a duplicate of the equally-fine and less-expensive statue of Goldsmith, as we suggested on engraving the work a few weeks back. The statue of Goldsmith should be set as dear to English as to Irish. We believe it is a public loss that so many of Mr. Foley's fine works should leave this metropolis—most of them this country. The Goldsmith has gone to Dublin, a singularly fine statue of a Parsee gentleman, which we are engraving, has been sent after him to Bombay, India; a colossal equestrian statue of the late Sir James Outram, upon which the sculptor is now engaged, is destined for Calcutta; a companion for Hardinge is the statue of Lord Elphinstone (the model of which is far advanced) goes to Bombay; the statue to the late Prince is to be set up in York; the statue of Fielding, the cotton lord, is destined for Todmorden; and an altar-monument to General Bruce, the late Governor to the Prince of Wales, is, we believe, about to be sent to Aberdare. Of the Goldsmith figure, it is to be placed in Dunfermline Cathedral. It is, we think, little to be known of the many works by the various efforts which have been made, that sufficient funds cannot be obtained for a repetition for London of the Lord Hardinge statue. We are glad to know, however, that the sculptor's model of Sir Harry's is to be cast in fine statues of Selden and Hampden, in the Palace of Westminster. We have seen the model for the Hampden, and it is a fine work in the head especially is a most remarkable success. Our readers may not be aware, also, that Mr. Cowper has given permission for Foley's statue of Lord Herbert of Lea to be placed in Westminster Hall, as the first of an intended series of statues of eminent statesmen. Finally, Mr. Foley is engaged on the sculptor for the proposed statue to the memory of General (Stonewall) Jackson, and he has been commissioned by the Confederate States to execute a marble his exquisite plaster statue of "A Youth at a Stream," now in the society's gardens—this being the only commission for an ideal work the sculptor has received from "the South." Mr. Foley's Ophelia, executed for the late Earl of Ellesmere, some twenty years ago!

The island of Monte Christo has just been chosen by the Italian Government as a penal settlement.

The Empress Eugenie's steam-yacht have chartered the Ocean Empress, 1508 tons, belonging to Messrs. James Baines and Co., Liverpool, Captain Macdonald, for the conveyance of stores and supplies for the Mediterranean. She is 213 ft. 3in. per statute adult. The ship is to be ready to receive her passengers at Birkenhead on the 30th of October.

About five years ago a Mr. Wallace purchased an estate in Roscommon on which was a lake called Corkby, or Keoghville, covering 120 acres and containing seventy islands, at the depth of water varying from 10 to 16 ft. Some attempts had been made by former proprietors to drain this lake, but they were frustrated by the difficulties of the undertaking and the superstition of the peasantry. Nothing daunted, however, Mr. Wallace employed forty men to cut a channel to the arterial cut, two miles in length connecting the lake with the river at Millitown Pass. This cut is 14 ft. wide at bottom and 21 ft. at top, and 6 ft. deep, and the fall for a mile it passes through solid rock, which had to be blasted. The result is that the lake has disappeared, and in its place is a large tract of rich alluvial soil, giving every promise of luxuriant vegetation. A correspondent of the *Western Star* thus describes the phenomenon:—"I had the pleasure of walking across the valley which was once the bottom of the lake, and inspecting the drainage works by which such a large extent of valuable land has been successfully reclaimed. Where, six months ago, the wildfowl congregated in myriads, and where fish were captured last year, not only cattle, but sheep were grazing on excellent pasture! There are portions of the soil in route from the drought, but in every case it is rich and friable and easily pulverised. Where the water was deepest the soil partakes somewhat of a peaty property, and is not so clothed with any lasting verdure, but the sedge was rapt and seemed to have been sown by way of experiment they have vegetated sufficiently well. What were once the tiny islands are distinctly seen, in the Ordnance map, like hills—so many raths or hills dotted over the valley, and tend rather pleasingly to diversify its appearance."

CURRENT LITERATURE.

A Lady's Visit to Manilla and Japan. By Anna d'A. (1 vol Hurst and Blackett.) Mrs. d'A. has written a readable book. There is not much that is new, or instructive, or exciting; the moral and religious reflections do not remind one very forcibly of Solomon; and the originality is not so striking as to startle; but the secret is that people like to know anything they possibly can just now, if not about Manilla, at any rate about Japan. Of course, there is a great deal of personal detail, relating chiefly to discomforts; the reader of travels must make up his mind to this. One traveller discourses plaintively about the martyrdom he suffers from mosquitoes; another laments that fleas are partial to him; a third is the victim of a larger species of domestic nuisance; and Mrs. d'A. is haunted by cockroaches. This is her *crux*; and the reader who can bear a rather liberal infliction of secondhand cockroach will find few other stumbling-blocks, whilst the reader who cannot had better supply himself with a little moral camphor before setting out upon his cruise through Mrs. d'A.'s book. It has been said that novelty is not a characteristic of the work; but, in one respect, that assertion must be modified, for Mrs. d'A. does not travel as an "unprotected female," but in company with her husband and her little girl, so that we are spared, for the most part, the stale querimonies as well as the romantic nonsense which make up half the diaries of our Hon. Misses Gushington. It must be confessed that absence of "gush" from the narrative is the more welcome as it is unexpected from the dedication, which runs in this high-flown strain:—"To thee, who hast aided me in my toils, and so kindly smoothed every difficult and rugged step, is dedicated this little work, by thy loving and faithful wife, Anna." The little party started from Singapore for Hong-Kong on March 2, 1862; from Hong-Kong they go to Manilla, then back again from Manilla to Hong-Kong; thence to Macao, return once more to Hong-Kong, sail thence to Shanghai, and thence, after a short stay, for Japan. They did not have an opportunity of visiting Jeddo, in consequence of the English Minister's illness; but Nagasaki and Yokohama they spent some time in. However, as has already been hinted, Mrs. d'A. has little to say of the Japanese which has not been said before, and the visit she herself received from some Japanese ladies did not result in any fresh revelations concerning them. The witness she bears to the readiness which the Japanese show to punish those who commit offences against Europeans is the most important part of her narrative, though that readiness does not appear to satisfy the requirements of our Government. There are the usual accounts of earthquakes and suicide for honour's sake, and "tea-house" girls, a portrait of one of whom faces the frontispiece. And herein we are led to reflect how strange a difference it makes whether an evil be foreign or native; for the "tea-house" girls are the Japanese "social evil," yet it is considered no breach of propriety to parade the portrait of one; but who would dream of enhancing (or otherwise) the value of a book upon English life and manners with a similar portrait? Censors would cry aloud. In respect of jokes, there is great variety of opinion, and one is quite ready to defer to a lady in matters of delicacy; we suppose, therefore, we are wrong in imagining that the funny hardly compensates for the nasty in the following anecdote:—"The Chinese experience considerable difficulty in the pronunciation of the letter R. On one occasion the boy of the house in some part of China which we were visiting appeared before me with the following message (*sic*): 'Mem, want catchee lice for Missy Losy dinner?' which, being interpreted, signifies, 'Mem, want rice for Miss Rose's dinner?' As may be well imagined, I could scarcely suppress a smile as I replied in the affirmative;" but we put it to the reader.

Eleanor's Victory. By M. E. Braddon. (3 vols. Tinsley Brothers.) The plot is briefly this:—George Mowbray Vandeleur Vane, having spent three fortunes like a gentleman and an idiot, is represented as living in Paris at the date of August, 1853, upon six pounds a month, allowed him by one of his daughters, Mrs. Bannister. The same lady also forwards, upon a day, to her father a hundred pounds, to be expended by him in finishing the education of his youngest daughter, Mrs. Bannister's half-sister, who has just arrived in the French capital. The old gentleman, who is exceedingly aristocratic in his manners but loose in his pecuniary dealings, smarting under the effect of some strong remarks in the letter which accompanies Mrs. Bannister's remittance, reflecting anything but slightly upon his character for honesty, and plainly hinting her suspicion that the hundred pounds will not find their way to the person and to the purpose for which they were intended, sets out at the very earliest opportunity with his youngest daughter to call upon and pay over the money to the lady who is to "finish" her. Unfortunately, the lady is out and the money cannot be paid; and on that very evening it finds its way, by means of a game at écarté, into the hands of one of the old gentleman's unscrupulous acquaintances. The poor old man is thus dishonoured, and feels bound, as a gentleman, to poison himself, which he does, after writing to his youngest daughter a letter full of self-reproach, incoherent assertions of having been cheated and robbed, and entreaties to his daughter to undertake the Christian duty of avenging his death upon what he is pleased to consider his murderer. Only a fragment of this letter, but enough to make its purport plain, falls into his daughter's—Eleanor's—hands. She, taking the same strange view of the matter as her father, and refusing to listen to the wise and Christian advice of friends, commences her orphan life with "a terrible oath upon her girlish lips;" and, with a singular forgetfulness of the doctrine of Scripture, offers up "a prayer that Providence would set her in the way of bringing vengeance upon her father's destroyer;" just as in French novels those who are about to break the seventh commandment expect the assistance of *le bon Dieu*. The vengeance she pursues, however, is not of the "ghastly" stamp; she merely strives that she may deprive the object of her hatred of a fortune which he is supposed to be in the way of inheriting. He gains that fortune by forgery; she detects the forgery; and just as she is on the point of satiating her revengeful soul by exposing the forger to public indignation and condign punishment, she falters, overcome by the prayers of the forger's mother. And this is Eleanor's victory; the motherly feeling which is inborn in woman triumphed over the vengeful purpose which was but an exotic planted in uncongenial soil. To say that the novel is clever; that it abounds in surprises; that it is full of contrasts, beginning with the vengeful young lady herself, whose golden hair, gray eyes, elegant figure, and virgin innocence are united with the spirit of a baleful Nemesis; that it is essentially wordly; that it is slightly vulgar; that its tone is harsh; that sweet domesticity is banished from its pages; that our poor old relative (pronoun) is occasionally abused, like his fellow in adversity, the neuter verb "lie;" and that it is altogether very interesting, is only to say that it is written by the author of "Aurora Floyd."

Subtle Brains and Lissom Fingers. By A. Wynter, M.D. (1 vol. Hardwicke.) Titles often require explanation; and it will therefore be as well to explain that Dr. Wynter has collected and published a series of papers, to a great extent relating to inventions and the application of them, which originally appeared in *Once a Week* and the *London Review*. He has thereby conferred a boon upon the public, for it is just the kind of book which can be taken up at any time with a certainty of finding information and entertainment. The insight which he gives us into the mysteries of breadmaking lead one to wish that some other staff of life could be discovered, and the paper called "Early Warnings" is likely to render the nervous extremely uncomfortable, for it appears that you may have had a blow from a cricket ball ten or eleven years ago, have suffered no inconvenience meanwhile, and to-morrow be seized with epilepsy from that remote cause. The paper called "Air Traction," which treats of the Pneumatic Despatch Railway, is particularly interesting. It is more from his facts and occasional acute remarks than from his literary style that Dr. Wynter attracts attention. We do not mean that his style is not quite good enough, but we wish the reader to understand that the contents of the volume are matter-of-fact, requiring little of the arts of composition to recommend them.

Poems and Songs. By Hugh Macdonald. (1 vol. Glasgow: William Love.) A mournful train of "three hundred men of mind and merit" followed three years ago, through cutting wind and pelting rain, the coffin which contained the mortal remains of the late Hugh Macdonald. That fact speaks volumes for the worth of the departed poet. For ourselves, we cannot better express our sense of his poetical merits than by quoting, as our indorsement of the truthfulness of his assertion, the lines which run:—

> And though the kitlle A B C
> Of music's been unlearned by me,
> Yet in my heart a soul of glee
> Deep hidden dwells;
> And weel I ken the melodie
> True passion swells.

No one can read "My ain hearthstane" and the "Wee, wee man" without acknowledging that the writer had music, and tenderness, and manliness, and purity in his soul.

Lancashire Songs. By Edwin Waugh (1 vol. Simpkin, Marshall, and Co.) There is stuff in these songs; they are manly, quaint, and characteristic. There is a simple plaintiveness in one or two which is really touching; but the following lines are worthy of the lads who held out and, alas! that we should have to say it, hold out so bravely in their sore distress:—

> While takin' a wift o' my pipe tother neet,
> A thowt trickled into my pate,
> That sulkin', because everything isn't sweet,
> Is nobbut a foolish consate;
> Iv man had bin made for a bit of a spree,
> An' th' world were a marlockin' schoo',
> Wi' nought nobbut heytin', an' drinkin', an' glee,
> An' holiday gam' to go through,
> He'd sicken afore
> His frolic were o'er,
> An' feel he'd been born for a foo'.

We don't pretend to understand all the "Lancashire;" but the spirit is evident to all.

The Bride of Messina. With an Essay on the Tragical Chorus. By Schiller. Translated by Adam Lodge, Esq., M.A. Third Edition, with other Poems. (T. F. A. Day.) Mr. Lodge's popular translation of the famous "Bride of Messina," of which this is the third edition, well deserves its standard reputation. It combines much poetic power and a skilful rendering of the German with no little classic taste and erudition. Mr. Lodge is evidently an enthusiast as to the beauties and dramatic force of this great tragedy by Schiller, and he is certainly borne out in his views by the fact that "The Bride of Messina" (whatever may be the question as to its introduction of a chorus) is frequently performed throughout Germany and never fails to create a sensation. Mr. Lodge's version might be safely tried on the English stage. It reads well, and could, no doubt, be acted with effect. Mr. Lodge, in this edition, introduces the play and Schiller's essay on the chorus, with an interesting preface of his own. The volume contains some other poems, not only in English, but in French, Italian, German, and even Greek. Among these smaller pieces of verse, we would call particular attention to Mr. Lodge's forcible translation of Müller's terrible ballad, "The Bell-founder of Breslau."

MEMBERS OUT OF PARLIAMENT.

If any proof were needed of the neutralisation of party and the fining away of political difference it would be found in the speeches which plentifully stud the journals of members "en voyage." With scarcely one exception, their talk and their doings are about anything but politics; and it is obvious that our legislative functionaries are all in the curious condition of public men without measures, even in prospect. Mr. Bright is pensively bobbing for trout in the Spey. In this case, of course, the Johnsonian dictum on those who fish for sport does not hold, so far as the antithesis to the worm at one end of the line is concerned; but there does seem something suggestive of a smile, to those who know him, in a mental picture of Mr. Bright in perfect silence, and with the necessary patience, bent on circumventing the wily denizens of the gentle streams; and there rises involuntarily in one's mind some idea about "a Triton amongst the minnows," which is too fanciful, and, perhaps, far-fetched, to set down with strict intelligibility. Then there is the excellent Mr. White, M.P. for Brighton, whose politics and opinions generally are as robust as his large and manly form;—why, even he, instead of splashing vigorously in one of these "baths of liberty," which he states, now and then, that he has been taking in his watering-place, has been piping softly about art, and lisping out dilettantisms on "sympathetic associations," in a way which forbids his mere Parliamentary acquaintances from recognising him in the least! It may have been fancy, but it struck us that during last Session Mr. White was not in his usual health or spirits; indeed, there were times when he seemed positively ill. It is to be hoped not, for we could better spare a better man in the House. But if he is physically weaker than he was, that may account for his lapsing into sentiment, and speaking pretty, well-turned sentences on the proper effect of good pictures on the human mind.

It is, of course, nothing extraordinary that Mr. Bass should discourse about beer; and that he has been doing at Manchester, having got—there being nothing remarkable in that—amongst the licensed victuallers, and there set up Mr. Somes's defunct teetotal bill of last Session for the purpose of giving it a few extra stabs. A revelation which he made in the way in which voting is carried on in the House of Commons is worth noting. He told how a member who was counteracting the drying process of tobacco by moistening his system with pleasant drinks in the smoking-room delivered his opinion as to the absurdity of Mr. Somes's measure with such intensity as to grace it with a Shandean expletive; but, lo! at the division he went into the lobby with Mr. Somes, and voted for what he designated a mass of nonsense, most entirely and utterly to be condemned, according to the short but expressive phrase which he had previously used. It is probably because in Nottingham, as in most boroughs, the beer interest is potent in elections, that Sir Robert Clifton also has lately got amongst the victuallers—so called because they never sell anything to eat, and deal solely in drink. Sir Robert is a singular compound of the swell and the Radical. In his appearance and in his outward demeanour he is of the class which parts its hair in the middle, and has everything else about him in keeping with that distinctive mark of personal adornment; but when he speaks parliamentarily the spirit of Feargus O'Connor, his once predecessor in the representation of Nottingham, might well be invoked to listen. A trifle sententious, and a little too apt to speak oracularly for a young member, is Sir Robert; and as he does not possess, or, possessing, despises to exhibit, any of the graces of oratory, he is not exactly taken by the House into its complete confidence, nor does he command its rapt attention. His opinions on strong liquors, as delivered at Nottingham, are doubtless satisfactory to most persons, except the fraternity to which George Cruikshank is now artist-in-chief.

Probably no member of Parliament has enjoyed such a notoriety this autumn as Mr. Laird, the representative of Birkenhead. He has been, and will be, as well abused and as well defended a gentleman as could possibly be found. If, when he appeared at the feast of an agricultural society which was held, oddly enough, in the strictly commercial town of Birkenhead, he was expected to say anything to clear up the mystery of the steam-rams which are being built in his yard, there must have been a serious disappointment; for he made a speech of the merest commonplaces. In truth, this Mr. Laird is technically not in the indictment which has been laid against the shipbuilders of Birkenhead; for he is no longer a member of the firm which he created, and so he cannot be called upon to plead directly to the offence imputed. But in his place in Parliament he argued this question of supplying the Confederates with vessels of war from an abstract point of view, and the sum of his reasoning was that his successors in his business were curiously impartial, and were quite ready to settle the question in dispute by accepting orders for the construction of ironclads for the Federals, which, on the whole, seems to be the common-sense view of the matter. In the House Mr. Laird has taken an excellent position; for the simple reason that he always speaks on matters which he thoroughly understands, and therefore delivers himself with authority. Besides which he is thoroughly gentlemanly in his manner, and, by consequence, not in the least pretentious. On the occasion which did not bring out Mr. Laird the festivities were presided over by Mr. Wilbraham Egerton. Of this gentleman's position in the House we can only say that, according to authentic records, he succeeded to the representation of North Cheshire on his father's accession to the Peerage.

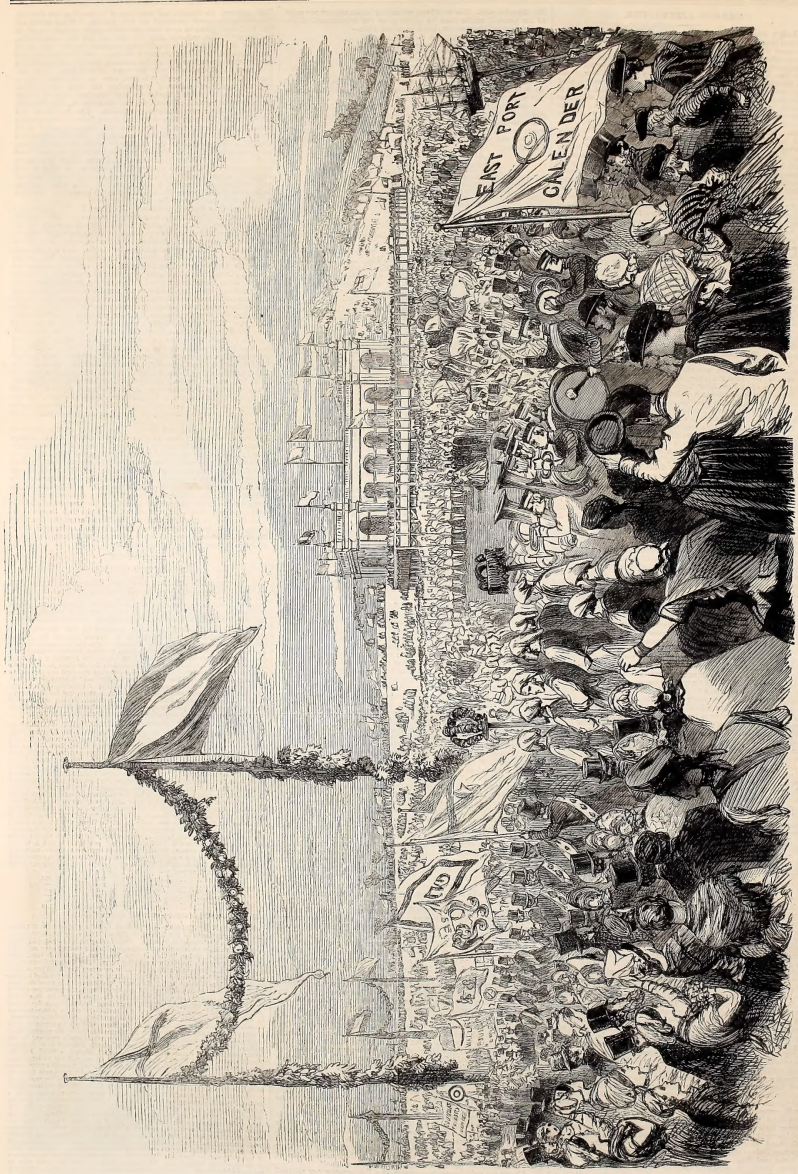
Almost the only formal communion, in a Parliamentary or political sense, that has yet taken place between a member and his constituents is that which took place at Elgin last week, when Mr. Grant Duff reviewed the Session, and was himself reviewed by the electors. On reading his speech one could not but exclaim, "What would not Mr. Duff have given to have been allowed to speak at such length in the house?" But, unfortunately, he does not get the opportunity. The fact is, that his style is partly epigrammatic, partly made up of fine sentences, is full of recondite allusions and illustrations, and bristles with quotations; while his manner, though not excited, is pronounced and emphatic, and his voice pitched high. Now, impartial lookers-on will readily believe that in Mr. Duff this is not the result of elaborate preparation, but only the product of cultivation of natural tendencies and impulses; and in proper times and places, Mr. Duff would be, and doubtless is, very effective, and could deliver very interesting speeches. But the House will not believe in this style; they deny that it can have any spontaneity about it, and they persist in supposing that they are called on to listen to diluted Ossian, and this because they take in only sound without giving themselves the trouble to search for sense. They hardly endure some of Mr. Bright's genuine bursts of sentiment and pathos, and they will not countenance eloquence which rises above the standard which they have set up for themselves. So long as you argue and converse, well; but a speech composed of rounded periods and antithetical sentences invariably sounds with that peculiar hollowness which informs Mr. Speaker that his powers of discipline will not be strained for awhile.

Amongst other things insisted on by Mr. Grant Duff, in his zeal for political and religious liberty, was a steady resistance to Mr. Walpole and Mr. Henley. It may, perhaps, be gratifying to the member for Elgin to know that one of his representative adversaries, Mr. Henley, told his constituents in Oxfordshire, a few days ago, that he is growing old, and that they cannot hope for his vigorous Parliamentary services for any very indefinite period. This may be so; but, on the whole, Mr. Henley showed no falling off in his critical qualities last Session. Once, indeed, he showed symptoms of senility, when he, the man of shrewd commonsense and plain-speaking *par excellence*, suddenly broke out into a turgid and semi-scriptural denunciation of national sins, and talked sentimental morality with curious infelicity. No one exactly knew what it all meant, nor was this peculiar outburst logically connected with anything that was going on, and therefore it was rather alarming. Nothing of the kind appeared afterwards, and, as he talked pure, good Henleyism at Oxford the other day, no doubt he is all right. Colonel North, his colleague, was also present, and very judiciously confined himself to "ditto to Mr. Henley." Talking of growing old, one wonders whether the gallant Colonel, who has all his life been a "beau garçon," is conscious that there are symptoms that Time is setting its mark slightly upon his head; but really this is too bad, and we pause. Colonel Fane has been too recently made a member of the House for us to have anything to say of him; and Mr. Bernard, who also was at this gathering, though living in Oxfordshire, is member for a Buckinghamshire borough, and this may serve as a reason for saying nothing of him when there is nothing to be said.

The Right Hon. Edward Ellice is the Nestor of the House of Commons. He never rises now but to give advice, and he always speaks as one having authority. Although there is a tinge of roughness in his countenance, taken physically altogether, he comes up to one's idea of a grand old man—stalwart in spite of years, massive even in decay. He is almost the last of the old Whigs proper, and though never very prominent, he would be missed in the house. He has been saying a few curt, sensible sentences at Inverness on the occasion of the opening of a railway to Perth; and as he is in some sort connected with that part of the country, his presence might have been expected. But what on earth was the Right Hon. Robert Lowe, Vice-President of the Committee of the Privy Council for Education doing there? Being there, he returned thanks for the toast of her Majesty's Ministers, but did not mention any of his own disappointments in not yet being a Cabinet Minister.

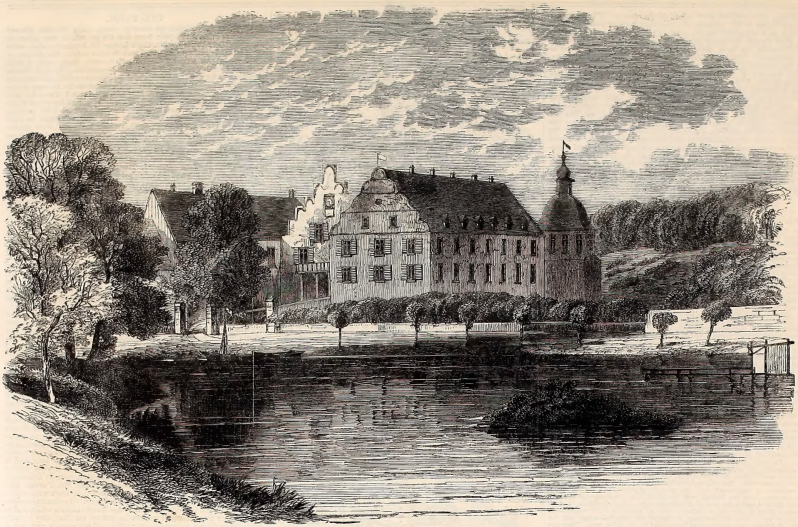
SCIENTIFIC NEWS.

A MAGNETIC MOUNTAIN has been discovered in Swedish Lapland. It is traversed by a vein of magnetic iron, several feet in thickness, and said to be the richest hitherto known. M. Berg, the owner of the mountain, has opened up the mine, with the hope of supplying all the world with loadstones of great power. One of these, weighing 68 Swedish pounds, has been already acquired by the eminent electrician, Professor Dove, of Berlin.



THE MINOR PLANETS.—At a meeting of the Academy of Sciences at Vienna during this season M. De Littrow reported the relative position of these bodies during 1863. He stated that in the first days of August Pales and Pandora would approach to about a million of miles' distance from each other, and that they would remain for about four months at a distance from each other not exceeding two million miles; but, as these planets are the smallest hitherto known, it is not probable that they exercised any perceptible influence on each other. The conjunction of Metis and Polyhymnia took place at too considerable a distance to be worth noticing. The orbits of Concordia, Angelina, Maia, Leto, Panopea, Danaë, and Asia are as yet too imperfectly known to have their conjunctions considered in detail. In the beginning of the year Concordia and Panopea approached each other at distances relatively inconsiderable, and Egeria and Leto did the same about the end of June.

ANALYSIS OF THE BREAD DISCOVERED AT POMPEII.—During the excavations made on Aug. 9, 1862, under the direction of M. Fiorelli, a baker's shop was discovered. In the interior of the oven were found eighty-one loaves of bread, of which seventy-six weighed from 500 to 600 grammes; four weighed from 700 to 800 grammes; and one weighed 1204 grammes (100 grammes = about 3½ oz. avoirdupois). All were nearly of the same form, but some had a depression in the centre, which appeared to have been a sort of trade-mark. Their edges were raised and rounded, and separated by eight lines proceeding to the centre, so that the upper part of the loaf could be divided into eight parts. The largest loaf appeared to have been destined for division into four parts. All the loaves measured at the raised part from 6 to 7 centimetres, and the central depressed part of some was between 3 to 4 centimetres (centimetre = 0·39371 in.). The shape of these loaves is that to be seen in the bread used at Palermo, Catania, and the interior of Sicily. The analysis of the above-mentioned loaves was made by M. De Luca, who has presented a memoir on the subject to the Academy of Sciences at Paris. He states that all the loaves have a blackish brown exterior, which tint becomes weaker in the central parts. The crust is hard and compact, while the crumb is porous, having cavities like our own bread. The bread contains moisture, unequally distributed, which it gives up at 110 to 120 deg. cent. The nitrogen is unequally distributed in it. The following table shows the variability of the composition of five of the loaves analysed:—



Water	20·3	23·0	21·1	—	10·6
Carbon	34·3	27·2	39·0	—	—
Hydrogen	8·4	6·5	4·3	—	—
Nitrogen	2·6	2·8	2·8	—	—
Oxygen	2·4	30·0	10·2	—	—
Ashes	7·2	13·2	16·6	16·9	11·8

with a small qantity of matters soluble in water and alcohol.

FORMOSAN TORTOISES.—A list of fifteen species of reptilia has been contributed to the *Annals of Natural History* by Mr. R. Swinhoe, her Majesty's Vice-Consul at Formosa. Three living tortoises (Emys Sinensis, of Gray) have been presented to the Zoological Society, and are now exhibited in their gardens. Other dead specimens have been deposited in the British Museum. We give a few notes respecting them. The Trionyx Sinensis is a tortoise with a long projectile neck and very sharp teeth. When once it seizes an object it is with the utmost difficulty that it can be prevailed upon to let it go. The Chinese boil it into soup, and esteem it a great delicacy. Another tortoise, the Cisto Clemmys Flavomarginata, is the prevailing species about Tamsuy, north-west of Formosa. Mr. Swinhoe frequently observed it in ponds about the rice-fields, with its round back showing above the surface of the water and its head peering out. At times several might be seen together on the tops of stones in the water, basking motionless with limbs extended. On being alarmed they would shuffle off the stones with all the energy in their power, and, plumping into the water, sink immediately. If the observer kept quite still, after the lapse of a few seconds they would again reappear at the surface. The green turtle of Europeans (Chelonia Virgata) is of frequent occurrence in the warm waters of the Gulf Stream, east of Florida. The fishermen regard it with great reverence as an emblem of longevity. When accidentally entangled in the fishing-nets, it is carried to the nearest large town and exhibited for a short time. It is then usually purchased from its captors by some well-to-do native, who has a few "good words" carved on its back, in company with his own name and the date, and fills in the inscription with vermilion. The animal is then decked with ribbons, and carried in a boat with much ceremony out to sea, where it is consigned with state into its native element. Some very large specimens were brought from Sawo to Tamsuy. They were kept in a boat filled with water during the day; in the evening they were brought out on the deck of a vessel. One of them for several consecutive evenings at eight o'clock precisely would commence scratching the deck with her fore flappers, and then set to laying eggs, usually twelve in number. She would then turn round, and commence pushing and scraping with her hind flappers—evidently the manœuvre she was in the habit of going through on the sandy beach; first scratching a hole for the reception of the eggs, then filling it up. Mr. Swinhoe had one alive for some time in the yard of his house. It used to lie motionless in the rain puddles, with only the tip of its head uncovered. When the thermometer fell below 50 deg. it would sally out of the water and not return till it grew warmer.

OPENING OF THE PEOPLE'S PARK, DENMARK: THE PROCESSION ENTERING OASTER PARK.—SEE PAGE 294.

KRANICHSTEIN, NEAR DARMSTADT, THE HUNTING-SEAT OF PRINCE AND PRINCESS LOUIS OF HESSE.

KRANICHSTEIN.

THIS hunting-seat of Prince and Princess Louis of Hesse is situated about three miles from Darmstadt. Their Royal Highnesses have been residing at this charming abode and Queen Victoria, shortly before her return from Germany, spent a day here on a strictly private visit to her daughter Princess Alice. Kranichstein is surrounded by a dense forest, full of wild boar, deer, and other game. Long avenues are, however, cut through it, so that from the windows of the house the eye can traverse these thick woods for miles. Our View of Kranichstein, showing the garden and park front, is from a sketch by Mr. T. L. Busch.

INAUGURATION OF THE FORTESCUE MEMORIAL.

YESTERDAY week the statue erected in the Castle-yard at Exeter by subscription to the memory of the late Hugh, Earl Fortescue, K.G., was publicly uncovered, and handed over by Lord Clifford to the care of the Lord Lieutenant of the county (his Grace the Duke of

INAUGURATION OF THE FORTESCUE MEMORIAL IN THE CASTLE-YARD, EXETER.

Somerset), who received it on behalf of the county. The ceremony was performed in the presence of a vast multitude of persons. Lord Clifford, in a eulogistic speech, presented the statue to the county. The High Sheriff, Sir George Stucley Stucley, Bart., then presented to Earl Fortescue the book containing the names of the subscribers to the memorial. The noble Earl made a brief reply full of feeling, and the interesting ceremony was concluded.

The statue is a noble piece of workmanship, executed in Sicilian marble by Mr. E. B. Stephens, of London. The sculptor has faithfully delineated the features of the deceased Earl. His Lordship is represented in the attitude of speaking—the left hand resting on the hip, and the right firmly grasping his robe, which latter indicates his rank in the Peerage. The left leg, which is advanced, exhibits the Garter—an honour bestowed upon him by his Sovereign for his eminent political services. Around the neck is the order of St. Patrick, which was conferred on the deceased nobleman for eminent public services rendered to his country in the capacity of Lord Lieutenant of Ireland. The collar and cuffs of the coat indicate his Lordship's official connection with the county of Devon, as Lord Lieutenant thereof. The statue and the pedestal are each 8 ft. high, so that the entire height of the monument is 16 ft. The base is granite, the work of Mr. Easton, of Exeter.

WILLS AND BEQUESTS.

The will of Field Marshal the Right Hon. Colin Campbell, Lord Clyde, G.C.B., K.S.I., D.C.L., was proved in her Majesty's Court of Probate on the 7th inst. The executors and trustees are thus described:—"Major-General Henry Eyre, 98th, now commanding Governor, Chatham; Lieutenant-Colonel Archibald Alison, C.B., formerly my military secretary while Commander-in-Chief in India, and now Assistant Adjutant-General, head-quarters, London; Colonel William Montagu Scott M'Murdo, C.B., Aide-de-Camp to the Queen; and Lieutenant-General Duncan Alexander Cameron, C.B., 42nd, now commanding her Majesty's troops in New Zealand." The will and two codicils are dated May 23, 1863, and a third codicil July 11 last, signed "Clyde, F.M." There are many legacies to officers and personal friends. To Sir William Mansfield he leaves the sword presented to him by the city of London, together with the document conferring upon him the freedom of the city, and that Sir William (whom he wished to have appointed as an executor had not his official duties prevented him from acting) should be consulted as to what papers, if any, should be made public; and, should any memoir of himself (Lord Clyde) appear, which he would rather did not, it should be limited to Hart's *Army List*, and be simply the recital of the services of a plain soldier. His Lordship's personal property was sworn under £70,000. To his sister, Miss Alicia Campbell, his Lordship leaves an annuity of £1000, and divides his real estate and the residue of his personal estate between her and General Eyre, leaving also to the General and his family many specific bequests. Lord Clyde died, Aug. 14, 1863, at the Government House, Chatham, aged seventy-one.

The will of Sir Albert John de Hochepied Larpent, Bart., late of Calcutta, East Indies, a merchant, has been proved in England, having been first administered to at Fort William, in Bengal. The executors appointed are Edward Taylor, Pierce Gilbert, John Noble (the acting executor), and Octavius Ommanney, Esqrs. The will was executed in 1855. The testator has bequeathed his estates, both real and personal, subject to his wife's life interest therein, and, under the tenor of marriage settlement, to his children, leaving one moiety to his son, and the other between his two daughters.

The will of Major-General William Dunn, R.A., of Inglewood House, Kintbury, Berks, was proved in the London Court under £140,000, the executors and trustees nominated being Mrs. Margaret Duncan Dunn, the relict, and William Hew Dunn, Esq., the son (who, being in his minority, a power is reserved). The will is dated August, 1860. To his wife he has left his residence of Inglewood, with the grounds attached, and the furniture. This property, upon her decease, will devolve to the eldest son—as well as a sum of £10,000, and a like sum of £10,000 amongst younger children, to each of whom there is also left a distinct legacy of £3000 on their respectively coming of age, or on the marriage of daughters. His real estate and the residue of his personal estate he has bequeathed to his eldest son. There are the following charitable bequests:—To the Royal Berks Hospital; St. Mary's Hospital, Paddington; Field-lane Refuge, the Society for Promoting Christian Knowledge, Leeds Infirmary, Society called "London beyond the Borders," to each is bequeathed the sum of £100; and to the poor of Kintbury, Berks, and the poor of Chapel Town, Leeds, legacies of £50—free of legacy duty.

THE DISTRESS IN THE MANUFACTURING DISTRICTS.

The usual weekly meeting of the Central Executive Committee for the administration of this fund was held on Monday in the Manchester Townhall.

A subject of grave importance was considered. Mr. Hutchinson, of Blackburn, brought forward a motion in favour of allowing local relief committees to undertake contracts under the Public Works Act, with the view of affording employment to ablebodied operatives during the coming winter. The main objects of this proposal were to create a preferential class of labourers; to ensure that "the married men with large families should have the preference until all could be employed;" and to establish "a proper test of eligibility for the relief to be afforded." Mr. Farnall and other members of the committee strongly opposed the scheme, and Lord Derby read a minute from Sir J. Kay Shuttleworth, in which the question at issue is closely argued. Sir John opposes the plan suggested by Mr. Hutchinson on various grounds, but mainly because it "involves a very grave departure from the true principles of relief administration." The result of the discussion was that Mr. Hutchinson's resolution was negatived, and Sir J. Kay Shuttleworth's minute adopted as an amendment.

With regard to the amount of indigence in the cotton districts, Mr. Farnall stated that while at this time last year the number relieved by the guardians was increasing at the rate of 5000 per week, it is now undergoing a weekly decrease of about 1500.

Mr. Maclure, the honorary secretary, reported that £149 had been received during the week, and that the balance in the bank was £299,853. Three packages of clothing were received last week, and two sent off.

Grants were made from the General Relief and Clothing Fund, including the following:—Ashton, £450; Stalybridge, £450; Dukinfield, £300; Tintwistle, £100; Heywood, £300; Farrington, £100; Blackburn, £400; Bacup, £200; Oldham, £800; Whitworth and Facto, £150; Royton, £200; Broadbottom and Charlesworth, £100; Hyde, £850; Crompton, £100; Stockport, £1250.

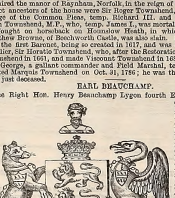
During the past month eighty-five persons, selected from the distressed districts of Lancashire and Carlisle, were assisted out of the funds of the National Colonial Emigration Society, Charing-cross, to emigrate to the colonies of Victoria, Queensland, and New Zealand. The society will send out during the current month a number of young women to Tasmania; they are further assisting forty-three persons to emigrate to New Zealand; and arrangements are in progress for sending to South Australia next month several families, numbering sixty to seventy souls, from Manchester and Stalybridge.

The Archduke Maximilian and the Archduchess Charlotte have consented to act as godfather and godmother to the great-grandchild of the celebrated patriot of the Tyrol, Andrew Hofer.

The Grand Duke of Weimar declined a serenade by torchlight, with which his subjects proposed to honour him on his return from Frankfort, alleging that rejoicings for the results of the Congress were premature.

Accounts from Victoria, Vancouver Island, of the 13th of July, state that the amount of gold brought there from Cariboo during the past fortnight had been £50,000; and that good accounts generally continue to be received from British Columbia.

Dr. Simon, the medical officer of the Privy Council, calls attention, in his fifth report to their Lordships, among other matters, to the neglect of the laws compelling vaccination. From the inspection of 190 different unions, containing altogether 900 vaccination districts, he is of opinion that the intentions of the Legislature are but very imperfectly fulfilled, and that the public defences against smallpox are in great part insufficient and delusive. He points to the utter and universal failure of the intended register of vaccination, and says that, although such failure deprives inquiry of any source of accurate measurement, still the inspectors have come upon cases where, quite apart from the register, there was conclusive evidence of extreme local neglect of vaccination. Among the elementary schools which they visited numerous cases were found where the unvaccinated proportion of scholars was from 20 to 30 per cent of the whole: in more than a few cases it was from 30 to 40 per cent; in some it was from 40 to 50 per cent; and in one case (that of Penn, in Buckinghamshire) it was as high as 55½ per cent. So again, among the young inmates of workhouses, although under the very eye of boards of guardians, the inspectors found similar evidence that vaccination was not duly performed; for, among thirty-eight workhouses there were eight where the unvaccinated proportion of children ranged from 20 to 38 per cent; and among seventy-four other workhouses there were twenty where the unvaccinated proportion of children was from 20 to 34 per cent. The less exact evidence furnished by the registers of vaccination justifies a conviction that in many cases the local neglect is greater, even very considerably greater, than those figures would suggest. Dr. Simon refers to several instances of districts remaining for considerable periods, and in one case as long as three years, without a single vaccination being performed by the publicly-appointed medical officer. He states, with emphasis, that thoroughly good gratuitous vaccination is by no means uniformly given by those authorities whom the Legislature has made responsible for giving it. And under these circumstances it would, he argues, be manifestly unjust to punish, for non-compliance with the law, parents whose children are not vaccinated. "I have, therefore," says Dr. Simon, "had no alternative but to submit, for their Lordships' consideration, that the laws now in force for the purpose of extirpating smallpox are not likely to accomplish their object, and that the system established by law for the provision of public vaccination works in an unsatisfactory manner."



OBITUARY OF EMINENT PERSONS.

THE MARQUIS TOWNSHEND.

The Most Noble Sir John Townshend, Marquis and Viscount Townshend, of Raynham, in the county of Norfolk, Baron Townshend, of Lynn Regis, in the same county, in the Peerage of Great Britain, and a Baronet, High Steward of Tamworth, was the elder son of Lord John Townshend, M.P., by his wife, Georgiana Anne, daughter of William Poyntz, Esq., of Midgham, Berkshire, and was grandson of Field Marshal George, first Marquis Townshend, godson of George I. He was born March 28, 1798, and, after receiving his early education at Eton College and the Royal Naval College, he entered the Royal Navy as Midshipman in 1814, and attained the rank of Captain in October, 1834, and that of Rear-Admiral in December, 1856. He was, before his accession to the House of Lords, M.P. for Tamworth, having been returned in 1847. He was a decided Liberal in politics; he voted in favour of the Ballot, and also advocated the admission of the Jews into Parliament and the removal of all religious disabilities. He latterly supported invariably the Government of Lord Palmerston. He succeeded as fourth Marquis Townshend on the death of his cousin, George Ferrars, the third Marquis, Dec. 31, 1855. He married, Aug. 18, 1825, Elizabeth Jane, eldest daughter of Rear-Admiral Lord George Stuart, C.B., and granddaughter of John, first Marquis of Bute, and by her, who survives him, leaves issue, an only son and three daughters—namely, John Villiers Stuart, Viscount Raynham, M.P., his successor; Lady Anna Maria, married to Captain Alexander Nowel Sherson; Lady Elizabeth, married to John St. Aubyn, Esq., M.P., of St. Michael's Mount, Cornwall; and Lady Audrey Jane Charlotte. The Marquis died somewhat suddenly on the 10th inst. at his seat, Raynham Hall, Norfolk. He is succeeded by his son, John Villiers Stuart, Viscount Raynham, now fifth Marquis Townshend, who was born on April 10, 1831, and has represented Tamworth in the House of Commons since 1856. The Rev. Lord George Osborne Townshend, brother of the Peer just dead, becomes heir presumptive to the title. The family of Townshend is of ancient Norman descent, and acquired the manor of Raynham, Norfolk, in the reign of Henry I. Among the direct ancestors of the house were Sir Roger Townshend, Serjeant-at-Law and Judge of the Common Pleas, temp. Richard III. and Henry VII., and Sir John Townshend, M.P., who, temp. James I., was mortally wounded in a duel he fought on horseback on Hounslow Heath, in which his opponent, Sir Matthew Browne, of Beechworth Castle, was also slain. Sir John's son, Roger, was the first Baronet, being so created in 1617, and was father of the famous cavalier, Sir Horatio Townshend, who, after the Restoration, was created Baron Townshend in 1661, and made Viscount Townshend in 1682. His great grandson, George, a gallant commander and Field Marshal, temp. George II., was created Marquis Townshend on Oct. 31, 1786; he was the grandfather of the Peer just deceased.

EARL BEAUCHAMP.

The Right Hon. Henry Beauchamp Lygon fourth Earl Beauchamp, Viscount Elmley, and Baron Beauchamp, of Powyk, in the county of Worcester, in the Peerage of the United Kingdom, a General in the Army and Colonel of the 2nd Life Guards, was the third son of William Lygon, the first Earl, by his wife, Catherine, only daughter of James Denn, Esq. He was born in 1785, and, when in his eighteenth year, he entered the British Army as a Cornet in the 16th Dragoons. He shared in much active and gallant service during the war in the Peninsula. He was there with his regiment from March, 1809, to September, 1810, and again from February, 1814, to the end of the struggle. He was at the capture of Oporto, at the battle of Talavera, and at the battle of Busaco, where he was severely wounded. He received the war medal, with one clasp, for Talavera. From the 16th Dragoons he removed to the 1st Life Guards, and he was Colonel commanding that regiment for many years, until he obtained the rank of Major-General in January, 1837. He was, in June, 1843, appointed Colonel of the 10th (the Prince of Wales's Own) Royal Regiment of Hussars, which he held till the death of Field Marshal Lord Seaton, in April last, when he succeeded him as Colonel of the 2nd Life Guards. He became a Lieutenant-General on Nov. 9, 1846; and a General on June 30, 1854. His Lordship was for nearly twenty years M.P. for Worcestershire (western division). He was a Conservative, and firmly opposed the measures brought forward by the Whig Government. He was a warm supporter of the agricultural interest, and voted against the repeal of the corn laws in 1846. Although holding opposite views in politics to the anti-Tory party, he was an excellent and most liberal landlord, and was deservedly esteemed by his numerous tenantry and dependents. He succeeded his brother as fourth Earl Beauchamp on the 22nd of January, 1853. He married, on the 8th of July, 1824, Lady Susan Caroline Eliot, second daughter of William, second Earl of St. Germans, and sister of Sir Edward Granville Eliot, G.C.B., P.C., the present Earl, by whom (who died on the 15th of January, 1835) he leaves two sons, Henry Viscount Elmley, M.P. for Worcestershire, his successor, and the Hon. Frederick Lygon, M.P. for Tewkesbury, late a Lord of the Admiralty; and a daughter, Georgiana, married to Richard William Fitzroy, second and present Lord Raglan. Earl Beauchamp's eldest daughter, Lady Felicia Susan Cavendish, wife of the Rev. Charles William Cavendish, died in 1848. The Earl died at his seat, Madresfield Court, Great Malvern, on the 8th inst., and is succeeded by his eldest surviving son, Henry Viscount Elmley, now fifth Earl Beauchamp, who was born on Feb. 13, 1829, is senior Captain of the 1st Life Guards, and has represented the western division of the county of Worcester in the House of Commons since 1853. This family of Lygon, of old Worcestershire standing, derives, in the female line, from the ancient and historic Lords Beauchamp of Powyk. William Lygon, Esq., who descended maternally from the last Lord Beauchamp of that house, and who represented the county of Worcester in Parliament for thirty years, was created Baron Beauchamp of Powyk on Feb. 26, 1806, and Viscount Elmley and Earl Beauchamp on Dec. 1, 1815. He was the father of the Earl just deceased.

EILHARD MITSCHERLICH.

This eminent professor of chemistry at the University of Berlin (where he died three weeks ago) was born on the 7th of January, 1794, at Neurede, near Jever, in East Friesland. Here he studied under the celebrated historian Schlosser, with whom he afterwards proceeded to Frankfort. In 1811 he went to Heidelberg, and thence to Paris, to study history and philology. In 1814, on his return to Germany, he commenced a series of researches on the history of the people termed Ghurides and Karachitayens, and in 1818 published part of a work on the subject, still incomplete. In 1818 his pursuits took a totally different direction. He went to Berlin, and there delivered himself up wholly to the study of the natural sciences, and more especially of chemistry. In this new career he made his début by the discovery of the law of "isomorphism" (of like form). According to this law the crystalline form of compound bodies always appears to be in relation to the nature of their component parts and the weight of their equivalents. So that, in a great number of compound bodies, by virtue of the analogies of their composition, one of the principal constituents may be replaced by another, without the compound undergoing any change in form. This discovery was followed by that of the "dimorphism" of sulphur, that is to say, of its property of crystallising when under dissimilar circumstances, under two different forms. In 1819 Mitscherlich was visited by the great Swedish chemist Berzelius, whose invitation to Stockholm he accepted, passing two years in his laboratory. In 1822 Mitscherlich returned to Berlin, and became Professor of Chemistry at the University. In his teaching he opposed the too synthetic tendency of the school of philosophy founded by Schelling, and aimed to make his pupils scrupulously exact observers, arguing, that experiment is the only true point of departure for all speculative science. On this principle is based his excellent "Treatise on Chemistry," published in 1829, which has reached its fifth edition, and has been translated into English. M. Mitscherlich devoted much attention to kindred sciences, and also to the construction and improvement of philosophical apparatus. His researches were very highly esteemed in foreign countries. In 1828 the Royal Society of London elected him one of its foreign members, and, in 1829, awarded him its Royal medal for his discoveries in crystallography. In 1852 he was elected one of the very few foreign associates of the Imperial Academy of Sciences of the Institut, at Paris. Mitscherlich's numerous scientific memoirs will be found in the Transactions of the Royal Academy of Sciences of Berlin, in Poggendorff's "Annalen der Physik," and in Erdmann's "Journal für Praktische Chemie."

Erratum.—The brother and successor of the late Sir Angus Campbell, Bart., of Dunstaffnage, is Sir Donald Campbell, and not as stated Sir *Isaac* Donald Campbell: he does not bear the name of Isaac.

THE FARM.

Agricultural societies go merrily along. The Wigton derived much extra interest this year from the 100 gs. which was given in three shorthorn prizes by Mr. Clark Irving, of Australia, who made some spirited purchases at Mr. Jonas Webb's sale. The 30-guinea district cup was won by Sir Wilfred Lawson, Bart., with a bull, Kildonan, purchased from the Duke of Devonshire; Mr. J. P. Foster won the cup for cows with one bred at Babraham; and Royal Butterfly again reigned supreme among twenty-three entries for the open shorthorn bull cup, value £25, with £25 added. Colonel Towneley also sent Master Frederick and Royal Butterfly 11th, and for one of these Mr. George Head, a banker in Cumberland, offered £240 in vain. The Royal Worcester winner, Duke of Tyne, had no chance in such company. The cups were exhibited in the yard, and were appropriately filled with some of the largest harvest ears from the Tiptree farm of Mr. Alderman Mechi, who was the guest of Mr. George Moore, the chairman at the dinner, and the principal speaker of the evening. At the Liverpool and Manchester Society Mr. Atherton took a second with a calf six weeks old. The Hadji won the blood-sire prize; and Overplus, by Augur, the Yorkshire hunter champion, did the hurdles in pretty good style, and won the first hunter prize. Mr. Laird, M.P., got terribly chaffed at the dinner about his "steam rams." A number of steady buyers followed Mr. Strafford to the Marton-le-Moor sale, at which 67 head averaged £38 2s. 3d.; the 57 cows and heifers averaged £40 3s. 6d., and Mr. Barclay, of Keavil, gave the highest price (105 gs.) for Water Maid. The fall of Duchess calves at Wetherby this season has been as follows:—Three white bull calves from Duchess 69th, 77th, and 78th ("the roan twin"); a white heifer from Duchess 80th, and two roan heifers from Duchess 70th and Duchess 85th. Oxford Rose has also had a rich roan heifer, which, like the six others, is by Duke of Clarence. We are glad to hear that Mr. Tallant has had a legacy of £500 left him by his late master, Mr. Marjoribanks, in token of the admirable manner in which he has managed his shorthorns and the Bushey Grove farm. A finer old English gentleman never passed to his rest, and his legacies are quite of the old Sir Roger de Coverley stamp.

Lady Pigot's sale, at Branches Park, on Tuesday, is likely to be a very spirited affair, and to be well attended by the foreigners. About 217 prizes in six seasons prove what energy and good judgment can effect; and we trust that her Ladyship may have her consolation for such a terrible 1300-guinea loss as that of Stanley Rose, Victoria, and Queen of Athelstane in three years. There will be about eighty-one lots in all, with Pride of Southwicke, Rosedale, and Castianira amongst them. The sale begins soon after one; the eight o'clock train from London reaches Newmarket at eleven; and a special runs to London after the sale.

The annual sale of Leicester rams, &c., at Edinburgh went off remarkably well, and Mr. Lees, of Marnston, made the highest average, £7 18s. for thirty of the former. Mr. Brydon had an excellent sale of Cheviot rams, at Beattock, on Thursday. Two five-year-olds averaged £6; twenty-six four-year-olds, £12 8s. (the rare Old Hornie blood scoring well); fifty-two three-year-olds, £9 13s.; sixty two-year-olds, £8 15s. 9d.; and seventeen one-year-olds, £5 2s. The great competition was for the four-year-old four-premium Thorley, who made 63 gs. No less than 2180 Leicester and half-bred rams were sold at Kelso fair on Friday. Mr. Purves, of Burnfoot, sold a very fine lot of 100, but the four-shear which gained the first prize at Kelso only made £5. Colonel Pennant's agent was among Mr. Purves's customers. The show generally was a good one, but there were several scores of leggy and bad-shouldered specimens. Implement-makers can never be got to confess that they are beaten in their trials, and in like manner many farmers cannot be got to see that they have no pretence to set up as tup-breeders. Sixty-three owners sent lots of all sizes, from 100 to 6. The Lincoln ram sales have been wonderfully brisk, and Mr. T. Kirkham's sheep averaged £19 13s. 3d. for 138, the price in one instance ranging as high as £80.

The fifteenth volume of the *Shorthorn Herdbook*, edited by Mr. Strafford, has just appeared. It contains 390 more pedigrees than Vol. XIII., and 94 more than its immediate predecessor. There are 1958 bull and 2714 cow entries; but, as a cow and her produce constitute an entry, about 5555 cows and heifer calves are really indexed. Her Majesty has entered some, and the volume gives the names of 831 other breeders, some of whom have died since it went to press. Messrs. Cruikshank, of Sittyton, furnish eighty entries, and fourteen more of their breeding are entered in the purchasers' names. Among the other most extensive entries we observe those of Earl Fitzwilliam, Lady Pigot, the Hon. Colonel Pennant, Mr. W. Torr, Mr. J. H. Langston, M.P.; Mr. Stratton, Messrs. Dudding, and Mr. Garne. Five Dukes, three Marquises, thirteen Earls, one Countess, seventeen Lords and Viscounts, and twenty-four Baronets also join the great shorthorn array. The plates, which still very much lack that lifelike freedom and truth which artists are wont to give to horses and dogs, include Mr. Torr's Breast Plate and Guiding Star, Colonel Towneley's Royal Butterfly 11th, Rose of Lancashire, and Young Butterfly; Captain Gunter's Duke of Wharfdale, Mr. T. E. Pawlett's Hopewell, Mr. Jonas Webb's Lord Chancellor, Mr. W. Slye's The Gwynne, the Duke of Devonshire's Countess of Barrington, Mr. M'Intosh's Lady Oxford 4th, with her Worcester prize calf Lady Oxford 5th; Mr. Harvey Combe's, or, rather, Mr. Hale's, Moss Rose; and Mr. A. L. Maynard's Water Maid. The cows' names run in the old groove, as there are 13 Adelaides, 25 Beauties, 67 Cherries, 6 Women in White, 20 Blossoms, 11 Britannias, 89 Princesses, 63 Queens, 35 Countesses, 25 Daisies, 84 Duchesses, 23 Fannies, 39 Rubies, 289 Ladies, 111 Misses, 27 Lilies, 22 Julias, and Roses without end, but generally with prefixes—Rock Rose, for instance. We see few names that strike us as new, save Carte de Visite, Coal, Croquet, Home Sweet Home, Mad Bess, My Eye, Jew's Harp, Gawky, No Name, Outrageous, Red Cabbage, Grapes, Proud Emily Booth, and so on. The bull list is of course rife with Lords and Princes; and Sir Charles Knightley contributes a "Bull's Run," a name which seems to have struck no other breeder, although the American war has furnished much sponsorial inspiration. Mr. C. Snewing has one Caractacus out of the five; and among the peculiar names we have Omnibus, Oyster, Photograph, Port and Sherry, Sherry Cobbler, Sirloin, Skedaddle, Thousand a Year, Whitebait, Yelverton, A B C, Breeches, and First Fiddle.

The 315 blood stock lots at the Sledmere sale have made 24,171 gs.; the 111 brood mares averaged 81 gs., the highest priced one (the dam of Elcho) making 450 gs.; the 51 yearlings averaged 60 gs., and 15 hunters 94 gs. Mr. James Hall went as high as 330 gs. for one of the latter. The prestige of the late Sir Tatton on the Continent made the foreigners very anxious to bid, and "the tykes" took care to keep them moving, and were well "punished" in return, by way of retaliation, when they wanted a lot. Sir Tatton bought two or three young mares for the sake of the old blood. Fandango fetched 500 gs., but, despite his great racing fame, he gets rather odd-looking stock, and many of them far too big, and roarers to boot; so that, after all, he was sold at, if not above, his real present value. Colsterdale, at 300 gs., seems a more satisfactory bargain, and John Osborne did well to keep him in England at 300 gs. The sheep sale on Monday realised £2780 18s.; one pen of five ewes was sold to Mr. James Hall for £60. Three hundred lambs remain to be sold on October 7. So far, the sheep and bullocks have produced £5556 18s., thus making, with the blood stock, the grand sum total of £30,936.

The "Long Firm" have been remarkably busy of late, and the farmers, tempted by their magnificent offers to leave the price to themselves, fall comfortably into their clutches. One "J. B. Hargrave" is the most active; but he does not seem very well up to his work, as he wrote to an eminent breeder of Cheviots lately, and propounded the highly original idea that "the Cheviot might cross well with the Leicester." The new dodge is to write on note-paper, with the name of some fictitious hall printed at the top, sometimes with or without a coat of arms, which disarms suspicion at once. We had recently occasion, on behalf of a friend, to test the locality of one of these "halls" in Essex, and it turned out to be a group of wretched cottages. Like the Dragon of Wantley, the firm's appetite is insatiable, and they will take calves, tups, washing-machines, books, or anything you may choose to send them.

The *Levant Herald* states that the Sultan has decided on building a spacious ballroom on the site of the old Beylerbey Palace, at each end of which will be a handsome kiosk. The same rumour states that his Majesty will on his next birthday give in this vast apartment a splendid entertainment in honour of the occasion—instead, probably, of the fairy fête given on the past two anniversaries by the Grand Vizier.

COLUMN FOR THE CURIOUS.

The delivery of Orations at Christ's Hospital (on St. Matthew's Day, Sept. 21—next Monday) is a relic of the disputations of the scholars in the cloisters—an "intellectual gladiatorship" of antiquity in all our great public schools. St. Matthew's is the day of the annual Commemoration—a festival set apart from the first year of their foundation for the General Court of the several Royal hospitals; and it is still observed with the usual solemnity. The Lord Mayor and Aldermen having met the Governors of each hospital in the Great Hall, the children pass before them, leading the way to Christ Church, where the sermon is preached. The company return to the Hall to hear the speeches, after which a collection is made for the speakers in furtherance of their support at the University. Trollope, in 1834, stated about £120 to be usually contributed. Formerly the speeches were delivered in the Grammar school, when the sum gathered was comparatively inconsiderable. The delivery of the list of Governors follows the collection; and, according to the "Order of the Hospitals," all the beadles are called before the Court, and, delivering up their staves, retire to the bottom of the Hall, "that the opinion of the Court may be heard touching the doing of these duties: to the intent, yf any of them be faultye, that he or they may be rebuked or dismissed, at the discretion of the said Court; and thereupon to deliver unto suche as then remayne their staves, and again astablishe them." These forms concluded, the Court is dissolved and the company, having partaken of refreshments, retire. It appears from the journal of Sheriff Hoare, 1740-1, that "sweet cakes and burnt wine" were then handed round on these occasions, and the usual breakfast was "roast beef and burnt wine."

We may here add a few words as to the two pictures at Christ's Hospital, attributed to Holbein, in connection with the evidence in the *Archæologia*, recently issued. Mr. John Gough Nichols considers the portrait of King Edward, which is in the Treasurer's house, to have been evidently painted towards the close of the King's life. But of the Charter picture in the Great Hall there is no better evidence than that for the Bridewell Hospital picture being Holbein's work. The event of each took place in 1553, "and it is now ascertained beyond dispute that Holbein could have produced no works later than the year 1543; whilst hitherto his era has been extended for eleven years longer." (*Nichols.*) Neither will bear comparison with the capital Charter picture at Barber Surgeons' Hall—an undoubted Holbein.

In the ancient town of Concordia, about a mile distant from Porto Gruaro, in the province of Venice, have just been discovered the remains of an amphitheatre—that almost unvarying indication of Roman conquest and civilisation. The walls, as far as unearthed, have been found four feet in thickness; but their extent has not yet been ascertained. At the depth of ten metres from the surface of the soil, the account states, a helmet of gold has been found which had been worn by a commander of one of Cæsar's legions; also a bronze pedestal, seven feet high; and a massive sword, which is thought to have belonged to a statue not yet found.

Shorthand and Longhand, and their respective worth, have been agitated since Sir William Armstrong's statement to the British Association at Newcastle; in opposition to which Mr. Toulmin Smith maintains that, instead of finding ourselves to have inherited "longhand" and stopping there, the truth is that our forefathers habitually used a very intelligible "shorthand," while we have gradually degenerated into an unnecessary longhand. Mr. Smith then refers to the system of contraction used in old records, which was fixed and certain, and could not therefore lead to confusion, while time and material were greatly saved. Thus, "eps" with a short mark stands for "episcopus," and "mis" stands for "misericordia." Mr. Smith adds:—"In a document which I have lately had occasion to print the manuscript is contained in ten lines and a half of moderate length, while the print, setting forth all the words at full length, occupies, in a small type, seventeen lines and a half on a large page. This document is just 400 years old. We have thus degenerated into longhand, and Sir William Armstrong's aspirations will be fully answered if we retrace our steps and use the same settled and understood system of contractions that our fathers habitually used." Still, this is but a technological shorthand for one profession—we find similar contractions in physicians' prescriptions; whereas "shorthand" has its general system, to be understood by everybody. We may here mention that in Rees's "Cyclopædia" will be found an excellent paper on Shorthand, written, we believe, by Dr. Mavor, who did much to amend the art, and published a treatise upon it, which is the basis of the system now in general use. The "Phonetics" appear to have succeeded to a very considerable tune.

There is an old story in French *ana*, referring "the Origin of Hackney-coaches" to Paris in the year 1662; "exactly two centuries ago," adds the latest version. This precision has led to its recent revival. The reader, we dare say, remembers the incident, which occurred in the ministry of Colbert, through whom the Duke de Roannes obtained the Royal privilege, or license, the carriage being the suggestion of Blaise Pascal. The success of the scheme was aided when the King and Queen being caught in a shower, his Majesty made the Queen and her ladies enter one of the new calèches, which happened to be plying for passengers, and the King mounted the box, and, himself taking the reins, drove to the palace. This is a pleasant story enough; but, unfortunately for the French claim, we had hackney-coaches in London in 1625, or thirty-seven years before the Paris scheme. They were first kept at inns, but got into the streets in 1634, as appears from "Strafford's Letters." Captain Bailey had the first stand, near the Maypole, in the Strand, where St. Mary's Church now is; and immediately adjoining there was a stand in our day. In 1637, Charles I. granted a special commission to his Master of the Horse to license hackney-coaches; and the Board of Commissioners had a snug location at the bottom of Essex-street until our day; a commissionership being one of the good things of the good old times. In this respect there is a remarkable coincidence between the English and French origins; in each case it became a Court or Government favour. To the recent version of the Paris anecdote is this rider—that the speculation was anything but profitable till the reign of Louis XV., when it came into the hands of a coach-painter, named Martin, who turned it to good account. This latter invented a new varnish (ever since known as the Vernis-Martin) to imitate Chinese lacquer, which was used not only for carriages, but also for furniture and boxes, which are still highly valued; for last year a snuffbox of the Vernis-Martin was sold at a Paris auction for 3000f.

The letter from Rome in the *Times* of the 12th inst. has this pleasant gossip:—"A new miracle has started in a retired mountainous village called Vico Vara, a little above Tivoli. There a holy picture of the Madonna has begun to wink and blink in a very remarkable and edifying manner." Another story is:—A few days since the Pope want to San Lorenzo to see some improvements which are being made there. He took it into his head to walk, much to the discomfiture of his Court, who were nearly stifled with dust. On arriving at the Basilica he was received with honour, and the Right Rev. Abbot began a complimentary speech, rather fulsome in its character. The Holy Father, however, cut it short in the true vernacular by a word, signifying "All trash; had you been in earnest you would have watered the roads!"

Recent population returns show some curious facts as to the longevity of the Irish. Thus, the Census of 1861 found in Ireland, among less than six millions of population, 765 persons above a hundred years old. Two Ulster women are returned as having attained the patriarchal age of 120. They were grown-up women when George III. came to the throne. Here they are but items in a column of figures; we know nothing of what sort of persons they were in mind, body, or estate. It is worth notice that of the 249 men of a hundred and upwards, only fifteen were never married; of the 516 women, only 52. Specimens of a past age, it is not surprising that two thirds of these men and four fifths of these women can neither read nor write.

A relic of peculiar interest from Cirencester, the ancient Corinium, has lately been transmitted by Professor Buckman to the British Archæological Association. It is an *olla*, 4½ in. high, within which were found the bones of a large song-bird. It is well known that the ancient Egyptians buried the embalmed bodies of the hawk and ibis in earthen jars; but the occurrence of the remains of birds in sepulchral deposits has seldom been noticed in this country. The late Mr. Thomas Bateman, of Tolgrave, discovered portions of two species of *falconidæ* in barrows of the *stone period*; and the archaic custom of *bird-burial* still lingers in Ireland, where the wren is interred on the festival of St. Stephen.—*Proceedings of the Association.*

CHESS.

TO CORRESPONDENTS.

T. R. A.—1. A reprint of the very ancient treatise by Jacopo da Cessole was published at Milan in 1829. See Simpson's Catalogue of Chess Books, just issued. 2. You may obtain any chess treatise or chess magazine, whether foreign or English, we have no doubt, at Mr. Simpson's Chess Dépôt, 10, King William-street, Charing-cross. 3. The match was played in November and December of 1843.

I. WILKS.—The oldest chess periodical in existence is, we believe, the little magazine called *Sissa*, published in Holland. The subscription to this excellent little chronicle of chess events is not more, postage included, than 9s. per annum; and there is no excuse, therefore, for its not being better known in England.

CONRAD.—Your subscription, paid in advance, should be sent to the publisher of the ILLUSTRATED LONDON NEWS.

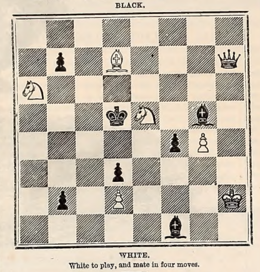
I. H. V.—The *Chessplayers' Chronicle* has long been defunct. A complete set of the first series is sometimes to be met with for a less sum than you name.

W. M.—A position of exceeding beauty; but it has been published a dozen times.

M. H., Waterford.—1. The German "Handbuch," price about 12s. 2. The "Chess-Players' Handbook," price 5s. 3. "Chess Praxis," price 6s. The first is published in Berlin; the other two by H. G. Bohn, of York-street, Covent-garden. The opening you speak of is at least three hundred years old, and perfectly familiar to every chess player.

LEARNER.—We cannot spare room to teach you the chess notation adopted in this country. Your best course is to procure a very useful chessboard, invented by Messrs Day and Son, of Lincoln's-inn-fields, every square of which has its designation inscribed on it. By the aid of this board you can play over games from book with perfect ease and accuracy.

W. H. A.—1. Enigma No. 1347 appears to be perfectly correct. Perhaps you have set it up wrongly. 2. The problem you send was published, or we are much mistaken, in these columns. By whom was it composed?



SOLUTIONS OF PROBLEM NO. 1019 by D. D., Philip, Sergius, Pip, F. A. S., Query, D. C. L., Rustic, M. P., Vernon, I. H. B., H. V. K., I. B, 1863, A Clerk, Miles, E. C. E, Regina, Volpone, T. M. B., Fergus, L. S. D., P. P., Quidnunc, Tom; C. D., of Bruges; G. B. C., F. R. S., Milo, Fidele; G., of Ludlow; Max, Boston Stump; I. J., of Paris; A Subscriber, Delaware, Q. E. D., Sigma, T. R. H., Old Joe, C. M. Dux; I. H., Chamouni; A Bath Archer, S. Borrow, Matador, Peregrine Pau, Estevan; Henry Fran, Lyons; Septimus, Junior, A Beginner, A Lover of Problems, Doubtful, Elene, Medicus, H.M.S. Dauntless, Grip, M. Bezerovnöy, Tyro, Johnston Mills, Jemmy, H. W. B., Rusper, Peterkin, A Swede, S. P. Q. R., Adelphi, G. W. R., Mercator; G., Blackheath; Garryowen, and A Rifleman are correct. All others are wrong.

PROBLEM No. 1021.

By Mr. W. S. Pavitt.

One of the competing Problems in the late Chess Tourney.

BLACK.

WHITE.

White to play, and mate in four moves.

CHESS IN BRIGHTON.

Mr. Staunton gave the Pawn and two moves to the late Dr. Turner.

(Remove Black's K B Pawn from the Board.)

WHITE (Dr. T.)	BLACK (Mr. S.)
1. P to K 4th	
2. P to Q 4th	P to K 3rd
3. B to Q 3rd	P to Q B 4th
4. P takes P	Q to Q R 4th (ch)
5. Kt to Q B 3rd	B takes P
6. B to Q 2nd	P to Q 3rd
7. Kt to Q 5th	Q to Q sq
8. Kt to K B 4th	Kt to K B 3rd
9. P to K R 3rd	Kt to Q B 3rd
10. Kt to K B 3rd	Castles
11. Q to K 2nd	P to Q R 3rd
12. Castles (Q's side)	Q to Q B 2nd
13. B to Q B 4th	R to K sq
14. B to Q B 3rd	P to Q 4th
15. P takes P	Q takes Kt (ch)
16. B to Q 2nd	Kt to Q 5th
17. B takes Q	
(He should rather have taken the Kt with Kt.)	
17.	Kt takes Q (ch)
18. B takes Kt	P takes P
19. Kt to K 5th	B takes K B P
(Threatening to gain a piece by playing B to K 6th (ch), and, when the Bishop was captured, to take the Kt with Rook, &c.)	
20. B to K B 3rd	B to K B 4th
(Designedly giving up the Queen's Pawn for a prospective attack.)	
21. B takes Q P (ch)	Kt takes B
22. Q R takes Kt	B to K 5th
23. Q R to Q 7th	P to K Kt 4th
(This is preferable to taking the K Kt Pawn; for example:—	
23.	B takes K Kt P
24. K R to K R 2nd	B to K 6th (ch)
25. B takes B	R takes Kt
26. R takes B	R takes B
27. K R takes P (ch) and White must win.)	
24. Kt to K Kt 4th	P takes B
25. Kt takes B	B takes K Kt
26. K R to Kt sq	P to K B 6th
27. Kt to K Kt 4th	R to K 3rd
28. P to K R 4th	K to R sq
29. Q R to K B 7th	Q R to K sq
30. K R to Q sq	
(Had he played the highly-promising move of Kt to K B 6th, Black would have answered with R to K 2nd, rendering it of no avail.)	
30.	K R to K 2nd
31. K R to Q 7th	R takes K R
32. R takes R	B to K R 6th
(A move Dr. Turner must have overlooked when he played his K R to Q 7th.)	
33. R to Q 4th	B takes Kt
34. R takes B	P to K B 7th
	and Black wins.

MR. BUCKLE'S GAMES CONTINUED.

Mr. Buckle gives the odds of the Pawn and two moves to an Amateur of some skill.

(Remove Black's K B P from the Board.)

WHITE (Amateur.)	BLACK (Mr. B.)
1. P to K 4th	
2. P to Q 4th	P to K 3rd
3. Kt to Q B 3rd	B to Q Kt 5th
4. B to Q 3rd	Kt to K 2nd
5. B to K Kt 5th	P to Q 3rd
6. P to K B 4th	Kt to Q 2nd
7. P to K 5th	Kt to K B sq
8. Kt to K R 3rd	P to Q 4th
9. P to K Kt 4th	P to Q B 4th
10. P to Q R 3rd	B takes Kt (ch)
11. P takes B	P to Q B 5th
12. B to K 2nd	P to K R 3rd
13. B to K R 4th	P to K Kt 4th
(By this dashing advance Black effectually retorts the attacks, though with some peril, from the exposed position of his King.)	
14. B to K Kt 3rd	P takes K B P
15. Kt takes P	K Kt to K Kt 3rd
16. Castles	Kt takes Kt
17. R takes Kt	B to Q 2nd
18. Q to Q 2nd	Q to Q R 4th
19. R to K B 6th	Castles
20. B to K R 4th	R to K sq
21. Q R to K B sq	Q takes Q R P
22. R takes K R P	R takes R
23. Q takes R	P to Q R 4th
24. P to K Kt 5th	P to Q R 5th
25. P to K Kt 6th	
(The advance of this Pawn was well-timed, and may be said to have saved White's game. It can be stopped now only by the sacrifice of a piece.)	
25.	Kt takes P
26. Q takes Kt	Q takes Q B P
27. B to K B 2nd	P to Q R 6th
28. Q to K Kt 3rd	Q to Q Kt 7th
29. B to K sq	Q takes Q P (ch)
30. K to R sq	Q to Q B 4th
31. B to K R 5th	R to K R sq
32. R to K B 7th	
(The termination of this game is played with considerable spirit by White, and with not less fortitude and patience on the part of his adversary.)	
32.	R takes B
(We are not sure but that Pawn to Q R 7th would have given White some trouble even here, forlorn as Black's game appears.)	
33. Q to K Kt 8th (ch)	K to Q B 2nd
34. R takes B (ch)	K takes R
35. Q to K B 7th (ch)	Q to K 2nd
36. Q takes R	P to Q Kt 4th
37. B to K R 4th	Q to K B sq
(Black might have made a drawn game now by playing the Pawn to Q R 7th.)	
38. B to K B 6th	P to Q R 7th
39. Q to K R 7th (ch)	K to K sq
40. Q to Q R 7th	Q to Q Kt 5th
41. Q takes Q R P	
(This is to amplify too much; he could have forced mate in a few moves.)	
41.	Q to Q R 5th
42. Q takes Q	P takes Q
43. B to K Kt 5th	P to Q 5th
44. B to Q B sq	P to Q 6th
45. P takes P	P takes P
46. K to Kt 2nd	P to Q R 6th
47. K to B 2nd	
	And Black resigns.

CHESS ENIGMAS.

No. 1351.—By Mr. A. Moser.

White: K at K Kt 4th, Q at Q B 6th, Kt at K B 5th, Ps at K R 3rd and Q B 2nd.

Black: K at K 5th, R at Q th, B at Q R 4th; Ps at K R 5th, K 4th, and Q B 6th.

White, playing first, gives mate in four moves.

No. 1352.—By the Editor of "Sissa."

White: K at Q R sq, R at Q Kt sq, Kts at Q 2nd and 4th.

Black: K at Q R 6th, R at Q R 4th, B at K R sq, Kts at Q 8th and Q Kt 5th; Ps at Q 4th, Q Kt 4th, and Q R 5th.

White to play, and mate in three moves.

TESTIMONIALS TO MAJOR PEARSE.

We engrave a silver cup and salver presented to Major G. G. Pearse, of the Madras Royal Artillery, by the native officers, non-commissioned officers, and men of the 3rd Sikh Irregular Cavalry, which regiment he commanded throughout the Indian mutinies. The salver bears the following inscription:—"Presented to Major George Godfrey Pearse, late Commandant of the 3rd Sikh Irregular Cavalry, by the officers, non-commissioned officers, and troopers of that regiment, in testimony of their devotion to and admiration and esteem for their commander, who, during the memorable year of 1857, when India was convulsed by the sepoy mutiny, raised the regiment within the short period of a month, and in the campaign of the succeeding year gallantly led it in many a glorious action; and yet further to mark the regret which they entertain for their severance from this brave, generous, and humane soldier by the disbandment of the regiment consequent on the reduction of the Bengal Native Army in July, 1861, A.D." The cup bears a similar inscription.

TESTIMONIALS TO CAPTAIN GRANT.

Captain James Augustus Grant, of the Indian Army, the companion of Captain Speke in the discovery of the source of the Nile, has recently received the freedom of the town of Nairn, his native place, presented by the corporation of the burgh, a handsome silver casket by the ladies, and a massive silver vase by the gentlemen of the county of Nairn. The presentation took place in the large hall of Anderson's Hotel, in the presence of most of the notabilities of the town and neighbourhood.

Mr. Adam Davidson, town clerk, read the deed recording the unanimous vote of the Corporation, which ran as follows:—"The Provost, Magistrates, and Town Council embrace with pleasure the opportunity afforded by the return of Captain James Augustus Grant, of her Majesty's Indian Army, son of the late Rev. James Grant, minister of the parish of Nairn, to his native town, to present him with the freedom of the burgh in testimony of their high appreciation of his valuable services in discovering the source of the Nile, in conjunction with Captain Speke, after a long and arduous exploration, manfully sustained. They therefore hereby unanimously admit, create, and receive the said Captain James Augustus Grant an honorary freeman, burgess, and guild brother of the Royal burgh of Nairn.—Alex. Findlay, Provost." The Provost hereupon handed to the gallant Captain the freedom of the burgh, inclosed in a handsome silver casket, the gift of the ladies, and bearing the following inscription:—"Presented by the ladies of the town and county of Nairn to Captain J. A. Grant, H.M.I. Army, on his return to his native town, in token of their esteem and regard, and in testimony of their appreciation of the memorable service he has rendered in the discovery of the source of the Nile, after a long, arduous, and brave exploration. This casket is intended as the depository for the freedom of the burgh, voted by the Provost, Magistrates, and Town Council of Nairn, A.D. 1863."

The vase, of which we give an Engraving, was presented by Brodie of Brodie, Lord Lieutenant of the county. It bears a representation of the Grant crest, with the words, "Stand Fast," and is mounted on a silver-mounted ebony pedestal, with the following inscription:—"Presented to Captain James Augustus Grant, of her Majesty's Indian Army, by friends in his native town and county of Nairn, to commemorate the discovery of the source of the Nile by him and Captain Speke. Nairn, A.D. 1863." The vase was supplied by Mr. Hancock, of London, and is valued at a hundred guineas.

THE RED HOWLING MONKEYS (MYCETES URSINUS)

IN THE ZOOLOGICAL SOCIETY'S GARDENS, REGENT'S PARK.

Many of the American monkeys thrive well in captivity in this country. The Capucins (Cebus) of Brazil and Guiana are the species most commonly selected by the Italian organ-grinders, who carry these denizens of the tropical forests of America round the streets of London in all weathers, and find them amongst the most hardy as well as the most intelligent of their tribe. On the other hand, the spider monkeys (Ateles) and the howling monkeys (Mycetes) of the same continent appear to possess a very delicate organisation, and to suffer severely from the effects of our changeable climate. Although great care has been bestowed on the former animals in the Zoological Society's Gardens, spider monkeys have hitherto proved but a short-lived race in this country, and until quite recently the society's efforts to obtain living howling monkeys have been quite unsuccessful, the examples of this genus captured for that purpose not having even survived to reach England alive.

It is to their active and obliging corresponding member, Mr. Edward Greey, of the West Indian Steam Navigation Company's service, that the society are indebted for the two howling monkeys that are now exhibited in their gardens, and which are believed to be the first of the sort ever brought living to this country. Mr. Greey obtained these animals from the forests on the Dekke River, near Cartagena, in New Granada, and transmitted them to this country viâ Southampton, under the care of Captain Abbott, of the well-known West Indian mail steam-ship Shannon. Though rather languishing from the effects of their close confinement when they first arrived, these monkeys have picked up wonderfully since their reception in the society's gardens, and now promise to do well.

The genus Mycetes of naturalists or of the howling monkeys, as they are commonly called, consists of some nine or ten species, all of which are peculiar to the hot and humid forests of tropical America. The ursine, or red howler (Mycetes ursinus), the species to which the animals now living in the Zoological Society's collection belong, is found in Guiana, Venezuela, and New Granada. Like others of the same genus, it is remarkable for its extraordinary vocal powers. "Nothing," says the well-known traveller Waterton, who encountered this animal during his wanderings in Demerara, "can sound more dreadful than its nocturnal howlings. While lying in your hammock in these gloomy and immeasurable wilds, you hear him howling at intervals from eleven o'clock at night till daybreak. You would suppose that half the wild beasts of the forest were collecting for the work of carnage. Now it is the tremendous roar of the jaguar, as he springs on his prey; now it changes to his terrible and deep-toned growlings, as he is pressed on all sides by superior force; and now you hear his last dying moan beneath a mortal wound."

The howling monkeys are provided with a special mechanism in the throat, formed by the development of the hyoid bone and thyroid cartilage, for the production of these discordant sounds, which, according to Humboldt, can be heard at the distance of nearly a mile. Should the specimens in the Zoological Society's Gardens attain to maturity, it is possible that the inhabitants of Regent's Park may some day have an opportunity of verifying the statements of that learned taveller as to the distance at which their howlings are audible.

The much-vexed point as to the merits of English and Arab horses has, according to the *Times'* correspondent, just again been tried in Cairo. Ali Pacha, who has the finest stud of Arabs in Egypt, maintained that no English horse could run against an Arab for four miles. His Highness Halim Pacha offered to run Companion, a well-known racer here, against him for any sum he liked. The match was run from the first station on the Suez desert to Cairo. The English horse, which was bred by Lord Ribblesdale, won in a canter by more than half a mile.

President Lincoln.—A Washington correspondent of the *New York Times* writes:—"I see the President almost every day, as I happen to live where he passes to or from his lodgings out of town. Mr. Lincoln never reposes at the White House during the hot season, but has quarters at a healthy location some three miles north of the city—the Soldiers' Home, a United States' benevolent establishment. I saw him this morning, about half-past eight, coming in to business, riding on Vermont-avenue, near L-street. The sight is a significant one. He always has a company of twenty-five or thirty cavalry, with sabres drawn and held upright over their shoulders. The party makes no great show in uniforms or horses. Mr. Lincoln generally rides a good-sized, easy-going, gray horse; is dressed in black, somewhat rusty and dusty; wears a black, stiff hat, and looks about as ordinary in attire, &c., as the commonest man. A Lieutenant, with yellow straps, rides at his left; and following behind, two by two, come the cavalry men in their yellow-striped jackets. They are generally going at a slow trot, as that is the pace set them by the dignitary they wait upon. The sabres and accoutrements clank, and the entirely unornamental cortége trots slowly towards Lafayette-square. It arouses no sensation, only some curious stranger stops and gazes. I saw very plainly the President's dark brown face, with the deep cut lines, the eyes, always to me, with a deep, latent sadness in the expression. Sometimes he comes and goes in an open barouche. The cavalry always accompany him with drawn sabres. Sometimes one of his sons, a boy of ten or twelve, rides at his right on a pony."

SILVER VASE PRESENTED TO CAPT. J. A. GRANT.
SEE PRECEDING PAGE.

TESTIMONIAL TO MAJOR C. G. PEARSE, OF THE MADRAS ROYAL ARTILLERY.—SEE PRECEDING PAGE.

THE RED HOWLING MONKEYS (MYCETES URSINUS) IN THE ZOOLOGICAL SOCIETY'S GARDENS, REGENT'S PARK.—SEE PRECEDING PAGE.

LONDON: Printed and Published at the Office, 198, Strand, in the Parish of St. Clement Danes, in the County of Middlesex, by GEORGE C. LEIGHTON, 198, Strand, aforesaid.—SATURDAY, SEPTEMBER 19, 1863.

THE ILLUSTRATED LONDON NEWS.

No. 1223.—VOL. XLIII. SATURDAY, SEPTEMBER 26, 1863. WITH A SUPPLEMENT, FIVEPENCE

RUSSIA SHUTTING THE DOOR OF DIPLOMACY.

THE diplomatic correspondence between the three Powers and Russia on the subject of Poland may be looked upon as closed. Prince Gortschakoff is released from the necessity of seeming to listen and defer to the remonstrances of England, France, and Austria by the approach of winter. While there remained a possibility that words of complaint might be followed up by deeds of hostility Russia deigned to hear what her neighbours had to urge against her, to make some admissions, to offer plausible explanations, to criticise offers of advice, and to give vague promise of concessions. With unrelaxed clutch on the throat of Poland she could afford to parley with shocked and indignant nations, and to amuse them with illusory hopes, until summer had slipped by. It is unnecessary now. Before the maritime Powers could organise a naval expedition to coerce her frost will have mounted guard over her northern ports, and, unless Austria should be provoked to act alone—a contingency too improbable to be feared—armed intervention will have become impracticable until next spring. The subjugation of her insurgent provinces—which she has been unable to effect with upwards of two hundred thousand soldiers during the open weather—she counts upon completing within the next three or four months, with the aid of a rigorous climate. The sharp breath of winter, she knows, will be more terrible than the rattle of musketry to the bands of patriots that bivouack in forest and swamp, and provide more work for Russian troops than they can accomplish. Her victim, she thinks, is at her mercy. She will have crushed all resistance before foreign interference can stay her vengeance; and, having prostrated, gagged, and pinioned the nation which has dared to assert its rights, she will tell Europe that for the future there need be no apprehension that the public conscience will be troubled by the shrieks of the oppressed, or that the public peace will be endangered by their struggles to be independent and free.

THE WAR IN AMERICA: ASSAULT ON FORT WAGNER, CHARLESTON HARBOUR, ON THE NIGHT OF JULY 18.—THE RUSH OF THE GARRISON TO THE PARAPET.
FROM A SKETCH BY OUR SPECIAL ARTIST.—SEE PAGE 317.

The diplomatic correspondence, we repeat, is closed. Russia smiles, bows, and shuts the door. The Powers had each solemnly reminded her that she would be held responsible for the consequences of her unrelenting policy, and she accepts that responsibility. Her logic has been battered to pieces, but her will remains. "May I not do as I please with mine own?" is the substance of her last despatches. "Look you to your duties, I will answer for mine. We cannot agree—we need not discuss. I am master in my own house. When I shall have vindicated my supremacy my natural clemency will suffice to ensure the well-being of Poland." And so, Eastern barbarism, having cut short all further argument with Western civilisation, will return to its fitting work with unshackled purpose. Poland must renounce all expectation of foreign aid. She must succumb or continue the struggle alone. She can hardly hope for another mild winter. She has held on hitherto with marvellous tenacity and success. Despair may prompt her to choose death rather than life. But the odds are fearfully against her, and her enemy will avail himself of them without scruple. It is a sad thing to be obliged to stand helplessly by and see a gallant nation crushed. It is impossible to suppress a feeling of fretful impatience at having good intentions summarily baffled. The alternative left to Europe is an afflicting one; but, perhaps, it was inevitable. Remonstrance with brute force intent upon perpetrating a crime of violence may have been all that civilisation could interpose between the perpetrator of the act, without provoking a still more disastrous issue; but it cannot be silenced without a sense of irritation being left behind. Russia may yet find that the successful assertion of her self-will, in the face of the pained conscience and the blessing sympathies of Europe, is but the germ of future misery. Russia beaten she would not befall an empire is to find itself free to be as wicked as it will.

For the end is not yet. Prince Gortschakoff, and the party whom he leads, may chuckle over the fruit of their diplomatic cunning, and, having soothed the remonstrant Powers, may turn with unhesitating confidence to the execution of their grim designs; but there will yet be the reckoning to pay. The Almighty wisdom which presides over nations never suffers its laws to be violated with impunity. The policy which defies justice and reason, even in making its immediate objects, inherits also the curse which such defiance inevitably entails. If, during the next few months, Russia should have her way with Poland, effectually break her spirit and blot out her name, no astuteness of diplomacy, no inflexibility of determination, no organisation or increase of her physical strength, will avail to reverse the laws which make evil-doing, in the long run, the cause of national weakness and the forerunner of the dissolution of empires. In what way, precisely, retribution will in this instance be connected with crime, it may be beyond human ken to discern. Effects cannot be measured because is the beginning of punishment. None can foresee what effect the murder of Poland may have upon the parties who have combined to compass it. Possibly, with the disappearance of the victim, may disappear also the bond which a common fear and wrong created in the hearts of those unlike and heterogeneous parties together. When the fire shall have consumed all that was combustible in the prostrate kingdom, may it not break out in the heart of the empire? Or who can tell what may be the result of an advance of Eastern barbarism to the extreme frontiers of Germany upon the prospects and policy of Austria and Prussia? One thing is certain. The Western Powers will treasure up the remembrance of the manner in which Russian pride first dallied with and then cruelly dismissed their complaints. No nation can in these days long hold a position of great importance without moral strength; none can successfully set at naught for more than a brief interval the moral sense of mankind. Russia refuses to lend her will to the public opinion of Europe. She avowedly accepts the consequences. She is recklessly engendering the electric power which, because it is diffused, is not the less real. She forgets that the moment and the occasion will surely come when that power will become concentrated, and the same flash which will render it visible will also shatter in pieces the towering insolence which attracts it. Right, too long and too proudly resisted, develops itself into might. The struggle arms invariably carries within itself the seed of its own punishment.

But it is by no means certain that, in re'ence to the subjugation of Poland, crime will be successful. The vitality of the insurrection has up to the present moment outdone all anticipation. When it first broke out no one expected that it could maintain itself for three months against the organised resources of Russia, unless it was promptly and powerfully aided from without. Yet it has kept at bay till now an immense military force, and, instead of being exhausted, is far stronger than it was at the beginning of the struggle. Berg and Mouravieff excite more hostility than they destroy. But for the approach of winter, the Emperor Alexander II. would have before him a more difficult and hopeless task than any in has yet fallen to his lot to undertake; or, perhaps, in the absence of those expectations which the advancing season of rigour inspires in the bosoms of Muscovite oligarchs, he would have been allowed to prefer a liberal policy to one of devastation and death. The data, however, upon which barbarism founds its calculations are not to be mistaken. The winter may not be so severe as Russian tyranny counts upon its being. The despair of the Poles may urge them to brave the utmost sufferings it can inflict in preference to the more humiliating and hardly less excruciating torments held in reserve for them by their oppressors. The National Government may hit upon a strategy which will evade to some extent the horrors of the season. The chances against the insurgents are not more desperate than they were when, unarmed, unorganised, unprovided with plans, resources, or leaders, they started up to claim back their national independence. What if their cause should survive the winter months? What, if when spring reopens the watery pathway to St. Petersburg, Europe should still witness the struggle between might and right? Will her patience have been confirmed? Will her forbearance be unshaken? Will she care much about the clement Napoleon's reproaches? Will the eruptions of breaking off of diplomatic correspondence this autumn have disposed the Powers to view the situation with indulgent considerations? Will they be satisfied with the six points? Or will intervention assume a shape which it will be impossible for Russia to face? At any rate, failure is upon the cards: and failure, under the circumstances, will be great and disgraceful just in proportion to the present diplomatic success.

We are by no means convinced that Europe will quietly submit the issue to this remote chance. On no coercive measure short of war be resorted? When the King of Naples rejected the moderate counsels of the Western Powers, they withdrew from official intercourse with him, and condemned him to isolation. Might not Russia be made to feel the inconveniences of a similar "moral blockade?" Might not the friendly Powers declare that they would recognise no ties of diplomatic fellowship with a Court which persisted in outraging public opinion and in disregarding treaty stipulations? If Russia will be barbarous, let her be dealt with as a barbarian. Let civilised Governments mark their sense of disapproval by expelling her from the code of nations. If not for the sake of right, for their own dignity's sake, and in vindication of their own self-respect, some such public manifestation of displeasure would be justifiable, even if it be not indispensable. We know not why it should render war more likely than to sit down to the ordinary intercourse of peace with Russia. In one respect we believe it would tend rather to prevent than to provoke war, for it would do something towards allaying the irritability of public feeling which, in France at least, may become unmanageable. Russia has coolly, not to say insolently, accepted the responsibility of her misdeeds—it surely would be well to let her feel that her responsibility is something more than nominal, and that if, in deference to the behests of Western civilisation, she refuses to give up a ruthless policy, Western civilisation will disown her as unfit for international recognition and fellowship.

FOREIGN AND COLONIAL NEWS.

FRANCE.

Preparations are being made at the Palace of Compiègne for the Emperor's reception. It is said that horseracing is to take place at Compiègne during his stay there, and that the arrangements are under the direction of General Fleury.

The letter of the Emperor, of the 15th ult. by the Polish National Government to Prince Czartoryski (of which we give a summary in another column) was republished on Sunday by the *Moniteur*; and its appearance in that journal is regarded as the most unmistakeable symptom of a rupture with Russia in the minds of Parisian politicians and speculators. The Bourse is nearly in a state of panic on Monday. Most of the Paris journals, including even one or two of those which are more or less "inspired," regard the publication of this document in the *Moniteur* as "a declaration of hostility and a challenge," "a fresh impression in Europe," and as the logical precursor of an official recognition of the Polish insurgents as belligerents. The letter produces quite a sensation in the *Moniteur*, absorbing nearly all the space allotted to news.

Wednesday last there published a pastoral letter of the Bishop of Marseilles, desiring the prayers of the faithful for their Catholic brethren in Poland, and commanding that public processions should be imposed to cover them with its protection, and to afford them liberty of worship.

The Annamite Ambassadors were received by the French Minister of Foreign Affairs yesterday week.

A panorama of Jerusalem has been set on foot in Paris under satisfactory auspices.

Alfred de Vigny, the well-known author, is dead.

Galignani says:—"Mr. C. Mathews continues his agreeable career in Paris with a kind of double success, theatrical and literary. Besides enjoying daily the favour of the public in the little piece into which he infuses such remarkable life and vivacity, he is receiving from all the theatres offers of the part of Lord Dundreary. Negotiations of his merits as an admirable comedian, but has been at once admitted, by general acclaim, to be the first literary character of the day. The sale of Vernet, Perlet, Arnal, and others of those great *comiques* with whose names it is a real privilege and honour for any artiste to be associated.

From Brest we get news that the Federal vessel Kearsage, Captain Winslow, left Cherbourg on the 19th of September, and taken up her berth within view of the Alabama.

THE FRENCH IN MEXICO.

It appears to be definitively decided that the Archduke Maximilian accepts the throne of Mexico. Much in excess of a report that the English Government gives a cordial concurrence to his accession, and will at once recognise him as Emperor of Mexico.

The deputation commissioned to offer the Mexican crown to the Archduke Maximilian left Miramar on the 15th, and have reoccupied Tampico without resistance. It is stated that both Marshal Forey and M. de Saligny are about to return to France.

Intelligence has been received from Mexico, through New York, mentions the almost incredible report that Miramon had declared his allegiance to Benito Juarez, the Democratic President of Mexico, and had promised the Juarez Government until otherwise instructed by their Government.

Further advices from Mexico state that the representatives of the South American States have refused to recognise an alliance with them, with the view of resisting European encroachments. A Federal delegate is also invited to co-operate.

ITALY.

The King has been engaged in reviewing the Italian troops near Milan. The manœuvres were very brilliant, and his Majesty was with the utmost enthusiastic reception. Similar scenes were held at Florence.

The *Gazette* of yesterday week contained the official announcement of the appointment of the Hon. H. G. Elliot to be Minister at the Court of Turin.

THE NETHERLANDS.

Yesterday week the Minister of Justice closed the Session of the States-General, by command of his Majesty, with a short speech, in which he briefly enumerated the measures which had been passed during a very active Session.

No sooner, however, was one Session closed than another was opened; and on Monday, according to the provisions of the Constitution, the King proceeded in state to read from the throne his annual speech to the nation's representatives. His Majesty said that the foreign relations of Holland continued to be friendly, while the good understanding with Belgium had been strengthened by the treaties concluded between the two States. Internal affairs of the country on its prosperity and the good state of its military forces, and informed the States that projects of law for a new criminal and civil code, for the extension of railways, for a reform of the system of taxation, and for the improvement of the Dutch colonies would be presented to them in the course of the Session.

GERMANY AND DENMARK.

The Committees of the German Diet have presented a report urging "Federal execution" in Holstein, and recommending that the duchy be occupied by 6000 Hanoverian and Saxon troops, and be administered by federal authority. The Diet will proceed to consider this report, and its decision—which involves the question of peace or war between Germany and Denmark—will be taken on the 1st of October.

The Danish Government has commenced preparations for its probable struggle with Germany, and issues an order that the regimental lists shall be filled up to war strength by the 1st of October.

A letter from London, in the *Times* of Wednesday, states (on what authority we know not) that Earl Russell, at the request of the Danish Government, has undertaken an attempt at mediation between the federal Diet and the Cabinet at Copenhagen.

PRUSSIA.

The King was present yesterday week at the manœuvres of the troops, which took place between Bucker and Strausberg. At the banquet at Lehus, which succeeded the inspection of the army corps near that place, his Majesty replied as follows to the toast in which his health was proposed:—

I am rejoiced and moved that the cordial and jubilant sympathies of this district, and my loyal people of Potsdam, have united to greet me on this jubilee festival for me. I am convinced that all present participate in those sentiments which have been expressed in the name of the soldiery and of my gallant Commander-in-Frankfort, and will only express the wish that, if required in this time of difficulty, these sentiments may be confirmed by deeds.

The King has conferred the Grand Cross of the Order of the Red Eagle on M. Rudler, Minister of Foreign Affairs for Belgium, and on Baron Nothomb, the Belgium Minister and Envoy Extraordinary at Berlin, in token of his Majesty's satisfaction at the treaty recently concluded between Prussia and Belgium. His Majesty has also conferred decorations of a lower grade on other of the Prussian officials.

The reply of the Diet to the propositions of the Congress at Frankfort has been published. His Majesty formally rejects the propositions of Austria and her allies, and states the conditions upon which alone he could co-operate in a scheme of federal reform. These are chiefly the complete equality of Austria and Prussia in all federal concerns, and a different organisation of the popular representation at the federal Assembly from that proposed by Austria.

The German Diet continues to be the subject in its crusade against the press. The trial of the editors, on the accusation of having exalté contempt and hatred against the authorities, came on at Berlin yesterday week, and resulted in all the defendants being acquitted.

The new Bourse or Exchange of Berlin will be opened on Monday next. The King has been invited to be present at the opening. The edifice, which is situated in Berg Strasse, on the right bank of the Spree, is in the handsomest and purest style.

The municipal authorities of Berlin and Leipsic have agreed to issue a common circular to the town councils of all Germany desiring their concurrence in festivities proposed to come off on the battlefield of the 19th of October, 1813. It is in commemoration of the great international victory of the Leipsic battle, the battle which broke the power of Napoleon I. and sent him an exile to Elba. Deputations from all Germany are requested to assemble on the fiftieth anniversary.

Professor Encke, the celebrated astronomer and mathematician, is compelled by advanced age to retire from the office of Secretary of the Berlin Academy of Sciences, which he has held for many years.

The Acclimatisation Society of Berlin opened a public exhibition on Monday. No less than 1500 objects belonging to the animal and vegetable kingdoms have been exhibited.

RUSSIA.

The Czar has been patronising constitutionalism in Finland. Yesterday week the Finnish Diet was opened with a speech from his Majesty. Among other subjects the Imperial speech stated that no new loan should be undertaken without the consent of the Diet, except in case of a sudden invasion, or some other unforeseen misfortune. The Emperor was desirous of remedying the imperfections of the fundamental laws. The speech concluded as follows:—"I shall soon cause to be laid before the Diet bills granting more extended privileges, upon the establishment of trade and liberty of introducing bills, reserving to myself, however, the initiative in fundamental changes." Articles in the press of Finland show that great expectations are indulged in as to the constitutional era about to dawn upon the country; and the official censor has not only offered no hindrance to the publication of these journals, but the Government has permitted new ones of decided liberal tendency to appear. One of these journals urgently demands the introduction of a decentralised system, and applies its own English, Belgian, and Norway as patterns to be imitated.

The Imperial family returned to St. Petersburg on Sunday, and the young King of Greece arrived in that city the next day on a visit to the Emperor.

The Russians are salt to be building eleven iron-plated gun-boats with turrets.

THE POLISH INSURRECTION.

The reply of the Russian Government to the last note of Earl Russell has been made public. It is similar in character to the notes addressed to the Western Powers, which remain unanswered to be given, and gently insinuates that Russia is perfectly able to manage her own affairs. Prince Gortschakoff says that this document could only end in confirming the differences which exist between the Western Powers and Russia, and in the conciliatory disposition of the Czar, therefore, determines that it shall not be prolonged. This Czar, Prince Gortschakoff continues, is willing to assume the responsibility of his international acts, which must be based upon public right, and, as public right has always been regarded as his guiding principle in his relations with other Powers, as Prince Gortschakoff states for his "august master" the same treatment which he has accorded to his allies.

The Polish National Government have addressed a letter to Prince Czartoryski, dated Aug. 15. The principles put forward in this document are those of nationality, religious liberty, and religious liberty, equality in the eye of the law, and justice impartially distributed to all classes and creeds. The National Government rejects the laws imposed on the country by foreign domination. To obey it laws ought to be impressed with the spirit of the nation, should therefore be the work of its will, founded upon the great principles of right, should be the expression of national sovereignty. Respect for nationality is the first eyes of the National Government, the necessary consequence of a system of things based on the confidence of the governed, on the justice of the rulers, and on the love of right for their common country. With regard to the religious question the principles thus laid down the manifesto declares that the propositions submitted to the Conference at St. Petersburg do not afford sufficient security to the Polish nation, whose unquestionable rights do not include the recognition of the Russian Polish question is presented in the light of a question of European order. "The proclamations of General Mouravieff are of themselves sufficient to prove that the Russian domination is only sustained by the upsetting of every principle on which organised societies are based. The only guarantee of social harmony are found under foot in these proclamations and by the acts of the Russian Government. In fact, social order, the principles which are its foundation, and the inviolable rights in which it concentrates, have no place in Poland no other security, no other protection, than what is afforded by the National Government and the institutions which it has created." The manifesto then shows that the Polish movement is not of foreign origin, and complains that it is the object of surveillance and menace on the part of neighbouring Powers which amount to a real intervention. It demands for the Poles a recognition as belligerents, and declares that they were ready to accept the succession of arms which Russia refused. "If," they say, "Russia will have no truce we accept the challenge, and, the God of our fathers with us, we are ready to renew the struggle in the firm hope that the future is ours."

Several engagements between the Poles and the Russians are reported, but except in one instance (in which the Poles are said to have been successful) the result is not named.

Andrew Woytasiak, one of the St. Petersburg Lancers, has been condemned to death for having passed over to the ranks of the insurgents. He was shot at Ponowej.

The notorious Mouravieff has been expressly thanked in an autograph letter of the Czar for his services in Poland. The insignia of the Imperial Order of St. Andrew the Apostle accompanied the Sovereign's communication.

A telegram from Warsaw states that the Marquis Wielopolski's leave of absence is made permanent, and that he has been definitively relieved of his functions as Civil Governor and Vice-President of the Council of State.

The Poles continue to retaliate by attempts at assassination for the merciless severities of their Russian military rulers. Last Saturday afternoon, while General Berg was driving through one of the streets of Warsaw, an Orsini bomb was thrown from a great house at his carriage. Its explosion left General Berg unhurt, but killed a trooper of his Circassian escort. The exasperated soldiers immediately broke into the house whence the bomb was thrown, and committed great excesses; but, although the street was immediately surrounded by troops and the thoroughfare stopped, the assassins were not apprehended. The two palaces of the Zamoyski family at Warsaw (from the windows of one of which the bomb is alleged to have been thrown) have been entirely plundered by the military. All the male inhabitants of both mansions have been carried off to the citadel. The two Counts Zamoyski and Prince Lubominski are in chains. The palaces have been condemned to be used as barracks in perpetuity.

The public library, the archives of the Vistula Steam Navigation Company, and the Oriental collection of Professor Kowalewski have been burnt.

AMERICA.

THE SIEGE OF CHARLESTON.—CAPTURE OF MORRIS ISLAND.

The whole of that long peninsula called Morris Island, which forms a natural mole at the southern side of the entrance to Charleston Harbour, is in the hands of the Federals. The capture of Morris Island opens the front door into Charleston. Fort Wagner and Battery Gregg, which are on it, can now be turned to the uses of the assailants. They command the entrance to the harbour, and at Cumming's Point, the end of the island, General Gilmore will be able to construct batteries a mile nearer the city than the spot from which the recent bombardment took place.

The attacks upon Morris Island fills up the whole interval from the 1st to the evening of the 6th. On the night of the 1st a grand attack was organised in conjunction with the monitors. During the afternoon the commanders assembled in Admiral Dahlgren's cabin to agree upon their plans, and at about eleven o'clock the fleet steamed up the harbour and began the fight, dividing their attention between Fort Sumter and the works at Cumming's Point. There was one "continued line of flashes from the Beach Inlet to the works on the extreme left — an uninterrupted roar of heavy guns and the howl of rifle-bolts made the scene one not easily forgotten." At daylight on the 5th another furious bombardment began against Fort Wagner and Battery Gregg and continued without intermission until dark. In the course of the night the Federals landed men in boats on the space between the two works, and tried to take Battery Gregg by storming it in the rear. This adventurous attack failed. Next day the bombardment was renewed and kept up till dark, having lasted almost uninterruptedly for fifty-two hours. Meanwhile, General Gilmore had been getting nearer and nearer the fort by dint of spadework, and by the evening of the 6th his Sappers reached the moat which surrounded it. Then at last Beauregard confessed himself beaten. Between that night and the following morning the works on Morris Island were evacuated, the Confederates spiking their guns and carrying off their wounded.

On the capture of Morris Island, Admiral Dahlgren demanded the surrender of Fort Sumter. General Beauregard refused compliance, and the Federals once more began a furious bombardment. At six p.m. on the 7th the monitors opened fire at close range. They do not appear to have suffered much damage themselves, but they failed to compel the surrender of the devoted handful of men who manned the fort. On the 8th the monitors directed their fire against Fort Moultrie and the other works on Sullivan's Island, on the north side of the harbour. For nine hours the fire was kept up, "with no result," as the Charleston papers assure us, though it is said that a magazine in Fort Moultrie exploded, and Moultreville, a number of buildings in the neighbourhood of the fort, was destroyed. Apparently during the night of the 8th, the Federals landed a force on the ruins of Fort Sumter, in the hope of taking it by a sudden and unexpected assault. The daring attempt failed. The Confederates were found prepared. The assailants lost sixty men by killing or drowning, and five officers were among the prisoners captured. At this point the curtain falls upon this extraordinary siege, notable alike for the determination and the wonderful range of the weapons with which the attack has been conducted and the desperate tenacity of the defence.

General Gilmore, in his despatch announcing the clearing of Morris Island and the taking of Forts Wagner and Gregg, says:—"About ten o'clock last night (the 6th) the enemy commenced evacuating the island, and all but seventy-five of them made their escape from Cumming's Point in small boats. Captured despatches show that the fort was commanded by Colonel Keitt, of South Carolina, and garrisoned by 1400 effective men, and Battery Gregg by between 100 or 200. Fort Wagner is a work of the most formidable kind. It is bombproof, and is capable of holding 1800 men. It remains intact after the most terrible bombardment to which any work was ever subjected. We have captured nineteen pieces of artillery and a large supply of excellent ammunition. The city and harbour of Charleston are now completely covered by my guns."

OTHER MILITARY MOVEMENTS.

No movement of importance has been made by either of the belligerent armies in Virginia, although there have been several skirmishes. A report has been current in Washington that General Lee had received heavy reinforcements, and that he meditated another aggressive campaign. The Confederate weakness at Chattanooga and other points is said to lend strength to this belief.

In East Tennessee we hear of the capture by Burnside of Knoxville and the taking of Cumberland Gap, where he made 2000 Confederate prisoners; and the abandonment by the Confederates of Chattanooga, which was immediately occupied by Rosencranz. The latter measure was probably taken by the Confederates with the view of advancing on and overpowering Burnside, but Rosencranz appears to have lost no time in taking possession of that strong Confederate position. A brief message informs us that General Burnside had resigned his command. No reason for such a step is given.

Despatches from Leavenworth, in Kansas, of the 10th inst., state that official intelligence had been received of the capture of Fort Smith, in Arkansas, by General Blunt, on the 1st inst.; also that the Confederates had evacuated Little Rock and retired to Washington, forty miles distant, which they were fortifying.

The whole army of the Gulf is moving from New Orleans. General Franklin is said to have started, at the head of 30,000 men, for Texas. Advices from New Orleans, of the 29th ult., state that the Confederates in Attakapus County crossed the Grand Lake 8000 strong. It is supposed they intended to attack Brashear City for supplies.

GENERAL NEWS.

Secretary Chase has satisfactorily concluded the 50,000,000-dols. loan with the banks.

The Douglas and Breckenridge sections of the Democratic party have held a meeting at New York, at which all minor differences were satisfactorily adjusted, in order that a united Democratic opposition to President Lincoln's Administration might be presented to the people during future elections.

The Hon. Charles Sumner recently spoke with some vehemence at the Cooper's Institute, New York, against the attitude of England and France since the outbreak of the war. Earl Russell's treatment of the Federal Government he considered had been unfriendly, and his correspondence "hard, curt, captious, and cynical." He charged the British Government with complicity with the "pirate ships" and their depredations, and said its liability was accumulating. The French offer of intervention was denounced, and a blow was dealt at the "empire" of Mexico. The remarks denuncia tory of England and France are said to have been loudly applauded.

A correspondence between Fernando Wood and President Lincoln, dated December last, has been published. Wood informed Mr. Lincoln that he has information that the Southern States would send representatives to the Federal Congress provided a general amnesty was granted, and suggesting that an unofficial correspondence be opened with the Southern leaders on this subject. President Lincoln replied that he thought Mr. Wood's information would prove groundless; but if the people of the Southern States would cease resistance, re-inaugurate, and submit to, and maintain the national authority within the limits of the Southern States under the Federal Constitution, then war would cease on the part of the United States. If, within a reasonable time, a full and general amnesty were necessary to such an end, it would not be withheld; but he did not think it proper to communicate this to the Southern people, who, he believed, already knew it, and when they chose could communicate with him unequivocally. Mr. Fernando Wood replied, regretting that Mr. Lincoln declined the innocent effort to ascertain whether the South desired to return to the Union.

The Federal troops had been withdrawn from the streets and squares of New York, and no futher apprehensions of disturbance were entertained—the City Council having finally passed the resolution appropriating 3,000,000 dollars to pay for substitutes. Many of the substitutes and conscripts who had been raised by the draught from New York and the adjoining States were showing a very refractory spirit; and, in one instance, an escort had to fire twice into some New Jersey recruits, who were ultimately disarmed.

The draught is to be enforced in Ohio.

The Kansas militia, inflamed by the massacre at Leavenworth, were preparing to enter Missouri for the purpose of taking a bloody revenge on all persons suspected of attachment to the Confederate cause; but the Federal General Schofield was endeavouring to restrain them.

A meeting has been held at Paolo, Kansas, at which 3000 armed men were present. The recall of the Kansas troops was urged if the Government continued its offensive military system in Kansas.

The proprietors of the *Baltimore Republican* have been sent South for publishing disloyal poetry.

The trade of New Orleans with Cairo, St. Louis, and the cities and towns of the Upper Mississippi, Missouri, and Ohio, has been declared free from military control.

Intelligence has been received of the foundering of the Federal corvette Bainbridge, seven guns, Commander Thomas J. Dwyer, in a fearful hurricane, on Aug. 21, the whole of the crew, about one hundred, with the exception of two men, going down with the vessel. The Bainbridge formed one of the Federal fleet appointed to the West India waters to intercept the various "blockade-runners."

At Havannah a British brig, the Atlantic, had arrived. She had been captured as a blockade-runner by the Federals, but subsequently her crew overpowered the prize crew and carried her into Havannah.

CANADA.

In the Legislative Assembly the Militia Bill passed its second reading upon a division of 89 to 7. The Volunteer Bill also had its second reading—Yeas, 82; nays, 13.

The estimated requirements of the Canadian Government for the year amount to 15,119,190 dols. The receipts of special revenue will verge, it is calculated, upon 4,000,000 dols., and, with certain items of ordinary income, will leave a balance of the expenditure to be provided by a vote of 3,918,554 dols.

INDIA.

By the arrival of the Bombay mail we have advices from Bombay to Aug. 24, and from Calcutta to Aug. 13.

The Viceroy and Lady Elgin had returned to Simla from their temporary sojourn at Mahaseo. His Excellency was to leave Simla on the 15th of September. His camp will be formed at Lahore, and he will proceed north with only a small establishment, and have an interview with the Maharajah of Cashmere at Sealkote in November.

The supposed Nana Sahib, recently captured at Ajmeer, was sent off from that place on the 11th of August to Agra, escorted by a detachment of native cavalry.

The supply of cotton promises to be on a larger scale in the Madras Presidency this season than in any former year. The crop of this season is roughly estimated at 160,000 bales.

Sir Jamsetjee Jeejeebhoy, Bart., has handed to Government the sum of 100,000 rupees (£10,000) for building a new college at Poona.

Mr. Cowasjee Jehanghir, a well-known and liberal Parsee merchant, has offered 7500 rs. to complete the steeple of the Memorial Church of St. John, Bombay, and to place in the tower an illuminated clock. He has also undertaken to erect forty drinking-fountains at different places on the island.

David Sassoon, Esq., in addition to founding a general hospital, has contributed liberally to the endowment of an asylum in Poona for such as are unable to work.

Cholera had been committing extensive ravages in various parts of the country, but was on the decrease.

Rain had been abundant throughout the country, and agricultural operations had everywhere progressed favourably.

Mr. Temple has introduced uniformity of weights and measures throughout the central provinces.

The *Bombay Gazette* says that all Afghanistan is agitated with the anticipation of some great political convulsion. Ameen Khan, a younger brother of the new Sovereign of Afghanistan, has openly rebelled and is fortifying Candahar. It is reported that Afzul Khan, who had raised a force of 25,000 men, has been assassinated, but the story needs confirmation.

The Rues Marivaux, Favart, and the Place Boieldieu, which surround the Opéra Comique, Paris, have just had the pavement replaced by asphalte, in order to deaden the noise of carriages. The same plan is being carried into execution in front of the Church of St. Paul, in the Rue St. Antoine, and is to be also adopted near several other public buildings.

The body of a man, a native of Passy, near Chamounix, who has been missing for the last nineteen years, has just been discovered in the crevice of a glacier, De Buet, near Mont Blanc. He left his home on the 14th of September, 1844, on a pilgrimage to the Great St. Bernard, and had not been since heard of until a few days back, when a pedestrian, exploring the glacier, came upon the body, which was in a perfect state of preservation. After being identified, the body was strapped to a plank and conveyed on the back of a commissionnaire over the mountains to Passy, where he was buried, after "lying in state" for twenty-four hours.

A rather curious incident is said by *Galignani* to have occurred at Potsdam at the time of the visit lately made to that place by the members of the Statistical Congress. Among the persons who were walking in the gardens of the Palace of Sans-Souci was a Prussian officer, who entered into conversation with an English savant. The latter, after a time, could not avoid expressing his surprise at finding a Prussian officer speak English so well. The officer replied that there was nothing astonishing in that fact, as his wife and his mother-in-law were both English. "Might I venture to inquire the name of your mother-in-law?" said the English savant. "Queen Victoria," replied the officer, who was no other than the Prince Royal.

Intelligence has just been received from the White Nile of the slaughter of several boatfuls of co-called ivory traders. The blacks surprised the boats, killed every one on board, and carried off the cargoes. The occurrence is, however, considered only an act of wild justice on the part of the blacks. Attention has been frequently called by travellers, and lately by Captains Speke and Grant, to the infamous practices of the white traders. It appears that armed bands are dispatched in large boats from Khartoum; they surprise unoffending villagers, kill the men, make slaves of the women and children, and drive away the cattle to be bartered against elephants' teeth. The traders, says a letter from Alexandria, have made the name of the "pale race" so odious that the features of the natives alter and assume an expression of hatred when they utter it.

The council of the Nightingale Fund recently met at Clifford-street, when the annual report and accounts were presented by the executive committee. The report showed that of the probationers who had completed their training as hospital nurses at St. Thomas's Hospital and been placed on the register as certified nurses, twenty were employed in various hospitals and infirmaries, principally in the provinces, and that the accounts received of them were most satisfactory. In consequence of the closing of the hospital during the removal to the Surrey Gardens, only a small number had completed their training during the past year. Twelve probationers are now under training there. The plan for training midwifery nurses at King's College Hospital, to be employed among the poor, is making progress. The probationers who have been sent out as trained nurses were employed in country parishes and were giving satisfaction. The committee state that, although the number of probationers who had completed their training in both hospitals had from various causes fallen short of what might have been expected, they were satisfied with the general results obtained. Decided progress had been made in the number of applications for trained nurses on the part of the public, and there had been latterly some improvement both in the number and in the character of the candidates who applied for the vacancies. Applications respecting hospital nurses should be made to the matron at St. Thomas's Hospital, S.; applications respecting midwifery nurses to the Lady Superintendent, King's College Hospital, W.C. The regulations as to both may be obtained from the Secretary, 11, Lombard-street, E.C.

LATEST NEWS FROM ABROAD.

The following telegram has been received through Mr. Reuter's office:—

RUSSIA.—Hamburg, Sept. 24.—Intelligence received here from St. Petersburg states that a decree has been issued recalling all superior and inferior cavalry officers at present on leave to their regiments. A collection of the laws has been published.

CHURCH AND UNIVERSITIES.

The Bishops of Calcutta and Madras are to visit Bombay in January next.

The Bishop of London has given notice that he will hold a general ordination in the Chapel Royal, Whitehall, on Sunday, Dec. 20.

The new school at West Harnham, near Salisbury, was opened on the 21st inst., by the Rev. Chancellor Lear.

The Church of St. John Baptist, Yedingham, Yorkshire, which has been rebuilt by subscription, was opened for Divine service on Tuesday, the Vicar of Sherburne officiating.

The parish church of Cocking, Sussex, which had been closed for about six months for the purpose of restoration and enlargement, was on the 17th inst. reopened with appropriate solemnity.

The parish church of Wilmslow, Chester, was reopened with choral services on Thursday, the 10th inst., after a general restoration and enlargement, the work of which has occupied the past twelve months, and has been carried out under the direction of Mr. W. H. Brakspear, of Manchester.

A purse containing 100 sovereigns and a handsome inkstand were presented to the Rev T. W. Fowler by the inhabitants of Staines, on the occasion of his leaving, "as a testimonial of respect for his unremitting services as Curate during a period of five years."

A new church at Rhydymwyn, about three miles from Mold, on the road to Denbigh, was consecrated on the 17th inst. The site of the church and churchyard was given by Philip B. Davies Cooke, Esq., of Gwysaney, at whose expense the chancel is built, and who has also given a site for a parsonage and schools.

A new bishopric is forthwith to be founded in Australia, to be designated "The Bishopric of Grafton and Arundale," and to be taken out of the present diocese of Newcastle. Mr. Clark Irving, a wealthy colonist, now in England, has sent out a bill of exchange for £2000, to be invested in the names of the Bishop of Newcastle, the Hon. C. Kemp, and the Rev. A. Selwyn, until the Bishop of the new see is nominated.

St. Mary-le-Strand Church, after having been closed for four weeks, has been reopened for Divine service. The chancel has been decorated with a small but elegant reredos, two crosses painted on the wall, and two illuminated texts covering the two blank windows on each side of the altar. A new organ has been erected for £250 by Messrs. Holland and Webb, of Griffin-street, Lambeth, and has been placed on the ground behind the choir-stalls.

The first Isle of Wight choral festival was held in the parish church of Newport on the 15th inst., and was an entire success. The festival was attended by twenty-two choirs and fifty of the clergy. The large and beautiful church was crowded to excess at both morning and evening services. The day commenced by an early service at eight a.m., at which the Holy Communion was celebrated. The Vicar entertained the clergy, churchwardens, and stewards at luncheon.

PREFERMENTS AND APPOINTMENTS.—*Rectories*: The Rev. W. Corfield to Llangattoc-juxta-Usk; Rev. W. Haslam to Buckenham with Hessingham. *Vicarages*: The Rev. J. Bland to Askhaw, Penrith; Rev. J. Foottit to Bitchfield, Lincolnshire; Rev. J. Melville-Martine to Farningham, Kent; Rev. R. R. Rackham to Barney, Norfolk. *Perpetual Curacies*: The Rev. H. Benson to Weald Chapel, Sevenoaks; Rev. R. R. Cousens, New Buckenham. *Curacy*: Rev. C. F. Routledge to Richmond, Surrey.—*Guardian.*

An organ purchased for the chapel of the Kent County Lunatic Asylum was opened at a harvest thanksgiving held on the 11th inst. The service was choral. The organist and choir were patients, and the chapel was very tastefully decorated with texts of Scripture and other devices of cornflowers and evergreens made by the patients. Two hundred and forty-one patients were present—a very large increase on the number attending Divine service previous to the recent formation of a choir. Several of the committee and others interested in the welfare of the institution were also present.

THE UNIVERSITIES AND PUBLIC SCHOOLS.—A Scholarship at Jesus, Oxford, worth £60, is open to natives of Wales or Monmouthshire, or to any who shall have been educated for the four years last preceding the election, or last preceding his matriculation, if already a member of the University, at one of the free grammar-schools of Abergavenny, Bangor, Beaumaris, and Bottwnog, or the free school of Cambridge. The examination will commence on the 19th of October.

The following are the Select Preachers who will preach in King's College Chapel, Cambridge, during the ensuing term:—Rev. F. Morse, M.A., St. John's, Hulsean Lecturer; Rev. J. R. Woodford, M.A., Pembroke; Hon. and Rev. W. H. Lyttleton, M.A., Trinity. Mr. H. Gaselee has been admitted a Fellow of King's.

The tercentenary anniversary of Elizabeth College, Guernsey, which was restored to an efficient state by the late Lord Seaton, when Governor of the island in 1823, was celebrated on the 19th, though the actual event fell on the 4th inst. The ceremony commenced by Divine service in the church of St. Peter Port, which was attended by a congregation that filled every part of this fine old Norman edifice. The service was said by the Rev. A. T. Corfe, Principal of the college, after which the Bishop of Winchester preached. The dinner took place in the evening, when a party of about eighty sat down in the college hall. The chair was occupied by Mr. Henry Tupper, Jurat of the Royal Court, who had on his right the Bishop of Winchester and on his left the Rev. Dr. Jeremie.

The Rev. R. Holme, Curate of St. Thomas's, Charterhouse, and Fellow of Corpus Christi College, Cambridge, has been appointed Principal and Chaplain of the Greenwich Hospital School, vice the Rev. G. Fisher.

The Rev. Dr. Kennedy, Head Master of Shrewsbury Grammar School, has been re-elected President of the Council of the College of Preceptors for the current year.

JAPAN.

(*From our Special Artist and Correspondent.*)

YOKOHAMA, July 13.

SINCE my last letter nothing has occurred here to disturb our relations with the Yokohamins. There is a rumour that an American ship, bound from Nagasaki to Kanagawa, has been fired upon by the Japanese; but the fact has not affected us here yet. The fleet still rides at anchor in the bay; picnics and theatricals are the order of the day; and riding parties formed to explore the country about Yokohama meet with every civility. The Tycoon is said to be still at his palace at Osaco, which he is not allowed to leave by the Mikado. Should he succeed in getting to Jeddo, it is expected that he will act upon his own responsibility, and, at all hazards to himself, open up the country to the Europeans.

My house is inundated with Japanese officers, who come to see my sketches and my companion Signor B—'s photographs. They are extremely polite, and bring presents of fruit, paper, and fans. To-morrow the present regiment leaves, and the officers of the new one just arrived have already paid us a visit. Some of the Japanese infantry have imitated the costume of Applin's horse, and wear blue breeches with a white stripe down the side, an astounding innovation. I send you a sketch of the forced levy of peasants, a kind of militia called out hurriedly during the recent troubles. They are armed with muskets and carry only one sword. Their costume is capital, consisting of a light blue blouse, loose trousers, stockings, and straw sandals. They are drilled like European troops. The sketch of the cavalry will give a good idea of the Japanese horse-soldier. He has a fashion of holding the reins very tight to make the horse keep up his head, while the short stirrups and high saddles give him a very perched-up look.

On Thursday last H.M.S. Perseus gave a grand entertainment, comprising theatricals, music, and a capital supper. The curtain rose at seven o'clock to a numerous audience, including the Admiral and his Staff and the Captains of all the men-of-war in the harbour: two ladies also honoured the representation with their presence. The blue-jackets in great numbers squatted on the deck. At the conclusion of the play we adjourned to the banqueting-hall on the quarterdeck, where about a hundred guests sat down to supper. All the arrangements were perfect, and the party did not separate until the small hours of the morning.

The general assembly of the Gustav-Adolph-Verein (the Evangelical Church Union) has just taken place at Lubeck. Representatives from all parts of Protestant Europe were present. Reports on the position of the Evangelical communities were read. The union has 1200 affiliated societies in different parts of Europe, besides 140 female societies.

THEATRICALS ON BOARD H.M.S. PRINCESS IN YOKOHAMA BAY.—FROM A SKETCH BY OUR SPECIAL ARTIST IN JAPAN.—SEE PAGE 305.

THE INGRAM MEMORIAL STATUE.

NEARLY twelve months have passed since we recorded in these columns the proceedings attendant upon the acceptance of the Ingram memorial statue by the Mayor and Corporation, acting on behalf of the people, of Boston. The work was then incomplete, inasmuch as the nymph and fountain in the niche at the foot of it scarcely existed even as a model in clay. Mr. Munro had first bestowed his thoughts and studies upon the statue itself; and as soon as he had realised his most sanguine conception of one who had passed away, the committee at once responded to the strongly-expressed wishes of the inhabitants of Boston, and the marble statue was placed upon its granite pedestal.

The nymph in bronze, emblematical of a public benefit to Boston which had been brought about by him whose memory was to be cherished, has but very recently been added, and thus the entire design has been completed. The whole sentiment of the artistic conception, the marble, granite, and bronze yielding an agreeable contrast in colour; but the chief figure is so lifelike and true, and yet so gracefully treated, that, were we to say aught in count as sought the relation that must naturally exist between the late Mr. Herbert Ingram and the ILLUSTRATED LONDON NEWS, these pages would not faithfully chronicle the progress of statuary art in this kingdom if they did not contain an illustration of the work as it now reveals itself.

Many of our cities and towns contain sculptured statues of statesmen, soldiers, and others whose fame the nation has been desirous to preserve, and, in most instances, the varied fashions of naval or military dress, or, it may happen, of an academical costume, have assisted the artist in giving a becoming attitude for a living and pleasing action. In this case, however, Mr. Munro, following those brethren in his art who raised most of the statues to the memory of the late Sir Robert Peel, has accepted the formal, and, we may say, the ungainly dress of every-day life, and, taking simple nature as his model, has produced a work that will rank amongst the first of its class in this country. Those who had the advantage to be present at the unveiling of the statue in the spacious market-place in Boston on that pleasant day in October last, and heard from the lips of that dense and grateful crowd the instinctive murmur of delight and recognition, gradually swelling into a round of applause, can surely testify to what we have written. Time has not lessened the approbation then so freely expressed, for the statue has since stood successfully the severe test consequent upon its situation in the town where Mr. Ingram was born, and amongst the men who knew him best and loved him most. In that town and neighbourhood there exists a universal feeling of satisfaction, naturally mingled with pride, upon the consummation of this work; and the present Mayor most faithfully represents the people when, upon accepting the statue from the hands of the committee, he said, "We promise to keep it pure and unsullied, as we receive it from you; and we trust that our children and children's children will also keep it equally unsullied in memory of one who was an honour to the town which gave him birth, and whom we all loved and respected."

Our notice would be incomplete did we not supply further information than can be gathered from the illustration. The statue is "colossal," 10 ft. high, and is of fine hard Carrara marble, known as Sicilian. The pedestal and its base are of Peterhead granite; the die is of that beautiful dark-looking red variety, and the bases are of a bluish grey. Stones of the size here used are, we understand, rarely produced in the quarry, the weight of them being about thirty tons. They are all polished, and the beautiful granulation of that particular granite is well brought out. This portion of the work was executed, under Mr. Munro's direction, at the Invernettie Granite Works, near Peterhead.

The graceful figure of a nymph, or naiad, in the niche in front, holding a vase whence trickles a streamlet of pure water, is in bronze, cast by Elkington.

The spotless white of the marble, the red and grey of the granite, and the dusky glow of the bronze form a beautiful scale of colour; and the contrast will be still more pleasing when the marble assumes the mellow tone, and the bronze requires the soft green—the sacred portion of Time.

PUBLIC MEN ON THE TOPICS OF THE DAY.—A meeting was held last week at Brighton to discuss Polish affairs under the auspices of the borough. Mr. Coningham and Mr. White were present, and both made speeches. Mr. Coningham strongly urged that England should remonstrate with Poles as belligerents, and Mr. White urged that Russia should be treated as Papa had been—sundry, that our Ambassador should be withdrawn as a mark of disapproval of the massacres which were being perpetrated by Russia in Poland—two members for Marylebone, Messrs. Mc. Mullen and Ayrton, have been addressing a meeting of their constituents. Their speeches were of a purely local character. Mr. Warner commended the policy of the Government in regard to Poland and America. He thought that, before long, a new reform bill would be brought in which would be more to the mind of Palmerston, while approving generally of his proceedings, he differed from him on some matters. Moreover, the Government and the Conservative party should set themselves to work to choose a leader who might succeed the present Premier. Sir William Heathcote's observations were of a very similar character.—Mr. W. B. Forster, M.P., delivered a speech at Newcastle on the condition of the working classes in that town and Leeds. He took the chair at a meeting at which the American question was discussed. Mr. Forster approved the policy of non-intervention pursued by the Government, while he declared that his sympathies were entirely with the Federals. They were fighting the battle of freedom, and undoubted right in endeavouring to prevent secession; and as the same time they were shedding the ever that system of negro slavery upon which the South sought to base itself.

A BRITISH TAR'S SPEECH.—At the entertainment given to the sailors of the Channel Fleet in St. George's Hall, Liverpool, on Tuesday, the following characteristic speech was made by John Grant, captain of the foretop on board the Royal Oak:—"Mr. Chairman, and all the kind entertainers of this feast—I rise, and I was going to say something when I did get up, but somehow that 'are gentleman there quite took the wind out of my sails when all the stiffening out of my shirt collar. (Loud laughter.) It is a fact, it took much of a chap to spin a long yarn. Sends I, you are an excuse me if I lose the steerage of my tongue; and if I break down you'll bear a helping hand to help a stranded sailor to get off the shore. (Cheers.) They say we live in the lion age. No doubt of it. Many of us have had the pleasure to look calmly in the face of the lion only once; but I believe the fair sex can boast of that as well as us. (Roars of laughter). But I was going to say, when I rose to my feet, that the Royal Oak was the object of excitement on shore, and only on one occasion was there a greater one, and that was the arrival of her most gracious Majesty Queen Victoria and the kind entertainers of this feast—I rise, and I was going to say something when I did get up, but somehow that 'are gentleman there quite took the wind out of my sails when all the stiffening out of my shirt collar. (Loud laughter.) It is a fact, it took much of a chap to spin a long yarn. Sends I, you are an excuse me if I lose the steerage of my tongue; and if I break down you'll bear a helping hand to help a stranded sailor to get off the shore. (Cheers.) They say we live in the lion age. No doubt of it. Many of us have had the pleasure to look calmly in the face of the lion only once; but I believe the fair sex can boast of that as well as us. (Roars of laughter). But I was going to say, when I rose to my feet, that the Royal Oak was the object of excitement on shore, and only on one occasion was there a greater one, and that was the arrival of her most gracious Majesty Queen Victoria and the kind entertainers of this feast—I rise, and I was going to say something when I did get on board the Royal Oak first the blue-jackets were piped to their hammocks (Laughter). Why, it is enough to make a blue-jacket's heart jump like a dolphin's when they pipe all our hands to go round their hammocks, but when they have been piped to grog of pleasure to a haven of joy instead of sailing up the Mersey. (Laughter and cheers.) The pilots are always those lads in the Channel Fleet and those men here who man it are held in their esteem. They are the very high? Let me see—how high? Let me see—how high? (Laughter.) Yes, blub-nafter maintrick is about the cockoil holystone. (Roars of laughter.) Now, before we cobble you all of the check, I hope my fellow-shipmates, blue-jackets and marines, and all of 'em in the fleet, will fill their glasses for a toast I'm going to give; and if they've got none, then what they have in their glasses 'll do. (Roars of laughter.) And, before I return you the heartfelt thanks, I only do myself, but of every blue-jacket of the fleet, let me say we all know there is not a day will pass over any of us, when he have not the kindness one to say, 'Now, he went to—to his knob and say, "Well, here's success to Liverpool." (Roars of laughter.) Now, I hope for a little drop of the Royal Oak, and therefore I will conclude, and we'll all drink success to every female in Liverpool—favourable to—also to our worthy chairman and our entertainers. I know my fellow-shipmates will join me in returning their heartfelt thanks, and let us give three hearty cheers for the Lady Mayoress and all the ladies of Liverpool." The toast and all Jack's requests contained in his speech were very demonstratively attended to.

CALENDAR FOR THE WEEK ENDING OCTOBER 3.

SUNDAY, Sept. 27.—Seventeenth Sunday after Trinity. Wellington's victory over Massena at Busaco, 1810. First meeting of the British Association of Science at York, 1831. Full Moon 6h. 7m. A.M.

MONDAY, 28.—Battle of Tinchebray; Robert of Normandy defeated and his duchy annexed to England, 1106. Battle of Brooklyn, Long Island, 1776. Emperor Sigismund and his allies totally defeated by the Sultan Bajazet, at Nicopolis, 1396.

TUESDAY, 29.—St. Michael and all Angels. Michaelmas Day. The New Houses of Parliament opened by H.R.H. the Prince of Wales. New Metropolitan Police commence duty, 1829. The Dramatic College opened; seven annuitants installed, 1862.

WEDNESDAY, 30.—St. Jerome, priest, confessor, and doctor, died, 420. Richard II., declared by the Duke of Lancaster, Henry Bolingbroke, to Henry IV., 1399. The "Papal Aggression":—the Pope re-establishes a Catholic hierarchy in England; creates Nicholas Wiseman Cardinal and Archbishop of Westminster, 1850.

THURSDAY, Oct. 1.—Remigius, or Remy, Bishop of Rheims. First publication of the *Edinburgh Review*, 1802.

FRIDAY, 2.—Charles II., of Spain, bequeaths his dominions to Philip, Duke of Anjou, which gives rise to the "War of Succession," 1700.

SATURDAY, 3.—Battle of Limerick by Ireton, 1651. End of the war.

Price One Shilling, beautifully Printed in Colours,

THE ILLUSTRATED LONDON ALMANACK

FOR THE YEAR 1864,

will be published on the 28th inst., containing Fresh Water Fish, from Paintings by H. L. Rolfe, with interesting descriptions, by James G. Bertram, printed in the highest style of the Chromatic Art by Leighton Brothers; Twelve Fine-Art Engravings; Astronomical Diagrams of Remarkable Phenomena, with Original Articles; Twelve Original Designs for Calendar by the Author, and by E. W. Kept.

It contains also Lists of the Royal Family of Great Britain; the Queen's Household; her Majesty's Ministers; and Public Offices and Officers; Law and Equity Proceedings; Parliamentary Proceedings; Remarkable and Remarkable Events; Times of High Water at London and Liverpool; Tables of Stamp, Taxes, and Government Duties; Christian, Jewish, and Mohammedan Calendars; Astronomical Symbols and Abbreviations; and a considerable amount of useful and interesting information, rendering the ILLUSTRATED LONDON ALMANACK an acceptable and elegant companion to the library, boudoir, or drawing-room; which, at so cheap a price, it is the cheapest Almanack published.

The ILLUSTRATED LONDON ALMANACK is inclosed in an elegant cover printed in colours.

Published at the Office of the ILLUSTRATED LONDON NEWS, 198, Strand, and sold by all Booksellers and Newsagents.

On SATURDAY, OCTOBER 3rd, will be published

A DOUBLE NUMBER

OF THE

ILLUSTRATED LONDON NEWS,

WITH WHICH WILL BE ISSUED

TWO PICTURES, PRINTED IN COLOURS,

ENTITLED

"THE VILLAGE OF ARGENIO, LAKE COMO, ITALY,"

From a Painting by G. PETTITT; and

"LITTLE LOVERS,"

From a Painting by E. HAVELL.

The accompanying Number and Supplement will contain the following Illustrations:—

General View of the New Works, Blackfriars Bridge, showing a Cylinder for the New Bridge.

Diogenes Looking for an Honest Man.

"Autumn," from a drawing by A. Hunt.

Rifle-Match between England and Australia: Competition in Sudbury Park.

Fancy Dress Ball at Liverpool to the Officers of the Channel Fleet.

The late Right Hon. Edward Ellice.

Aveling and Porter's Traction-Engine.

The late Professor Cockerell.

View of Macon, Georgia, Confederate States.

"Lord Clifford" Winner at Doncaster Races.

New Birds in the Zoological Gardens, Regent's Park.

The Port of Kustendjie.

College Wood Viaduct, Kustendjie.

The Crack Shots of the West Middlesex Volunteers.

Royal Marriage Festivities at Christchurch, New Zealand.

A Series of Australian Scenes: Hunting the Emu, Kangaroo Hunt, Coo-ee-ee-on, Diggers Prowling Round a Sheepfold, Snake-Hunting, Bee-Hunting, Native Dance.

&c., &c.

The accompanying Number and Supplement will contain a variety of Fine-Art and News Illustrations.

Two Whole Sheets and Coloured Supplement, price 10d.; Stamped, 1s.

THE ILLUSTRATED LONDON NEWS.

LONDON: SATURDAY, SEPTEMBER 26, 1863.

THE only department in letter-writing which has not been abolished by Sir Rowland Hill is that to which these lines belong. It is only of late years that this portion of a journal has been dignified with the title it now bears. The "Leading Article" is a name of respect, but it is a new creation. Our fathers called that column the "Postscript," thus preserving the idea of the news letter, which the journal originally was. And postscript, in a sense, the article may still be said to be, the great bulk of the newspaper having been previously prepared. We wonder how long the journalist's postscript will be required at his hands. This is an age of change, and everybody should be educated to two or three professions at least, for there is no saying what discovery may arrive at any moment to throw a particular calling out of use. "We" is an institution at present; a year hence "We" may be out of date. As it is, a batch of telegrams, arriving just as "We" has finished and polished his last epigram, leaves his article exceedingly smart, no doubt, but perfectly unpractical.

As for the letter, the domestic but not private letter, the rising generation knows nothing of what it has lost. We say not private, because no person believes that the elaborate composition which ran over three pages of folio, covered the face, and went variegating round the seal, for the reception of round which dainty preparation was made, was intended for one pair of eyes only. It was designed to be read as a sort of general epistle to a household, parts of it were to be shown to admiring visitors at the morning call, and then it was to be sent about the country, under strict orders of circulation. Finally, it was to be duly filed, or bound in a morocco portfolio, with a view to the publication of its best passages at some distant day. People who dash off their laconic scribble, saying little more than is necessary, and not always that, have no idea of the works which their letters, and motions, and words used to compose, and it is only when by accident a volume of epistolary MS. falls into one's hands that we are fully aware of the change that the abolition of postage—it is all but that—has caused in the social habits of the educated classes.

We suspect, however, that in the case of the majority of writers, these letters must have been a great bore to concoct, and that the same class in the present day have reason to congratulate themselves on being delivered from a grievous bondage. There were very good writers, and, like all artists, they liked their work and were proud of it; but these were the exceptions. It must have been hard work for the dull. In the first place, there were good manners to be observed, and the letter had to begin elegantly. A well-bred person would no more have thought of dashing into a communication without preface than he would have rushed into a drawing-room without taking off his hat and making a bow. And the framing the introduction was a matter of thought, and required a certain graceful dexterity. We have just had an opportunity of looking over a dozen volumes of carefully-preserved letters, written to each other by persons moving in the best society, and the documents are from forty to sixty years old. They are respected as first-class specimens of letter-writing, and most of them have names with titles either affixed or inscribed outside. One of them begins, "Situated as I am between the hostile scenes of Portugal and surrounded by society which even you would approve, I did not think, dearest Lady Fitzbattlexe, that it was possible to have an addition to my pleasure until your charming letter of Tuesday arrived." Now, that is very elegant and highly polite; but that sentence must have demanded labour. There was, perhaps, tried over on a separate piece of paper before it was transferred to the gilt-edged paper whence we have extracted it, after fifty years of its sweetness had been wasted on the desert shelf of an old library. Well, then the composition proceeds according to rule. The writer, a very clever lady, has to express more thanks for the charming letter of her correspondent. She has to be grateful for the affection that could withdraw a lady with so many delightful engagements from the society she ornaments to devote a precious hour to amusing "and instructing" her friend. It is appreciative, but in some; the parties are of equal rank and fortune, only it was the proper thing then to be civil, as it is now the proper thing to be bruique. So our fair writer declares that she has little to offer in exchange for such a letter, that the will must be taken for the deed, but that if she writing be valuable to the dull, may be a relief to the many brilliant epistles which her friend is sure to receive at the same time. All stuff, all just as sincere as it should be. The lady, as we have said, is very clever, and as soon as her guns are in position she opens fire to good purpose. She tells her correspondent, and hopes, in a lady-like way also, that cavalry will be sent into the neighbourhood; and then ends with a little bit of that kind of allusion to a certain topic of the day which one "frisky matron" may, perhaps, indulge in without blame when writing to another, but which will be meant for one pair of eyes, and one alone, therefore, we have nothing to say. But this is not all. It was the high polite thing to end a letter as neatly as it was begun. Well-bred folks leave a room as gracefully as they can enter one. So our lady, relapsing into the decorums, and making reference to her last scandal, wonders if she had innocently regretted that a certain person had "no friend to advise her," says, "Friendlessness, indeed, must be the most melancholy condition of life; and happy, indeed, am I to think that I can never be reduced to that situation, while at Battlecrawlie Towers there exists a charming friend who never forgets her friends—even such unprofitable ones as her ever sincere and affectionate Barbara Babbleton." That is something like a letter, and it is no exceptional specimen of its class; and very pleasant reading it was fifty years ago, and is in 1863. But it was a work of art.

Just at this time of the year there is something more like

letter-writing than at any other. In country houses, when the breakfast is over, and the men are gone away gunning, and the afternoon arrangements are made, and the ladies have retired to their bedrooms, they certainly are not engaged during all those *hore subsecivæ* in looking over their dresses and tormenting their maids, because, when they come down to lunch, the letter-box in the hall is suddenly flooded with epistles directed in every lady-scrawl that is known. These may not be all that are written—who knows—some may not be intrusted to the possible survey of persons whom they may concern, and lady's-maids may be sent to the village post-office with documents of that kind. But there are dozens thrown into the box, and they are probably full of sketches of a lively kind, of the other persons who help to fill that box, and it need not be doubted that there is much candour in the little essays thus made the property of the Postmaster-General. But we fear the fine style is lost, the elegant cursive hand and the graceful flirtation are gone, instead of the beautiful period, "Friendlessness, indeed," and so on, we should be much more likely to read, "There's the gong for lunch—burn this—I'll write to-morrow. B. B." Thus knowing that one can write to-morrow that one wrote no "frank," and that a Queen's head represents the *entlay* (rich people used to think tremendously about the one and a penny for the letters, and like the penny arrangement as well as their inferiors) has made our letters a miserable affair. Envelopes are dear, and it all has become scramble. Sir Rowland Hill has done his work, and the elegant correspondence of the past will not be done for the editorial postscript, by courtesy called archive—those telegrams: "will be the death of us," or rather of "we." No matter, something will arise from our ashes—*Le Roi est mort, vive le Roi*.

THE COURT.

HER Majesty the Queen continues at Balmoral, in good health.

On Wednesday in last week Her Majesty, accompanied by the Princess, drove out in the vicinity of the castle. The Royal party first visited the Cairn erected to the memory of the late Prince Consort; then inspected the new dairy; and afterwards drove to Abergeldie and visited the Princess of Saxe-Weimar. Tea was served there at half-past four o'clock. Prince and Princess Louis of Hesse and Princess Victoria arrived at the Castle, attended by Baroness von Gemmingen, Captain von Westenholz, and Dr. Becker. Their Royal Highnesses were welcomed by the Queen, the Princess of Wales, and the other members of the Royal family, and received a hearty welcome from a number of the tenantry assembled to greet them upon their arrival, and who were greatly pleased by the Princess alighting to shake her baby.

On Friday Prince and Princess Louis of Hesse drove to Abergeldie and visited the Princess of Saxe-Weimar.

On Saturday the Queen, accompanied by the Princesses, drove in the neighbourhood of Balmoral.

On Sunday the Queen and the members of the Royal family attended Divine service in the castle, performed by the Rev. Mr. Fraser, of Lochcarron, one of her Majesty's chaplains.

On Tuesday the Queen, accompanied by Prince and Princess Louis of Hesse, drove to Invercauld.

Her Majesty takes daily drives in the neighbourhood of Balmoral, and pays frequent visits to the Prince and Princess of Wales at Abergeldie.

THE PRINCE AND PRINCESS OF WALES.

The Prince and Princess of Wales continue at the castle of Abergeldie, where their Highnesses have been frequently driven among the romantic scenery of the surrounding country, attended by Colonel R. Farquharson, of Invercauld, and Captain Farquharson.

The Prince has been decstalking in the forest of Invercauld, where, on Saturday in last week, he was fortunate enough to obtain a right handsomed two-year-old stag, consequently none were brought down. Later in the day, when the Princess had joined the party (all of whom partook of a lunch served on the ground near the shooting-box), the sportsmen were more successful. A deer drive having been proposed, Prince Craig, the Prince and Princess ascended the hill. Her Royal Highness took up a favourable position at the pass, and had the pleasure of seeing a number of fine stags bounding past at some twenty or thirty yards' distance. Six of the herd fell before the rifles of the Royal party. At the conclusion of the sport the Prince and Princess were conducted to the Falkd Varnish. On Tuesday also the Prince went out shooting, and killed two fine stags. The same day the Prince and Princess visited the Lochnagar distillery, when the proprietor (Mr. Begg) explained to the Royal visitors the process of the manufacture of whisky. Afterwards their Royal Highnesses honoured Mr. and Mrs. Begg by partaking of refreshments at their residence. Thence the Prince and Princess drove to Balmoral, and awaited the arrival of the Queen at half-past six o'clock, when they warmly welcomed her Majesty and the Royal family.

On Wednesday the Prince of Wales and Prince Alfred had good sport among the grouse, and in the afternoon his Royal Highness and the Princess enjoyed a hillside picnic.

On Friday the Prince and Princess, attended by Lieutenant-Colonel Keppel and the Hon. Mrs. Bruce, dined with the Queen at Balmoral.

On Sunday the Prince and Princess attended Divine service at Crathie, and Princess Helena, attended Divine service at the parish church of Crathie.

The Prince and Princess pay almost daily visits to the Queen at Balmoral.

His Royal Highness the Duke of Cambridge is visiting the Earl of Cheshrfield at his shooting-box, in Nottinghamshire.

Prince and Princess Edward of Saxe-Weimar have left Dunrobin Castle for the East of Scotland, in Northumberland.

His Excellency the Russian Ambassador and Baroness Benmuse have returned to Cheshan Rooss from Brighton.

His Excellency the Bavarian Minister and Baroness de Cetto have arrived at their residence in Hill-street, from Brighton.

His Excellency M Mousrus, the Turkish Ambassador, has left St. Leonards-on-Sea, en route for Constantinople.

His Excellency the French Ambassador has arrived at Allington House, Park Paris.

His Excellency the Hanoverian Minister has left Hotstein for Hanover.

The Duke and Duchess of Saldanha have arrived at Alnwick Castle on a visit to the Duke and Duchess of Northumberland.

The Duke and Duchess of Grafton arrived at their residence in Grosvenor-place on Monday from a Continental tour.]

The Duchess of Manchester left town on Monday on a tour of visits in Scotland.

Lord Rosebery, Dean of Beaufurt, has left town for Scotland, on a visit to Lord and Lady Londesborough.

The Duchess of Montrose and Lady Violet Graham have arrived in Grosvenor-square.

The Marchioness Townshend and Lady Audrey Townshend have left Raynham Hall, Norfolk, for St. Leonards-on-Sea.

The Marquis of Lansdowne has arrived at his residence in Berkeley-square, from Bowood Park, Wilts.

Earl Granville has arrived in Bruton-street, from Doncaster.

The Earl and Countess of Ashburnham have arrived at their residence in Dover street, from Battle, Sussex.

Viscount and Viscountess Walden arrived on Tuesday at their residence in Baton-place, from Guernsey.

ECHOES OF THE WEEK

AT the dead season of the year a vivid agitation of some kind, it is tolerably certain, will start up, either of itself or through ingenious fermentation. Sometimes the agitation is frivolous; often it has been worm threadure during previous recesses. This autumn holds fair to see an agitation—it is yet only in the most tentative plane of meeting—about the question of labourers' cottages. It is hoped, indeed, that the papers should be full of controversies on such a topic than on the done-to-death themes of hotel charges, railway supinotunity, the scattering of public schools, and like. The last century is up to the position of the agricultural labourer may lead to some tangible good. For a dozen years the present writer has, in a humble way, been asking in the different journals and periodicals in which he has been permitted to scribble how it came about that the English peasant was so much worse housed, worse helped, and worse clothed than any other husbandmen in Europe? As, however, we did not happen to be Jupiter Tonans, our voice was not duly applied to. The Great Ones of the earth were, perchance, deemed impertinent, if not libellous. Now that Jupiter has taken the matter up, the public ear, it would seem, is inclined to listen.

We say *worse* fed. We have breakfasted, dined, and supped in dozens of labourers' cottages in France, Germany, Italy, and Russia; but, poor as was the fare, we never found so naked a diet as that which generally prevails in English cottages. Bread, bacon, and in the year round, with now and then a little rancid bacon or a morsel of cheese, and a pinch of tea for the wife, and a drop of gin for the old Chuzzlick! We say worse lodged. The recent revelations as to the cottage homes of England will bear us out in that assertion. We say worse clothed. That the peasantry in many European countries are on week days, ragged and dirty, we admit; but take them on Sundays and on gala days. We can ever show gold chains, gold ornaments, gold crosses, gold combs and scalp ornaments, silver buttons, silver buckles, or expensive fur caps, handed down from generation to generation among the French peasantry. Is the soil of an English village more sterile? The utmost extent of finery of any intrinsic worth is in a wedding-ring (and that is often a pinchbeck one), a silver watch (if a watch), or a silver watchchain (worth, perhaps, three and sixpence, and the watch attendant to it must not look much more than three and sixpence). There must be something radically wrong in the state of things which keeps the peasant in such desperate poverty, and which, after years of ecmmuting toil, leaves him, when he is old and broken, only fit for the union-house. William Cobbett drew a very different picture of the state of the labourer in the days when we were a happy people. On the other hand, were Cobbett alive now he would point out that the farmer when he was a young man, either willed or bought a pot and a tame old horse to his soil at an English village fair, and "the Seven Saxons" would have stared to see the advertisements now so frequent in the papers of a farm to be let with "no horse-keep." There is a rise of any class in the community, and we rejoice at the marvellous improvement which has taken place in the social status of the farmer; but it is deplorable to see the labourer, the foundation of the pyramid, deemed to hopeless toil, penury, and want.

In that black "Handbook of Social Judey mystery—the Census—there is one item of special sinister darkness worthy of preservation. A chemist, examined before the Commission, stated that the average life of the labourman was so remote that to one single customer he was in the habit of supplying the article of coffin. "I have," he continued in his diun; nding, that "she could not live without it." This seems to us absolutely terrible. We read of Mithridates feeling on poison, and profess to think that the Sultan Abdul Hamid, the Bulgarian Tchiroch " at Stamboul, and the opium-smoking houses at Canton; but here, in the very midst of civilised England, the commercial man so openly and with little less stint than though it were barley-sugar. There is an act to restrain the sale of poisons, but it is evidently inoperative. Surely an enactment was proposed limiting the sale, to a stranger, of this drug to a single pennyworth; but an intending suicide laughed at the regulation as soon by-passed as the chemist's shops are different penny worths of laudanum.

We do not know whether, as a rule, the common-sense precaution of dispensing poison only in bottles different in form and hue to those in ordinary use is adopted. We have heard of many valuable lives lost and terrible sufferings undergone by taking medicines drawn from phials without any mark to indicate their perilous contents; but the most terrible case of all is that recorded in the newspapers as occurring at Swansea, where a woman, after taking a dose of *her accustomed medicine, and went to bed, to death a shock jacket, as the short of a dress.* This is a hideous commentary on the sumptuary expedients of Brian Cox.

The 26th of September is, as all true Britons should know, the birthday of the immortal Nelson, who on Michaelmas Day, 1798, first saw the light of the Norfolk Rectory, in the village of Burnham Thorpe, in that private anniversary. Queen Elizabeth was (according to tradition) taking her after-dinner walk in the grounds of Hever Castle when the Spanish Armada was brought her; and on the feast of St. Michael and All Angels Queen Victoria, in the year 1851, was "at home" to the French "gosse" in so signal a manner. We have noticed this little item in the way of ephemerides for the reason that, either through an old connection with the Nelson family (the Incledons) or through opportunities, the approach of the hero's birthday has given rise to an advertisement in the *Times* of "Nelson's Neck" as a relic in the possession of a French gentleman," is for sale. With a property authenticated pedigree, such a relic must command a very high price; and we are glad to see that the Nelson Museum at Norwich is open to when Nelson were it, and where? and, in particular, how the weapon gets into the possession of a French gentleman? Is Nelson's neck, or under ordinary circumstances, expect to find Marlborough's baton or Wellington's sword in the hands of a Gallic connoisseur?

Mr. Charles Mathews's triumph at the Variétés Theatre has been, we have now the best authority for stating, of unmingled brilliancy. Mr. Willington's version of the piece is said to have met with universal opposition to his performance, and in the *feuilletons* of the *Comédie-Parisienne* and *Le Journal de Mr. Bluschard Jerrold's* name as a co-author," which we always understood to be (*mirabile dictu*!) an original piece. Some of the Parisian critics, however, hint that they recognise the "cucumber," even in its "timid" disguise, as an old French acquaintance. We should like to have this point cleared up. Another point, by the way, before we in dispute, we should like to see *original* work translated for representation on the French stage; but hitherto these triumphs have been rare. The plot of "The School for Scandal" is "borrowed" from over the water; "Sweethearts and Wives," is a translation; so is "The Typewriter;" so is "The Lottery Ticket," and scores more favourite English comedies and farces rejoice in "original."

The death of Count Alfred de Vigny, while it creates a vacant *fauteuil* in the Academy, leaves a void in the roll of illustrious French men of letters which will not easily be filled up. Alfred de Vigny belonged to the old school of French *literateurs*. He must be ranked with the Chateaubriands, the De Tocqueviles, the Nodiers, the Cousins, and the Villemains. Although he gave vent to his picturesque tendencies in his novel of "Cinq Mars," in his dramas, in his "Chatterton," and in some of his poems, he had little in common with the turgid sensationalists of the "Romantic" fraternity. He lived apart—noble, solitary, and proud—and could be identified with no clique or coterie whatsoever; but he was a good and kind man, and his countrymen were justly proud of him.

The ever-green Father Prout—wittiest, chattiest, most erudite of Paris correspondents—lately drew attention to the fact that the old mansion of Clos Mars, within the bastions of the Marron Dolonne, still existed in the Rue St. Catherine, and in the heart of the busiest quarter of Paris. It is said that the relics of this quaint mansion to escape demolition—more, we opine, through their being forgotten than from any respect they had left for antiquity. "Le convenient" respects nothing. We remember once being on the point of taking an apartment in a dingy house of the Quartier Latin, and an American friend quietly observed, "All I'll give to see that old cemetery pond better not live *there*. I know the house well. In the room you take of the Gascogne Marie was assassinated by Ravaillac, to-day." The "blood-bolttered" house has, we daresay, been pulled down long since.

Cingalina's old hotel, however, has entered upon a new lease of existence. Wondrous are the mutabilities of mansions! Is it now the central office of the Compagnie de Fonderie Française Étrusque?—the French parcels delivery company; and in the salon where the masters of the conspiracy assembled Richelieu once met to spend banquet has just been given by the directors of the company to their friends.

Of good Irish novels—from the pens of writers who are really qualified by birth and experience to discourse of the manners and customs of the Green Island—there has lately been a lamentable dearth. The bright days of the Banims, the Morgans, the Griffins, the Maxwells seem departed, to return no more. Lever, Carleton, Hall we have yet among us, but they have seen and their day for the first is concerned, and have strayed to fresh pastures. We hear, however, Edmund Downey, the author of "Dunmahon Court" Cumnig, spoken of as the model of what an Irish novel should be—full of humour and pathos, and replete with sound suggestions as to the causes of Ireland's sorrow.

"THE SOLDIER'S WIFE."

BUT few persons, we should imagine, are unfamiliar with the touching poetical episode—a favourite with most of us, probably, in our youth—which has been painted by Mr. Herrick with the subject of the picture engraved on page 308. Yet many, we suspect, will forget that the sad story of Elira at the battle of Minden, though so often met with in a detached form, is extracted from the once popular of "Loves of the Plants," the second part of Dr. Darwin's "Botanic Garden." Poor Erasmus Darwin is now so popular, his sayings nearly forgotten; poetry and botany will not consort together; and the Doctor's fanciful personifications of plants are now quite little human or vital interest. Yet Darwin had exquisite fancy; his masterly diction well deserves attention from the poetic student; and some passages of "The Botanic Garden" others, that of the fate of Elira—will not soon be forgotten, even by the general reader.

The tale in question briefly introduces the sister of Elira in that of the orchis, which is represented as "lulling her infant in her fondling arms" and "guarding his life, forgetful of her own"—an allusion to the parent root of this flower, as also of other tuberous and bulbous roots, shrivelling up and dying as the young one increases. Darwin's poetical fancy has here indeed been prolific to a degree to be beside her knee; and then follows the episode commencing—

> *To stood Elira on the wood-crown'd height,*
> *Or Minden's gory plain, when, lo! the fate*
> *Bought with bold eye quaff the bloody strife,*
> *Bursts on her heart, and lifeless at her life.*

When this picture was exhibited in the Royal Academy, the following lines, as well as the preceding, were quoted in the catalogue as being more immediately descriptive:—

> Fast by his head son lisping boy she hid;
> A shot, not far off, the fatal mischief did.
> Slept on her forehead, cradled by her arm;
> Her husband's.
>
> Fear, and more near the intrepid beauty proud,
> Saw him fall groaning amidst blackening clouds.
> Sleet on her forehead, cradled by her arm;

The requel need hardly be recalled. Elira lived to see the battle won, but in the moment of victory a stray bullet struck her down, and the husband found his wife weltering in her blood, the child, who the boy fancying her merely asleep. Campbell's death of "Gertrude of Wyoming" may have been unconsciously suggested by this of "Darwin's Elira." Sir Walter Scott frequently pauised battle-pieces as overseen by some interested spectator; and his "Clara at Flodden" is a remarkable parallel to that of Elira at Minden.

Mr. Herrick, the painter of this picture, has entered with congenial sympathy into the very circumstances he has selected for representation. The love which impelled Elira to forget her own safety in anxiety for that of her husband is well rendered in her agonisedly anxious expression, and although the painter has not attempted to express all the pathos of the babe sleeping at her bosom and the half-pleased, half-frightened clinging of the boy at her side.

The Sub-Prefect of Terranova (Sardinia) has telegraphed to the Italian Government that the cholera case at Cotton has been gathered in that district, and that it is sold at the rate of 320*l.* per cwt.

The life-boat of the National Life-boat Institution, stationed at Southport, put off on Monday to the assistance of a galc and half-wrecked from the ship St. Lawrence, of Liverpool, which was stranded on the Salthouse Sandbanks, at the mouth of the Mersey. Between the hours of seven and twelve of the crew; the captain and three other men refusing to leave the vessel. When the life-boat was within hailing distance of the half-wrecked ship, was afterwards launched, with the view of saving the four men. After a hard pull the exhausted men were taken on board the life-boat, and the vessel with him still remaining firm in their determination not to quit the ship, the life-boat returned to the shore, reaching morning. At about the hour. A signal of distress was seen flying from the ship, and the Lytham life-boat was again rent out, when it was found that the vessel was in a fair way to be got afloat left in their own boat. It was still blowing a gale of wind, and as the ship had a light fleet of water in her hold, it was, of course, nearly unmanageable, but the crew of the life-boat determined to make an effort to save the ship, and they were fortunate enough to succeed. It began to get dark, the keeper would unquestionably have been totally lost had she remained on the bank another tide. Lytham life-boat returned to have behaved very gallantly. The rest of the Southport life-boat was presented to the National Life-boat Institution, two or three years ago, by the late Mr. Joseph Mayer, of Bidston Hall. She has since been instrumental in saving three shipwrecked crews, consisting of twenty-six persons, and has been put off several times in the absence of vessels in distress. The Lytham life-boat has only just been sent to her station, and her coxswain is Mr. Alexander Richardson, formerly Navy, of Wakefield.

EARLY MORNING ON MONT BLANC.—Already there was enough of dirtied twilight to render Mont Blanc perfectly visible. Though the late icy fall 11 to 12 degrees of frost, the white ranges of the mighty mass fields for two hundred miles displayed their jagged bastion of grey rock and snowy pinnacle. No eye could see the summit, but yet the king of mountains. The marvellous resemblance which the outline from the north bears to a massive human head, reclining on its back, was not realised by the sun, was never more striking than now. The straight forehead, the short, finely-moulded nose, the firm mouth, and having beard, all were there, still in the grey repose of death. For a few minutes each instant brought a new delight, as peaks were lit, and valleys were successively gilded by the ruling sun. Gradually the glittering points seemed to descend, fusing in the end all the salient features of the profile. The mountain woke into life under the magic touch of light and heat: the fair was to be seen in its entirety, and the glory of the impressive ence of its daily companion and friend. The great power of the sun for the last month or two we have had occasion to do the illusion which is used to the peculiar outline of the mountain, for exactly where the shoulder of the recline ng giant would naturally be, the sharp rock precipice had been exposed by the melting or sinking snow, and fifty or sixty miles of distance reduced this to the very facsimile of an officer's epaulette. The clearest beauties of the scene did not last long: Nature is not prodigal of her highest efforts of light and shade. The mountains and the snow remained precisely as they were when the first beams of the sun appeared, but the peculiar charm had left them, only to reappear when another favourable combination should allow the gradient portion of our world to assume again for a while its loveliest form. No corner but the sun rises than its hybrisule power began to mar the scene: a haze spread over all the plain towards the west, and only passed for a moment in its upward progress to afford a hurried view of the distant tops of the French Alps, picked out against the commencing sky by the golden messengers of the sun.—*Cornhill Magazine*.

"THE SOLDIER'S WIFE," BY W. S. HERRICK.—SEE PRECEDING PAGE.

MONUMENT TO THE LATE MR. HERBERT INGRAM, M.P., AT BOSTON, LINCOLNSHIRE, RECENTLY COMPLETED.—SEE PAGE 306.

MEMBERS OUT OF PARLIAMENT.

The autumn speeches of our representatives just now fall thick as "leaves in Vallambrosa." One can be quite as fastidious in one's choice of reading them as in a Parliamentary report; although, to be sure, they are so different to those which appear in that rigid chronicle. Gentlemen who shut their eyes and speak through their teeth in the house a few unheeded angular sentences are now sportive, and pointed, and epigrammatic, bucolically speaking; and unwonted laughter and cheers are associated, in print, with their names. Warwickshire has again been made sprightly by a gathering of its members, and Mr. Newdegate's cheerfulness has been supplemented by Mr. Adderley's hilarity—an engrafting of "argent" upon "or," which is generally asserted to be bad heraldry. One remembers well Mr. Adderley's stupendously commonsense addresses in the House, which, treating mostly of educational matters, are redolent of scholastic discipline in its effects on an unimaginative intellect; in short, he shows as a model of rectangularity. Sometimes, however, he mounts a more lively hobby, when he denounces the policy of half-defending, and therefore wholly weakening, in a military sense, our colonies; and in this matter he has ever and anon so contrived to raise his voice out of its usual monotone that one begins to believe in the possibility of quick pulsation in his system. At Leamington, where he has recently appeared, he was supported by Mr. Greaves, of Warwick, who is a fine, stalwart gentleman; by Mr. Repton, whom we do not remember ever to have seen, and certainly never heard, in the house; and Sir Charles Mordaunt, of whom one has a notion that he looks tremendously young, and only occasionally hovers about the bar of the house. Then, at Reading, Mr. Serjeant Pigott, who, being leader of the Oxford Circuit by virtue of the absence of keen competition, naturally represents an assize town in that district, has been discoursing platitudinously, as his manner is, to his constituents about the Polish question, which, as the initiated may well conceive, has not been materially advanced or illustrated in consequence.

That portion of mankind which regards with interest the sayings and doings of Parliament men, when it beholds a long column of discourse at Cockermouth coming from Lord Naas may for a moment wonder why the son of an Irish Peer, who has been twice Secretary for Ireland and has sat for more than one vivacious Irish constituency, should be vegetating as a member in a quiet little borough somewhere about the lake country. The answer is to be gathered from the fact that he was supported by Mr. Percy Wyndham, M.P. for West Cumberland, who is the son of the first Lord Leconfield, who was Colonel Wyndham, who has a word or two to say in Cumberland and a great deal to say in Cockermouth, and who is father-in-law to the Irish nobleman. Anything more antithetical in appearance on a platform than Lord Naas and Mr. Percy Wyndham can hardly be conceived. The former is a fine specimen of youthful manliness in form (though he is not quite so youthful as he looks), and, though gentle enough in his demeanour, gives one the idea of growing physical robustness. On the other hand, his "honourable relative," as he would be called, is to men in general what an *omelette soufflée* is to plum-pudding. He seems as if he should be sheltered in a glass case from the rougher winds of heaven; and as he shows signs of mental activity, often interposing in debates in the house, one cannot but hope that the scabbard is stronger than it looks, in order to bear the proverbial wear and tear of the sword. They say that Lord Naas will not be Secretary for Ireland again, but, if he should chance to be Earl of Mayo before the Derbyite party comes into office once more, the Lord Lieutenancy will be at his disposal; and, no doubt, he would look very well on a viceregal throne and in viceregal robes, if there are such things in Dublin Castle. Judging from an occasional expression of his countenance, one would say that Lord Naas has a strong comic vein in his composition, although he never shows the slightest symptom of it in his speeches, which are decorously business-like.

At the time that it occurred, last Session, in this Journal we chronicled the novelty, and a characteristic novelty it was, of a Welsh debate pure and simple. In that discussion the Welsh members developed themselves wonderfully, and showed that when need arose they could be as national, as animated, and twice as pertinacious as the Irish and Scotch representatives. In that debate Colonel Douglas Pennant, although only a naturalised Welshman, as the representative of a Welsh county was, of course, conspicuous; and was so because he has been long known as an excellent working member of the House, an efficient committee-man, and, in brief, one of the "business-men" of Parliament. When one looks at the Colonel now, and when one remembers him twenty years ago, one understands how it was that he, a Douglas, and a younger son of a Scotch Peer, was able to add Pennant to his name, and to become the owner of a Welsh principality. In fact, his appearance is gallant, whichever way the accent may be placed upon the word; and in his most gallant days he married, and inverted the order of things in such cases which usually gives the wife her husband's name. He is still a representative of the exquisitely-dressed gentleman of 1841 or so; and is the last wearer in the house of the primrose gloves which were *de rigueur* in those days, since Mr. Vernon Smith culminated into Lord Lyveden. We have been tempted to this rough sketch of Colonel Pennant on seeing an account of a public appearance of his at Bangor the other day—the object of which and the points of which have treacherously escaped us—and where he was in company with Sir Richard Bulkeley Williams-Bulkeley, Bart., who is, though he has been in Parliament since 1830, to our poor knowledge, Sir Richard Bulkeley Williams-Bulkeley—and nothing more!

In gathering the materials for this discursive column on members *in eyre* we were struck curiously by finding in a remote corner of a journal a paragraph—merely a paragraph—which told of a few sentences, applicable to the situation and the audience, which fell from Mr. Disraeli at a harvest-home at some place near Wycombe. The leader of the Opposition in a short paragraph! Let us ask Lord Russell if this is not poetical justice on him who sarcastically talked of the noble Lord when he was a member of Lord Aberdeen's Government without office, and was reported to have been obliged to trespass on part of the official bureau of one of his colleagues in order to write his letters, as "a great man in a small room." Mr. Disraeli at Wycombe! Is not that suggestive of recollections of a fiery young Radical who came with a letter of recommendation from Joseph Hume to the electors of Wycombe, who bounced about the hustings like a firework, and talked politics like Mirabeau, as he supposed? No wonder that in such a spot he was reticent. How he must have thought of the change which had occurred in the career which he then indicated! and how he must have wondered whether he might not have been now, in official life, where Mr. Stansfeld will be some day, if he had stuck to Liberalism, instead of being the possessor of a plentiful crop of barren Parliamentary honours which he can scarcely keep warm beneath the perpetual cold shade of Opposition!

One wonders if anybody recollects now that Andover was once the subject of a cry—from the wrong point of view for Andover, however. Is it remembered how, day after day, there used to be detailed statements of pauper sufferings, and chronicles of dietary, which were curiously loathsome? To feed as some men and women were obliged to do at Andover, very nearly became proverbial in the foulest and most painful sense. Well, this week Andover presents itself in another gastronomic light. We hear of the recurrence of the "annual venison feast" of the magnates of that borough, which Mr. Dudley Fortescue, one of its representatives, spoke of as carrying the company back to the "days of Shakspeare himself;" but who, as nobody seemed to take the allusion, added "that, any rate, it was of remote origin;" which is as good an excuse as any for a convivial custom. In excellent keeping with such an occasion was the presence of the other member for Andover, Mr. Cubitt, who, though he has ceased to be an Alderman of London, has left behind a reputation as a twice-chosen Lord Mayor, which will live in the gastronomic records of the Mansion House. From this hon. gentleman came a present of a "dessert," which, under the circumstances, could hardly be brought within the law against treating one's constituents. Mr. Fortescue is a son of that Earl Fortescue on whom the people of Devonshire have recently conferred the posthumous honour of a statue at Exeter. He is generally a quiet member enough; but last Session he distinguished himself by the decided manner in which he forced the consideration of the Colonel Crawley-Mhow case on the House, and, indeed, may be said to be the founder of proceedings which are to result in what many people believe is to be a great act of military justice. Mr. Cubitt, every one knows, is a useful member; and during his double mayoralty he was, with a certain appropriateness, placed on the Kitchen and Refreshment Committee of the House, and is no doubt a party to that agitation for reform in Parliamentary "restauration" which cropped up last Session, and which, intended to be sublime, trembled on the verge of the ridiculous. To be sure, the object was to make the house, which is the best club in town in other respects, the best gastronomically—a matter which may be considered with reference to the great question of "counts out."

COUNTRY NEWS.

The Queen has approved of Don Joaquin Gonzalez Huet as Consul at Cardiff for the Queen of Spain.

George Hammond, an old man, was sentenced to six weeks' hard labour the other day by a bench of Hants magistrates for deserting his master's service.

An explosion of firedamp took place in the forge-pit at Aberdare on Monday evening. One man was killed on the spot, and thirteen or fourteen others severely injured.

The sixteenth annual conference of the Evangelical Alliance was inaugurated on Tuesday evening by a soirée at the Rotundo, Dublin.—William Brooke, Esq., Master in Chancery, presiding. There was a very large attendance of deputations from conferences in various parts of the world.

The citizens of Glasgow have presented Dr. John Strang, City Chamberlain, with a testimonial, consisting of about 1600 guineas and a piece of silver plate, expressive of their appreciation of his private worth and long-continued public services.

The Royal charter, with the great seal of the realm attached, constituting Reigate a borough town, has just been received. The charter is dated the 11th of this month, and provides that the governing body shall consist of a Mayor, six aldermen, and eighteen councillors.

The coming of age of the Hon. Vesey Dawson, eldest son of Lord Cremorne, was celebrated on Tuesday week with great rejoicings at Dartrey, the family residence, in the county of Monaghan. The tenantry of the large estate, to the number of 2000, dined in the courtyard.

An attempt to poison five girls is reported from Hull. A little girl of fourteen is said to be the guilty person, and it is alleged that she threatened to "serve them out" for a quarrel. The poison was put into the coffee-pot, and the victims are not expected to recover.

Three of Messrs. Curtis and Harvey's gunpowder-mills at Hounslow exploded on Saturday morning. Only one of the three mills was at work at the time. Much damage has been done to the buildings, and one workman was seriously burnt.

A silver vase and cover, of the value of £270, was on Tuesday presented by the ladies of Bradford to the Mayor of that borough (Mr. M. W. Thompson), as a mark of their high appreciation of his many hospitable courtesies, more particularly on the occasion of the marriage of the Prince of Wales.

Yesterday week the chairman, deputy-chairman, some of the directors, and the chief officers of the Dublin, Wicklow, and Wexford Railway Company passed in their State carriage over the entire line to Enniscorthy, a distance of seventy-eight miles. The portion extending to that town from the Vale of Avoca, thirty-six miles, is quite new.

The hall of the Hartley Institution, Southampton, was on Wednesday week densely crowded, Cardinal Wiseman having undertaken to inaugurate the thirty-fourth session of the Polytechnic Institution by an address on the subject of "Self-culture." Mr. R. Stebbing, the president of the institution, occupied the chair. His eminence was received with great cordiality, and delivered an eloquent and instructive lecture.

A bed of rock salt has been discovered at Middlesborough. The following is an extract of a letter from Newcastle-on-Tyne:—"I do not know whether you have observed anything about a very interesting discovery that has been made in this district, under the new red sandstone—a bed of rock salt, at Middlesborough, where they have bored. It is about 120 ft. thick; it is deep—I think about 200 fathoms."

The *Inverness Courier* says that the prospect of an extension of Highland railways, so as to embrace Skye and the Hebrides within its influence, is freely discussed. Several routes are spoken of, the most promising of which appears to be by Loch Carron, following nearly the line of the present coach road by Attadale to Kyleakin. This route has been selected for the first survey, and Mr. Mitchell's assistants are engaged traversing the district with a view to the extension of the line.

Fifty "stowaways" were detected on board the Galway packet Anglia last week, as she was on the point of sailing. They were taken by the police and escorted through the town with fixed bayonets, several unsuccessful attempts being made for their rescue. Now fewer than 128 persons had concealed themselves in the Adriatic, that sailed from Galway on the 1st inst. for New York. The Hibernia has brough back twenty-nine of the "stowaways" and handed them over to the police authorities.

The late Prince Consort having given the Free Church congregation at Crathie a site for their recently-opened place of worship, a neat Gothic tablet has been placed in the church in acknowledgment of the gift, bearing the following inscription:—"To the noble and illustrious Prince Albert, K.G., Consort to her Majesty Queen Victoria, and Lord of the Castle and Lands of Balmoral, this tablet is dedicated in deep sorrow for his early death, and in pious remembrance of his beneficent gift of the site whereon their church is erected, by those who worship under its roof."

The Lord Lieutenant of Ireland left Meen Glas, the residence of Lord Lifford, on Monday, for a tour in the western part of the county of Donegal, on his way to Derry, where he was expected to arrive on Thursday evening, when he would be presented with an address and the freedom of the city. On Friday he was to open the new bridge, and in the evening to be entertained by the commissioners. On Saturday (to-day) he is to proceed to Greencastle to inspect the improvements of the harbour, and will probably return to Dublin in time to grace with his presence the festivities in honour of the Channel Fleet.

The Ghost is just now the talk of London. His latest reported appearance is in the library of the Lord Chancellor, away down in Hampshire. The gentlemen who allege themselves the inventors of the Ghost wanted to get the Great Seal passed to their patent; a number of other gentlemen who have been exhibiting the Ghost denied that the invention was novel, and the Ghost came on a portable stage before Lord Westbury to know whether or not he was to be sealed with Mr. Wyon's beautiful seal. The Lord Chancellor decided that the Attorney General having passed the patent the inventors should have the sealing-wax they and the Ghost desired, leaving the objectors their remedy by ordinary course of law.

A fire broke out on Sunday morning in the house of Mr. Verrey, tailor, Cornmarket-street, Oxford, and spread with great rapidity. The grocery establishment of Messrs. Grimbly, Hughes, and Co., adjoining Mr. Verrey's, was soon burned to the ground. The house of Messrs. Park Brothers, wine merchants, on the other side of Mr. Verrey's, was completely gutted; and Alderman Browning's, ironmonger and machinist, was also considerably injured. A large stack of chimneys fell, burying four men, who had been working the hose. One was killed on the spot, another died shortly afterwards, and the two others are seriously injured. The damage done by the fire is estimated at from £20,000 to £30,000; nearly the whole of which, however, was insured.

At Loughgall, Armagh, Petty Sessions, James Hagan was summoned by his wife, Sarah Hagan, for gross ill-treatment, the cause of which was the loss of a talisman, "a dead man's finger," which Hagan believed enabled him to become invisible and enter any man's dwelling, go behind his counter, and rob his drawers without being observed or detected. This was the wife's evidence. Hagan, because his wife could not account for it, gave her a most unmerciful beating, and threatened to take her life. The truth appeared to be that the poor woman became alarmed at the conduct of her husband carrying about the finger, and she buried it in a neighbour's field and forgot the place of interment. No excuse would satisfy Hagan. He would have the finger, and nothing but the finger; so that the poor woman, failing to discover it, felt the power of his five fingers in a very unmanly way. The Bench, having commented severely on the fellow's misconduct and gross superstition, ordered him to find bail to keep the peace for twelve months.

The King of Wirtemberg, who is now in his eighty-second year, has been seriously ill for some days.

The South-Eastern of Portugal Railway, from Veudas Novas to Evera, was opened on the 13th inst.

The ex-Grand Duke of Tuscany has accepted the office of Syndic or Mayor of the Commune of Schlakenwerth, in Bohemia.

Don Garcia, son of Queen Christina, has died of phthisis, at Pau, at the age of nineteen—being the third casualty in that offshoot branch of the Bourbon race within a recent period.

From Gibraltar we learn that the Spanish Government is concentrating a large force in order to effect a settlement of the boundary question and to keep the Riffians in check.

The steamer Chancellor, at St. Louis, from Memphis, has on board a 36-pounder that was captured in 1846 in Mexico by the United States' forces, and was again recaptured from the Confederates at Vicksburg, on July 4, 1863. The gun was made in France Nov. 26, 1768.

METROPOLITAN NEWS.

On Thursday morning the remains of Mr. C. R. Cockerell, R.A., were laid in St. Paul's Cathedral, to the restoration of which during the last few months he had so largely contributed.

The domes of the Exhibition building of 1862 are being removed to Alexandra Park, Wood-green, Hornsey, where they will be erected as soon as the preparatory works can be completed.

Speech-day at Christ's Hospital was kept on Monday with the usual ceremonies. The Corporation attended service in the adjoining church, and listened to a sermon from an old Grecian of the school. Service over, they proceeded to the hall of the hospital, where the speeches were delivered.

On Wednesday the General Steam Navigation Company's vessel Seine was coming up the river when she was run into, near Blackwall Pier, by a steamer belonging to the Carron Company. The Seine began to fill, and the captain, keeping on all steam, ran her ashore near Greenwich. Her passengers were taken off by the Naiad, Woolwich steamer.

The Baron Osy steamer was on Saturday last hauled into Lingsley's dock, Deptford, and the extent of her injury was ascertained. More than nine feet of her bottom under the bilge had been rent open when she struck, a large portion of the iron plate being ploughed out when she passed over the obstructions in the bed of the river.

A Hungarian named Sigismund Dietrichsen, for some years in business in London, has absconded with a sum of £8000 in Bank of England notes, obtained by fraud. Dietrichsen purchased on Saturday £11,000 worth of Egyptian and Brazilian bonds, paying for them with a cheque which he reckoned would not be presented till Monday, in consequence of the Saturday half-holiday. He at once got £8000 on security of the bonds and decamped. The cheque was promptly presented, when it was found that he had a balance of about £25 to his credit! £1000 reward is offered for his apprehension.

Last week the births of 1930 children—946 boys and 984 girls—were registered in London. In the ten corresponding weeks of the years 1853-62 the average number (corrected) was 1846.——In the week that ended last Saturday the deaths in London were 1186. The average number of deaths in ten corresponding weeks (viz., the thirty-eighth week in each of the years 1853-62), with the omission of deaths from cholera in 1854, and a correction for increase of population, is 1147. The deaths from scarlatina were 130. This complaint is, at the present time, the most fatal in the list, with the exception of phthisis, which numbers 142 cases.

An inquest was held on Wednesday respecting the death of Mr. George Beamire, aged seventy-five, who had lived for twenty years in a set of chambers in the Adelphi, allowing no one to enter his rooms. Though a wealthy man, his chambers were in a filthy state. He appears to have shunned the society of his kind, and at last, being missed, his body was found in an advanced state of decompositon. There was no bed or bedding in the rooms; but a great quantity of newspapers, books, paintings, and valuables of different kinds were strewed about. Death, the medical man said, had been caused by low fever, accelerated by neglect, and the jury returned a verdict accordingly.

The raising of the Holborn valley has been discussed at a meeting of the Common Council. A report from the Improvement Committee recommended that designs for the raising of the valley should be advertised for, and that prizes should be offered for the best designs. This recommendation was adopted without much discussion.——Mr. Marrable, of Whitehall-place, writes to us as follows on this subject:—"My attention has been called to a paragraph in several of the daily and weekly papers copied from the *City Press*, in which, after referring to the two plans now before the public, by which the evils of Holborn-hill and Skinner-street may be mitigated if not altogether removed, it properly assigns to Mr. J. B. Bunning, the City architect, the authorship of one scheme; but with regard to the other it states, 'This plan was advocated, though not originated, by Mr. Marrable, the late architect to the Metropolitan Board of Works, and it would be the cheaper.' The *City Press* does not state who was the originator of this design, and, until I read the paragraph, I had fondly thought that, whatever might be the merits of the scheme, I was the author of it. Before I put it forward at all or laid it before the Board of Works, so long ago as 1858, I took every possible means to discover whether any plan taking the same line, and possessing the same features and advantages, had ever been devised before. I consulted several eminent engineers and architects—amongst the rest Mr. Bunning—and I was assured by all that the plan was at least original. The drawings hung for many weeks in the library and reading-room at the Guildhall. I exhibited them, and explained the advantages of the scheme at a general meeting of the Royal Institute of British Architects, where a discussion took place, and the merits and demerits were canvassed. The drawings were also exhibited at the soirée of the president of the Institution of Civil Engineers, in 1859; and, further, two views, looking east and west of the proposed high-level road and viaduct, were exhibited at the Royal Academy in 1861; and a long and able article, explaining and going into the merits of the scheme, appeared in the Illustrated London News of July 20, 1861, with a full-page engraving of one of the views. Thus the design has been before the public and the profession for five years, and this is the first time I ever heard its originality impeached."——In answer to this statement Mr. Thomas Naylor, of Euston-grove, writes to the *City Press* as follows:—"Permit me, as the author of the said plan, to state that I made the requisite surveys in 1839, and submitted the plan to the Court of Common Council in 1841, when it was referred to the Farringdon New Street Committee, and subsequently, in 1842, to the London Bridge Approaches Committee. The plan met with much support from the late Thomas Henry Hall, Esq., and other influential members of the Corporation; it was also brought under the notice of the then First Commissioner, the Earl of Lincoln, and by his Lordship favourably entertained. In June, 1855, I was examined by a Committee of the House of Commons relative to this project, and the proposed new line of street from King's-cross to the Post Office and Cheapside."

Law and Police.—The September session of the Central Criminal Court, the Surrey Sessions, and the Middlesex Sessions, were opened on Monday.

In calling over the roll of the grand jury at the Surrey Session, a gentleman, who had been a clergyman of the Church of England and is now a layman of the Church of Rome, was excused on the ground that his Anglican orders were indelible. Another juryman was excused on the ground that he is a freeman of the Worshipful Company of Cooks.

At the Central Criminal Court on Tuesday, John Murphy was charged with embezzling small sums of money, the property of the trustees of the "Royal Liver Friendly Society." There was nothing of interest in the case so far as the charge was concerned; but it transpired that the society, which professes to insure poor people, who pay small sums of money weekly, allows its agents and collectors 25 per cent on the premiums they gather in. The prisoner was acquitted. The Recorder commented in terms of strong reprobation on the manner in which the society did business.

Mr. Alfred Styles, the enthusiastic youth who was some time ago committed for trial on a charge of endeavouring to raise a Polish Legion in this country, was yesterday set at liberty on his own recognizance, at the Central Criminal Court. He pleaded guilty, and his counsel alleged in his behalf that in enlisting men for the Polish service he was not aware that he was offending against the laws of his country. This plea of ignorance, and a promise to abstain from such proceedings for the future, were accepted by the Russian Government, whose counsel proposed that he should be ordered to enter into his own recognizance to appear for judgment when called upon.

A railway compensation case came before the Lord Mayor's Court on Saturday, Mr. Duffield, coach-builder and harness-maker, of Long-lane, Smithfield, and Aldersgate-street, whose repository is about to be removed to make way for the Smithfield extension of the Metropolitan Railway, claimed the sum of £13,000 as compensation for the leases, removal, depreciation of stock, loss of trade, and the consequent injury that would accrue to his business. The evidence was of a very conflicting character. Ultimately the jury awarded £4900.——On Monday, at the Sheriff's Court, Red Lion-square, a compensation case, "Samuel v. The Metropolitan Company," occupied nearly the whole day. Messrs. Samuel are artificial florists, in Charterhouse-square. As originally proposed, the claim was £18,000. The company offered £2000, which was refused, and the claim as submitted to the jury was £7700. The jury assessed the damages at £2250.

In a case at the Southwark Police Court yesterday week a butcher was charged with having in his possession diseased meat. The magistrate told the defendant that he was liable to a penalty of £20 for every piece, or three months' hard labour, without a penalty, under the new Act passed in July. A conviction was not pressed for, but the meat was destroyed.

THE DISTRESS IN THE NORTH.

The weekly meeting of the Central Executive Relief Committee was held on Monday in the Manchester Townhall—Sir J. Kay Shuttleworth, Bart., in the chair. The hon. secretary reported that the balance in the bank was £292,691, and that £379 had been received during the week. The report presented by Mr. Farnall stated, "That on the 12th inst. there was a decrease in the number of persons receiving parochial relief in twenty-seven unions in the cotton-manufacturing districts, as compared with the number so relieved in the previous week, of 800. The pauperism of this week is less by 24,555 than that of the corresponding week of 1862. The total weekly cost of outdoor relief on the 12th inst. was £8647; in the corresponding week of 1861 it was £2267. In the corresponding week of 1862 it was £10,026. The amount of money in the hands of the treasurers of the above unions on the 12th inst. was £93,568. Mr. Maclure, hon. sec., reported that the number of ablebodied men relieved by the relief committees was 29,932; ablebodied women, 37,647; children under six years of age, 54,294; aged persons, 5124: total relieved by the relief committee, 119,997. Several grants were made.

The Mansion House Committee met yesterday week at the Mansion House; Wm. Cubitt, Esq., M.P., presided. It was reported that the total amount of subscriptions received up to Thursday evening was £511,416, of which sum £444,912 had been remitted to the distressed districts; £645 had been received in the course of the last fortnight, of which £348 was from colonial resources. Several grants, making altogether £1160, were made.

SCIENTIFIC NEWS.

CAST-IRON GIRDERS.—The durability of these valuable architectural materials has been proved by their behaviour during the recent fire at the German Bazaar at Langham-place. The eminent metallurgist, Dr. John Percy, writing in the *Times*, gives the result of the observations which he had been induced to make by his friend, Mr. James Fergusson, the architect. Dr. Percy says that "the girders were 18 ft. long and 13 in. deep, in the middle tapering off slightly towards each end, and flanged at the bottom. Several had fallen to the ground, but only a few were broken; and of those which remained entire two were bent laterally, in a striking and nearly equal degree. The flexure was gradual from end to end; the deviation from a straight line at the ends was 22 in. No cracks could anywhere be detected. Many of the cast-iron columns, which are still upright, have been singularly twisted at the upper part, as though the metal had been softened by heat, and yielded without cracking to the effect of pressure from above. As far as we could judge, there was no very decided evidence of fracture in either girders or columns from the injection of water upon them; and yet, from the fused glass and other objects which lie scattered about, it is certain that they must have been exposed to a pretty high temperature." Dr. Percy strongly recommends (on account of their rarity) that specimens of these bent girders and columns should be preserved in a museum, together with other objects illustrative of accidents—such as the bursting of boilers, the breakage of railway axles and tires, &c., which would thus become not only interesting, but important in a practical point of view.

FULMINOSE.—In a memoir on the formation of humus vegetable soil, and nitre, read at a recent meeting of the Academy of Sciences at Paris, the author, M. Blondeau, states that twenty years ago, when studying the action of acids on cellulose, he observed the remarkable fact that, before combining with cellulose, sulphuric acid transformed it into an isomeric substance having remarkable properties, which he designated "fulminose," because, when raised to the temperature of 140 deg. cent., it spontaneously decomposed into carbon and aqueous vapour. Fulminose possesses not only the property of combining with nitric acid and forming gun-cotton, but is also capable of actively absorbing certain gases, especially ammonia, hydrochloric acid, and sulphuretted hydrogen; this absorption being accompanied with the evolution of heat and the combination of the gas or its elements with the fulminose. After noticing other properties of fulminose, M. Blondeau states that, when dead wood is placed in suitable conditions of temperature and moisture, it is soon attacked by one or two specimens of mycoderms; and that, after they have drawn from the wood the nitrogenous matters necessary for their development, they leave behind a substance closely resembling fulminose. When a fragment of dead wood of a linden tree was treated with an alkaline solution of potash, by dilute hydrochloric acid, and, finally, by boiling water, M. Blondeau obtained as residue a friable white substance, which when analysed presented the composition of cellulose, and possessed all the properties of fulminose. These facts, he believes, throw light on the formation of humus and the part which it plays in nitrification. Fulminose possesses the property of absorbing gases, especially ammonia, which, reacting on the remains of selerogen, colours them black, and forms a species of combination which, being soluble, penetrates into the pores of the substance, giving it the black tint characteristic of humus. Ammonia and oxygen are condensed by the humus, whereby a quantity of heat is generated, sufficient to determine the combustion of the ammonia and its transformation into water and nitric acid; hence arises the production of nitrate of ammonia, which may change its base with potash, soda, and lime, and thus form the different nitrates which so powerfully aid vegetation. M. Blondeau thus sums up the facts contained in his memoir:—"1, The transformation of wood into fulminose under the influence of mycodermic vegetation; 2, The absorbing power of fulminose in regard to gases, especially ammonia; 3, The combustion of ammonia in the pores of the fulminose, and the transformation of the elements into water and nitric acid—a combustion rendered manifest by the light which dead wood affords in darkness; 4, The identity of humus and fulminose. M. Blondeau states that, although all the foregoing facts are not entirely new, the most part having been previously observed, yet that no one has hitherto precisely determined the nature of the substance which enjoys these curious properties, which he thinks constitute the simplest interpretation of nitrification hitherto obtained.

THE ARTIFICIAL FECUNDATION OF THE CEREALS AND FRUIT-TREES, according to a method invented by M. Hooibrenck, whereby a much more abundant crop is said to be obtained than by the course of nature, was some time ago submitted to the French Government, who appointed two commissions to report thereon, including MM. Payen and Decaisne, members of the Institute. They reported favourably of the results produced at Sillery and Châlons. These results have been also inspected by the Emperor himself, and in consequence he has appointed another commission to examine and report on experiments about to be made during the next agricultural season on the Imperial farms at Fouilleuse and Fontainebleau, and in the Imperial Agricultural Schools at Grignon, Versailles, &c. The apparatus employed by M. Hooibrenck for the fecundation of cereals consists of a cord 20 metres in length, to which are attached pieces of wool from 33 to 35 centimetres long. These pieces of wool should be numerous enough to touch each other. A small leaden ball, about the size of deershot, is attached to the extremity of the wool at very short distances. The apparatus is passed over the ears of corn at the period of flowering, so as to shake them lightly. Three persons are employed for each operation, a man at each end of the apparatus, and a child in the middle to sustain the cord. The operation should be repeated three times. The expense for fecundating a hectare (about 2½ acres) three times costs about 2f.; the apparatus, which is very durable, costs about 5f. The process for fecundating fruit-trees is more complicated. The inventor, as is usually the case, is exceedingly sanguine as to the success of his process, which, he says, is based upon "opportunity, simultaneity, equality, and force!" The Imperial Government is thoroughly determined to test his assumptions. Details will be found in *Les Mondes*, edited by the Abbé Moigno.

THE SUN'S DISTANCE FROM THE EARTH.—Mr. J. R. Hind, the superintendent of the *Nautical Almanack* published by the Admiralty, has written to the *Times*, setting forth the results of the recent investigations of astronomers, which tend to show that the sun is really about four millions of miles nearer the earth than is stated in the text-books, which give the distance as 95,298,260 miles, according to the observations of the transits of the planet Venus in 1761 and 1769, published by Professor Encke, of Berlin. These transits generally happen in pairs, and with an interval of eight years between each pair; a period of 105 or 122 years intervenes between the last of one pair and the first of the next. Within the last few years M. Le Verrier, the chief of the Imperial Observatory at Paris, has completed a most rigorous application of the theory of attraction of the motions of the earth, Venus, and Mars, defined by observations at Greenwich and other observatories. The theory of the earth was published in 1858, and, Mr. Hind states, contains a result which shows a diminution of the assumed distance of the earth from the sun very nearly to the same amount assigned by M. Hansen's researches connected with the moon. The earth's mass, as referred to the sun's, would, from the same cause, require increasing to the extent of nearly a tenth part of the whole. Mr. Hind states that the next ensuing pair of the transits of Venus will take place on the 9th of December (civil reckoning), 1874, and on the 6th of December, 1882. No part of the transit of 1874 can be viewed in this country. The egress only will be visible in the south-east of Europe near sunrise, in Italy, Turkey, &c.; but the entire duration may be observed in Australia, New Zealand, British India, China, Tartary, and the islands of the Indian Ocean, including Madagascar. The entire duration of the second will be observable in the United States and British America. In conclusion, Mr. Hind says, "It is scarcely to be doubted that every possible use will be made of the transits of 1874 and 1882 to improve our knowledge of the great astronomical unit, the measure of the sun's distance; and that all the resources of modern science, and all the facilities afforded by modern enterprise, will be continued for that purpose. No other opportunity of the kind will occur until the year 2004.

A PHOTOMETRICAL COMPARISON OF THE SUN AND STARS has been made by Mr. Alvan Clark, of Cambridgeport, United States, who records his method of observation and the results in the American *Journal of Science*. He has a dark underground chamber 230 ft. in length, one end terminating in the cellar of his workshop, and the other communicating with the surface of the ground by a vertical opening 1 ft. square, and 5 ft. deep. In a movable partition, between this opening and the end of the chamber, a lens of any focal distance can be inserted. A twentieth of an inch focus was employed, of the best finish possible; its flat side cemented to one face of a prism with Canada balsam. No light whatever can enter the dark chamber, except through this little lens. A common plane silvered glass mirror, placed above ground, over the vertical opening, receives the direct rays from the sun, and sends them down into the prism of total reflection, by which they are directed through the little lens into the chamber. An observer in the cellar, 230 ft. distant, sees the sun reduced 55,200 times; and its light, in amount, varies but little from that of Sirius. Upon a little car, movable in either direction by cords and a pulley, is mounted another lens, with a focal distance of 6 in. The eye of the observer is brought into a line with the lenses, or so near it that he sees the light through the six-inch lense; then by the cord he sends the car into the chamber to the greatest distance at which he can see the light, like that from a star of the sixth or seventh magnitude. At noon, March 19 last, with a perfectly clear sky, Mr. Clark found the sun visible through the six-inch lens, when it was removed to the distance of 12 ft. from the eye. The distance between the lens being 218 ft., the reduction by the small lens, if viewed from the point occupied by the six-inch lens, would be 52,320 times; and that again by the six-inch lens, distant from the eye 12 ft., or twenty-four times its focal distance, is reduced 23 times, making the total reduction 1,203,360 times. Mr. Clark believes that this last reduction is about the limit at which the naked human eye could ever perceive the great luminary. The disc of the moon may be thus reduced 3000 times; Sirius, 20 times; Castor, 10 times; and so with other stars. With the above-mentioned apparatus Mr. Clark compared the light of the sun with various stars—e.g., he found that to bring the magnitude of the sun to an equality with that of the bright star Alpha in Lyra, the distance would need to be increased 102,000 times; according to Wollaston, 425,000 times.

Mr. Mason, the Commissioner from the Confederate States, on Monday sent to Lord Russell a notification that he had been instructed by the Confederate Government at Richmond to withdraw from this country. Mr. Mason, it is understood, will proceed to Paris and remain there.

NATIONAL SPORTS.

WITH the exception of the remarkable St. Leger race, on which the settling has been excellent, and the interesting collateral trial which Macaroni had with his old rival through Queen Bertha in the cup, the running at Doncaster was rather dull. To the corporation the meeting was a most productive one; but, unless the entrances to the Grand Stand and the accommodation are very considerably enlarged, people will not care to pay a guinea to be almost crushed to death in 1864, as they were this year and last. But for Lord Clifden's engagement in the Doncaster Stakes he would, no doubt, have gone for the double honours of the week, as Rockingham, Don John, Charles XII. and Voltigeur did so successfully before him; and we should have seen the unprecedented spectacle of the three "red, white, and blue" "ribbons" of the year fairly pitted against each other. Lord Clifden (whose Portrait has been unavoidably deferred until next week) is in the Claret Stakes T. M. M. at the Craven meeting, in which Mr. Naylor's nomination is still "sealed up," and both he and Macaroni have been handicapped at even weights with Carnival in a £500 free handicap at Newmarket this year, in which Queen Bertha (8 st.) also figures. Coastguard's action in the Two-year-old Stakes was rather high; and both Welland and Johnny Armstrong proved themselves very good under high weights. Hubert, whose blood—Stockwell from a Touchstone daughter of Beeswing—would satisfy Dr. Shorthouse himself, ran remarkably well in his patent blinkers on Friday, and, bad as the field might be, with 11 lb. less and good temper on the day, he ought to run forward in the Cambridgeshire. He is trained at Whitewell by Heseltine, and does his work alone. The Marquis is said to have turned so savage that they were recently almost a week before they could get at him in the stable. The Richmond races have been much better than usual, and Appenine and Harvest Mell are among the winners. It is said that Winteringham refused £3500 for the two at Doncaster, and that Mr. Blenkiron has given Mr. Osborne a heavy sum for their sire, old Weatherbit, who is now twenty-one years old. The value and truth of the old horse's stock is only just becoming apparent. Lord Zetland's Saragossa received 3 lb. and beat Harvest Mell cleverly by a neck, from the Grey Stone in, on the second Richmond day.

In the Doncaster sales Lord Derby, with an 850-guinea Stockwell colt, was second; and his Lordship and Mr. Cookson were bracketed third, with 800-guinea De Clare and Newminster colts, to the 930-guinea premier, Mr. Newton's Zambesi. His Lordship's average for six was 536½ gs. The Whitfield stud averaged 413 gs. for seven; Mr. Cookson's, 351½ gs. for seven; the Sheffield Lane, 180½ gs. for twelve; the Boythorpe, 169½ gs. for nine; and Lord Scarborough's, 111½ gs. for six. Two sisters to The Wizard, four and two, averaged 83 gs., and Zuyder Zee was not put up. Mr. Churnside, the great Australian speculator, was very spirited, and went as high as 560 gs. for Lord Derby's Meeance filly, which he intends to send with some others to Whitewall to train, while the rest are located pro tem. at the Hasketon paddocks.

Carbineer, Lady Clifden, and Miss Julia are all for sale. The Fandangoes were remarkably busy with dead heats on Tuesday, as Fanfaron beat Oldminster at the second attempt, at 37 lb., at Richmond; and Measure for Measure, "the property of a young lady of fifteen, who gave her jockey her own orders" and claimed her winner at 41 gs., ran two at Tunbridge with Rosa Lee, who ran against the post at the third time of asking, and was beaten by a neck when they met next day. Newmarket First October begins on Tuesday, and Edinburgh and Lothians Club, Chesterfield, and Tenbury, on Wednesday.

The leading packs are nearly everywhere busy in the woodlands, and cubs are generally plentiful. Mr. Drake is again in his right place at the head of the Bicester country, which did very little without him. All hunting men will deplore the loss, after a lingering illness, of Mr. James Morrell, for ten years the master of the Old Berkshire, with John Jones and Tom Clark as his huntsmen. He took to harriers soon after he left Eton, and no man knew or enjoyed the work of hounds better. His pack and his horses made a very excellent average when he gave up the mastership of the scarlet and black collar O. B. H. in 1858, and some of his best blood accompanied Clark to Badminton, where it has held its own well, especially with the Spangle litters. The annual hound show at Tubney was always a very pleasant day, and looked forward to with the keenest delight both by masters and huntsmen as something quite unique of its kind. Mr. Morrell seldom went to the meet latterly, but took more pleasure in his greyhounds, and his shooting, and his fishing. He never ran his dogs in public; and, although a keen sportsman in every way, he was quite as fond of his farm and his flower-garden, and was always sorry to quit them for his annual trip to the seaside or the Epsom and Ascot fortnight, part of which he always spent at Salthill. In munificence and public spirit there were few to equal him, and his loss to Oxford is indeed a heavy one. He was only in his fifty-third year, and leaves a widow and one daughter.

We believe that the honour of killing the champion salmon of the season has fallen on Colonel Keane, who landed a 33-pounder on the Ness, near Laggan Cottage, Inverness, after a struggle of about an hour. Shortly before that Mr. White, son of Earl Mansfield's head gamekeeper, took a 28 lb. one at the Lynn of Campsie, near Perth.

RICHMOND RACES—TUESDAY.

Easby Stakes.—Harvest Mell, 1. Little Stag, 2. Stolen Moments c., 3.
Sapling Stakes.—Appenine, 1. Revival, 2. Gondola, 3.
Richmond Handicap.—Fanfaron, 1. Oldminster, 2. Piccador, 3.
Richmond Cup.—Lady Louisa, 1. Alice, 2. Prairie Flower, 3.
Licensed Victuallers' Plate.—Who's Who, 1. Saltant, 2. Ruby, 3.
Members' Plate.—Maid of the Mist, 1. Miss Armstrong, 2. Leyburn Lass f., 3.

WEDNESDAY.

Wright Stakes.—Saragossa, 1. Harvest Mell, 2. Gondola, 3.
Burton Handicap.—Newmarket, 1. Fanfaron, 2. Bonny Bell, 3.
Zetland Plate.—Lady Louisa, 1. Who's Who, 2. Miss Armstrong, 3.
Her Majesty's Plate.—Caller Ou, 1. Alice, 2. Unfashionable Beauty, 3.
Volunteer Rifle Corps Plate.—Wisdom, 1. Prairie Flower, 2. Brother to Stockton, 3.
Belsay Castle Nursery Handicap.—Kapunda, 1. Mantrap, 2. Leyburn Lass f., 3.

LATEST BETTING AT TATTERSALL'S ON THURSDAY EVENING.

CESAREWITCH.—15 to 1 agst Anfield (t and off), 100 to 6 agst Hurricane (off), 18 to 1 agst Lioness (t), 25 to 1 agst Jack o' Hearts (t), 25 to 1 agst Myrtle (t), 40 to 1 agst Catch 'em Alive (t), 50 to 1 agst Melandra (t).
CAMBRIDGESHIRE.—100 to 7 agst Birdhill (t and off), 100 to 6 agst Catch 'em Alive (t and off), 100 to 6 agst Borealis (t and off), 50 to 1 agst Cairncastle (t), 50 to 1 agst Baldwin (t 66 to 1).

The *Levant Herald* has received a warning for publishing a letter animadverting upon the Imperial expenditure in palace building and the arrears due to the army, the discussion of which topics the Government "considers inconvenient at present."

The proceedings of the International Social Science Congress at Ghent were brought to a conclusion last Saturday by a banquet given by M. Kerchove, the burgomaster of Ghent, to the members, of whom there were nearly 400 present.

"Notwithstanding," says the *Pays*, "the great number of omnibuses now plying in Paris, they are found altogether insufficient for the accommodation of the public, and the company has therefore determined to place on the principal lines much larger carriages, which will take fifty-two passengers instead of twenty-six, as at present."

MONETARY TRANSACTIONS OF THE WEEK.

(From our City Correspondent.)

A VERY limited business has been transacted in all National Securities during the present week, and the market generally has been extremely inactive. Sales of money stock have predominated, and the quotations have had a drooping tendency. The unfavourable nature of the political and financial advices from Paris appears to have had some influence upon most of the operators for a rise.

There has been a steady, but by no means active, inquiry for money in the general discount market, and full rates have been paid for accommodation. The lowest quotations for the best paper are now as follows:—

Thirty days' bills	3⅞ to 4 per cent.	Four months' bills	4 to 4½ per cent.
Sixty days' bills	3⅞ to 4 "	Six months' bills	4½ to 5 "
Three months' bills	4 to		

At the Bank of England, the applications have continued somewhat numerous; whilst, on the Stock Exchange, money may be quoted at a fraction over 3 per cent.

The Continental Money Markets present no new feature. The quotations in the leading cities are as under:—

	Bank rate per cent.	Open market per cent.		Bank rate.	Open market.
Paris	4	3½ ¾	Amsterdam	3	3
Vienna	5	5	Turin	5	5
Berlin	4	3¾	Brussels	4	3½
Frankfort	3	2¾	Hamburg	—	3
			St. Petersburg	6	8

The imports of the precious metals have continued on a full average scale, and about £200,000 in gold has been disposed of to the Bank of England. The withdrawals have amounted to £105,000 for shipment to Egypt and the Mauritius.

Nearly the whole of the Continental exchanges continue in favour of this country, and there is still a profit on the export of gold from New York.

On the 8th proximo India Debentures to the amount of £5,000,000 will fall due. The Indian Council have only £2,000,000 in hand to meet this payment, and it is understood that only that amount will be taken in exchange for the new 4 per cent stock. The council will, therefore, have to provide another million to meet the claims of the debenture holders. This amount will, we presume, be obtained from the Bank.

A loan of £200,000 has been partly raised for the United States of Columbia. It is in a Six per cent Stock, at 86. The scrip has already been done at 1 to 1½ prem.

The following return shows the state of the note circulation of the United Kingdom during the four weeks ending Aug. 22:—

Bank of England	£21,364,053
Private Banks	2,931,609
Joint-stock Banks	2,761,065
Scotland	4,113,607
Ireland	4,882,173
	£35,116,407

Compared with the corresponding period in 1862 the above return shows a falling off in the circulation of £571,231. The amount of specie held by the Scotch and Irish banks was £4,218,133.

On Monday very little was doing either in Home or Indian Securities. Prices, however, were supported. Consols, for Money, realised 93⅛ ¼; Ditto, for Account, 93⅜ ½; Reduced and New Three per Cents, 92⅞ ¾; India Five per Cents, 108⅜ ⅝; Ditto Bonds, 18s. to 20s. prem.; Exchequer Bills, par to 3s. prem. The Five per Cent Rupee Paper was 107⅞; and Bank Stock, for Account, 240. The dealings on Tuesday were limited, and the quotations had a drooping tendency. Consols, for Transfer, closed at 93⅛ ¼; Ditto, for Account, 93⅜; Reduced and New Three per Cents, 91⅞ 92; Red Sea Annuities, 21 1-16; India Five per Cents, 108⅜ ⅝; Ditto, Debentures, 100 to 100⅜; Exchequer Bills, par to 3s. prem.; India Stock, 224; the Four per Cent Rupee Paper, 98¾; the Five per Cent ditto, 107½. On Wednesday Consols, for Money, were done at 93⅛ ¼; for the Account, 93⅜ ½; Reduced and New Three per Cents, 91⅞ 92; India Five per Cents, 108⅜ ½; Ditto Bonds, 16s. to 20s.; Exchequer Bills, par to 3s. prem. The Five per Cent Annuities marked 107¼ and 108⅛; the Five per Cent Enfaced Paper was 107½ ¾ 108; and the Five-and-a-Half per Cent, 116⅞ to 117. On Thursday Consols marked 93⅛ ¼ for Money, and 93¼ ⅜ for Account; the Reduced and New Three per Cents sold at 91⅞ 92; and Exchequer Bills, par to 3s. prem.; India Five per Cent Stock sold at 108⅜ ⅝.

American Securities have changed hands slowly. Atlantic and Great Western have realised 78; Erie Shares, 70; Illinois Central, 100 dol. Shares, 78½; Panama Railway, 101⅞ 102.

Mexican Stock has fluctuated to some extent. Greek, Spanish, and Turkish Securities have ruled less firm, and a slight fall has taken place in their value. The leading quotations are as follows:—Brazilian Five per Cents, 102½; Ditto Four-and-a-Half per Cents, 91½; Danish Five per Cents, 1863, 91½; Equador, 16½; Egyptian, 102 ex div.; Greek, 38¼; Ditto, Coupons, 16⅞; Italian Railway, 82½; Mexican Three per Cents, 47½; New Granada, 17⅞; Ditto Two per Cents, 31½; Portuguese Old Three per Cents, 49½; Ditto, 1862, &c., 49½; Russian Five per Cents, 1862, 93⅞; Ditto Four and-a-Half per Cents, 1850 91½; Spanish Three per Cents, 53½; Ditto, Deferred, 48¾; Ditto, Passive, 36⅞; Ditto, Certificates, 14½; Turkish Old Six per Cents, 95½; Ditto 1858, 70⅞; Ditto, 1862, 71½; Venezuela Three per Cents, 27; Ditto Six per Cents, 61; Dutch Four per Cents, 102½; and Italian Five per Cents, 72⅜.

A large business has been transacted in Joint-Stock Bank Shares, and prices have had an upward tendency. Agra and United Service have marked 116; Alliance, 41½; Australasia, 82⅜; Bank of Egypt, 28; Bank of London, 130½; Bank of Otago, 4⅞; Bank of Queensland, 15; Brazilian and Portuguese, 5⅜; Chartered of British Columbia, 12½; Chartered of India, Australia, and China, 37; City, 110; Consolidated, 10⅜; English, Scottish, and Australian Chartered, 24½; Hindustan, China, and Japan, 28½; Imperial, 22; Imperial Ottoman, 19⅞; London and Brazilian, 51¼; London, Buenos Ayres, and River Plate, 51⅞; London and County, 50; London Joint-Stock, 36½; London and Northern, 9½; London and South African, 28; London and South-Western, 9; Mercantile and Exchange, 11⅞; Metropolitan and Provincial, 17½; National of Liverpool, 15; Scinde, Punjaub, and Delhi, 6¾; Standard of British South Africa, New, 18; Union of Australia, 59; Union of England and France, 9½; and Union of London, 40½.

Colonial Government Securities have been dealt in to a moderate extent:—Canada Six per Cents have sold at 102½; Ditto Five per Cents, 91½; Cape Six per Cents, 114⅞; Ceylon Six per Cents, 114½; Mauritius Six per Cents, 110; New South Wales Five per Cents, 102½; Nova Scotia Six per Cents, 104½; South Australian Six per Cents, 112⅞; and Victoria Six per Cents, 114¼.

The Miscellaneous Market has been tolerably active. Berlin Waterworks, 9½; Crystal Palace, 38½; Egyptian, Commercial, and Trading, 4; General Credit and Finance of London, 5¼; Great Ship, ½; Ditto, Seventeen-and-a-Half per Cent Preference, ⅝; Hudson's Bay, 9⅞; International Financial Society, 11½; Italian Irrigation, Canal Cavour, 5; Ditto, Six per Cent Bonds, 89⅞; Joint Stock Discount, 7⅜; London African Trading, 6⅞; London Financial Association, 14⅞; London General Omnibus, 2½ ex div.; Madras Irrigation and Canal, 4; National Discount, 9⅞; Oriental Inland Steam, 3½; Peninsular and Oriental Steam, 80; Ditto, New, 49; Rio de Janeiro City Improvements, 5¼; and Imperial Gas, 86.

The Confederate Cotton Loan has been done at 31 to 29 discount.

We have very little change to notice in the value of railway shares. The market, however, has been in a very inactive state. The following are Thursday's official closing quotations:—

Ordinary Shares and Stocks.—Caledonian, 120½; Cornwall, 7½; Great Eastern, 51; Ditto, East Anglian Stock, 27; Great Northern, 125; Ditto, A Stock, 128; Ditto, B Stock, 135½; Great Western, 66⅞; London and Blackwall, 73½; London and Brighton, 113⅞; London and North-Western, 101⅞; London and South-Western, 101⅞; Midland, 127½; Ditto, New, 1½ prem.; North British, 55½; North Eastern—Berwick, 101½; Ditto, Leeds, 58; North Staffordshire, 80; South-Eastern, 96⅞; Staines, Wokingham, and Woking, 9½.

Preference Shares.—Great Eastern Five per Cent, No. 2, 111; Ditto, Six per Cent Pref., 139½; Great Northern, Four-and-a-Half per Cent, 103½; Ditto, Five per Cent, 107½; Great Western, Four-and-a-Half per Cent, 101½; Manchester, Sheffield, and Lincolnshire, 121½; North-Eastern, Four-and-a-Half per Cent, 102.

Lines Leased at Fixed Rentals.—Great Eastern, 109; London, Tilbury, and Southend, 99½; Manchester, Buxton, and Matlock, 4.

British Possessions.—Bombay, Baroda, and Central India, 107½; Buffalo and Lake Huron, 6⅛; East Indian, 108½; Grand Trunk of Canada, 1st Preference, 74; Ditto, Deferred, 59; Ditto, 4th Preference, 27½; Great Southern of India, 107½; Great Western of Canada, 10⅞; Indian Branch, 2⅞; Madras Five per Cents, 107½.

Foreign.—Antwerp and Rotterdam, 9½; Bahia and San Francisco, 20⅞; Dutch Rhenish, 18⅞; Great Luxembourg, 14⅞; Ottoman, 12½; Recife and San Francisco, 19; Sambre and Meuse, Five-and-a-Half per Cent Preference, 10; San Paulo, 9½; Ditto, 22½; South Austrian and Lombardo-Venetian, 22½; Turin and Savona, 3½.

The return of the Bank of England for the week ending Sept. 23 shows the following results when compared with the preceding statement:—

An increase of circulation of	£ 28,626	An increase of other Securities of	308,369
An increase of public deposits of	919,980	A decrease of bullion of	28,724
A decrease of other deposits of	625,859	An increase of rest of	6,893
An increase of Govt. securities of	50,000	A decrease of reserve of	9,204

The total circulation is £21,515,731; public deposits amount to £8,291,491; and private deposits to £12,459,580. Securities are £30,960,809; and the stock of bullion is £15,432,834.

THE MARKETS.

CORN EXCHANGE, Sept. 21.—The show of English wheat in to-day's market was only moderate; nevertheless, the demand for all kinds was heavy, at a decline in the quotations of from 2s. to 3s. per quarter. In foreign wheat, the show of which was rather extensive, very little business was transacted, at 1s. to 2s. per quarter less money. Floating cargoes of grain were a dull inquiry, on rather easier terms. The inquiry for barley was somewhat restricted, at 1s. per quarter decline; but most kinds of malt were tolerably firm in price. Owing to heavy arrivals from abroad, oats moved off slowly, and the quotations gave way 6d. to 1s. per quarter. No change took place in the value of either beans or peas; but the inquiry for these articles was much restricted. The flour trade was heavy, at barely stationary prices.

Sept. 23.—Wheat, both English and foreign, met a dull inquiry, at Monday's decline in the quotations. All other produce moved off heavily, at barely previous currencies.

English.—Wheat, Essex and Kent, red, new, 40s. to 45s.; ditto, white, 41s. to 47s.; Norfolk and Suffolk, red, 40s. to 45s.; rye, 32s. to 34s.; grinding barley, 26s. to 28s.; distilling ditto, 29s. to 33s.; malting ditto, 30s. to 40s.; Lincoln and Norfolk malt, 60s. to 66s.; brown ditto, 50s. to 57s.; Kingston and Ware, 60s. to 66s.; Chevalier, 66s. to 68s.; Yorkshire and Lincolnshire feed oats, 18s. to 22s.; potato ditto, 22s. to 26s.; Youghal and Cork, black, 16s. to 22s.; ditto, white, 16s. to 23s.; tick beans, 30s. to 33s.; grey peas, 34s. to 36s.; maple, 38s. to 40s.; white, 37s. to 38s.; boilers, 38s. to 39s. per quarter. Town-made flour, 40s. to 43s.; town households, 34s. to 36s.; country marks, 27s. to 30s. per 280 lb. American flour, 19s. to 25s. per barrel; French, 36s. to 39s. per sack.

Arrivals this Week.—English and Scotch: wheat, 420; barley, 160; malt, 1310; flour, 490. Irish: oats, 070. Foreign: wheat, 6850; barley, 1240; oats, 5630; flour, 590 sacks, 4379 barrels.

Seeds.—Tares are dull, and rather cheaper. Most other seeds move off slowly, on former terms. In cakes very little is doing. Prices, however, are supported.

Linseed, English, crushing, 64s. to 69s.; Calcutta, 64s. to 65s.; hempseed, 44s. to 46s. per quarter; coriander, 16s. to 19s. per cwt.; brown mustard seed, 10s. to 14s.; white ditto, 11s. to 12s.; tares, 6s. to 6s. 6d. per bushel; English rapeseed, 60s. to 64s. per quarter. Linseed cakes, English, £9 10s. to £10 5s.; ditto, foreign, £9 10s. to £10 15s.; rape cakes, £6 to £6 13s. per ton; canary, 36s. to 50s. per quarter; red clover seed, 38s. to 48s.; white ditto, 54s. to 58s. per cwt.

Bread.—The prices of wheaten bread in the metropolis are from 7d. to 7½d.; of household ditto, 5d. to 6½d. per 4 lb. loaf.

Imperial Weekly Averages.—Wheat, 44s. 9d.; barley, 33s. 2d.; oats, 20s. 9d.; rye, 32s. 7d.; beans, 39s.; peas, 36s. 9d.

The Six Weeks' Averages.—Wheat, 45s. 2d.; barley, 33s. 5d.; oats, 22s. 3d.; rye, 33s. 4d.; beans, 39s. 8d.; peas, 35s. 11d.

English Grain sold last Week.—Wheat, 107,763; barley, 21,657; oats, 9935; rye, 523; beans, 1796; peas, 1092 quarters.

Tea.—There is only a moderate business doing in this market. Prices, however, rule about stationary.

Sugar.—The demand is steady, and the quotations are well supported. Barbadoes has realised 33s. 6d. to 40s.; Tobago, 32s. to 33s.; Demerara, 35s. to 41s.; and Berbice, 32s. 6d. to 39s. 6d. per cwt. Refined goods are in fair request, at 44s. 6d. per cwt. for common brown lumps. The stock of sugar is now 112,060 tons, against 89,069 tons last year.

Coffee.—All kinds move off slowly, and in some instances the quotations have given way 6d. to 1s. per cwt. Stock, 10,613 tons, against 8908 tons in 1862.

Rice.—The market is flat, at late currencies. Stock, 43,093 tons, against 59,777 tons last year.

Provisions.—Most kinds of butter are in fair request, and the quotations are supported. Bacon moves off slowly, and the rates have a drooping tendency. Most other provisions are inactive, but not cheaper.

Tallow.—The market is firm. P.Y.C., on the spot, is selling at 44s. 9d. to 45s., and for delivery during the last three months, 45s. per cwt. Stock, 42,615 casks, against 36,711 ditto in 1862.

Oils.—Linseed oil moves off steadily, at £43 5s. per ton. Rape is quiet, at £42 10s. to £45; olive, £52 to £60; coconut, £45 to £47; and fine palm, £36 10s. to £37. French turpentine is selling at 79s. per cwt.

Spirits.—Rum sells slowly, at 1s. 4d. to 1s. 5d. per gallon for proof East India, and 1s. 5d. for Leewards. Brandy is offering at from 3s. to 11s. 4d.; Hambro' spirit, grain, 1s. 4d. to 1s. 5d.; Ditto, English, 1s. 8d. to 1s. 10d.; Ditto, rice, 1s. 4d. to 1s. 5d.; and English gin, for export, proof, 2s. 9d. to 3s. per gallon.

Hay and Straw.—Meadow hay, £3 to £4 10s.; clover, £4 to £6; and straw, £1 8s. to £1 16s. per load.

Coals.—Best house coals, 17s. 9d. to 18s. 6d.; seconds, 16s. 3d. to 17s. 3d.; Hartley's, 15s. 3d. to 16s. 3d.; and manufacturers', 13s. to 15s. per ton.

Hops.—The show of new hops is extensive, and the demand is steady, at from 100s. to 150s. per cwt.

Wool.—All kinds are in fair request, at very full prices.

Potatoes.—The supplies are extensive, and the demand is inactive, at from 50s. to 90s. per ton.

Metropolitan Cattle Market (Thursday, Sept. 24.)—To-day's market was well supplied with beasts as to number, but their general quality was inferior. Prime stock sold steadily, at full prices. Otherwise, the beef trade was heavy, at barely late rates. The show of sheep was only moderate. Downs and half-breds were quite as dear as on Monday, with a good consumptive inquiry. Heavy breeds were dull, but not cheaper. A few very superior Downs sold at 5s. 4d. per 8 lb. Calves—the supply of which was moderate—moved off slowly, at barely stationary prices. Pigs, however, were in fair request, and rather dearer. Milch cows supported previous rates. Per 8 lb. to sink the offal:—Coarse and inferior beasts, 3s. 4d. to 3s. 8d.; second quality ditto, 3s. 10d. to 4s. 4d.; prime large oxen, 4s. 6d. to 4s. 8d.; prime Scots, &c., 4s. 10d. to 5s.; coarse and inferior sheep, 3s. 6d. to 4s.; second quality ditto, 4s. 2d. to 4s. 6d; prime coarse-woolled sheep, 4s. 8d. to 5s.; prime Southdown ditto, 5s. 2d. to 5s. 4d.; large coarse calves, 3s. 6d. to 4s. 2d.; prime small ditto, 4s. 4d. to 4s. 8d.; large hogs, 3s. 10d. to 4s. 4d.; neat small porkers, 4s. 6d. to 4s. 10d.; suckling calves, 12s. to 20s.; and quarter-old store pigs, 21s. to 29s. each. Total supply: Beasts, 1220; cows, 140; sheep 6700; calves, 310; pigs, 412. Foreign: Beasts, 420; sheep, 1600; calves, 290.

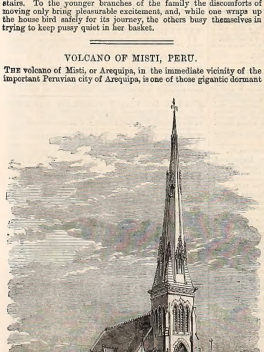
Newgate and Leadenhall.—The supply of meat is moderate and the demand is steady, as follows:—Beef, from 3s. 8d. to 4s. 2d.; mutton, 3s. 6d. to 4s. 8d.; veal, 3s. 8d. to 4s. 4d.; and pork, 3s. 10d. to 5s. per 8 lb. by the carcass.

ROBERT HERBERT.

"QUARTER-DAY:" THE DISCOMFORTS OF MOVING.—SEE NEXT PAGE.

"QUARTER DAY."

OUR Artist's pencil tells its story so thoroughly as to need no help from another's pen. The scene he has depicted is one which is familiar enough to dwellers in towns, at least, and will recall to many minds experiences of Michaelmas Days passed in the discomforts of moving from the old houses to the new. To more settled country folk the scene will not possess so much significance. They are little accustomed to moving; and, as a rule, desire to end their days in the familiar home in which they began the grave duties of life. They know nothing of noises to quit, except from Death; and all the moving they have any experience of is done by the undertaker. But townspeople have no idea of becoming attached to houses or localities, like their country cousins. It is simply impossible, indeed, to contract an affection for a house in a row or a square; and no one has been heard of who has expressed a desire to end his days within the bounds of Bayswater or the limits of Kentish-town. The genuine Londoner, indeed, is rather fond of moving, despite its discomforts, and derives a great deal of pleasurable excitement in the search among unfamiliar neighbourhoods for the new house. It is not until Quarter Day itself comes, and the actual process of moving commences, that all its discomforts are realised. The house is given up to a reckless band of nondescript men, who tear up carpets, pull down curtains, and level bedsteads. There is more order, however, in their way of working than there seems to be, and no great harm is done. Accidents, of course, will happen. Paterfamilias, half in tears, runs forward to announce that her favourite china vase has been broken; Paterfamilias, with a racked face, makes the discovery that the drawing-room pier-glass has been starved on its way down-stairs. To the younger branches of the family the discomforts of moving only bring pleasurable excitement, and, while one wraps up the house bird safely for its journey, the others busy themselves in trying to keep pussy quiet in her basket.



THE VOLCANO OF MISTI, OR AREQUIPA, IN SOUTHERN PERU.

VOLCANO OF MISTI, PERU.

THE volcano of Misti, or Arequipa, in the immediate vicinity of the important Peruvian city of Arequipa, is one of those gigantic dormant volcanoes so common in South America of which there is no recorded eruption, but which show, by the wreaths of steam that occasionally issue from their craters, that the volcanic force in them is only latent, and may at any time break out with formidable activity.

The summit, of which the height is 18,000 ft. above the level of the sea, has been reached on various occasions in the seventeenth, eighteenth, and present centuries; but the successful ascents have not been very numerous, owing to the formidable obstacles presented by the quantity of loose sand on the steep slope of the mountain, and the difficulty of making any continued violent exertion in so rarified an atmosphere, at a height considerably greater than that of Mont Blanc. The Hon. Robert Marsham succeeded in reaching the summit on June 17, 1863. At the very highest point he found an iron cross, about 6 ft. high, which had been placed there in 1784, by order of Don Miguel Pamplona, the then Bishop of Arequipa.

Mr. Marsham found the existing crater to be a circular pit, about a quarter of a mile in diameter and 300 ft. in depth. The walls of the crater appeared soft and crumbling, so much so that it would hardly be possible to descend into it; the bottom, which was rough and irregular, not unlike the surface of a ploughed field, was partially covered with bright yellow crystals of sulphur, and emitted jets of steam and sulphurous vapour from various small crevices. The upper part of the volcano was covered with a glistening coat of frozen snow, and masses of snow lay even within the crater, in those parts of it that were free from the jets of sulphurous steam.

NEW CONGREGATIONAL CHURCH, TOLMER'S-SQUARE, HAMPSTEAD-ROAD.

CONGREGATIONAL CHURCH, TOLMER'S-SQUARE, HAMPSTEAD-ROAD.

THIS structure has been erected upon the site of the old reservoirs of the New River Company, lately removed. It has been built for the Congregationalists, and is in the Decorated period of Gothic architecture. The walls externally are of Kentish rag, with Bath stone dressings. The church is 81 ft. long by 51 ft. wide, irrespective of the apse and tower, which give a total length of 117 ft., and under which is a committee room and vestries; and other conveniences are arranged at the rear of the church. There are five entrances to the building. Accommodation is provided for 1207 persons. The cost of the building, including warming, lighting, and boundary fence, is £5100. The architect is Mr. John Tarring, of Buckhurst-hurry, and the builders are Messrs. Dove Brothers, of Islington.

TRINITY CHURCH, LITTLE AMWELL, HERTFORDSHIRE.

IN July last year the first stone of a new church was laid at Little Amwell, near Hertford, by Mr. R. Hanbury, of Poles. The undertaking was set on foot by the Rev. D. Barclay Bevan. In and about Hertford Heath there is considerable population, chiefly of poor persons, whose parish church of All Saints', Hertford, is too distant to secure regular attendance on the services of the Church and proper ministerial supervision. Some portion of this population was provided for by services held in the Church school-room at Hertford Heath, and in a little chapel erected and supported by Mr. F. Johnson, one of the Professors at the late East India College. But the want of a district church as a centre of attraction and unity was much felt; and this want has now been supplied. A new church has been erected on land given for the purpose by Marquis Townshend. The church is about a mile and a half from Hertford, and within easy reach of the whole of the scattered population of the Heaths.

Trinity Church has recently been consecrated by the Bishop of Rochester. The external appearance of the church is quaint, but not ungraceful. It is massively built of red brick, with a roof of plain and ornamented red tiles, and a circular apse. The entrance to the nave is from the north through a porch of open oak timber-work resting on brick walls. The roof is surmounted by a high timber belfry, placed over the chancel arch, and terminated by a spire of rust oak shingles, with a vane on the top. The spire and the porch relieve the homely monotony of the mass of red brick and tiles, and give comeliness to the unpretentious structure.

Internally, the church, although intended to be plain, is beautiful. The undeniable charm which is due to grace of form, the fit arrangement of the materials used, and the harmony of all the parts which constitute a whole, strike one everywhere. The Church consists of a nave, 54 ft. 6 in. long by 24 ft. 5 in. wide; and a chancel, 34 ft. long by 25 ft. wide, terminated by the rounded apse. The arch between the nave and chancel is of variegated brick work, and springs from handsome columns of Devonshire marble resting on bases of Bath stone. The columns have finely-executed foliated capitals. On the north side of the nave there is a large three-light lancet window, and two double arched windows springing from columns of red Mansfield stone, with foliated capitals in Bath stone. On the south side there is a large three-light window, and three double arched windows. At the west end there is a three-light window of great size. The apse is lighted by seven small windows, deeply set, the walls sloping inwards, and admitting an abundance of light. The roof of the nave is of open timber-work, and the roof of the chancel of moulded wood ribs, with ornamental plaster panels. The walls are plastered, except at the openings of the windows, where the brickwork is shown.

The cost of the building is about £1400. The works have been executed, under the superintendence of Mr. Ewan Christian, of Whitehall-place, the architect, by Mr. Walter Hitch, builder, of Ware.

TRINITY CHURCH, LITTLE AMWELL, NEAR HERTFORD.

. *The charge for the insertion of Births, Marriages, and Deaths is Five Shillings for each announcement.*

BIRTH.

On the 10th inst., at the Consulate Piræus of Athens, the lady of W. B. Neale, Esq., her Majesty's Consul for Continental Greece, of a son.

DR. DE JONGH'S

(Knight of the Order of Leopold of Belgium)

LIGHT-BROWN COD-LIVER OIL,

prescribed by the most eminent Medical Men throughout the world as the safest, speediest, and most effectual remedy for

CONSUMPTION, CHRONIC BRONCHITIS, ASTHMA, COUGHS, RHEUMATISM, GOUT, GENERAL DEBILITY, DISEASES OF THE SKIN, RICKETS, INFANTILE WASTING, AND ALL SCROFULOUS AFFECTIONS,

is incomparably superior to every other variety.

SELECT MEDICAL OPINIONS.

Sir HENRY MARSH, Bart., M.D.,

Physician in Ordinary to the Queen in Ireland.

"I consider Dr. DE JONGH'S Light-brown Cod-liver Oil to be a very pure Oil, not likely to create disgust, and a therapeutic agent of great value."

DR. GRANVILLE, F.R.S.,

Author of the "Spas of Germany."

"Dr. Granville has found that Dr. DE JONGH'S Light-brown Cod-liver Oil produces the desired effect in a shorter time than other kinds, and that it does not cause the nausea and indigestion too often consequent on the administration of the Pale Oil."

EDWIN CANTON, Esq., F.R.C.S.,

President of the Medical Society of London, &c., &c.

"For several years past I have been in the habit of prescribing Dr. DE JONGH'S Light-brown Cod-liver Oil, and find it to be much more efficacious than other varieties of the same medicine which I have also employed with a view to test their relative superiority."

DR. DE JONGH'S LIGHT-BROWN COD-LIVER OIL is sold only in Imperial half-pints, 2s. 6d.; pints, 4s. 9d.; quarts, 9s.; capsuled and labelled with his stamp and signature, WITHOUT WHICH NONE CAN POSSIBLY BE GENUINE, by respectable Chemists and Druggists.

SOLE CONSIGNEES,

ANSAR HARFORD and CO., 77, STRAND, LONDON, W.C.

ANOTHER TESTIMONIAL (this week) to DR. LOCOCK'S PULMONIC WAFERS.—From Mr. Evans, Chemist, Dorchester, Sept. 21, 1863:—"Persons are constantly expressing the great benefit they have received from the Wafers. They give instant relief, and a rapid cure of asthma, consumption, coughs, colds, and all disorders of the breath and lungs. They have a pleasant taste." Price 1s. 1½d., 2s. 9d., and 11s. per box. Sold by all Druggists.

SECONDHAND FURNITURE.—A very favourable opportunity now occurs to secure TWO SETS of valuable FURNITURE, for drawing-room and dining-room, at a great reduction from its cost. The drawing-room is in handsome walnut, consists of all the necessary articles, including a magnificent walnut cottage piano, of extraordinary richness and brilliancy of tone, almost new; the dining-room set is in mahogany, and covered in morocco. Both in capital order. To effect an immediate sale, the price fixed is only 62 guineas and 33 guineas respectively, or 40 guineas without piano. Either will be separated. For further particulars, and to view, apply to Mr. READ, 12, Sloane-street, Belgravia.

FURNITURE, CARPETS, and BEDDING (CARRIAGE-FREE), see our ILLUSTRATED CATALOGUE, containing Prices and Estimates for Furnishing Houses of different classes, which will be forwarded gratis. This book is universally allowed, for its practical utility, to be unique. LEWIN CRAWCOUR and CO., Upholsterers, 73 and 75, Brompton-road, Knightsbridge, London.—N.B. Fifty Drawing and Dining Room Suites, from 12 to 100 guineas. An assortment of Old Oak Furniture. Established 1810.

ANTIQUE FURNITURE, for Dining-room and Library, old oak, in good preservation, of a very choice character, suitable for mediæval decorations; the carvings are unique, chaste, and elaborate. The dining-room set consists of ten high-backed chairs, a pair of elbow chairs to match, large set of telescope dining-tables, with extra leaves, dumb waiter, &c., truly beautiful sideboard fitted with plate-glass back. Price of the foregoing, 68 guineas—half its value. The library set comprises an 8-ft. bookcase, six Gothic chairs, and a library table same style. On view at the BELGRAVE FURNISHING COMPANY, 12, Sloane-street, Belgrave-square.

THE LORD DUNDREARY EQUILIBRIUM CHAIR. Extremely comfortable, good, and very cheap. "There's the idea!"—A. SEDLEY and CO., 210, Regent-street, London, W., Patentees of Equilibrium Chairs.

SEDLEY'S Patent EQUILIBRIUM CHAIRS are the most comfortable and cheapest yet offered to the public. Capital for India, packing up in less space than any other chair. Also, first-class Furniture, Carpets, &c., at very moderate prices. 210, Regent-street, London, W.

DRAWING-ROOM FURNITURE, of the most superior design and workmanship, arranged in complete suites, and covered in brocaded silks, rice moquette, and Neuilly tapestry, in all colourings, always ready for inspection and delivery, at prices varying from 35 guineas per suite for cash.—A. SEDLEY and CO., Upholsterers, 210, Regent-street, W.

HEDGES and BUTLER, 155, Regent-street, London, W., and 30, King's-road, Brighton, invite attention to their varied stock of choice OLD PORT, consisting of

	£	s.	d.	
Port of the celebrated vintage 1820	6	0	0	per dozen.
Port of the vintage 1834	5	8	0	„
Port of the vintage 1840	4	4	0	„
Port of the vintage 1847	3	12	0	„

Port for ordinary use, 30s., 36s., 42s., 48s., and 60s. per dozen.

SAUCE.
LEA and PERRINS'
WORCESTERSHIRE SAUCE, Pronounced by Connoisseurs "THE ONLY GOOD SAUCE."
None genuine without name on wrapper, label, bottle, and stopper. Sold by CROSSE and BLACKWELL; Barclay and Sons; and by Grocers and Oilmen universally.

Prize Medal awarded to Fry and Sons, 1862.
FRYS' COCOA.
FRYS' HOMŒOPATHIC COCOA.
Frys' Pearl Cocoa.
Frys' Iceland Moss Cocoa.
J. S. FRY and SONS, Bristol and London.

HORNIMAN'S PURE TEA CHEAPER. Full benefit of reduced duty obtained by purchasing Horniman's tea in packets; very choice at 3s. 4d. and 4s. "High Standard" at 4s. 4d. (formerly 4s. 8d.) is the best imported.

PRICE'S CHILD'S NIGHT LIGHTS are perfectly safe, and burn their time. The quality of these Night Lights can now be relied on.

SHERWOOD BED LIGHTS, Sixpence and Eighteenpence a Box. These candles are made to supply a want very generally expressed—a cheap, really good chamber candle. They will be found inferior only to "Price's Candles, which will not drop grease when carried," which are sold in Boxes, One Shilling and Three Shillings each.

GLYCERINE, which very simple tests show to be impure, is being sold on the statement that it is "in every respect equal to Price's." Most medical men prescribe PRICE'S GLYCERINE. Where purity is of importance, patients can ensure it by desiring to have their Glycerine in 1 lb., 8 oz., 4 oz., or 2 oz. bottles, with capsules over the stopper, marked "Price's Patent."—Belmont, Vauxhall.

STARCH MANUFACTURERS
TO H.R.H. THE PRINCESS OF WALES.
GLENFIELD PATENT STARCH, used in the Royal Laundry, and awarded the Prize Medal, 1862.

COALS.—COCKERELL'S COALS, price 24s., cash. Central Office, No. 13, Cornhill, E.C.

THE EYVA. Registered at Stationers' Hall.
This remarkable garment combines a Lady's Jacket and Vest in an ingenious manner, producing a most elegant and pretty effect, and which by means of an elastic band fits any figure. The Garibaldi, introduced in the autumn of 1861, was generally welcomed and largely patronised as being a step in the right direction; but the Eyva exhibits an appearance of tastiness and finish, which is altogether wanting in the Garibaldi, and can be worn on any occasion in place of the high dress body. The Eyva, being the invention of Mr. Peter Robinson, cannot be furnished from any other house.
A complete assortment now ready.
PETER ROBINSON'S, 103 to 108, Oxford-street, W.

PATTERNS POST-FREE.

NICHOLSON and AMOTT,
Crystal Warehouses, 61 and 62, St. Paul's-churchyard.

CRINOLINE.—The Patent ONDINA, or Waved JUPON, does away with the unsightly results of the ordinary hoops; and so perfect are the wavelike bands that a lady may ascend a steep stair, lean against a table, throw herself into an armchair, pass to her stall at the opera, or occupy a fourth seat in a carriage, without inconvenience to herself or others, or provoking the rude remarks of the observers, thus modifying in an important degree all those peculiarities tending to destroy the modesty of English women; and, lastly, it allows the dress to fall into graceful folds. Price 15s. 6d., 21s., and 25s. 6d. Illustrations free.
E. PHILPOTT, 37, Piccadilly, W.

SHIRTS.—Morning and Evening Shirts of every description, fitting with precision and ease, at moderate prices. Directions for self-measurement and patterns sent on application.—CAPPER and WATERS, 26, Regent-street, London.

SHIRTS.—BOWRING and ARUNDEL, professed Shirtmakers, beg to call attention to their large variety of new Patterns in Dress and Morning Shirts suitable for the present season.
11 and 50, Fenchurch-street, E.C.; and 11, Old Bond-street, W.

BOWRING and ARUNDEL, Outfitters and Manufacturers of Clothing suitable for all climates.
11 and 50, Fenchurch-street, E.C.; 11, Old Bond-street, W.

SHIRTS.—FORD'S COLOURED FLANNEL SHIRTS are made only from such flannel as will wear well. A good fit and best workmanship guaranteed. The new patterns and colours are ready. On receipt of three stamps, patterns to select from, and all instructions for measurement, will be sent. Prices, 10s. 6d. each, the very best quality (the colour causing the difference in price); 12s. 6d., 13s. 6d., and 14s. 6d. each.
R. Ford and Co., 38, Poultry, London, E.C.

NEW SONG.—BIRD OF THE WILDERNESS. Price 3s. Just published. This song is sung by Madame Rudersdorff with the greatest success. It is the finest thing in his entertainment at the Gaiety.—Daily Telegraph. Also, just published, a new and charming Song of Sweet Spring, by Claribel, for a mezzo-soprano voice. Price 3s.
DUFF and HODGSON, 32, Oxford-st.

NEW SONG.—THE WELCOME AT THE DOOR. Sung by Madame GUSTEL. Price 3s. 6d. (Sent at Half-price.) Sequel to the celebrated Song, "The Good-by at the Door." Also, just published, "The Welcome" will be equally successful.—DUFF and HODGSON, 32, Oxford-street.

SECONDHAND PIANOFORTES. CHAPPELL and CO. have Black of EIGHTY-FIVE PIANOFORTES for Sale, by BROADWOOD, COLLARD, ERARD, and other eminent Makers, in Cottage, Semi-Grand, and Grand Sizes, also Instruments of every Description.—Chappell and Co., 50, New Bond-street.

PIANOFORTES at CHAPPELL'S.—The Pianofortes by Broadwood, Collard, Erard, &c., for Sale or Hire.—50, New Bond-street.

CHAPPELL'S FOREIGN PIANINO (the smallest Pianoforte ever manufactured). A very elegant Pianoforte, of small size, the full compass, check action, and most carefully and elaborately adapted to small rooms, yachts, boudoirs, &c. Warranted to keep in tune and to be the best and most durable small Pianoforte ever made. Price 50 guineas.—Chappell and Co., 50, New Bond-street.
Price, in mahogany, rosewood, or walnut, 35 and 38 guineas. A great variety and Illustrations.
Chappell and Co., 50, New Bond-street.

CHAPPELL and CO.'S ENGLISH MODEL COTTAGE PIANOFORTE, manufactured upon the same English tone of the Broadwood or Collard cabinet, and the full compass of 7 octaves, with the most recent improvements introduced, at a moderate price. The touch is of the most elegant description, and the above makers, and therefore specially adapted to the country, where the tone will remain unaffected by the variations in many of the towns. In elegant rosewood case, with full rim, similar in every respect to the Pianoforte supplied to the Queen's 20 guineas; if walnut, 40 guineas.
Chappell and Co., 50, New Bond-street.

CHAPPELL'S FOREIGN MODEL COTTAGE PIANOFORTE, in rosewood; or in walnut, 40 guineas. This Instrument has Three Strings and the fuller grand compass of 7 octaves, and is recommended to meet persons' wishes to endure the greatest change of climate, and to stand perfectly in tune. For a full description of the best description, the Model Cottage, see Illustrated London News, March 8, 1862.—Chappell and Co., 50, New Bond-street. The touch is elastic, and its repetition very rapid. No Pianoforte has ever been manufactured that has given such universal satisfaction in every part of the world. Warranted for seven years. Price 50 guineas.—Chappell and Co., 50, New Bond-street.

BROADWOOD, COLLARD, and ERARD. The best Pianofortes at every description, including all the most recent improvements, for SALE or HIRE, on the most easy terms for sale (and hired with option of purchase) at the new Showrooms of CHAPPELL and CO., 50, New Bond-street.

ALEXANDRE'S DRAWING-ROOM MODEL HARMONIUM, the best that can be made, price 20 guineas. Illustrated Lists and Testimonials on application to Manufactory and Harmonium-room application to CHAPPELL and CO., 50, New Bond-street.

SIX-GUINEA HARMONIUM by ALEXANDRE, with five stops, two fronts, and in handsome case. These instruments are lower in price and superior to all other cheap harmoniums. Illustrated Lists on application to CHAPPELL and CO., 50, New Bond-street.

SECONDHAND HARMONIUMS. CHAPPELL and CO. have always on hand a new, and greatly-reduced prices, as CHAPPELL'S, 50, New Bond-street.

ALEXANDRE'S PRIZE EXHIBITION MODEL HARMONIUM, for the CHURCH, 12 stops, 2 rows of vibrators, and Venetian swell, secured by the seal of the right hon. the Lord Mayor. Price 100 guineas. Also may be viewed and tried at CHAPPELL and CO.'S, 50, New Bond-street.

DOOSEY'S MINIATURE PIANOFORTE. Price 17 guineas, in walnut, French polished.—"We have had occasion to commend many of the fantastic instruments made by Boosey and Sons, which combine quality and cheapness in a remarkable degree. The latest novelty is a miniature Pianoforte, 4 octaves, which, though small, is of full and musical tone."—Musical World. Unreserving it thanks such surprise as would be caused by a child. Concerning it these words may be said—it is a piano of a full-grown tone. It has a rich, telling quality, and is capable of much delicate light-and-shade expression; and the whole mechanism of the instrument seems to be perfect. It is, in short, a piano in miniature, and not a mere musical plaything."—Illustrated London News. Testimonials from Sir Julius Benedict, Sir Michael Costa, and others. May be had of Boosey and Sons. Every instrument guaranteed. Every one is sent carefully packed for the carriage. Price 17 guineas.—Boosey and Sons, 24, Holles-street, W.

ENGLISH CONCERTINAS, by LACHENAL. Full Compass, with all the latest Improvements, warranted for 5 years. Manufactory, and to be had in Tune, from Two guineas, with Case, Lock and Key, &c.
HOPWOOD and CREW, 42, New Bond-street.

CHISSHOLME AND SONS, Pianoforte Manufacturers (from Messrs. Broadwood), 41, Bernard-street, Russell-square, W.C., have for SALE a large Stock of Pianofortes, in Walnut and Rosewood cases, from 20 guineas. Pianofortes on Hire from 10s. per month.

THE GLORIES of the HEAVENS seen distinctly by a New Telescope for £5, which will also distinguish the features of a man five miles, and time by a church clock six miles. This instrument is guaranteed to be equal in the most essential particulars to telescopes costing £20. Sent free by POST, on receipt of remittance. Portability, Power, and Perfection. An upper and diagram with full particulars, and testimonials sent free.—Address pocket, open, full, and general outdoor glasses.

OPERA, Race, Field, and General Out-door Day and Night GLASSES, with an improvement which renders them perfectly free from chromatic aberration, equal to the weakest person. It has always been a great drawback to the enjoyment of the Opera and Theatre that the glasses in use have not an adjustment sufficiently delicate to meet the case which is expected, which informs them to reduce the prices, which range from 10s. 6d. to 5 guineas.—SOLOMONS, 39, Aldersgate-street, City, E.C.

SPECTACLES.—The Patent Newly-invented TINTED SPECTACLES are patronized by the majority of the Nobility, including Viscountess Strangford. They give unfailingly relief by day and night to weak, dim, and defective vision.
Sold at SOLOMONS, 39, Aldersgate-street, City, E.C.

DEAFNESS.—The SOUND MAGNIFIER and INVISIBLE CONVERSATION INSTRUMENTS for the deaf, which are inexpensive, restore hearing where in the head, and are recommended by the Aurists. Pamphlets and testimonials free.—SOLOMONS, 39, Aldersgate-street, Holborn.

"RECONNOITRER" GLASS, 9s. 6d. It magnifies objects nearly three times, and will show to any strong eye at sea, in the country, or in London, the following:—At a distance of 5 miles, the hands of a church clock; 10 miles, the figures on a church clock; LE SOMMIER ELASTIQUE PORTATIF. The Patent Elastic Mattress for invalids, for sleeping, and the usual spring mattress is too heavy and cumbersome for the sick room. This mattress is made in three separate parts, and is quickly put together. It is made in three separate parts, and is quickly put together. It is also cheap and durable, and as it has no stuffing on its top is most healthy beds.

EVANS'S PRIZE KITCHENER.—This combines Kitchener obtained a Prize at the Exhibition of 1851. It is adapted for the Cottage or Mansion, from £3 to £30. Also, larger sizes for Hotels, Taverns, Private and Public Schools, Workhouses, Hospitals, Prisons, Ships, &c., with Apparatus for Steam, to 2,000 and upwards.
Illustrations Post 2d, King William-street, Strand, London.

ST. ANDREW'S HALL, NORWICH, RECENTLY RESTORED.—SEE PAGE 321.

ILLUSTRATIONS OF THE WAR IN AMERICA.

A BLOCKADE-RUNNER has brought us some sketches from our Special Artist in Charleston, two of which are engraved in the present Number. Respecting the Engraving on our first page—"The Assault on Fort Wagner on the night of July 18"—our Special Artist and Correspondent writes as follows:—"I returned from the south-west just in time to witness this most formidable of all attempts made by the enemy on the defences of Charleston. You are already doubtless aware that the Federals succeeded a fortnight since in effecting a lodgment of their forces on the islands forming the approaches to the city. A temporary success enabled them to throw up works in front of Fort Wagner, and to commence an advance on the last-named stronghold. In conjunction with their iron fleet, which took up an enfilading position seawards, they maintained a heavy fire of mortars,

THE WAR IN AMERICA: SCENE PRESENTED IN THE DITCH AND ON THE SOUTHERN SLOPE OF FORT WAGNER, CHARLESTON HARBOUR, THE MORNING AFTER THE ASSAULT OF JULY 18. FROM A SKETCH BY OUR SPECIAL ARTIST.

11-inch and 15-inch guns, on the devoted sandworks during the whole day preceding the assault. As a little relief to this the whole day preceding the assault. As a little relief to this the evening the Yankees attacked with three brigades, believing that a bombardment of twelve hours' duration from ordnance of hitherto unheard-of calibre would have demoralised or driven the garrison out. They could not have had less than 8000 men engaged, some of whom reached the parapet and died there; yet, with only 1500 to oppose them, they were eventually driven back with a loss of more than the entire force of the Confederates in the fort. The period chosen for my illustration is the moment when the last shell has fallen from the fleet hurls over the battery; and the troops, illumined by the glare, are seen rushing to the assault. As a matter of fact, many of the enemy have already reached the crest of the work, but only to pay for their temerity by falling where they stand."

Our Scottish correspondent, in relation to his other sketch—"The Appearance of the Dutch and the Southern Slope of Fort Wagner on the morning after the Assault"—has forwarded us that met the eye the morning after the attack beggars description. All through the night were heard the screams and groans of the wounded lying within a few yards of us; but as a continual fire was kept up by the advanced pickets it was impossible to do anything for them without incurring great risk of being shot. Early in the morning, however, the Federals sent a flag of truce asking for a cessation of hostilities, that they might bury their dead. The first demand was granted, but they were told they could not be permitted to come into the lines of the Confederates, and that the latter would perform the last offices for the fallen enemy. In the ditch they lay piled, negroes and whites, four and five deep on each other; there could not have been less than 250 in the ditch—some partially submerged; and, altogether, over 600 were buried by the Southerners.

FINE ARTS.

FRESCO AND WATER-GLASS PAINTINGS IN THE PALACE, WESTMINSTER.

The public seem to take less interest than one might be expected in the mural paintings completed or in course of execution at the Palace, Westminster. It appears not to be known to strangers that the Royal Gallery, the finest picture gallery in London, is open to the public on Saturday by simply applying at the Lord Chamberlain's office. For our part, we see no reason why this national building should not be open to the public, as such monuments usually are included, at any time without restriction, formality, or trouble of any kind.

Mr. Maclise's finished picture of "The Interview of Wellington and Blücher at Waterloo" has now been subjected to greater advantage than heretofore; although the coloured light falling in patches on the picture from the stained-glass upper windows in certain parts of the day, particularly if the sun shine, and to which one attention cannot be called, still injures the general effect. This grievance, by-the-way, is much greater to those artists whose works are in the dark corridors beneath. The spaces surrounding Mr. Maclise's picture have been finished, and a new copying advantageously its base line has been placed along the wall beneath. The colour on the upper portion of the drawing-in of the sky and the hue is, however, so exceedingly bright that it catches the eye and is out of harmony with the whole of the gallery besides. By standing in the visitor is not permitted to do in the proper distance to take in the whole composition, he will feel that the force which characterises the centre portion of the picture appears to fall off, as we understand, is very difficult to obtain in the novel medium in which the painter works; but the best in excess: for anything of such much power would not have "borne out" against the surrounding carvings and vivid colours of the glass and decorations. When the opposite façade within which Mr. Maclise is now working upon the companion picture of "The Death of Nelson," is removed, and a more favourable aspect afforded, this observation will, of course, apply with still greater force.

More favourable conditions for viewing the work are not, however, needed to convince us that it is a very fine and commanding picture, memorative of national achievement in arms in this country. It will, indeed, form a fitting pair to the history of Britain, as we have, it is true, some good pictures of sea-fights by Loutherbourg, Stanfield, Turner, and one or two others; nevertheless, as an historical epic, but none have the dignity, and few anything approaching the balanced accuracy, of the work before us. To our military pictures, of which we have a rich collection—Wilkie, Haydon, and Chevalier Eastlake being only names worth mentioning—the same remark applies. To form an estimate of the merit of this picture we must go to the battle-fields and scenes of Saalfeld, Hess, Menzel, and Rethel in Germany, or the pictures by Horace Vernet, Yvon, Pils, and other French painters, at Versailles, and there is nothing in England to make such comparison. Mr. Maclise's great Waterloo picture will be found at least generally superior in subject to similar German works, while it has a richness and stateliness of composition, arising from a profound calculation of the architectonic harmony and effect required by the nature of the building it adorns to which no French battle-piece pretends.

But, besides this and the great companion painting by the same artist, other mural works are being executed in the same magnificent building at Westminster. Mr. Herbert's very elaborate fresco, "Moses Bringing down the Tables of the Law from Sinai," is composed for very shortly submitted to public inspection; and it is gratifying to be able to say confidently that it will be found to be a very noble work. Messrs. Dyce and Cope are steadily advancing with their respective works, the paintings in the corridors and vestibules are progressing with his series of (as they will doubtless prove) admirable frescoes from the Arthurian romances. But of all these painters none seems to work more unceasingly (without either short intervals of personal holiday) as Mr. Maclise. His Waterloo picture was finished only a little short of a year and a half ago, and the wall on which the present year he had executed a most elaborate finished study in oil of "The Death of Nelson," and nearly the upper third of the work of the picture is finished. Judging from this portion and from study, we may say that the picture promises to be still more successful than its vis-à-vis. The finished part shows the Victory with the body of the "companion-ladder," with the figures thereon, together with the rigging, flags, masts, &c. above the bulwarks on the quarter-deck. This part of the composition—cables, ropes, pulleys, crossbrees, yards, masts, &c.—will be a painter more time (he believes) to execute than an equal space filled with figures would have done. Upon these details the artist has, with characteristic patience and conscientiousness, lavished his wonderful imitative power; and we may add that the section of a man-of-war represented has a fidelity, down to the very threads of every cable, which is unsurpassed in any work from the Victory. In everything, indeed, the painter has actually been guided by the directions and criticism of naval men; and behind the bulwarks, the picture from his studies there is quite a crowd of sailors and "marine store" of cables, pulleys, bunting, sponging-rods, and such like. It may be interesting to mention that among the extraordinary story of Mrs. Barnes appearing in the papers the other day, the painter resolved to put a female among the wounded in his picture. Mr. Maclise had previously wished for the assistance of association it would afford to introduce a female—a sort of Blackyred Susan, if the spectator chose—but could find no authority for doing so, and no plausible excuse, as for the *récondère* and *sauve qui peut* of the Spanish picture. Mrs. Barnes's story supplied, however, the necessary justification. A certain number of women of good character were, it appears, allowed during the Nelson wars to accompany their husbands; and the poor woman, as part of the number, was on board the Mars at the battle of Trafalgar, in which engagement her husband was killed. On the poop Mr. Maclise has already painted the young midshipman who shot the fisherman that had struck down Nelson. He is about to take him at the enemy's mizentop, whence the fatal shot had proceeded. This was the lad, who is now the *Lieutenant* Pollard, still living at Greenwich, of whom the reader may have read. Notwithstanding his case was brought before the public some time since, he has for his "distinguished bravery" received no higher promotion than nearly sixty years! This picture, if all goes well, will probably still take a year to complete.

These great works by Mr. Maclise are, it should also be borne in mind, not only of unparalleled excellence in their kind, but they are of the highest importance technically, being the first paintings wholly executed in this country upon the system of stereochrome, or water-glass. Fresco has proved the most durable form of painting in Italy; but the palace of Westminster itself affords most conclusive evidence that the method has in England been the least permanent. The irretrievable decay of nearly all the early frescoes in the Poets' or Upper Waiting Hall and the House of Lords may be partly attributed to ignorance of the old methods of preparing the lime and colours; to the improper preparation of the walls, the paintings not having been cut off from possible absorption of moisture by placing backs of iron upon slabs of slate as has been done in the corridors; and to the probable circumstance that many of the frescoes are not wholly executed in the genuine *fresco buono*, as the mediæval painters termed it—finishings being frequently added when the plaster had become partially dry, and become dissolved in a humid, atmosphere. There can, however, be no reasonable doubt that everything relating to the proper preparation of the material is understood, and applied, in the recently-finished frescoes show symptoms of decay. The inference is therefore fairly drawn that the fresco is the proper work for our climate, as it is not likely to remain unchanged for the centuries that mural painting will be required to commemorate our history. The advantage of frescoes and the early substitution of oil painting for tempera in the north of Europe point to the same conclusion; and it is further borne out by the fact that water-glass has been found applied as thinly as possible, as in Mr. Herbert's "Lear," which is the only stereochrome fresco at Westminster which has remained entirely least affected by mould and fungus. Mr. Maclise was long ago sensible of the necessity of a more permanent medium, and in 1847 went to Germany to inform himself of the then new process of water-glass, as then adopted in painting by Kaulbach in his great works in the New Museum. By several other Germans, however, Mr. Maclise returned fully satisfied of its merits, and has found no reason to modify his opinion. Water-glass has in Germany been submitted to test in the severest kind to ascertain its durability. At Berlin a stereochrome painting was suspended for twelve months in the open air, and then placed in the New Museum, during which time it was exposed to sunshine, mist, snow, and rain, but remained unchanged. In Bavaria, also, a fresco in stereochrome, or water-glass, is, chemically speaking, a tetra-silicate of potash, a compound of silica, otherwise called silicic acid and potash. This is the discovery of Professor Fuchs, of Munich; and reasoning having led up to it—for Dr. Johann Fuchs, of Munich; and, although Professor Liebig declared the process to be impracticable slighted and misunderstood, it is now acknowledged to be capable of many valuable applications. The late Prince Consort was one of the first to call attention to it in the English public, having translated for the *Journal of the Society of Arts* the pamphlet describing the theory and practice of Professor Fuchs's discovery.

The water-glass method of painting is extremely simple. A surface of stone or plaster is washed over with a solution of water-glass, colours which are levigated with pure distilled water; and this is the only medium or vehicle employed for their application. It is in fact, water painting, and the effect is somewhat similar to it. When the picture is finished it is fixed on the wall or surface by means of a varnish of the same material, which is applied with a brush, and which is syringed on and left to dry. The carbonic acid of the air and the earths in the surface in a short time throw down the silica or flint, which is perfectly insoluble, and the surface is rendered, when washed off, the picture remaining adherent and only removable by mechanical abrasion. Thus the picture becomes a part of the wall, however the manifold. Besides its greater durability it allows the use of those colours which are destroyed by the action of lime, as it admits of any rate of execution, or any number of alterations and retouchings before the glass-water is applied; this final varnish still preserving the whole surface from the action of the weather. The greatest difficulties and disadvantages in fresco—namely, the necessity of painting on the entire portion required, leaving no joining out a portion of plaster entirely, are thus altogether removed or obviated.

Mr. Gibson, our great English sculptor, who, like several modern sculptors of world-wide reputation, has made Rome an almost life-long home, has lately paid a visit to this country for the purpose of modelling a bust of the Princess of Wales. Mr. Gibson's stay was very short, and, after modelling the bust, having first obtained sittings of the Princess, he has just returned to Italy. We trust to see the finished work in marble in our Royal Academy Exhibition of next year.

The sum subscribed for the memorial to General (Stonewall) Jackson has now amounted to £1,000, and will, it is expected, be sent to the Confederate States at the termination of the war.

WILLS AND BEQUESTS.

The will of the Right Hon. William Richard Arthur Polle-Tylney-Long-Wellesley, Earl of Mornington, of Dangrost House, Wilts, and of Combeland, Berks, was proved on the 22nd ult. by Richard Long, the executors, William Baldeby Glasse, Esq., Q.C., and Andrew Alfred Cuthyer Fagan, Esq., the personal estate being sworn under £140,000. The testator, who (if of great length, was executed in June last, and a codicil in the month of August, 1862. Lord Lieutenant of Wilts, a Knight of the Garter, a D.C.L. of the fourth Earl, by Katharine, daughter and heir of the late Sir J. Tylney Long, Bart., and succeeded to that title in 1857, and to the head of the family of Wellesley, of which the Duke of Wellington and Earl Cowley represent branches. His deceased wife died in April last. Lord Mornington, and has made a liberal provision for his (testator's) sister, Lady Victoria Long Wellesley. There are also annuities to his brother, Lord Maryborough, and to each of his executors he leaves £500, as well as complimentary legacies to his domestic servants.

The will of Edward William Smythe-Owen Esq., of Condover Hall, Shropshire, was proved in London, by the executors, Colonel Robert Hamilton Bromley, Esq., and the Rev. Edward Owen, M.A., the testator's nephew, the Rev. George Augustus Salisbury, LL.B., Rector of Westbury, and Archdeacon of Salop, and Mr. Owen's brother, who likewise was the only son of E. Pemberton, Esq., and succeeded to the estates of his uncle, Thomas Pemberton, Esq., of Condover Hall, in 1827, by the Rev. Deputy Lieutenant for Shropshire, and had held the office of High Sheriff for that county. The testator died on the 1st ult., and was aged 74. By the will there are three codicils, executed in 1862. His wife, who was liberally provided for by settlement, is left sole executrix, and the Rev. Edward Owen, Miss Caroline Pemberton, takes a life interest in the principal part of his property; and, after the decease of his widow, succeeds to the Condover estates, upon registering his surname and executor, the Rev. G. A. Salisbury, residuary legatee, and executor, and to whom the testator leaves the bulk of his personal property.

The will of Thomas James Ireland, Esq., of Ousden Hall, Suffolk, was proved in the London Court on the 3rd instant by the executors and trustees Henry Gregory, Esq., of Lincoln's-inn-fields, and Captain Charles Bathe Wolley Gregory, Bart., the testator's brother-in-law; the Rev. W. B. Gregory, M.A., of Ousden Rectory, Suffolk, and Mr. Thomas Gregory, of Bute; and R. H. Sawyer, Esq. The personalty was sworn under £45,000. To the effect to mention that, besides the Victoria Cross, the testator has also his residences, Upper Harley-street, London, and Sandford-place, Chelsea-bank, with all the furniture, plate, and an handsome library of books, and his interest in the sum of £35,000. He bequeaths to each of his unmarried daughters £5000 in addition to the settlement made upon them upon their royal parts amongst his children. Legacies are left to his servants and to each of his executors, and £100 to the poor of Ousden and Lyngate.

The Queen has approved of Mr. Thomas Ryan as Consul at Sweden for the Port and City of Gothenburg.

A congress of "Catholic theologians and scholars of Germany" will assemble on the 28th inst., in Munich.

Once again the "Chronicles of *Punch*" the archery season of the South Tipperary Downers has closed under brilliant auspices in the presence of the Earl and Countess of Donoughmore. A highly fashionable circle of the nobility and gentry of this and other counties, who had accepted the invitation issued by Lord and Lady Donoughmore, assembled at Knockbally. The shooting commenced at one o'clock and closed at six o'clock, the usual number of ends having been shot off. The company then adjourned to the pavilion, where dinner was served, covers having been laid for two hundred, after which the noble host and hostess proposed the toast of the day, which the greatest difficulties and disadvantages in fresco—namely, the necessity of painting on the entire portion required, leaving no joining out a portion of plaster entirely, are thus altogether removed or obviated. Queen was received with great enthusiasm. The following was the score of the contest:—Lord Donoughmore, 146; Mr. Penny Quin having made 246, the highest gross score of the day, was the bachelor's prize. This prize consisted of a beautiful silver cup, presented by the bachelors of the club but purchased. Among the gentlemen Mr. Charles Wise, who scored 230, won the first prize, which consisted of a silver goblet.

MUSIC.

THE MUSICAL FESTIVAL AT NORWICH.

The Norwich Musical Festival, which was held last week, has fully supported the high reputation of these great music meetings, not only as tending to the advancement of the art of music in England, but as aiding the cause of benevolence. The festival of the present year was the fourteenth of these triennial meetings, the first of which was held in the year 1824; since which period they have contributed to the charitable institutions of the county of Norfolk a sum amounting to within a trifle of ten thousand pounds. The patrons are the Queen, the Prince and Princess of Wales, the Duchess of Cambridge, the Duke of Cambridge, and Princess Mary. The Earl of Leicester, Lord Lieutenant of the county, is the president, and the Earl of Suffield is the chairman of the committee of management. Mr. Benedict is the conductor, an office which he has held for twenty years. We have already mentioned the names of the principal singers engaged, and the general arrangements of the festival. It is sufficient, therefore, to add, that the instrumental band, consisting of the usual complement of performers, was ninety-three strong, and the chorus, consisting chiefly of local amateurs, numbered 275—a powerful and instrumental mass quite sufficient for every purpose; for we have always been of opinion that no real accession of power is given by the monstrous gatherings which have come into fashion since the Crystal Palace and Exeter Hall.

The festival began on Monday, the 14th of this month. On the preceding Sunday a sermon was preached in the cathedral by the Rev. Canon Heaviside, who eloquently advocated the festival as a most useful and important agent in the work of beneficence. The musical service of the cathedral was chosen and beautifully rendered. The chants were composed by Dr. Buck, the eminent organist of the cathedral; the responses were those of the late Dr. Beckwith, a young musician, whose untimely death was much lamented; and the anthem was by Mendelssohn. The latter was admirably performed: the choir of Norwich Cathedral, under the able superintendence of Dr. Buck, being one of the best in the kingdom.

The first sacred performance was St. Andrew's Hall on Monday evening consisted of Handel's oratorio, "Judas Maccabæus." It is usual at entertainments of the sacred music in the evenings; but the reason assigned for this exceptional proceeding was a good one—it afforded the opportunity of hearing a great sacred performance to many who otherwise would not have enjoyed it. This performance accordingly—given at reduced rates of admission—was attended by a large audience, composed chiefly of the working classes, evincied with evident gratification to this magnificent oratorio, performed by such a host of talent.

The miscellaneous concert on Tuesday evening was a profuse musical banquet. It had the fault—common to the evening concerts at all our festivals—of being a most delicious feast too long, and did terminate till midnight; and to sit between four and five hours in the crowd and heat of an assembly room was a physical infliction too much for the keenest musical appetite. Accordingly (as always happens) the concluding part of the performance was wearily listened to, and the audience were glad to get away. This miscellaneous—which is truly English, being never experienced on the Continent—was not without its redeeming features, even in the evening. The concert, nevertheless, though too long, was, on the whole, excellent. Beethoven's "Pastoral Symphony," and the overtures to "Oberon" and the "Flauta Magico" (played the proper powers of the latter), and Mendelssohn's Violin Concerto was played by Sainton in a style which could not be surpassed by any violinist of the day. There were selections from Gounod's "Faust," and from Howard Glover's "Ivanhoe" and "Rob Roy," the most popular the most pleasing morceaux of these operas. A prominent feature of the concert was Mr. Cusins's "Wedding Serenata," composed in honour of the marriage of the Prince and Princess of Wales and first performed at her Majesty's Theatre on the opening night of last season. Its reproduction on this occasion created a real success. It was splendidly executed and warmly applauded. The remainder of the concert was made up of miscellaneous vocal pieces familiar to the public. The noble "Hallelujah" chorus created a real enthusiasm, brilliantly lighted, and filled with an elegant assemblage, presented a gay and beautiful scene.

On Wednesday morning Mr. Silas's oratorio, "Jeash," composed expressly for this festival, was performed for the first time. The production of this work was eagerly designed to be the most remarkable event of this festival, as the production of Moliqueu's "Abraham" had been of the last. It is needless to say that a musician's fame is not the same calibre as Moliqueu. "Abraham" will take its place among the musical productions which we cannot do. In the highest branches of art there is no room for mediocrity: the few works of great genius live and descend to posterity—the many, however estimable in point of talent, are forgotten. It is this latter category we are compelled to place the new oratorio of M. Silas. It evinced scholastic learning and ingenuity, but it was the production of the mere *dévinier*, the poetic fire, the spirit of inspiration, which breathes in the music of Handel, Haydn, Spohr, and Mendelssohn. We do not therefore deem it necessary to enter into a detailed criticism of the work. The subject, familiar to everybody who knows the Bible, has been manipulated by the author of "Jeash" of "Abdallah," and the Maniac in his tragedy of the same name; so that M. Silas had to contend not only with the genius of Handel but with that of Mendelssohn, whose choruses to Racine's play are among the greatest of his works—a consideration which ought to have deterred M. Silas from measuring his strength with that of a master. The work was admirably performed. The principal parts were sustained by Mdlle. Titiens, Mdme. Sherrington, Mdme. Rudersdorff, Mr. Lawler (who exerted himself much in the utmost: the choruses were sung with force and precision; and all the performers were evidently zealous in their endeavours to do justice to the work.

"Jonah" was followed by a scene from Leslie's cantata "Immanuel," very finely sung by Mr. Lawler and by Mr. Cusins; and this again, was followed by a strange performance of the "Stabat Mater," the music being taken from the three works of Pergolesi, Haydn, and Rossini, in a series of patchwork, a jumble of incongruous styles, for which we cannot hold Mr. Benedict responsible. It could not have been pleasant to the fine musician of his high artistic taste.

The concert of Wednesday evening included a great number of popular vocal pieces, most of them sung at the metropolitan concerts of the past season. Its most pleasing feature was a selection from the works of Mozart, in which the air "Quando mio" was sung by Mdme. Weiss. "Voi che sapete" by Mdme. Trebelli, "Della sua pace" by Mr. Reeves, and "Deh vieni" by Mdme. Titiens—all of them charmingly sung and enthusiastically applauded. There was also a selection from Mr. Sullivan's music to Shakspeare's "Tempest." Mr. Sullivan has talent, but his power is not equal to his ambition. Miss Fanny Arne argues a lack of that modesty which becomes a young English composer.

Mendelssohn's "Elijah" was performed on Thursday morning to a crowded audience. This sublime sacred work—second only to the "Messiah" of Handel—it is sufficient to say that its performance on this occasion has probably never been excelled. The principal solo parts were sung by Mdlle. Titiens, Mdme. Sherrington, Mr. Lawler, and Mr. Weiss; and the perfect execution of the choruses bore testimony to the zeal and energy of the conductor.

The concert of Thursday evening derived great interest from the production of Mr. Benedict's cantata, "Richard Cœur de Lion," composed expressly for this festival. It will be remembered that at the last Norwich Festival he produced his beautiful cantata, "Undine." This was equally beautiful, and was most favourably received with equal enthusiasm. Its title suggest its subject—the well-known romance of the King of England's imprisonment, who, returning from Palestine, was seized in passing through Germany by his enemy, the Duke of Austria, and immured in a dungeon, from which he was rescued by means of his faithful minstrel, Blondel, who discovered the place of his master's captivity by singing an air which was heard and responded to by the King in his prison. Out of this legend Mr. Oxenford has constructed an elegant and interesting cantata, which Mr. Benedict has set to music in thoroughly congenial music. The piece opens with a chorus of peasants and vassals, making merry without the castle of the castle where the King is imprisoned

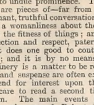
CURRENT LITERATURE.

Ned Lockley, the Etonian. (2 vols. Bentley.) This story, which originally appeared in the *Dublin University Magazine*, has very many points of excellence. The language, when scholastic affectations are not obtrusive, is extremely fine, the style is decorous, and the tone is particularly healthy. The characters are, for the most part, cast in a pleasant mould, and transferred to paper in a skilful manner. There must, almost of necessity, be exceptions to rule, by a villain introduced, but he is not elevated into undue prominence. There are charmingly pathetic scenes; there are pieces of fine rich sentimentality; there are lively, jocund, truthful conversations; there is a manliness about the whole which is remarkably refreshing in these days of effeminate taste. The author has a considerable knowledge of what constitutes one's sense of the fitness of things; and, above all, there are pictures of filial affection and respect, paternal consideration and forbearance, love, which it does one's heart reciprocate. Plot there is none, or next to none; and it is by no means certain that the absence of this intricate machinery is a matter to be regretted, for the tenter-hooks of expectancy and suspense are often extremely painful, and the tales which depend for interest upon them are generally such as the reader does not care to read twice over, and does not derive any benefit from. The main events may be briefly told. Ned Lockley, the son of Mr. Robert Lockley, and Lucy Lockley, *née* Burkitt, and is brought up as one of the family of Mr. Lyon, Earl of Cranshale, at whose residence Lockley is the trusty manager. Earl Philip dies at an early age, and upon his deathbed thus addresses his wife:—"Kate, let the boys grow up together." And it is their wish that they should grow up together. One of his boy if any father can; and, if they grow up as brothers, he will be a kind of father, of course, to poor Phil. You are a woman of women, Katty dear; but a boy wants a man's hold over him." So Ned Lockley found a second mother in Lady Cranshale, and the brother and sister in the young Earl Philip and Lady Constance Cranleigh. The Lady Constance "is more beautiful than day," and her consequently is easily found. Poor Ned, who is a boy when he leaves Eton, is desperately in love. But Constance loves another after the fashion which boys and girls love, and loves him quite another. This unpleasant fact she acknowledges to him on a moonlit night, and, at his request, puts—for once and for ever—the seal of a kiss upon "the grave of his first hope." Ned, however, has a powerful rival against that kiss—only one and no hope of another—having been born upon the wrong side of the blanket, and consequently cannot have been a necessity. Well, poor Ned, to heal his love-wounded heart, takes arms in the H.E.I.C.S., distinguishes himself amazingly, and becomes, the palace, the husband of Gertrude, the daughter of a rich nabob, and all he has to do is to watch the "villain," his cousin, Keane Borkitt, now by dint of a long purse and a long pedigree, become, in England, to hone, to parental love, and to wedded life, to India and back. Everything, however, with his latest breath he recommends forgiveness of the traitor.

"Stonewall" Jackson. By the author of "Life in the South." (1 vol. Ingram, Cooke, and Hall.) We wonder that this little book should set a sketch, and a slight sketch too, has already reached a second edition; for the author tells us nothing that is not familiar to Anglishmen as though it had belonged to one of our own heroes. It is astonishing how some men manage to steal away the hearts not only of their friends but also of those who are enemies. Stonewall Jackson was one of them. According to all accounts he was no lawyer a fine-weather soldier, and a fanatical worshipper of liberals. The generous souls amongst the latter were ready to exhalen upon his death, in the words which Prince Henry used of Hotspur—

> Burn but his alive so stone a gentleman;
> and Englishmen are always ready to indorse the adage. We may admire the sagacity and soldierly bearing of Lee, but we loved old Stonewall Jackson. There was in his very appearance, even at a sudden, certain swoop upon his prey and his prayerful pertinacity, a resemblance to our own Cromwell which at once enlisted our sympathies. Cromwell was a Puritan, and Jackson was a Presbyterian as if Jackson were a Puritan he was at the same time a Cavalier. He learn that his grandfather was a soldier of the old revolution; when he graduated seventeenth in a class of about sixty students. It is mentioned that he was a Methodist, and a teetotaller. He was already, at sixteen years of age, held the office of a county constable. In 1842 he entered the army, and was under the command of General Taylor; and afterwards, under General Scott, he attained to the rank of Brevet Major in 1847. He then accepted "the appointment of Professorship of Natural Philosophy in the Virginia Military College of Lexington." In this position he remained for nearly ten years, when he resigned it to take the field at the head of a battle for the Southern Confederacy. What need to speak of his deeds since then? Fame has trumpeted them over the world.

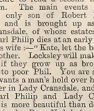
A Winter in Upper and Lower Egypt. By Mrs. Romer. (1 vol. Rust and Blackett.) Thirty years ago Mr. Hoskins made his first pilgrimage to the land of mummies, and has visited it since, as often as the Pyramids; and lately he made his second to the same country in the company of his fascinating wife, who has had the advantage of experiences and wrought a work which may be read with profit by learned and unlearned, by sound and unsound. He has chosen for his style that which is the most difficult, namely, the easy romantic narrative; and, in a sanitory point of view, he has certainly added to the literature of Egypt a valuable contribution. He has, in addition to learned observations, interspersed with copious references to Wilkinson, Bunsen, and other grave authorities upon the time-honoured monuments and the glory of the past, much information which will prove a list of the principal diseases which the European tourist may expect to encounter in the land of Sesostris, together with a list of the medicines with which one should take care to be supplied for purposes of constipation. Of the latter, should, he has prepared the battle against headaches, biliousness, dysentery, dysentery, ague, and ophthalmia, with selections, according to attack, from a medicinal armoury consisting of Epsom salts, magnesia, Cockle's pills, Dover's powders, Gregory's powders, diluted sulphuric acid, quinine, tincture of rhubarb, compound tincture of camphor, laudanum, cinchona plaster, laudanum, a lancet, scales, and liquid measures, and leeches from Cairo." Some people might suppose that under these circumstances Egypt is a very unhealthy country. It is quite the reverse. Mrs. Romer says about the climate of Nubia. "Every invalid who has travelled in Egypt will remember that they prefer the climate of Nubia to Madeira; and it is certainly finer than Algiers, which from experience, the writer can say is very unhealthy in the spring, to the climates of Rome, Mentone, Nice, or the south of Spain."



Invalids should not go to Egypt for health, but should rest return to Cairo before the end of March or beginning of April, when the Khamsin, the hot wind from the desert, will oblige them to find refuge for the remaining spring months in the more genial climate of Malta, Corfu, or Italy." Be it remarked that "the voyage from Malta to Alexandria is performed in a steamer in about 5 days."

Andrew Deverell. By Charles Beach. (2 vols. Bentley.) The author of "Andrew Deverell" has written a book of many characters, the occasional sensible if not very original remarks, and the really original method of wooing and winning a lovely maid, which are to be discovered in the course of it. The book is not remarkable for the subtlety of plot they have not much pretension. There are surprises and incidents enough to keep the reader on the tenter-hooks of curiosity, but they are not so skilfully interwoven with the main story as to deserve to be called anything more than episodical interpolations. The hero, an adventurer in New Guinea, was born in the State of New York, and the combined audacity, respect, perseverance, and skill with which he conducts his extraordinary love suit are highly characteristic of his nation. He has only seen the young lady in her carriage whilst he was a tattersdenation, yet he writes both to her aristocratic father, a planter of New Orleans, and to her, to express respectfully his intention of making his fortune and marrying her; and he succeeds. It is plain, from the third page, that he is no ordinary man, for there, after remarking that he was twelve on the 25th of May, 1838, he says, "that is the 25th day of May." This day I am twenty-two years of age;" which is scarcely according to Cocker.

OBITUARY OF EMINENT PERSONS.



THE MARQUIS OF HUNTLY.

The Most Noble Charles Gordon, Sixth Marquis of Huntly, Earl of Huntly Enzie, and Aboyne, Viscount Inverness, Baron of Badenoch, Strathavon, Auchindoun, Balmore, Lochnar, Garthie, and Kincardine, in the Peerage of Scotland; and Baronet of Nova Scotia, Lord Lieutenant of the County of Aberdeen, and Chief of the Name of the Clan of the Gordons, Hereditary Keeper of Kinghorn; Premier Marquis of Scotland, and Lord Lieutenant of Aberdeenshire, was the eldest son and heir of the late Marquis of Huntly, by his first wife, Catherine Anne, daughter of Sir Charles Cope-

MRS. ARCHIBALD PEEL.

land, and Baronet of Bramall Park, in the county of Chester, by his eldest son, Charles, Earl of Aboyne, now eleventh Marquis of Huntly, who is a youth in his seventeenth year. The family of Gordon (Seton in the male line), Dukes of Gordon and Marquises and Earls of Huntly, of the Isles of Ireland, Lords of Gight, one of great antiquity and historic celebrity in Scottish annals. George, fourth Earl of Huntly, and George, fifth Earl of Huntly, were Lord Chancellors of Scotland. George, second Marquis of Huntly, the stanch friend and supporter of Charles I., and the loyal Earl of Aboyne, for his devotion, and fidelity, and bravery, to the rebels in 1649. From his eldest surviving son descended his lamented successor, the eighth Duke of Gordon, who died in 1836, and whose memory remains extant in 1846; and from his fourth son, Charles, created Earl of Aboyne, descended the Marquis of Huntly, whose premature decease we have to chronicle. The ancestor of the house as much Marquis of Huntly in 1836, on the death of the late Duke of Gordon.

The death of this lady, the only daughter of Sir Roger Palmer, Bart., of Ramsey Abbey, and widow of Archibald Peel, Esq., son of the Right Hon. General and Lady Alice Peel, occurred very suddenly at Brighton, on the 9th inst., within a few days after the birth of a daughter, the fourteenth issue of that being disease of the heart. The family of Palmer, from which Sir Roger (daughter of Mrs. Peel and her brother, Captain Roger Palmer, R.N., C.B. for the Battle of Navarino and Medal for the Battle of Algiers) derives his descent is one of the most ancient in the west of Ireland, and still possesses a great landed estate representing a branch of the Palmers of Wrytham, Kent, a noble house, now become Earl of Castlemaine. Mrs Peel leaves seven daughters.

THE RIGHT HON. EDWARD ELLICE, M.P.

The Right Hon. Edward Ellice, M.P. for Coventry, a politician and statesman of note, was the son of Alexander Ellice, Esq., an eminent merchant of the city of London. He was born in 1785, and, after receiving a university education, was for some years engaged in the fur trade of Canada, carried on in the Hudson's Bay Company, besides being a proprietor in Canadian and West Indian estates. In 1818 he entered M.P. for Coventry in the Whig interest, and, with the exception of four years, from 1826 to 1830, has continued to represent that city ever since. In 1830 he became the conspicuous position in the House of Commons by his business habits and his shrewd, good sense. He was appointed one of the Bank Restriction Committee of Bill, when he opposed Lord Castlereagh. His speeches, which were numerous, were chiefly confined to matters connected with trade and the Bank Charter Act, which he vehemently, though unsuccessfully, opposed. Mr. Ellice's choice was the agent against the Hudson's Bay Company in the dispute with the Government of the Bank advances; and so he desired to make the Bank and the Government independent of each other. In November, 1834, he was appointed joint Secretary to the Treasury; in Earl Grey's Administration, and held that office till August, 1835; and was Secretary at War from April, 1835, till December 1834. He became a Privy Councillor in 1835. The right hon. gentleman married, in 1809, Lady Jane Ann Elizabeth Sutherland, one of Charles, first Earl Grey, elder of Charles, second Earl Grey, K.G., the Prime Minister, and of the Hon. and Rev. Edward Ashley, killed at the action off Bergen in 1808, by whom (who died on July 28, 1839) he leaves issue. He married, secondly, in 1841, Lady Anne Elizabeth Russell, daughter of Lieutenant, daughter of William Charles, fourth Earl of Albemarle, and widow of Thomas Henry, Viscount Clifden, Baron of Ilchester, Earl of Leicester, which lady died on July 22, 1844. Mr. Ellice died suddenly on the 17th inst., at Aldenham, the seat of Lord Ellesmere, in the 67th year of his Andrews, and married, in 1834, Catherine Jane, daughter of General Balfour. He was the brother of the Right Hon. Edward Ellice, Captain Alexander Ellice, R.N., was for some time M.P. for Harwich.

C. R. COCKERELL, R.A.

Charles Robert Cockerell, R.A., whose death has just occurred, was the son of Samuel Pepys Cockerell, Esq., and was born in 1796. He was educated at Westminster School, and at the University of Oxford, where he took the warmest interest. In early life Mr. Cockerell spent many years in careful study of the architectural remains of Greece, Sicily, Asia Minor, Italy, Rome, Pompeii, and elsewhere. In 1811-12 the ruins of the Temples of Jupiter, in Egina, and of Apollo, in Bassæ, were explored by Mr. Cockerell and Mr. Foster, in company with Baron Haller and others. He published an account of these researches in 1860. He was also a diligent student of the antiquities in the museum at Munich and in the British Museum, and he depicted many restorations of the buildings of antiquity. In 1829 he became an Associate of the Royal Academy, and in 1836 he was made a Royal Academician. In 1848 he succeeded Sir William Chambers as Professor of Architecture to the Royal Academy, a post he filled with much success, his lectures always displaying great learning and ability. In 1840 he was elected one of the honorary Grangers of the Academy of the Institute of France, and in 1863 one of the ten foreign members of the Academy of St. Luke, at Rome. In 1848 he was created an honorary D.C.L. of the University of Oxford, and in 1848 he was the first to receive the gold medal of the Royal Institute of Architecture. He was also a member of the Academies of Munich, Berlin, and Berne.

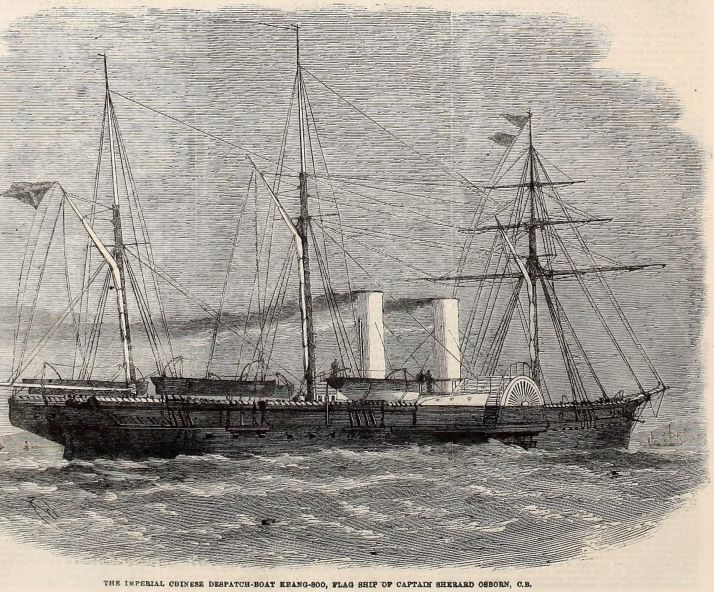
Advices received from the coast of Iceland state that the catch of codfish has been more abundant this year than has been remembered.

THE STREETS OF PARIS.—The first section of the commission's report on the improvement of the Paris streets, lately presented to the Prefect of the Seine, refers to the different terms used to designate the public thoroughfares, and proposes to adopt the following as the most appropriate. Thus, the use of the word *square*, which has been adopted from the English, will be discontinued, and that of *place* will be substituted in its stead. The latter, whether planted or paved, will be reserved for the larger spaces at the intersection of streets and boulevards, or new entrances to the city. The term *rue* will no longer existing the streets, roads, and lanes, as also those which are called Chaussée d'Antin, Rondes, Allée, and Chaussée. The name of the "Rue de la Chaussée d'Antin" dates from the time when it was the commencement of the road to Antin before dwelling on the suppression of the latter word. The name *Boulevard* is to be applied to those streets which run in a circular direction, whatever the determination was come to to preserve it for the latter as an exception, and restore it to the streets of the Rue Blanc, which it had previously borne. That street has, in fact, often changed its name, having been called Rue Neuve des Capucines, Rue de la Paix, Rue Napoléon, Rue Forchenne, Chemin de la Chaussée d'Antin, Rue de l'Hôtel Dieu, Rue de la Chaussée d'Antin, and Rue Louis-le-Grand. In 1676 Louis XIV. and Madame Josephine occupied the house No. 62 before her marriage with General Bonaparte. Another street which has undergone many changes is that we raise the hotel of Cardinal Fesch. The use of the word boulevard is also to be circumscribed. That term generally signifies a rampart, and should only be applied to roads which follow the line of the ancient fortifications, or which at least run in a circular direction, and indicate more or less the trace of an old municipal boundary. The wide thoroughfares which traverse the city in an oblique direction, or run from the centre to the circumference, are in reality avenues. The designation "boulevard," as applied to some of the transversal thoroughfares recently opened in the centre of Paris will, however, be retained. The attention of the committee has also been directed to the abuse of certain names of streets or thoroughfares in a certain place, not less than eighteen bearing the title of Eglise, seven that of De la Mairie, sixteen that of Moulin, and twenty-four that of Fontaine, with similar appellations of sixteen others. Such a state of things calls loudly for reform,

SIR JAMES WILDE.

SIR JAMES PLAISTED WILDE, the recently-appointed Judge of the Probate Court, is the fourth son of Edward Archer Wilde, Esq., a brother of the late Lord Truro, so well known as Serjeant Wilde, and who held the offices in succession of Solicitor and Attorney-General, Chief Justice of the Common Pleas, and Lord Chancellor. The subject of the Portrait which we engrave was born in London, in 1816, and was educated at Winchester School and Trinity College, Cambridge, where he graduated B.A. and M.A. Belonging to a family several members of which were connected with the profession of the law in both its branches, Mr. Wilde studied for the Bar, and was called at the Inner Temple in 1839. Having chosen the common law as his walk in the profession, he went the northern circuit, and, having especially devoted his attention to mercantile and marine law, the latter in particular, he obtained a considerable practice in those departments of jurisprudence; and in town may be said to have been marked out as an able adviser and sound arguer in cases relating to shipping. In 1840 he was appointed one of the counsel to the Customs and Excise, and in 1855 received the appointment of Queen's Counsel. During his possession of that rank Mr. Wilde did not take a very leading place in the general advocacy business at Nisi Prius; but he retained his position in that description of cases to which his attention had been devoted when behind the bar; while his acquirements as a lawyer and his status amongst his professional brethren were such as have generally indicated him as a member of the Bar likely to attain to judicial honours. For several years, whenever a Puisne Judgeship became vacant, Mr. Wilde's name was always mentioned in the list which was prophetically set about in Westminster Hall of eligible and likely candidates. It was not, however, until the death of Mr. Baron Watson, in 1860, that he was actually raised to the Bench. In a very short time it was found that the estimate of his judicial qualities which had been generally formed was correct; for, as the familiar phrase goes, he made a very good Judge. Unfortunately, his health failed him. At the Summer Assizes of 1862, being the junior Judge on the Northern Circuit, his strength gave way during the always protracted sittings at Liverpool, and he was obliged to leave a portion of the business unfinished so far as he was concerned. In the spring of this year he was unable to undertake the duties of Judge of Assize on the Western Circuit, and Mr. Serjeant Shee was placed in the commission, and went the circuit in his stead. About this time there was a rumour that, in the event of the retirement of Dr. Lushington, Sir James Wilde would be appointed to the less arduous and, looking to his professional antecedents, scarcely less congenial office of Judge of the Court of Admiralty, the duties of which, it was thought, would not be incompatible with his bodily strength. However, on the death of Sir C. Cresswell he was selected to fill the vacant place of Judge of the Probate Court. It has been rumoured that it is not unlikely that the function of Judge Ordinary of the Divorce Court will be separated from that of the Probate Court, and this latter combined with the Court of Admiralty, and that Sir James Wilde will be appointed Judge of that combined court; while another and distinct judgeship of the Court of Divorce will be created.

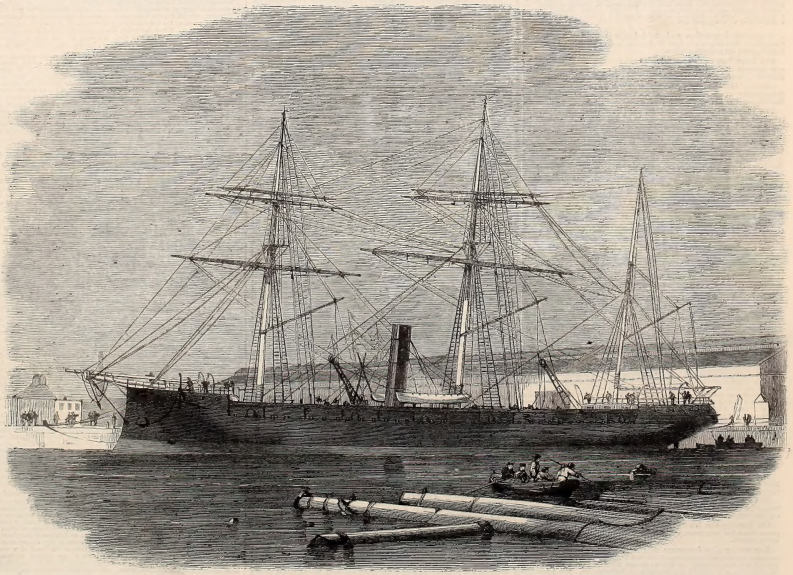
Our Portrait of Sir J. Wilde is from a photograph by J. and C. Watkins, of Parliament-street.



SIR JAMES PLAISTED WILDE, THE NEW JUDGE OF THE PROBATE COURT.

THE IMPERIAL CHINESE DESPATCH-BOAT KEANG SOO.

THE subject of our Illustration is a beautiful paddle steam-vessel, constructed for the Emperor of China by Mr. John White, the eminent shipbuilder, of West Cowes, Isle of Wight, and is the flagship of Captain Sherard Osborn, C.B., Commander-in-Chief of the Anglo-Chinese squadron. She was built and fitted out at the Medina Docks, and is of 1015 tons burden: length, 241 ft. 6 in.; breadth, 29 ft. 3 in.; depth of hold, 15 ft. 3 in. She is armed with traversing 68-pounders fore and aft, and four 18-pounders on her broadside. Her engines are of 300-horse power, by Messrs. Day and Co., of Southampton, and on her trials at the Government measured mile, in Stokes Bay, attained the great speed of 17 knots, or 19½ statute miles, per hour.



Our Sketch is from a photograph by Mr. Farrell, of the Chinese Government service.

THE IMPERIAL CHINESE DESPATCH-BOAT KEANG-SOO, FLAG SHIP OF CAPTAIN SHERARD OSBORN, C.B.

REVIEW OF THE NORFOLK VOLUNTEERS ON MOUSEHOLD HEATH: LADY SUFFIELD PRESENTING THE PRIZES WON AT THE NORFOLK RIFLE ASSOCIATION MEETING.—SEE NEXT PAGE.

ONE OF THE STEAM-RAMS IN COURSE OF CONSTRUCTION IN MESSRS. LAIRD'S SHIPBUILDING-YARD, BIRKENHEAD.—SEE NEXT PAGE.

THE STEAM-RAMS AT BIRKENHEAD.

We give on page 321, from a sketch by Mr. W. Woods, of Liverpool, an Engraving of El Tousson, one of the steam-rams in course of construction in Messrs. Lairds' yard at Birkenhead which have been the cause of so much excitement and controversy of late. We learn from a contemporary that no time is being lost in bringing both vessels to a state of completion, and that El Tousson wants but little to prepare her for receiving her equipment. As to El Mounassir, she is in a comparatively backward condition, but the operations on board her and in the neighbouring workshops are rapidly conducted. The two rams are not unshapely in their bulk, but seem as well designed for swiftness as for strength. The length of each is 230 ft., the beam 42 ft., and the extreme depth less than 20 ft. The burden is but 1500 tons register, and the draught of each vessel when loaded will be some 15 ft., the deck being about 6 ft. above the water-line, all the intermediate surface being protected—first, by a coating of teak over the iron skin of the ship, and then by armour-plates over that, each massive scale being 5½ in. thick. All this armour is dovetailed together so accurately that the joints are scarcely perceptible. The deck is of 5-in. teak, covered with iron, and the bulwarks are also of iron, being so made as to let down outwards, and thus to clear the decks during action. Two revolving cylindrical turrets, on the well-known principles invented by Captain Coles, are apportioned to each ship, one turret being before and the other abaft her engine-room. There is also a pilot-house, strongly built of teak, and iron-plated. Each turret carries two guns, placed in close proximity, so that they can be brought to bear nearly in the same position at one time. In the case of the Mounassir, one turret is being fast completed on a spot situated at some little distance from the hull, and the plan of construction is at present laid bare. Its wall is a series of cellular spaces, like the chine of a shell-fish, and all these iron cells are to be filled up with teak, making one solid and uniform mass, which is to be again strengthened and rendered well nigh impregnable by armour plates. At each end of the vessel is a raised deck, forming tolerably commodious quarters for officers and men; and the forecastle is made to carry one or two heavy guns, if they be needed. In the captain's cabin are portholes for two 32-pounders; and each ram has capacity for 300 tons of coal. The machinery, as a matter of course, is all below the water-line. Their sterns will be so formed as to protect the screw and rudder from shot or collision.

NAVAL AND MILITARY INTELLIGENCE.

WAR OFFICE.

6th Dragoons: Paymaster D. F. Chambers to be Paymaster.
16th Lancers: Lieut. T. F. Agg to be Captain; Cornet I. Turner to be Lieutenant.
Royal Artillery: Cadet H. E. Dolphin to be Lieutenant.
Coldstream Guards: Lieut. and Capt. H. A. Herbert to be Instructor of Musketry; the Hon. H. Legge to be Ensign and Lieutenant.
2nd Foot: Ensign W. C. Hood to be Lieutenant; Cadet R. Shirley to be Ensign. 3rd: Lieut. J. E. Durnford to be Instructor of Musketry. 5th: Lieut. J. M. Toppin to be Captain; Ensign D. G. Beamish to be Lieutenant; Cadets R. L. Dickson and C. H. Broad to be Ensigns. 10th: Lieut. G. H. Stace to be Lieutenant; Lieut. J. Rudge to be Captain; Ensign H. G. Carleton to be Lieutenant; Cadet H. W. Palmer to be Ensign. 15th: Cadet G. M. Porter to Ensign. 21st: Lieut. T. H. Green to be Captain; Ensigns J. J. Rutherford and E. M. Allen to be Lieutenants; J. N. Tew and Cadet C. E. Bovill to be Ensigns. 28th: Ensign S. F. F. Auchmuchty to be Lieutenant; Ensign R. L. Dickson to be Ensign. 32nd: Ensign F. A. Horridge to be Lieutenant; Cadet W. H. Bourne to be Ensign. 45th: Cadet H. J. de B. Smart to be Ensign. 64th: Lieut. W. J. Voules to be Instructor of Musketry. 75th: Paymaster H. A. Gossett to be Paymaster. 78th: Ensign G. E. Lecky to be Lieutenant; Cadet C. K. McCausland to be Ensign. 85th: Lieut. C. C. Oldfield to be Lieutenant. 103rd: Lieut. E. W. Trevor to be Captain; Ensign C. E. Glasse to be Lieutenant; Lieut. C. Frankland to be Captain; Ensign H. H. Richards to be Lieutenant; C. H. Stoddart to be Ensign. 104th: Lieut. Sir A. K. Lake, Bart., to be Captain; Ensign R. C. Richardson to be Lieutenant; Lieut. A. L. Douglas to be Captain; Ensign M. F. Stokes to be Lieutenant; H. V. Hunt to be Ensign.
3rd West India Regiment: Lieut. J. B. Jackson to be Captain; Ensign St. J. Clerke to be Lieutenant; J. G. Kelly to be Ensign.

INDIA OFFICE.

Her Majesty has approved of the undermentioned promotions and alterations of rank amongst the officers of the Staff Corps and of her Majesty's Indian military forces:—
Bengal Staff Corps.—Majors (Brev. Col.) O. Cavenagh, (Brev. Col.) J. S. Paton, and C. P. Trower to be Lieutenant-Colonels; Captains (Brev. Lieut.-Col.) T. A. Carey, E. W. E. Howard, D. Mocatta, G. W. Fraser, J. J. Eckford, (Brev. Major) C. Warde, and H. P. Babbage to be Majors; Lieuts. J. C. Miller and W. M. Gibbon to be Captains.
Bengal Army.—Cavalry: Lieut.-Col. (Major-Gen.) J. F. Bradford, C.B., to be Colonel; Cornet H. A. Fletcher to be Lieutenant. Late 1st European Light Cavalry: Capt. C. H. Nicholetts to be Major. Late 35th Native Infantry: Lieut. J. C. P. Baillie to be Captain. Infantry: Ensigns C. E. Hunter, F. D. Boilean, J. A. M'Neale, and C. F. Thomas to be Lieutenants.
Madras Staff Corps.—Major H. Drury to be Lieutenant-Colonel; Capts. A. B. Marsack, W. T. F. Farwell, C. P. Keyes, A. W. Ritherdon, and E. H. Power to be Majors.
Madras Army.—4th Native Infantry: Capt. J. J. Brine to be Major; Lieut. G. H. Stiles to be Captain. Infantry: Ensigns J. L. G. Silver and H. T. H. Baker to be Lieutenants; Surg. H. Young to be Surgeon-Major.

A general inspection and field-day was held on Southsea Common on Thursday week, Lord W. Paulett, commanding the south-west district, being the inspecting officer.

The large fort in the course of construction at Portsmouth, near Southsea Castle, is to be provided with a cupola shield, on the plan patented by Captain Cowper Coles.

Captain George H. Richards was on Saturday appointed Hydrographer of the Admiralty, in the room of the late Rear-Admiral Washington, who died on Wednesday week.

The Mayor of Portsmouth (Mr. W. Grant Chambers) entertained on Wednesday week the naval, military, and civil authorities, together with the members of the town council and other leading inhabitants, at a banquet at the Porland Hotel, Southsea.

The whole of the Woolwich division of Royal Marine Light Infantry, numbering upwards of 1600 rank and file, assembled on the Common on Thursday week, in three battalions, commanded by Colonels Travers, Marriott, and Suther; and, having formed in heavy marching order, were inspected by Colonel Rodney, Assistant Adjutant-General of the corps; Captain Travers, and other officers of the Staff of the Inspector-General. The force subsequently went through a series of brigade evolutions.

The Queen has appointed the Right Hon. John David Fitzgerald, Mountifort Longfield, Esq., Sir William Atherton, Sir Robert Joseph Phillimore, Sir Thomas Staples, the Right Hon. Thomas O'Hagan, Robert Porrett Collier, Esq., Robert Bayly Follett, Esq., Henry Cadogan Rotheray, Esq., and John Hazlett, Esq., to be her Majesty's Commissioners to inquire into the constitution, establishment, officers' practice, procedure, and fees of the High Court of Admiralty in Ireland.

The festivities in connection with the visit of the Channel Fleet to the Mersey have been on an extensive scale. Yesterday week a concert and fancy dress ball were given by the Mayor of Liverpool (Mr. R. C. Gardner) at the Townhall. About 2000 guests were invited, and the building was crowded to excess. On Monday the Commodore and members of the Mersey Yacht Club gave a magnificent banquet, at the Philharmonic Hall, to Admiral Dacres and the officers of the fleet. Mr. Graves, commodore of the club, presided, supported by Lord Stanley and Admiral Dacres. The guests numbered 480, of whom about 200 were officers of the fleet. The boxes and galleries were filled with ladies and gentlemen. The usual loyal toasts were given, and the proceedings throughout were of the most enthusiastic character. One of the most unique, magnificent, and successful public banquets ever given in Liverpool took place on Tuesday afternoon, when a number of Liverpool gentlemen, principally members of the Royal Mersey Yacht Club, entertained a thousand seamen and marines of the fleet to a dinner in St. George's Hall. The men landed at half-past twelve at the great landing-stage, and there formed in procession, some of the men carrying the national ensigns. The men marched through the principal streets and round the Exchange. The streets were all alive with the gayest bunting, and as the men marched up to the hall thousands upon thousands of spectators cheered them to the very echo. On arriving at the hall the men were received by Commodore S. R. Graves, of the R.M.Y.C., the chairman of the day. Marshalled by their officers, the men were very quickly and quietly seated, and they did evident justice to their dinners, consisting of roast and boiled beef, ham, vegetables, and plum-pudding, each man having a pint of beer, a half-bottle of rum, and a screw of tobacco. At a long table which ran the full length of the hall were seated the Mayor of Liverpool, surrounded by native and military officers, and some of the most influential of the local merchant princes.

THE VOLUNTEER MOVEMENT.

The Prince of Wales has consented to become patron of the Highland Rifle Association.

The battalion prize shooting of the 20th (North-West) Middlesex was brought to a close last Saturday afternoon at the Willesden range, the competition having lasted the whole week.

The first competition for the challenge cup of the London Brigade, G Company, took place on Saturday last at the Plaistow range. The cup was won by Private Horncastle.

On Monday the 4th Tower Hamlets commenced shooting for prizes which had been presented by ladies and gentlemen of the district and by the officers.

The competition for prizes offered by the Captains of each company respectively to members of the 2nd City of London Rifles was commenced at the range inside the Custom House, Victoria Docks, on Saturday, the 12th inst., and brought to a conclusion on Saturday last. The prizes consisted of a London Armoury rifle, or, in the event of a member having won one before, a prize of the same value. The winners of the rifles were:—first Company, Private Evans; second Company, Private Skelley; third Company, Sergeant Franklyn; fourth Company, Sergeant Stokes.

There was a volunteer review and sham-fight on Wanstead Flats last Saturday. The officer in command was Lieutenant-Colonel Ibbetson. Several companies of volunteers and of yeomanry cavalry took part in the affair. The evolutions were very smartly performed, and were witnessed by a great number of persons.——The 1st Essex Administrative Battalion had a field-day at Braintree on Thursday week. The total strength of the battalion was about 600. Lieutenant-Colonel Sir Claude de Crespigny took the command; and, various movements having been creditably executed, the assembled force was hospitably entertained at a substantial dinner by the officers and men of the Braintree corps. Sir Claude de Crespigny complimented the battalion on its smartness and efficiency.——On Thursday week the 3rd Essex had a competition for prizes at Brentwood. The principal premiums went to Private G. Davey, Sergeant Bush, and Private J. White.

The annual prize competition in connection with the 1st Kent (Maidstone) took place on Tuesday week, at Boxley Warren.

The annual prize shooting of the 4th Hants (Havant) took place on the 11th inst., at the Warblington butts, when a goblet, given by Captain Longlands, was won by Private G. White. Shooting for minor prizes followed. In the evening the members were entertained at dinner by the officers.——On Tuesday week about sixty members of the 12th Hants met at Horndean to compete for four prizes given by Sir Jervoise Clarke Jervoise, M.P., which were won, after some good shooting, by Sergeant Charles Glass, Private Penn, jun., Private Dear, and Sergeant Coles. Sir Jervoise Jervoise afterwards entertained the members at dinner.

The annual competition for the vase presented to the Cheltenham battalion by Mr. C. Schrieber came off on Tuesday week. Sergeant Pottinger was the winner.

A grand review took place in Wiltshire on Wednesday week. The annual inspection of the first battalion, which is commanded by Lieutenant-General Buckley, M.P., and Major Clark, having been fixed to take place at Trowbridge, the volunteers of that town took advantage of the occasion to organise a fête in aid of their band fund, and the day was kept as a holiday for many miles round. Although the corps are scattered over a wide extent of the county, and include the Salisbury, Trowbridge, Bradford-on-Avon, Maiden Brasley, Mere, Westbury, and Warminster volunteers, every company was well represented, and made a creditable display in the movements performed. About 5000 spectators were present, and the evening was devoted to a variety of games and sports. Mr. Long and Lady Bisshopp entertained the officers and a distinguished party of the notabilities of the county, and the men dined together in a large tent erected on the ground.

In Cornwall, during last week, two interesting meetings for prize-shooting were held. On Wednesday the first company competed, at Penzance, for five silver cups. The town cup was won by Sergeant Marrack, the officers' cup by Private Roberts, the High Sheriff's cup by Private Colenso, and the Mayor's cup by Private Teague. The ladies' challenge cup was won by Sergeant Marrack. Money prizes to the value of nearly £30 were shot for by the eleventh and twelfth companies, at Truro, on Friday; also the ladies' challenge cup. Captain Henderson tied with Private Truscott for the ladies' cup, and on shooting off the prize fell to the latter.

The annual competition of the 4th Bucks (Vale of Aylesbury) came off on Thursday and Friday last week. The distribution of the prizes took place on Friday evening at the White Hart Hotel—Mr. T. T. Bernard, M.P. for the borough, in the chair.

The Ludlow volunteers had their annual rifle contest at Whitbach on Tuesday week. They dined together in the evening.

The first annual prize meeting of the Herefordshire Rifle Association was commenced at the Hereford range on Monday, the 14th inst., and terminated last Saturday. In the company prize of £12, shot for by six men from each company, the first company (Hereford) won. The Colonel's prize (£10), the gift of Lieutenant-Colonel Fielden, afforded a tie between Piper and Holmes. The recruits' prizes were won as follows:—First prize, Private Adams; second, Private Probert; and third, Private Day. For the Lord Lieutenant's prize of £20 and the bronze medal of the National Rifle Association a spirited contest took place. The winners were:—First prize, Sergeant Dodd; second (£12), Private Davenport; third (£8), Corporal Wornington; and fourth (£4), Corporal Porter. The marksmen's prize, to be shot for by marksmen of 1863, caused a good deal of interest. Private Newton took the first prize of £10, and Private Haywood the second. Corporal Purchas and Private Saxby made a tie, and, on shooting it off, Saxby won the third prize. A long-range telescope, the gift of the Adjutant, was shot for by three men from each company, and three men tied, but, on shooting off, Private Pickerill won. Private Levreson (1st Hereford) won the members' cup of £10. The all-comers' match was finished on Saturday. The first prize (£40) was won by Sergeant Clutterbuck, 6th Gloucestershire. In shooting off fifty-three ties, Halsall got the second prize of £20; Captain Heaton the third, £10; and Kemp the fourth. Several minor prizes were shot for.

In Suffolk, the Bury St. Edmunds corps was reviewed, on Thursday week, by Lieutenant-Colonel Ibbetson, who expressed warm approval of its efficiency. Lieutenant-Colonel Ibbetson has also inspected the Eye, Stowmarket, Sudbury, Hadleigh, &c., corps, and has expressed himself in favourable terms as to their position, although he suggested ameliorations in matters of detail.

The annual prize competition of the Norfolk Volunteer Service Association commenced on Monday, the 7th inst., on Mousehold Heath, near Norwich, and was continued on Tuesday, Wednesday, Thursday, and Friday. In an all-comers' match, the first prize of £15 for the best score at three ranges won by Lieutenant Hawker, of one of the Middlesex corps; the second prize was of £10 was gained by Private Bridgman, of the 3rd Norwich company. A prize of £5 for the best score at 200 yards went to Corporal Ringer, of the 4th Norwich; another prize of £5 for the best score at 500 yards, to Captain Holloway, of the 11th Norfolk; and a third prize of £5 for the best score at 900 yards, to Private Marsh, of the 12th Norfolk. A match between eight volunteers of Norfolk and eight of Suffolk took place at 200, 500, and 600 yards, and was won by the first side, the members of which scored 276 marks, while their opponents obtained 266 marks. In a match between eight officers of Norfolk and eight of Norwich corps, at ranges of 200 and 500 yards, five rounds each, the Norwich side scored 185 marks and the Norfolk 170. This contest was for a sweepstakes of 5s. each. A match for a similar sweepstakes followed between twenty volunteers of Norwich and twenty of Norfolk. The ranges were again the same. The Norwich side won, making an average of 23·25 marks per man at the two ranges, while their opponents only obtained an average of 20·35 marks per man. On Wednesday evening the shooting for prizes given by Mr. J. Middleton—to which the association also added premiums—was brought to a conclusion. Six squads fired, the competitors being about 100 strong. The shooting was at ranges of 200, 500, and 600 yards, and for the best general score Mr. Middleton handsomely gave £25, for the second best £15, and for the third best £10, or £50 in all. In addition the association offered three prizes of £3 each for the best score at each range. After a number of ties had been shot off, the prizes were awarded as follows:—The £25 to Lieutenant Davy, of the Thetford Corps; the £15 to Sergeant Bridgman, Norwich; and the £10 to Private King, 21st Norfolk. Three prizes of £3 each, added by the association for the best score at each range, went to Captain Holloway, 11th Norfolk (200); Corporal Gunn, Norwich (500 yards); and Ensign Foster, Norwich (600 yards). On Thursday, in the match for a challenge bugle, presented by Mr. R. J. H. Harvey, six representatives of sixteen companies or subdivisions in Norfolk competed. The first prize was the challenge bugle and £12, and the second prize was £6 for the company or subdivision making the best and second best aggregate scores. The result of the shooting is annexed:—5th Norfolk, 132; 1st Norwich, 150; 4th Norwich, 134; 2nd Norwich, 141; 3rd Norwich, 133; 11th Norfolk, 147; 8th Norfolk 114; 21st Norfolk, 146; 15th Norfolk, 157; 6th Norwich, 132; 10th Norfolk, 138; 18th Norfolk, 96; 16th Norfolk, 121; 22nd Norfolk, 131; 5th Norwich, 105; 14th Norfolk, 116. The bugle and £12 was accordingly awarded to the 15th Norfolk, or East Dereham company, while the 1st Norwich, making the second best score, carried off the prize of £6. The prizes for the best individual scores at each range were won—that at 200 yards by Sergeant Rolfe, 21st Norfolk; and that at 500 yards by Corporal Carter, 15th Norfolk. The High Sheriff's prize was open to enrolled and honorary members of any volunteer corps in Norfolk. In this match the rewards not only included £25 given by the High Sheriff (Mr. J. S. Scott Chad), but also a rifle given by Mr. Cartwright, with £2 added by the association, besides £3 for the best third score. The £25 was won by Sergeant Tunally, 21st Norfolk; the rifle and £2 by Captain Hollway, 11th Norfolk; and the £3 by Corporal Gunn, Norwich. Prizes of £3 for the best scores at each range went to Private Haughton, 5th Norfolk (200 yards), and Sergeant Bridgman, Norwich (500 yards). A series of prizes—£10, £5, and £3—were shot for by members of the association only at 200 yards, and were won—the first by Private Breeze, 1st Norwich; the second by Corporal Forrester, 2nd Norwich; and the 3rd by Private Wilson, 15th Norfolk. The last contest on Friday was for the championship of Norfolk, the winner of the match receiving the bronze medal of the National Rifle Association and £20; second and third prizes of £10 and £5 were also awarded, as well as prizes of £3 for the best score at each of the three distances—200, 500, and 600 yards. The largest scores were made by Corporal Wilshak, of the Great Yarmouth corps, and Private Richardson, of the Fakenham corps, each obtaining 41 marks; in shooting off the tie Private Richardson missed, so that Corporal Wilshak became champion for the year. The £10 of course went to Private Richardson. The third prize was won by Corporal Gunn, 4th Norwich; the prize for the best score at 200 yards by Private Garwood, of the East Dereham corps; that for the best score at 500 yards by Corporal Martin, of the Fakenham corps; and that for the best score at 600 yards by Private Bridgman, 3rd Norwich. The prizes were distributed at a general review by Colonel M'Murdo, of the Norfolk corps, held on Mousehold Heath, near Norwich, on Tuesday week. The following corps assembled on the occasion:—1st Norfolk, 408; 2nd Norfolk, 316; Yarmouth Artillery, 194; Yarmouth Rifles, 221; Norwich, 339; Light Horse, 35: total, 1511. To these must be added the three troops of the 18th Hussars at present quartered at Norwich, 14 of the staff of the West Norfolk Militia, and the Norwich Cadets, so that altogether about 1800 men were under arms on the ground. Colonel M'Murdo, the Lord Lieutenant of Norfolk (the Earl of Leicester), and Staff, having ridden up and down the line, the infantry marched past with considerable steadiness, and the cavalry also defiled before them. Several manœuvres were then gone through, after which the Hussars left for Norwich, and the volunteers then formed a large square for the purpose of witnessing the presentation of prizes to the successful competitors at the late annual gathering of the Norfolk Volunteer Service Association. The presentation was made by Lady Suffield, the recipients of the well-merited rewards being also addressed, one by one, in a few encouraging words, by the Earl of Leicester.

The challenge cup of the 8th Cambridgeshire corps has passed into the hands of Private Barker for the third time in succession. Should he hold his own at the next competition the cup will become his definitive property.——By the invitation of Lord Royston the two Cambridge Town corps marched over to Babraham, on Thursday week, to the residence of his Lordship's brother-in-law, Mr. H. J. Adeane, M.P., for the purpose of being drilled.——The third annual competition for a ladies' challenge cup, offered to the Wisbeach corps, has resulted in favour of Sergeant Bennett.

The third annual meeting and shooting of the Warwickshire County Rifle Association took place at Stoneleigh, on Tuesday, when various prizes were shot for in the deer park belonging to Lord Leigh. At the ranges of 400 and 500 yards the greatest aggregate scores were obtained by the Warwick riflemen. Quartermaster-Sergeant Squires, of Leamington, obtained the highest prize of £20; the second prize of £10 was secured by Corporal Worth, of Nuneaton. The ladies' prize of £10 was taken by Sergeant Butler, of Coventry. Lord Leigh's challenge cup, with £5 added, was taken by Corporal Butler. The latter prize goes to the town of Stratford.

In Lincolnshire an annual contest has just taken place among the best shots of the Stamford corps for a challenge cup given by the Mayor of that town, as well as several prizes given by the officers of the corps. About fifty volunteers participated in the shooting, which resulted in favour of Corporal Tinkler as regards the Mayor's cup.——In a match between twelve members of the Stamford corps and twelve of the 3rd Robin Hood (Notts) Rifles, the scores made were—Stamford, 400; Robin Hoods, 352.——An elegant vase, presented to the Lincoln corps by Mr. F. Straw, has been competed for. The highest score was made by Sergeant Bourne.——The Lindsey battalion has been reviewed and entertained by Captain Uppleby in his picturesque grounds at Barrow. There were about 3000 persons present.

The long-talked-of encampment of the rifle volunteers for the county of Nottingham has at length commenced. The ground selected for the encampment is situated on the Manor Hills, belonging to the Duke of Newcastle. It is about one mile from Worksop, in a south-westerly direction, and is in every way well suited for the occasion, with the exception of want of water supply. The range of ground is about 800 yards in length and about 200 yards in breadth. At the west end is the rifle-butt, erected by his Grace the Duke of Newcastle at a cost of about £200. A great number of tents have been erected. On Wednesday week the Duke of Newcastle reviewed the 2nd Administrative Battalion of Notts Volunteers. In addressing the battalion at the close of the review, the noble Duke observed that, although the battalion had displayed great efficiency in the movements through which it had been put, he must remind the members of what he had said at Southwell last year—viz., that they did not pay sufficient attention to company drill, which was essential to their efficiency.——On Monday the Nottingham Robin Hoods was inspected at Bulwell Forest, near Nottingham, by the Duke of St. Albans, on joining the regiment as Colonel. The battalion were put through a number of intricate movements by Lieutenant-Colonel J. C. Wright, and at the conclusion were highly complimented by the commanding officer for their efficiency. On Monday, the 5th of October next, this regiment will be reviewed in Bulwell Forest.

The 3rd Battalion of the Lancashire Rifles assembled at Lytham, on the 9th inst., for four days' training, on the principle of the militia. There were three drills per day. The progress made was most satisfactory, so much so that the officers unanimously agreed to adopt the principle of an annual training in substitution of the periodical battalion meetings.——The annual rifle contest at the range of the Wigan Corps (the 21st Lancashire) was brought to a close last Saturday. Since last year the 21st has been joined with the 8th (Bury) for drill purposes, and at the competition just closed there were several prizes for which the Bury Volunteers were allowed to shoot. The first contest was for a purse of £15, divided into four prizes. The highest scorers were Privates Hardy and Gabbatt, who tied, and had consequently to shoot off. Hardy proved the winner, and Gabbatt received the second money. Next was a purse of £10 for the best company volley-firing. The second company of the 21st were the winners.

The movements in Yorkshire have been of interest during the past week. The 6th and the 7th West York held their annual meeting, and several valuable prizes were stoutly contested. Lord Londesborough has presented £25 for competition by the York volunteers, in addition to an annual subscription of £100 for battalion purposes. His Lordship also gives £25 towards the uniforms of a subdivision of Foresters in the York corps.

Lieutenant-Colonel Roney is at present making an inspection of several of the north country rifle corps. On Monday the 3rd Durham Rifles, under the command of Major Commandant Lord Adolphus Vane Tempest, were inspected by him in Sunderland Barracks. The corps was put through the manual exercise by Captain Potts, and through the platoon exercise by Captain A. Featherstonheugh, concluding with file and volley firing. Lieutenant-Colonel Roney congratulated Lord Vane Tempest on having such an excellent body of men under him.——The 4th Battalion of the Durham Volunteers, comprising the Darlington, Stockton, Hartlepool, and Castle Eden corps, was reviewed by Colonel Roney, Government Inspector, on Thursday week, at Stockton. When the review was concluded, Colonel Roney, addressing the men, told them that he was glad, not only for the sake of Lieutenant-Colonel Scurfield (the commanding officer), but for their credit, that they had acquitted themselves satisfactorily.

The members of the Sandhoe Rifle Club, near Hexham, Northumberland, met on the 16th inst. at the practice-ground of the president, Sir Rowland Stanley Errington, Bart., at Oakwood Cottage, near Sandhoe House, for their second annual competition for prizes given by the patronesses, president, vice-presidents, and stewards of the club. Sixty members competed, and the first prize was carried off by Mr. Hutchinson; the second by Mr. Charles Hedley; the third by Mr. Matthew Leadbitter; and the fourth by Mr. Henry Stobbs. On the following day three prizes for all comers, with any rifle, presented by the president, were competed for. There were seventy-four competitors, and the first prize was won by Mr. John Salmon, of South Shields; the second by Captain Nicholson, 2nd North; and the third by Corporal White, 2nd North.

The Great Eastern, which left New York on the 8th inst., arrived at Liverpool on Sunday. Off Cape Clear she ran down the ship Jane, from Liverpool for Quebec. Two lives were lost.

The steamer Sunbeam foundered in Lake Superior on the 28th of August, and it is feared that all on board, except the wheelsman, were lost. He lashed himself to a piece of wreck, and, after floating for thirty hours, was washed ashore at Portage, twenty miles from the scene of the disaster. The passengers and crew numbered thirty-five.

The Ocean Mail, a fourteen years' classed ship at Lloyd's, 800 tons register, commanded by Captain Linklater, has been lost in the China seas. She was bound to England from Shanghai with a valuable cargo of teas and silk, roughly valued at £100,000, and appears to have foundered six miles off the entrance of the river Woosung. No mention is made of the crew. The ship and cargo are stated to be insured in London and China.

The Maori, which sailed on the 21st of March from Plymouth, arrived at Melbourne, Victoria, on the 29th of June last, having on board 31 married couples, 192 single women, and 29 children. Three births and one death (that of an infant) took place during the voyage.——The Eena arrived at Freemantle, Western Australia, on the 22nd of July last, with 15 married people, 21 single men, 17 single women, and 12 children.

A gold chronometer watch has been presented by the United States' Government to Captain Robert Clark, Master of the British ship General Neil, for rescuing the crew of the American ship Scargo, on the 15th of March, 1862. An extract from the Scargo's logbook stated that the captain and crew were rescued when their vessel had 5 ft. 8 in. of water in the hold, and when their destruction seemed inevitable.

The Emigration Commissioners' ship Gresham, 965 tons, sailed from Liverpool on Wednesday week for Melbourne, Australia, having on board 448 passengers, comprising 86 married couples, 247 young women, 7 boys and 12 girls under twelve years of age, and 10 infants.——Yesterday week the ship Canterbury, 2000 tons burden, Captain Clare, left the East India Dock in tow of a steamer for Gravesend, whence she sailed for Canterbury, New Zealand. She takes out nearly 400 passengers, principally mechanics and agriculturists.

The reigning Sovereign of Anhalt-Dessau-Köthen, who has acquired all the territory of the duchy of Anhalt-Bernberg in consequence of the late Duke dying without male issue, has issued a proclamation announcing his accession. The duchy of Anhalt-Dessau-Köthen-Bernberg contains about 150 square kilometres, with a population of about 170,000 souls, and supplies a contingent of about 2000 men to the federal army. The whole dukedom is completely surrounded by the Prussian territory, and will, in all probability, be absorbed by that kingdom at same future day. The *Débats* remarks that among the many illustrious scions of the house of Anhalt was the Empress Catherine of Russia. The present Duke is seventy years of age, and is now in the forty-sixth year of his reign.

Cardinal Wolsey's Chapel, Windsor, is being restored and beautified at the expense of the Royal children, in order to form a fitting memorial of their beloved parent the late Prince Consort. While erecting some richly-carved stonework last week it became necessary for the workmen to cut away a portion of the wall on each side of the doorway opening into the cloisters, opposite St. George's Chapel. On removing the masses of stone from the mortar in which they were embedded, sixteen or eighteen of the pieces were discovered to have formed (it is supposed) a portion of the chapel erected by Henry III. These interesting relics form portions of the jamb of a doorway with ogee mouldings, pillars, and other parts of an ancient ecclesiastical edifice. On one of the stones is an angel's wing, while the mouldings and surfaces still bear the crimson, green, red, and black colours with which they were decorated, in carved and zigzag lines. The whole of the stones seem to have belonged to the Early English and Norman periods.

COLUMN FOR THE CURIOUS.

THE last of the Thatched House Tavern, in St. James's-street, has disappeared; and a handsome stone-fronted edifice, to be entitled "Thatched House Chambers," is rising upon the site. The Thatched House Tavern had been for nearly two centuries celebrated for its clubs, its large room for public meetings, and its public dinners; it may have been originally a *thatched* tavern "in a spacious street, with very good houses well inhabited with gentry." The Thatched House was Swift's favourite haunt. In some birthday verses he sings—

> The Deanery-house may well be match'd,
> Under correction, with the Thatch'd.

Here was erected the Brothers' Club, of which Swift was made a member in his absence. "The end of our club," he says, "is to advance conversation and friendship, and to reward deserving persons with our interest and recommendation; and, if we go on as we began, no other club in this town will be worth talking of." The Dean preferred to call "The Brothers" a society, and not a club; and his journal is very full of brothers Arran and Duplin, Masham and Ormond, Bathurst and Harcourt, Orrery and Jack Hill, and other Tory magnates. Swift tells Stella he entertained here his "brothers," at the cost of seven guineas. "I staid till eight," he adds, "and then we all went away soberly. The Duke of Ormond's treat, last week, cost £20., though it was only four dishes, and four without a dessert; and I bespoke it in order to be cheap. Yet I could not prevail to change the house. Lord Treasurer is in a rage with us for being so extravagant; and the wine was not reckoned neither, for that is always brought by him that is president. Afterwards they shifted their dinner from the Thatched House to the Star and Garter, "on the Pall-mall." At the Thatched House first mét the Dilettanti Society, or, as Walpole describes it, "a club for which the nominal qualification is having been in Italy, and the real one being drunk." The character of the club, however, became changed, the members being persons devoted to art and antiquarian studies: in the clubroom were two fine conversation portrait-pieces by Sir Joshua Reynolds, painted in the manner of Paul Veronese; and a collection of portraits, the earlier ones by Hudson, Reynolds's master. The Dilettanti is now a publishing society, such as the Roxburgh, the Camden, &c. To the Thatched House, removed, in 1799, from Parsloe's, in St. James's-street, "the Club," from the time of Garrick's death known as the "Literary Club," of which the late Marquis of Lansdowne and Sir George Cornewall Lewis were members. There is an amusing anecdote of the mention of the tavern in the House of Lords:—

> In the debates on the regency a prim Peer, remarkable for his finical delicacy and formal adherence to etiquette, having cited pompously certain resolutions which he said had been passed by a party of noblemen and gentlemen at the Thatched House Tavern, the Lord Chancellor Thurlow, in adverting to these, said, "as to what the noble Lord in the red riband told us; he had heard of the alehouse."—Lord Campbell's "Lives of the Chancellors."

—Lord Thurlow was just the man to demolish such affectation, and Lord Campbell just the author to chronicle such an incident. The greater part of the Thatched House Tavern was taken down in 1844, and the Conservative Club House now occupies the site, together with that of the house of Elmsley, the bookseller, at the south corner of Little St. James's-street, where Gibbon the historian died, Jan. 16, 1794. The large room of the tavern faced the street, and, when lit up by its huge glass chandeliers, from the pavement might be seen the Dilettanti portraits upon the walls. The remaining portion of the tavern has been taken down for the site of the new edifice already mentioned. In the rear, Thatched House-court has also disappeared. We have long missed from this part of St. James's-street the large bow-window which Theodore Hook compared to an obese old gentleman in a white waistcoat. "Round the corner," in Cleveland-row, Hook lived from 1827 to 1831, in a handsome house which he furnished at some £2000 or £3000 expense, and by this and other outlays so increased his embarrassments that he had to sell a moiety of his share in the *John Bull* for £4000. Of the St. James's-street of Hogarth's days we get a glimpse in the background of his picture of "The Rake arrested by Bailiffs;" here the projecting sign and the barber's pole carry us a century back. The tavern which has just disappeared was nearly the last relic of old St. James's-street, although its memories survive in various clubs; and the "Thatched House" is to be kept in mind by the chambers built upon its site.

Pity the sorrows of a poor old yew is the burden of a lugubrious letter addressed the other day to the *Times* from Darley Churchyard, in a very lovely valley in Derbyshire. The petitioner is one of the most celebrated yew-trees in this country. The trunk is 33 ft. in girth, and within the memory of man its arms stretched across one entire side of the churchyard; and forty years ago the young urchins of the parish used to climb from the outer wall into the branches, and from the branches on to the church-leads. The famous old yew-tree at Darley was thus described, many years since, to the British Association, by Mr. Bowman, F.L.S., "as having a mean diameter of 1356 lines; horizontal sections gave an average for its latest increase at 44 rings per inch nearly, which gives 2006 years as its age." The complaint of this "Poor Old Tree" is that, notwithstanding all its claims to reverence, idle persons cut, break, and mutilate the trunk and branches. "Until tourists began to multiply and excursion-trains to run," says the complainant, "I had scarce a single scar, other than time and tempest had left, on my body. But now the Snookses, and Tomkinses, and Joneses have begun to immortalise themselves (as is the fashion of that race) by cutting their names all over my bark, and on Thursday last two fellows of this tribe commenced a still more cruel process. While one of them smoked his pipe and watched, the other drew out a saw and actually set to work to cut out a great slice of my very flesh, which, but for the lucky intervention of the clerk, he would soon have accomplished." This wanton spoliation—next door to sacrilege—is disgraceful. We shall next hear of some pilfering excursionist boasting that he has stolen enough of the wood of the yew to veneer his own drawing-room table!

One of the oldest seats of learning in Paris, the College of Plessis, situated at the top of Rue St. Jacques, one of the most ancient monuments in the city and little known to strangers, is about to be taken down. It was founded in the year 1316, by Plessis Balizon, secretary of Philippe le Long. It flourished for nearly three centuries; but its resources having become exhausted, it was united to the Sorbonne, assumed the name of Plessis Sorbonne, and was completely rebuilt. It was suppressed in 1790, like all other ecclesiastical establishments. The faculty of theology and letters was re-established there in 1820. Subsequently, the buildings of the College of Plessis were annexed to that of Louis le Grand. The present demolition is the commencement of the execution of a vast plan, which consists of the rebuilding of the entire façade of the Lycée Louis le Grand, and bringing it on a line with the buildings of the College of France. Louis le Grand was founded two hundred and fifty years after the College of Plessis. When, during the siege of Paris under the League, a domiciliary visit was commanded in all religious houses, more provisions were found in the possession of the reverend fathers of this college (then the Jesuits Clermont) than in the four richest houses in Paris. Early in the eighteenth century the College Louis le Grand numbered among its pupils Arouet de Voltaire, already remarkable for the keenness of his wit. During the Revolution the college was reorganised; and during this and the Imperial periods the sons of Camille Desmoulins, and of Carrier, Casabianca, Grouchy, Fourcroy, and Toussaint L'Ouverture were pupils.

A curious smoking relic was lately exhibited by Mr. Baskcomb to the British Archæological Association—viz., an elegant German tobacco-pipe of the close of the reign of Leopold I., which doubtlessly belonged to that Emperor, or was a present from him to some great personage. The surface of the wooden bowl is incrusted with pearl-shell, mosaic, and brass piquéwork; is mounted with broad silver ferules; and has a conical cover of silver, representing the brick or stone spire of a building, terminating in a monde, on which rests the Imperial eagle, ensigned by a crown, and bearing the arms of Austria on its breast. Mr. B. notes that he found this curious relic near the ruins of the old castle of Pekan, a few miles from Gratz, in Lower Styria.

Three noteworthy persons have passed from among us within the last few days at very ripe ages: Mr. Joseph Gwilt, the architect, in his eightieth year; Mr. C. R. Cockerell, the architect, in his seventy-sixth year; and Mr. William Tooke, President of the Society of Arts, in his eighty-sixth year, brother of Mr. Thomas Tooke, the political economist, who died in 1858, aged eighty-five.

CHESS.

TO CORRESPONDENTS.

PUZZLED.—The key move to Mr. Pierce's Enigma, No. 1347, is—1. Kt to K 2nd. It is a very clever *two*-move problem; but the following, sent us by a correspondent, as having baffled many excellent players, is still better:—*White:* K at Q 8th, Q at K Kt 7th, R at K 3rd, Bs at K 2nd and Q Kt 8th, Kts at Q Kt 3rd and Q B 3rd, P at K 7th. *Black:* K at K B 4th, R at K 5th, Kt at K Kt 7th; Ps at K B 2nd, Q 2nd, and Q 5th. White to play, and mate in *two* moves.

C. W., of Sudbury.—1. They shall be reported on speedily. 2. Beyond the fact that it has certainly not yet appeared, we can you give you no intelligence regarding the book of last year's chess meeting.

M.P.—For brilliancy of combination, for intrepidity in attack, and for quickness of play, no one has ever surpassed, if any one has equalled, our countryman, Mr. Cochrane.

ARGUS.—The variation in the Allgaier Gambit to which you allude—

1. P to K 4th	P to K 4th	5. Kt to K 5th	*Kt to K B 3rd*
2. P to K B 4th	P takes P	6. B to Q B 4th	*P to Q 4th*
3. Kt to K B 3rd	P to K Kt 4th	7. P takes P	*B to Q 3rd*
4. P to K R 4th	P to K Kt 5th	8. P to Q 4th	*Kt to K R 4th*

was first played by Mr. Staunton in a game with M. von Heydebrandt at Brussels in 1853. You may rest assured that there is not a syllable of truth in the statement that Mr. Staunton derived it from the foreign player whom you mention.

I. MILLS, Stratford-on-Avon.—Your problem appears to us defective. Suppose Black for his first move play, 1. Kt to Q 5th, or, 1. Kt to K 8th, how then?

W. H. A.—1. The key-move is, 1. *Kt to K 2nd.* 2. The end-game you have been good enough to forward is now under examination.

I. K. B.—Apply to Mr. Owen, publisher of the *Civil Service Gazette*; office, 67, Strand, London.

GIL BLAS.—We have no recollection of a chess-book which treats of problem-making.

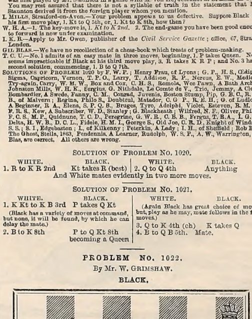
T. C. U.—No. 1 admits of an easy mate in three moves, beginning, 1. P takes Queen. No. 2 seems impracticable if Black at his third move play, 3. R takes K R P; and No. 3 has a second solution, commencing, 1. B to Q 7th.

SOLUTIONS OF PROBLEM 1020 by F. W. P.; Henry Frau, of Lyons; G. P., H. S., Œdipus, Sigma, Capricorn, Vernon, T. P. O., Larry, T. Addison, R. P., Nereus, E. W., Medicus, Try-again, Carry, W. M. W., Box and Cox, C. H. S., Romola, Wee Pawn, A Bath Archer, Johnston Mills, W. H. K., Sergius, G. Nithdale, Le Comte de V., Trio, Jemmy, A Clerk, Bombardier, A Swede, Fanny, C. M., Conrad, Juvenis, Boston Stump, Pip, G. B. C., R. S.; B., of Malvern; Regina, Philo S., Doubtful, Matador, C. G. P., R. E. H.; G. of Ludlow; A Beginner, R. A., Elena, S. P. Q. B., Bruges, Tyro, Adelphi, Violet, Estevon, R. M. K., F. R. S., Kew, A Subscriber, W. D., Stanley; G. Blackheath; Wilfred, N. F., Oliver, Philip, F. C. S., M. P., Quidnunc, T. C. D., Peregrine, G. W. R., C. B. B., Fergus, T. R.A., I. G. N., Delta, H. W. B., D. C. L., Fidele, H. M. I., George S., Old Joe, C. R. D., Knight of Windsor, S. S.; S. I., Edgebaston; L., of Kilkenny; Peterkin, A Lady; I. H., of Sheffield; Rob Roy, The Ghost, Stella, 1863, Pendennis, A Learner, Rudolph, W. S. P., A. W., Warrington, Gil Blas, are correct. All others are wrong.

SOLUTION OF PROBLEM No. 1020.

WHITE.	BLACK.	WHITE.	BLACK.
1. R to K R 2nd	Kt takes R (best)	2. Q to Q 4th	Anything

And White mates evidently in two more moves.



SOLUTION OF PROBLEM No. 1021.

WHITE.	BLACK.	WHITE.	BLACK.
1. K Kt to K B 3rd	P takes Q Kt	(Again Black has great choice of moves, but, play as he may, mate follows in the four moves.)	
(Black has a variety of moves at command, but none, it will be found, by which he can delay the mate.)		3. Q to K 4th (ch)	K takes Q
2. B to K 8th	P to Q Kt 8th becoming a Queen	4. B to Q B 5th.	Mate.

PROBLEM No. 1022.

By Mr. W. GRIMSHAW.

BLACK.

WHITE.

White, playing first, gives mate in four moves.

CONTINUATION OF MR. BUCKLE'S GAMES.

Mr. BUCKLE gives the Pawn and two moves to an Amateur.

(*Remove Black's K B P from the Board.*)

WHITE (Amateur.)	BLACK (Mr. B.)
1. P to K 4th	
2. P to Q 4th	P to Q 3rd
3. P to K B 4th	Kt to K R 3rd
4. B to Q 3rd	Kt to K B 2nd
5. Kt to K B 3rd	P to K 3rd
6. P to Q B 4th	B to K 2nd
7. Castles	Castles
8. Kt to Q B 3rd	Kt to Q R 3rd
9. P to Q R 3rd	
(It was important to prevent Black fixing his Kt at Q Kt 5th, and this move was not, therefore, a mere loss of time, as at first sight it seems to have been.)	
9.	P to Q B 4th
10. P to Q 5th	B to K B 3rd
11. P takes K P	
(We believe White would have opened the game and brought his immediately disposable forces into better play by advancing the Pawn to K 5th at this moment. For example, suppose—	
11. P to K 5th	P takes K P
12. K B P takes P	B takes K P
13. Kt takes B	Kt takes Kt
14. B takes K R P (ch)	K takes B
15. Q to K R 5th (ch)	K moves
16. R takes R (ch)	Q takes R
17. Q takes Kt	
With a fine position.)	
11.	B takes P
12. P to K B 5th	
(Again, it appears to us that P to K 5th would have been preferable to the move made.)	
12.	B to Q 2nd
13. Kt to Q 5th	Kt to Q B 2nd
14. R to Q R 2nd	
(The mixture of strength and weakness in White's play is very remarkable. Many of his moves are excellent, and show a more than ordinary aptitude for chess combinations, while others are so puerile that they might be taken for the tentative efforts of a mere beginner at the game. For instance, at this moment he loses valuable time by playing the Queen's Rook out of range of Black's Bishop, when, by simply capturing the Bishop, he would have gained time and rid himself of a very dangerous enemy.)	
14.	Kt takes Kt
15. K P takes Kt	Kt to K 4th
16. Kt takes Kt	B takes Kt
17. Q to K R 5th	Q to K sq
18. Q to K R 3rd	Q to K B 2nd
19. B to Q 2nd	Q R to K sq
20. B to Q B 3rd	B takes B
21. P takes B	Q to K B 3rd
22. B to Q Knt sq	Q R to K 4th
23. Q R to K B 2nd	P to Q Kt 4th
(Very good.)	
24. P takes P	B takes Q Kt P
25. K R to Q sq	K R to K sq
26. B to Q 3rd	R to K 8th (ch)
27. Q R to K B sq	R takes K R
28. R takes R	B to Q R 5th
29. R to K B sq	R to K 4th
30. Q to K Kt 4th	B to Q 2nd
31. Q to K B 4th	K to B sq
32. P to Q B 4th	P to K R 3rd
33. P to K Kt 4th	K to B 2nd
34. R to Q Kt sq	B to Q B sq
35. K to Kt 2nd	Q to K R 5th
36. B to K 4th	B to Q R 3rd
37. P to K R 3rd	B takes Q B P
38. R to Q Kt 7th (ch)	K to B sq
39. R to Q 7th	Q to K 8th
40. B to K B 3rd	B to K B 8th (ch)
41. K to R 2nd	Q to B 7th (ch)
42. K to R sq	B to K Kt 7th (ch)

And wins.

Another Game between the same Parties, Mr. BUCKLE giving the Pawn and two moves.

(*Remove Black's K B P from the Board.*)

WHITE (Amateur.)	BLACK (Mr. B.)
1. P to K 4th	
2. P to Q 4th	P to K 3rd
3. Kt to Q B 3rd	B to Q Kt 5th
4. B to Q 3rd	Kt to K 2nd
5. B to K Kt 5th	P to Q 3rd
6. P to K B 4th	Kt to Q 2nd
7. P to K 5th	Kt to K B sq
8. Kt to K B 3rd	P to Q 4th
9. Castles	B takes Kt
10. P takes B	P to K Kt 3rd
11. B to K B 6th	R to K Kt sq
12. Kt to K Kt 5th	
(These desultory assaults occasionally harass the adversary for a short time, but, as a rule, they injure the attacking party more than the attacked.)	
12.	P to K R 3rd
13. Kt to K R 3rd	P to Q B 4th
14. P takes Q B P	Q to Q R 4th
15. Kt to K B 2nd	Q takes P on her B 4th
16. Q to Q 2nd	B to Q 2nd
17. Q R to Q Kt sq	B to Q B 3rd
18. K to R sq	P to K R 4th
19. Kt to K R 3rd	Kt to K R 2nd
20. K R to Q sq	Castles
21. B to K R 4th	Q R to K B sq
22. B to K B 2nd	Q to Q R 4th
23. B to Q 4th	Kt to K B 4th
24. Q to K B 2nd	P to K Kt 4th
(This attempt to force the right wing of White's position is alike skilful in plan and execution.)	
25. B takes Q R P	P to K Kt 5th
26. B to Q Kt 6th	P to K Kt 6th
27. B takes Q	P takes Q
28. Kt takes P	P to K R 5th
29. P to K R 3rd	R to K Kt 6th
30. B to Q Kt 4th	Q R to K Kt sq
31. B takes Kt	P takes B
32. B to K 7th	K R takes K Kt P
33. B takes K R P	R takes Kt
34. B takes R	P to Q 5th (dis. ch.)

And White surrenders.

THE FARM.

LADY PIGOT'S sale, which has caused so much interest in the shorthorn world, came off on Tuesday last, and was attended by about four hundred breeders and farmers from "canny Aberdeen" to Truro. The withdrawal of Second Duchess of Gloster, which has been at Wetherby very recently, reduced the lots to seventy-nine, as Spicey's one-week-old calf, which was put up at an eighty-guinea reserve, was not sold. The fifty-nine females realised 3361 gs., and the twenty bulls 961 gs., giving an average of £57 8s. 6d., which is the highest of the season. The two Babraham averages were within 18s. of each other, and the highest about 35s. below her Ladyship's; so that Cambridgeshire stands first, second, and third in the shorthorn sales of the year. The average must be considered very satisfactory, seeing that both Pride of Southwicke and Rosedale were "rather doubtful," that several of the recently-purchased females were very moderate indeed, and that the bulls did not look nearly so well in the house as they did out. With sixty lots instead of eighty, the average would have pressed hard on those at Bushey Grove.

His Grace the Duke of Montrose took the chair at a very elegant luncheon, and proposed, in a few neat sentences, after the toast of her Majesty, the healths of Sir Robert and Lady Pigot. Her Ladyship was most enthusiastically greeted when she rose, after her husband, and added a few words. "In the presence of the breeders of Skyrocket and Royal Butterfly," said the fair speaker, "the representatives of Warlaby and Killerby, and my good shorthorn tutor, Mr. Torr, I am almost ashamed to hear the sound of my own voice. However, I must try and thank you all for your great kindness in coming, and I hope that you will give me an excellent average. Now, remember, I've won about 213—no, I'm wrong—268 prizes already, and I intend to come out again and beat the best of you, meet where we may. (Great cheering and laughter.) Permit me once more from my heart to thank you, and to propose the health of my good old friend, Mr. Wetherall, and the glorious interests of '*The Red, White, and Roan.*' "The tutor" then gave the health of the noble chairman in his usual energetic style, and remarked that out of several scores he never had a pupil half so quick as her Ladyship; and when a torrent of rain had passed over a general move was made to the ring side, whose rails were gracefully entwined with box, oak, and laurel—"the new style" again. The waggons were quickly filled, and Sir Robert and Lady Pigot and Mr. and Mrs. Benyon, the Duke of Montrose, Lord Feversham, Colonel Towneley, Colonel Leslie, M.P., Captain and Mrs. Gunter, Mr. Chandos Pole Gell, Captain Oliver, Mr. Drake, Mr. Torr, &c., occupied the covered pavilion, a new and very happy feature at a sale. There were also present Messrs. Stewart, Douglas, the Brothers Booth, Ladds, Woods, Barclay, Atkinson, Waldo, Atherton, Charlesworth, Savidge, Tallant (whom, we trust, now that the Bushey Grove herd has passed away, will be in commission once more, and busy as ever, among the rosettes), Culshaw, of course, John Ward, who showed Rosedale and "The Pride" with his highest skill in the ring, and, in fact, a very strong show of the principal breeders and "trainers."

The whole proceedings occupied four hours, and were conducted by the "Nestor of Shorthorns" with rare spirit to the end. He was obliged to halt four or five times to rebuke that incorrigible nuisance, the ceaseless undertalk of non-buyers, which is a sad hindrance to auctioneer and bidders, and caused one or two lots to be put up twice over. The principal purchasers were old Spicey, 56 gs. (Mr. Waldo); Rosey (dam of Rosedale), 96 gs. (Mr. Storer); La Valliere, 90 gs. (Duke of Montrose); Lady Sarah, 50 gs. (Mr. Pell); Empress of Hindostan, 50 gs. (Mr. Crisp); Bonne Fille, 60 gs. (Marquis of Verdon); Rose of Promise, 200 gs. (Mr. Gibson); Lady of Bonhill, 68 gs. (Mr. Crisp); Pride of Southwicke (put up at 60gs.), 120 gs. (Lord Feversham); Victoria 35th, 48 gs. (Mr. Gebhardt); and Almack's Belle, 115 gs. (Mr. Gibson). Queen of the Georgians, 105 gs., and Castanet (close on calving), 155 gs., both fell to the nod of Mr. Churnside, the celebrated Australian breeder, who has bought upwards of 5000 gs. worth of horses at Sledmere and Doncaster, and fought hard to the last for Prince Victor and Rosedale. There were also Magnolia, 82 gs. (Mr. Atkinson); Rosedale (who forfeits her Royal prize), 215 gs. (the Duke of Montrose); Empress of the East, 80 gs. (Colonel Leslie, M.P.); the very cheap Castianira, 130 gs., and Mildred, 62 gs. (Mr. Macintosh), whose commission, both for this heifer Rosedale and Rose of Hope, was held by Mr. Strafford; Ladye Edburga, 80 gs. (Captain Oliver); Rose of Hope, 125 gs. (Mr. Gibson); and Victoria Lily, 71 gs. (Sir A. de Rothschild). Among the bulls which made above 50 gs. were Brian Borue, 72 gs. (Mr. Butler); Pan, 51 gs. (Mr. Sowerby); Prince Victor, 230 gs.; a very good thick-fleshed Prince Alfred bull from the 500-guinea Barnes's Victoria (Mr. Maxwell, of Ireland); British Hope, half brother to the celebrated bull Lamp of Lothian, 52 gs. (Mr. Langston, M.P.); Meteor, 110 gs. (Mr. Pell); and Silverstick—a beautiful combination of Booth and Bates, and perhaps the most elegant bull there, 66 gs. (the Duke of Buccleuch), who also bought two other lots. With the exception of two or three sharp and short showers, which did not make one man leave his post, it was a very pleasant afternoon, and was wound up by the exhibition of Spicey's calf, which has looks and pace worthy of its great Newmarket neighbour Macaroni. The Branches herd, No. 2, now consists of this little "flyer" and Ravenspur, and about a dozen females, including calves; and we wish her Ladyship every luck in this her second venture into shorthorn politics.

One of the squares in Athens is to receive the name of Palmerston-square.

The Royal Commission appointed to inquire into the condition of the sea fisheries of the United Kingdom have commenced the inquiry at Cullercoats, on the Northumberland coast. They will visit Newbiggin, North Sunderland, and Holy Island, and will then continue their labours at Sunderland, Hartlepool, Hull, and other fishing-stations southward.

The first half-yearly meeting of the railway companies amalgamated during the last Session under the title of the Great Western took place, yesterday week, at the Paddington terminus. The report was adopted, but not without some remonstrance from those among the shareholders who objected to the grant of the retiring pension to Mr. Saunders, the secretary.

According to the last census, the number of noblemen in the Austrian States amounts to 250,000. Hungary possesses the greatest number, having 163,000, among whom are mentioned four princely families, 84 with the title of Count, 76 of Baron, and 300 simple nobles. Galicia has 24,900 noblemen; Bohemia only 2260, which are divided into 14 princely families, 172 Counts, and 80 Barons.

The *Gazette* of yesterday week records the appointment of Sir Henry Barkly, K.C.B., to the governorship of the Island of Mauritius and its dependencies. Major Robert Miller Munday has been appointed Lieutenant-Governor of the island of Grenada; Mr. Benjamin Way, chief magistrate, and Mr. Thomas Mayne, stipendiary magistrate, of the settlement of Lagos; Mr. T. Mildmay Sherrington, Attorney-General of Grenada; and Mr. James Meagher, Superintendent of Public Works for the island of Trinidad.

ST. ANDREW'S HALL, NORWICH.

ALL the performances of the musical festival at Norwich took place, as on former occasions, in St. Andrew's Hall, the repairs, decoration, and restoration of which have made rapid progress, under the superintendence of Mr. T. D. Barry (surveyor to the Council of the city of Norwich and architect to the Corporation), since the last festival. This building has been aptly designated as a "noble structure in the Perpendicular style of architecture, with some parts of earlier date." What has recently been effected in the way of restoration may be seen by the subjoined extract from a description prepared by Mr. Barry:—"The roofs have been stripped, repaired, and covered with new lead. The internal decorations of the roof have a light and elegant effect. The panels are coloured deep blue, filled in with gold stars; the hollow moulded parts of the timbers are coloured bright vermilion; those forming the arched ribs of the roof, and those surrounding the clerestory windows, being ornamented with gilt flowers at stated distances, and the lower members of the arch ribs being coloured alternately drab and oak colour in a spiral form, to develop its rounded character. The decorations of the aisles include the blue panels and gold stars, together with the vermilion in the hollows of mouldings, the remainder being oak colour. The lighting of the hall is effected by nine brass coronæ, pendent from the centres of the roof timbers, the nave being provided with three of large size and the aisles having each three of smaller diameter. Several rooms have been erected on the north side for the use of committees.

The whole of the internal stonework has been scraped and restored, including the beautiful moulded bases of the columns, which had been nearly destroyed. The east wall of the nave has been removed, and a stone arch, nearly the entire breadth of the nave, has been inserted, by which the space formerly known as the tower of the Dutch Church is added to the hall; within this increased space, and extending as far as the dais in front, the organ and orchestra are placed, by which arrangement accommodation for nearly 500 additional sittings has been obtained in the hall. A new western window of great beauty has been erected instead of the old one, and is thrown open to the hall. The aisle windows at the north, south, and east have been restored and re-glazed, and the walls repaired and faced with flintwork. A new south porch of suitable character has been erected in connection with the principal door. The west wall has been almost rebuilt and flint-faced, and a spacious and handsome door provided under the great west window."

All the chief vocalists and instrumentalists have expressed their opinion that the present position of the orchestra, about which there had been some difference of opinion, is a decided improvement; that they can sing with less exertion; that the voice does not recoil as it did in the orchestra as formerly placed; and that the orchestral and choral effects are much improved.

THE DONCASTER CUP.

THE contest for this Cup, which began with the century, and can reckon Tramp, Catton, Filho da Puta, Lottery, Fleur-de-Lis, Mulatto, Voltaire, The Saddler, Rockingham, Tomboy, Touchstone (twice), Beeswing (four times), Don John, Alice Hawthorne (twice), Sweetmeat, The Hero, War Eagle, Chanticleer, Cancroa, Voltigeur, Teddington, Virago, Rataplan, Fandango, Velette (twice), Saltarac, Kettledrum, and Tim Whiffler among its winners, can now boast of another really good winning name in Mr. Naylor's Macaroni. As in 1861, when Kettledrum and Brown Duchess met, the race resolved itself at the finish into a struggle between the Derby and Oaks winners, and Macaroni gave 7lb. and beat Queen Bertha by a length and a half. The fact of his always running with his tongue out may deceive people a little; but the general impression was that Challoner had to "ride him out." Blue Mantle, Golden Pledge, Rapid Rhone, and Drummer Boy also started, and finished in that order "all over the course." The Cup, which is destined to grace the sideboard of Hooton Hall, is a silver group, manufactured by Messrs. Garrard, and representing the fight of St. George and the Dragon.

THE DONCASTER CUP.

PARIS FASHIONS FOR OCTOBER.

ON the first signal of declining weather the Parisian notabilities and the French Court abandon the *eaux* and the *bains de mer* to return either to the great capital or to scenes where formality and ceremony take the place of the comparative *sans façon* of the bathing localities, or of the establishments famous for their mineral curatives. Even in mid-September Paris begins to look itself again by the reappearance of many of the celebrities of the fashionable world.

The actual diminution of the temperature has necessarily occasioned some changes in the costume of the whilom absentees; and one of the most striking features in the alterations introduced is the sudden appearance of a number of very beautiful cloaks, or camails, as they are more generally called, in woollen plaids, which, according to the best modistes, are decidedly adopted for the present season and for that upon which we are about to enter. Where so many varieties of tartan exist the choice becomes somewhat difficult. The Scotch blue and green (of the famous clan of Marie Stuart) is very pretty, when perfectly fresh; the white, red, and green is also recommendable; but the selection of colour, as well as the size of the pattern, usually large for these new camails, must depend in a great measure upon the composition of the remainder of the toilet, as well as upon the face of the wearer.

Little is to be said at present on the subject of the ordinary dress bonnets. For the country, and even in the Bois de Boulogne, the round hats are still worn; they are, however, not admissible for ceremonial visits, which are scarcely the mode in the month of September. Rumour says that next month will witness wonders in the way of fresh experiments in the chapeau department, and of ornaments of altogether a new style. For the transition period, crape bonnets, rice-chip bonnets with feathers, and straw bonnets ornamented with flowers or ribbons, or both, are worn alternately, according to the requirements of the toilet.

For dinner or evening parties, ladies' dresses are worn rather *décolleté*, but provided, except for grande toilette, with a pelerine either of crape, tulle, or gauze, trimmed with blonde or lace. For more elegant attire still, suitable for the theatre or for a conversazione, a shawl of *dentelle d'Angleterre*, covering the shoulders and fastened with a brooch of precious stones, is in the best taste.

THE ILLUSTRATIONS.

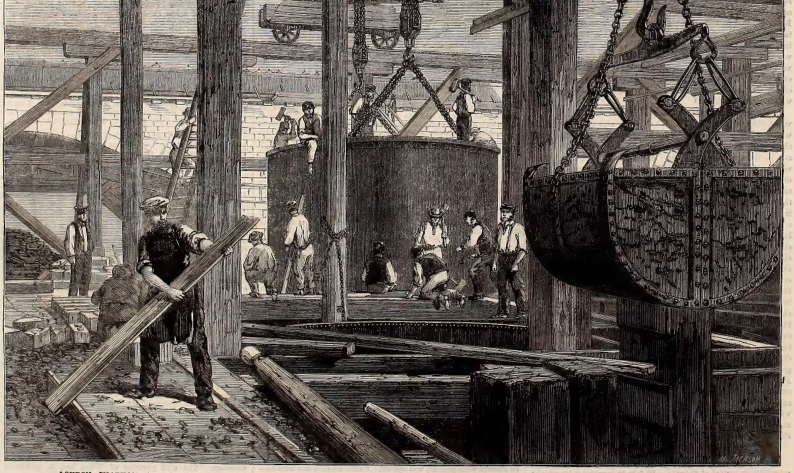
Fig. 1. *Costume d'Amazone.*—This elegant riding-habit is in light black cloth, the corsage being trimmed with passementerie and grelots. The sleeves are close-fitting, with jockey in passementerie. Upright linen collar, fastened by a narrow pink cravat; undersleeves of organdi muslin, with deep linen cuffs. Black straw hat, ornamented with large velvet bow and two rich feathers.

Fig. 2. Dress for an Evening Party.—White organdi robe, provided with three bouillons at the bottom of the skirt; over the middle one, at intervals, are small bows of guipure, the description of trimming constituting the ornament of the remainder of the skirt and of the waistcoat-fashioned corsage, which is richly trimmed in the style shown in our second Illustration. The sleeve is rather ample for the present mode, but is ornamented to match. Full-dress cap in tulle, with pink velvet bow and floral ornaments in front.

Fig. 3. *Walking Dress.*—Light brown silk dress, with three fluted flounces edged with narrow black velvet. The corsage is round-waisted, buttoned in front, and fastened with a narrow russia leather ceinture. The remainder of the dress is very plain, the only additional ornament being that of the narrow ruching with black velvet edging on the sleeve. Straw bonnet, edged with blue silk, and trimmed inside and out with a profusion of lace and velvet ornaments.

PARIS FASHIONS FOR OCTOBER.

LONDON: Printed and Published at the Office, 198, Strand, in the Parish of St. Clement Danes, in the County of Middlesex, by GEORGE C. LEIGHTON, 198, Strand, aforesaid.—SATURDAY, SEPTEMBER 26, 1863.



THE ILLUSTRATED LONDON NEWS.

Nos. 1224, 1225.—VOL. XLIII. SATURDAY, OCTOBER 3, 1863. TWO NUMBERS AND COLOURED SUPPLEMENT } TENPENCE

THE CHANNEL FLEET.

ALTHOUGH in this country we have no great liking for pageantry, yet we are not wholly without our Royal progresses, and at this time of the year our governing classes are in the habit of showing themselves to the more or less admiring public in the provinces. This year we have been treated to a novel kind of public demonstration, and the feelings of the people have been appealed to by a very national exhibition of one of our sources of strength and power. At opportune moments we have had great naval reviews; but it is at least unusual, if not unprecedented, for a squadron of vessels of war to visit most of the great ports of the United Kingdom, apparently with a view to the lionising of officers, men, and ships. If it were intended as an experiment on the feelings and sympathies of the people, and perhaps one not wholly without ulterior views, it has been eminently successful. The Channel Fleet will this week have finished, as it were, a voyage of discovery along the shores of the British isles, and careered proudly through all their narrow seas. It would have been a heavy blow and great discouragement if this imposing representation of our Navy had been received otherwise than it has been in all parts of the kingdom. A very creditable, though almost jealous competition sprang up in all our great maritime towns for the honour of being the hosts of the squadron, and the official act of saying "No" gracefully has been sufficiently tested; while it is quite certain that wherever by its presence the hearts of Englishmen, Scotchmen, and Irishmen have been explored, they have been found, with scarcely an exception, loyal and warm in their feelings of a common nationality.

It is true that amidst the gratulatory shouts which welcomed the fleet during its triumphal march (we have excellent poetical authority for applying this word to ships) there arose, in rare instances, some faint murmurs of dissent from the popular suffrage; but it was hardly surprising that, in a case like this, a slight display of those national peculiarities which, despite the union of the three kingdoms, are not quite extinct, should have been evoked. The story of the outraged feelings of a few of the stricter Sabbatarians of the Church of Scotland on account of the ships being open to visitors on Sundays is rather an old one now, and the attempt to carry out their conscientiously rigid principles on the part of the gentlemen in question was at the time swamped by the popular determination to have its own way. Equally ineffectual was an effort on the part of a fanatical professor of Irish disaffection in Dublin to disclaim for Ireland any participation in the historic glories of the British Fleet, and to cavil at that symbol of the power of the empire which he and his co-thinkers, whoever they may be, are so eager and so resolved to renounce. The answer to these ravings of pseudo-patriotism has been found in the reception of the squadron in Dublin, which has proved a fitting sequel to the ardent manifestations at Cork and Belfast. Although it is the fact that the predilections of that part of the Irish population amongst which recruits for our warlike services are sought, tend rather to the Army than to the Navy, yet the geographical position of Ireland and her capabilities for maritime enterprise, especially along the western coast, have caused a sufficient leaven of sailor feeling to exist amongst her people; and it would be difficult to persuade us to believe that Irishmen as a nation repudiate any desire to appropriate to themselves a share in the achievements of the Navy.

LONDON, CHATHAM, AND DOVER RAILWAY-BRIDGE WORKS AT BLACKFRIARS: SINKING A CYLINDER FOR ONE OF THE CIRCULAR STONE PIERS.—SEE PAGE 345.

It was but natural that enthusiasm on behalf of a naval force should have reached its highest point at Liverpool. Apart from the circumstance that this was the first time in which a body of our maritime fortresses floated on the bosom of the Mersey, the essentially seafaring character of that great port was directly appealed to. In such an emporium of a commerce which exists only by its connection with shipping it must have been a peculiar gratification to the inhabitants to see for themselves the kind of guardians of the deep which this country maintains for the protection of its mercantile interests. At Liverpool we are opened to the commerce of mankind some of the finest docks in the world, and every special adjunct to navigation exists on the grandest scale. If there be any object of British policy in which the interest of Liverpool is concerned, it is that which relates to the maintenance of our naval power, on which depends the safety of that immense amount of treasure which England always keeps afloat upon the seas. There was, besides, a sentiment involved in this visit of the Channel Fleet to the great northern seaport. In the southern part of the kingdom people are apt to think with what expedition—it is so connected with the great naval arsenals and harbours which are established in the counties antipodal, so to speak, to Lancashire—that it has become almost an institution of their own. The main purpose of a Channel Fleet being, as we have pointed out in a previous issue, it is a matter of course that such a naval force should have its most constant cruising-place in southern waters; but it is at least good policy to allow those more remote districts of our coasts, where the need of naval defence is less obvious, to see occasionally that there is an efficient naval squadron ready for service, within the province of which is the whole circuit of the United Kingdom; and which, if need be, could very materially enlarge the meaning of the word channel, as it is applicable to its duties and its capabilities. Something like this was probably working in the mind of Liverpool when it suggested such really magnificent hospitality to the officers and men who sail under Admiral Dacres's flag. Everything that occurred was happily calculated to create goodwill and sympathy between the naval and mercantile services. Testimony was probably borne to the admirable conduct of the seamen of the fleet; and, if it were needed, a splendid example of the effects of discipline and good treatment was held up before the sailors of the mercantile marine; while in all the characteristics of the popular true British Tar the crews of Mr. Majesty's ships came out with peculiar strength and efficiency. If on the one side there was an ovation, on the other there was a great moral and professional triumph.

We do not know whether, as we have hinted above, any motives of Admiralty policy dictated this progress of the Channel Fleet; but one thing suggests itself in connection with it which is of no little importance. This naval demonstration at the principal seaports of the kingdom is, we think, calculated to have a considerable influence on the fortunes of the Naval Reserve. That most valuable institution has succeeded to an extent which its most sanguine originators scarcely ventured to predict for it, and it has reached such a point that it may be said that the once-difficult question of manning the Navy has been nearly solved. It is not only possible, but very likely indeed, that the appearance of a very large body of our ships in the service of the Crown, under such circumstances as those in which they have lately figured, will operate insensibly on the mind of many a private sailor who has been reluctant to enroll himself in the Naval Reserve; and it will be surprising if the returns of accessions to that force in the next few months do not show a large increase. At Liverpool such a stimulus has been especially wanting, as it happens that that port supplies relatively the very smallest number of men to the Reserve force. If nothing else is the practical result of the jovial intercommunication of the services in the mercantile harbours, a great advantage will have been achieved.

In the midst of all the enthusiasm and the congratulation to which this naval demonstration has given rise there ought, as we think, to arise a small voice of warning. Doubtless, the ships of the squadron which have been so deservedly fêted are in their way magnificent. Amongst them are the pioneer vessels of the iron fleet which is ere long to supersede the tra-ditionary wooden walls of Old England. The question involuntarily arises, ought they to represent the naval preparation of this country? Are they, in their equipment, in their ordnance, in their defensive elements, such as to put us above, or even on a par, with at least one foreign navy? A very important paper has just been made public in which the comparative strength and efficiency of the French and English navies have been elaborately detailed, and if the writer—a Frenchman—has set down his account fairly; the result is at least such as to lead to serious consideration, if not to active operation, on the part of the naval administrators of this country. We do not pretend, in this place or at this moment, to enter upon the delicate of the subject: we will not venture to make suggestions of what; but it is not beyond our province to urge that it would be unwise to take for granted that all is perfect and as it should be because our Channel Squadron has ostensibly made a great display of naval power in our great seaports. It is not too great a concession on the part of the Government and the Admiralty to admit that, though much has been done, much remains to do before the Navy of England is once more supreme. Not long ago it was our boast that we were in no want of ships, while in a whisper we confessed that we needed men. Now we have got the men, let it not happen that we shall want ships of the right kind.

Sir W. Atherton is said to have resigned the attorney-generalship on account of ill-health. He is to be succeeded in his office by Sir Roundell Palmer, now Solicitor-General; and Sir Collier's name is mentioned in connection with the latter office.

FOREIGN AND COLONIAL NEWS.

FRANCE.

The Emperor remains at Biarritz. He has been visiting M. Fould, at Tarbes. On his return from Tarbes on Saturday last the Emperor reviewed the troops of the garrison of Bayonne in the Place d'Armes. The review was followed by a distribution of the usual decorations and promotions to officers, sub-officers, and soldiers was made; the troops fired the usual salute, and the Emperor returned to Biarritz.

Baron Gros has returned to London to resume his diplomatic duties, but there are rumours that he is shortly to be replaced by Count Walewski. Prince Napoleon has also arrived in this country. His journey is stated to have no political bearing.

M. Prosper Lhuys left Paris on Sunday week the members of the Mexican deputation.

M. de Girardin's property has at length brought down a warning upon the *Presse*. Nominally, it is not indicted for the stinging article on ministerial responsibility, but for a subsequent article of a much milder character. The *Avenement* charges the attack with "describing the management of foreign affairs as causing uneasiness to the country, and detrimental to commercial and financial interests."

The division of iron-plated vessels collected at Cherbourg has put to sea. It is to double the Isle of Ushant and steer towards the coasts of Spain. Admiral Bruat's flag is to be hoisted on board the *Invincible* to-night without anchoring. Vice-Admiral Penaud, president of the commission charged to watch the experiments, hoists his flag on board the Solferino. The other members of the commission are distributed among the four frigates which, with the Gloire, form the division. These are the Couronne, the Magenta, the Invincible, and the Normandie. The steam advice-boat Talisman is placed at the disposal of Vice-Admiral Penaud for the service of the division during the whole course of the experiments.

By virtue of a decree dated the 22nd ult., modern history will henceforth be studied in the French colleges. Such writers as Hegel, Simonde, St. Simon, Miguet, and Henri Martin have now a place in the school-books.

The Minister of Fine Arts has announced that the Exhibition of the Works of Living Artists is to be held next year. Artists will open on the 1st of May and close on the 15th of June. Foreign as well as French pictures will be admitted. The price for exhibition are to be sent in between the 10th and 20th of March next.

Amongst the sights of Paris there is now open at the Great Exhibition Building, in the Champs Elysées an exposition of objects of design as connected with house decorations, furniture, and, in fact, in the useful arts. The collection is formed of articles contributed by the Paris and provincial schools of design, whilst the ground floor of the building is filled with shops, where the tradesmen of Paris show their goods for sale.

Count Nieuwerkerke has addressed a report to the Minister of the Imperial Household and the Fine Arts on the development of the museums of Paris and the environs since 1850. Within that space of thirteen years the Louvre alone has received 1,500 objects before collections of Egyptian, Assyrian, Greek, and Roman antiquities, of the Renaissance and modern times, of American antiquities, and lastly, of Byzantine and Arabo-Roman antiquities, arranged at Saint-Germain. Among the various archæologists who have distinguished themselves by their zeal during their travels, or otherwise, in collecting relics of the olden time, we perceive the names of Auguste Mariette, for his researches at Memphis; the Duc de Luynes, for his liberal support of M. Mariette's researches at Sisa, for various antique busts found at Naples, in the Crimea, and in France. The Museum, which at Saint-Germain at present is but still in its infancy, already contains a vast number of curious objects, such as flint implements, and other relics of the age of stone; bronze and weapons of the age of bronze and iron, &c. The improvements effected during the above period comprise the opening of new exhibition galleries, the formation of a library for the use of artists, new drawings at the Louvre, the re-organisation of the copperplate department, the restoration of the fountain of Diana, new printed catalogues, and the foundation of the museums of the Sovereigns of France, the Museum Napoleon III., and that at Saint-Germain.

Mr. Charles Green continues to make his balloon ascents, and there is likely to be a series of last nights. One of the most popular features of Mr. Green's displays is, that the voyaging not only instructive but pleasant; so he has constructed reading and billiard rooms, and a photographic studio in the car, ready to be used when required.

An attempt to cultivate cotton has been made in the Jardin des Plantes at Clermont, by the Société Impériale d'Agriculture, which has been attended with success. Several feet of ground were sown with cotton seed brought from America. The cotton plant has blossomed, and, should the winter prove fine, the inhabitants of the garden expect to gather a plentiful crop.

The Fair Trade movement launched by sportsmen this season that there is a great scarcity of quails in every part of the country.

Much rain has fallen and the provincial journals contain accounts of inundations in many places. The Rhône has overflowed its bed in the neighbourhood of Lyons, and submerged much of the adjacent country. The Saône has also left its banks, and swollen. Paris the bed of the Seine, which was recently dry for some distance from its banks, has been filled by subsequent rains, and at the scale of the Pont Royal marking 4 ft. above the summer level.

THE FRENCH IN MEXICO.

Wednesday's *Moniteur* publishes despatches from Mexico to Aug. 24, which assert that the Juarez party is fast dissolving; that Doblado is about to retire to the United States; that San Luis Potosi is about to proclaim Maximilian; and that Juarez is powerless. Other things, all satisfactory to France, are immediately to happen. The Emperor has established order in Anc. 24, with much display. "the population taking part in it with the utmost eagerness." Le *France* has also news from Mexico, to the effect that the Indian population are disposed to favour of the French and Maximilian. In fact, if we are to believe those journals, everything in Mexico is taking the precise turn which the French Government most ardently desires, and the Golden Age is likely to return to one country in the world at least.

By the arrival of the West Indian mail-steamer we have news of the recall of General Forey. General Bazaine had taken command of the French troops.

SPAIN AND MOROCCO.

It is officially announced that the Emperor of Morocco, acknowledging the justice of the complaints against him, has given his will to send a force under Muley Abbas to severely chastise the Riffs.

PORTUGAL.

The young Queen, daughter of King Victor Emmanuel, has given birth to a son, who received the name of Luis Infante de Bragança well.

Lisbon has been visited with heavy rains and thunderstorms.

The whole of wine and oil is reported to be safe.

The South-Eastern Railway is open for traffic. This line has been in progress for the last three years, and its completion reflects great credit on all parties engaged, inasmuch as the work has been of the heaviest description. The contractor is Mr. Edward Price, the chief engineer Mr. C. D. Archibald, and the superintending manager Mr. E. D. Rose. On the occasion of opening the line on Monday, a dinner given by Mr. Edward Price, to which about 130 invitations were issued. Among the guests were the Duke de Loulé (President of the Council), Viscount Sa da Bandeira, Count de Mello, Councillor Siagna Morta, and Councillor Losa.

BELGIUM.

The annual fêtes in commemoration of the national independence of Belgium commenced on Thursday week at Brussels. The public buildings were hung with flags, and a solemn Mass was performed at the Church of St. Gudule for the souls of those who fell in September, 1830. An agricultural and horticultural exhibition, at which the Duchess de Brabant, her brother the Archduke Joseph, and the Count de Flandre were present, was opened. Public amusements were continued throughout the day, and the principal edifices were illuminated in the evening.

AUSTRIA.

The Emperor arrived on Tuesday at the shooting fête at Innspruck. His Majesty remains incognito.

The Imperial rescript, requesting the Transylvanian Diet to send deputies to the Reichsrath, has been dispatched to Hermannstadt.

The Chamber of Deputies, at one of its late sittings, voted the abolition of the laws which, in a great number of countries of the empire, impose illegitimate authorisations for contracting marriage. That regulation, the antiquated remnant of ancient laws, had already, in most of the provinces, become a mere formality.

The Austrians residing in England have forwarded to the Emperor Francis Joseph an address, congratulating his Majesty on his recent development of liberal policy in Germany, and hailing the just pride which they entertain of their country and their Sovereign, whom they term "the generous, the pride of Austria, the regenerator of Germany."

GERMANY.

A great meeting of the National Unions of Germany has just taken place in Dresden. M. Schulze-Delitzsch, the distinguished Prussian representative, delivered a speech, in which he described several of the proceedings of the late Congress of Sovereigns. He declared that Austria had acted solely out of consideration for her own dynastic interests, and he advised them to return to the Constitution set by the Frankfort Parliament of 1849. This speech is stated to have produced a great sensation.

The National Union will shortly hold a meeting in Leipzic.

PRUSSIA.

The new Exchange in Berlin, which is situated in Burg-Strasse, on the right bank of the Spree, was opened by the King on Monday. His Majesty said:—

I cannot but consider it a great happiness that I was present at the laying of the foundation-stone of this building, and also at its opening. We have here a proof that the efforts of the merchants of Berlin has established a work which is worthy of the capital and of Prussia. Commerce is the river of peace, and confers riches and gain on all. It is my prayer early and late that this wealth may abide by the country and by the capital. It is the task of the Monarch, the Government, and the people to maintain this blessing. I hope that circumstances will favour that the prayer, for the service of which we devote to-day, may also gain more and more in importance by the transactions within it. I offer my congratulations and I thank the merchants of Berlin that they have intervened in promoting the work and in bringing it to completion. Once again I say may sincere congratulations.

The Crown Prince and Princess, with their children, left Potsdam on Monday evening on a visit to this country.

The Berlin official paper publishes a circular issued by the Minister of the Interior calling upon the chiefs of the provincial governments to devote their attention to the conduct of the public functionaries during the forthcoming elections. The officials of all kinds are expected to lend their entire support to their Government, and even a passive or neutral attitude will be considered a proof of want of devotion to the Sovereign, and a breach of their oath of allegiance.

DENMARK.

OPENING OF THE RIGSRAAD—SPEECH OF THE KING'S SPEECH.

The Rigsraad—the common assembly for Denmark and Schleswig—was opened at Copenhagen on Monday.

The President of the Council read the Royal speech, of which the following is a summary:—

Each nation has called a Danish Prince to fill the vacant throne of Greece. This fresh union may lead to happy results.

I have ordered bills to be laid before you relating to a new Constitution for Denmark and Schleswig, which I hope will be found upon the Constitutional basis. Under the new Constitution the Rigsraad will no more each power than it will be competent to decide upon matters relating to Schleswig, and as a law period bring about the complete constitutional development of the country.

Other important propositions will indicate how, with the co-operation of the people and in accordance with the Constitution, the finances of the country and the peace of the kingdom may be settled.

The dispute between Denmark and the federal Diet appears to be approaching a close, as the resolutions passed at the Congress of German Princes anticipate a settlement of the question of the Federal Execution, as conformity with the Treaty of March last. I trusted that an understanding with the federal Diet would be arrived at, and that the Federal Execution may be withdrawn from Holstein.

Our last despatch to the federal Diet declared our readiness to carry out its resolutions in the matter, and we feel ourselves to be competent with our sovereignty over the federal provinces, and did not impair independent legislation in the interest of the kingdom as a whole.

In case our hope should not be realised, it is obvious that it would no longer be a question of the Federal Execution in the case of the Duchies, but a defence of Denmark, who is firmly determined to protect herself against any attack.

The speech concludes by expressing a conviction that his Majesty does not stand alone, and that he can be certain that he has hopes on the people's love of their country and of liberty.

THE NEW CONSTITUTION FOR DENMARK AND SCHLESWIG.

The President of the Council laid before the Rigsraad, on Tuesday, the draught of a new Constitution for Denmark and Schleswig, by which all questions common to the two provinces are to be regulated. It shows great progress in the development of liberal ideas in Denmark.

A property qualification will only be required of members of the Upper House. Members of the Lower House will be freely elected without any qualification relating to the income of either the electors or the persons elected.

All matters concerning Denmark alone will be regulated by the Rigsraad, and those relating to Schleswig by the Diet of that province.

In view of the probable rupture with Germany, the Government has demanded of the Rigsraad authority to construct an iron-clad battery and to iron plate a frigate, and, moreover, to call out 5000 militia.

In a note which is dated the 19th of July, but which was published yesterday week in the *Berlingske Tidende*, the Danish Chief Minister declares to the British and French Governments that a "federal execution" in Holstein will probably and justifiably be regarded by Denmark as a declaration of war on the part of the German Diet. A war may ensue if the Western Powers do not protect Denmark; and Sweden "may perhaps" be eventually be compelled to take an active part, inasmuch as the subjugation of Denmark would endanger the interests of Sweden."

THE POLISH INSURRECTION.

Accounts of struggles between the Russians and the Poles continue to be received. A telegram from Thorn reports a defeat of the Poles, with considerable loss in the government of Plock; while, on the other hand, we receive from Cracow accounts of victories obtained by the insurgents in two or three encounters. Another action was fought on the 27th ult. near Sunworno, in the Wojwodschaft of Radnsk, the insurgents defeating the Russians on the 28th ult. at Mirow, in the Wojwodschaft of Cracow, between the insurgent chief Otto and the Russians. Several waggons with their arms and horses, were captured.

The National Government has decreed a life annuity to the sisters of the fallen insurgent chief Lelewel.

The *Czas* says positively that the attempt on the life of General Berg was made by insurgents in the street, and not by the inhabitants of the houses. A shot was fired and two hand-grenades were thrown down. They were not Orsini bombs, but simply hand-grenades filled with gun-cotton.

The Polish National gendarmes, Tanisewski, Raczucki, Kosinski, Jagorowski, and Zaluski, were shot early on Wednesday morning in five of the public squares of Warsaw.

The Government has discovered printing-offices and military tailoring establishments in some convents of Warsaw, and has resolved upon successively occupying all the convents.

General Monravieff has given orders to transport all the small nobility in Lithuania to the remotest part of Russia; and, as these are entire villages occupied by this nobility, these villages are depopulated, and the inhabitants transported into the Oural or the Caucasus. The civil governor of Wilna has, in pursuance of Mouravieff's orders, instructed the military authorities to transport 1000 of these nobles, guilty or innocent.

GREECE.

King George of Greece arrived at Berlin from St. Petersburg on Monday morning. His Majesty was received at the Silesian railway station by the Danish Minister, M. von Quaade, and was then conducted to the Potsdam railway station, whence he departed at half-past seven for Rumpenheim, near Frankfort.

The Greek National Assembly has voted a sum of 150,000 drachmes for the reception of the King.

The treasury is at present in a better condition than formerly, owing to the National Loan having assisted to collect the taxes in the provinces.

The elections in the Ionian Islands have terminated, and the result so far is in favour of the union with Greece.

A sanguinary riot at Chios has rendered it necessary to send a frigate from Smyrna to that island.

TURKEY.

The Syrian indemnities will be paid in the new issue of 30,000,000 of Consolidés.

The question of foreigners holding property is approaching a settlement.

It is reported that Franco Effendi will succeed Doudri Pacha as Governor of the Lebanon.

The statutes of the Varna Railway have been approved.

Sir Henry Bulwer has returned to Constantinople.

AMERICA.

WAR NEWS.

There is no important news from Charleston. The Federals were engaged on the 15th ult. in shelling Fort Moultrie from Morris Island, and the Confederates were maintaining a steady fire upon the Federal position. A few incidents are reported. A magazine in one of the batteries upon James Island accidentally exploded on the 12th ult., causing the death of a Lieutenant and five men. One of the 800-pounder Blakely guns bursted on the 13th. Another burst on the 16th, owing to the piece being too much elevated in an attempt to throw a long shot. General Beauregard, it is stated, unfavourably regards the use of these monster cannon, and has telegraphed to the authorities at Richmond not to send any more of them. Captain Gilmore has tendered his resignation on account of a disagreement with Admiral Dahlgren. It is supposed the latter will be superseded. General Beauregard's official report of the capture of the Keystone State upon Sumter, dated the 9th ult., states that the captures were 111 officers and upwards of four hundred men, all told.

The news from Virginia is important. General Lee has fallen back from the line of the Rappahannock towards Gordonsville. General Meade's army is in advance, but has not passed that line nor yet succeeded in passing the Rapidan, although there had been much skirmishing, and although on the 13th it was reported that the Confederate army was too large and was about to retire on Richmond, or even, according to another report, to evacuate the state of Virginia. It was said that General Johnston had been summoned to command the Confederate forces in Virginia, in the room of General Lee, who had proceeded to the South with the important purpose, at least a large portion of General Lee's troops had been moved southward to join General Bragg—General Longstreet's corps having already arrived at Rome, in Georgia.

General Bragg was believed to be strongly established near Lafayette, in Georgia; there had been minor engagements between different divisions of his army and the Federal troops in which the Confederates had the advantage. The Federal General Rosecrance was said to have assumed a strong defensive attitude at Chattanooga. It is asserted that General Burnside, at the urgent request of the President, has withdrawn his resignation.

The capture of Little Rock, the capital of Arkansas, by the Federals is officially confirmed. The Confederate commissariat stores had been burned by the Federal cavalry.

A disaster has been experienced by a portion of the Federal expedition which, under General Franklin's command, had left New Orleans for Texas. An attempt to effect a landing at Sabine Pass had been repulsed by the Confederates, with the loss of two gunboats and a transport. The Federal fleet and part of his crew were asleep, the captain and the other two succeeded in escaping them, and afterwards the watch on deck, saving their escape; the vessel took her into the port of Havannah.

Some of the more recent doings of the Alabama and her consorts will be found recorded in our Cape news.

MISCELLANEOUS.

President Lincoln has suspended the Habeas Corpus Act throughout the United States in all cases where the military, naval, or civil Government officers hold persons under their command or custody as prisoners, spies, aiders, or abettors of the enemy, members of, or thoughted, enlisted, or mustered officers, soldiers, or seamen, in the Federal service, or deserters. Proclamations will be constituted in force during the duration of the rebellion, or until President Lincoln sees fit to revoke it. The Judge of the United States District Court decided that President Lincoln's proclamation prevented writs of habeas corpus being granted in cases occurring before or after its issue.

The Democratic party have carried the State election of a large majority.

The Government has commenced to construct a national railroad between Danville, Kentucky, and Knoxville, Tennessee.

A fearful state of affairs is reported to exist on the Kansas-Missouri borders. The war is in future to be largely carried on by guerillas throughout the department of the Missouri.

The Admiralty has announces the death of General Sam Houston, of Texas, at his residence in Huntsville. He was seventy years old.

A deception of Memphis, republished in the New York papers, says that a fearful riot occurred in Mobile on the 4th ult. A party of soldiers wives, to the number of 600, paraded the city with exciting mottoes on their banners, such as "Bread or Peace." The soldiers offered no opposition to the display; but, in some instances, the citizens attempted to arrest the progress of the women. Intense excitement prevailed.

Advices from California are to the 18th ult. The steamer Nebraska had arrived at San Francisco, from Oregon and British Columbia, with 250,000 dols. in treasure. Cars had commenced running from San Francisco to the Alameda seventeen miles of San Joaquin Valley Pacific Railroad. Twenty-five miles would be in order for passenger cars within a month. The rest of the road was under way and completed by January. The steamer Senator had sailed for the southern coast, completely loaded with passengers and freight for the mines lately opened 150 miles east of the Colorado River, and also for the San Francisco mining district. The excitement in the southern part of the State over the new district was very great, and people daily were flocking in that direction. Parties recently returned to Los Angeles say that a considerable quantities of gold report discoveries of valuable quartz lead in the San Francisco mercantile and gold and such specimens.

The extra Session of the State Legislature of Virginia was opened on the 17th ult. at Richmond, when Governor Letcher delivered an unexceptional message. He observes that the Federals, having found themselves incapable of making head against the regular armies of the South, had resorted to a policy of desolation, and were sending their columns into Southern territory on missions of devastation, pillage, and havoc. To repel these raids it was necessary to raise a new species of local force; but the task had encountered much. The entire military force of the State, militia included, had been absorbed by the armies in the field, so that the Commonwealth remained without any organised levies whatever. Every fighting man, as fighting men are usually defined, had been already carried off, and the new local militia had to be hastily improvised from such imperfect or neglected materials as remained. Every boy over sixteen, and every man under sixty, should be called, the Governor thought, without exception, to the service of the State. Hitherto, certain religious communions have been exempted, for conscience sake, from military duty, and allowed to compound for such service by a money payment; but Governor Letcher thinks they should be indulged no longer, and required, at any rate, to work on the fortifications if they cannot actually fight. All foreigners, and all strangers travellers and temporary residents, share the obligations of native Virginians, and carry arms for the State. By these means, and by the enrolment of every man and boy not physically disabled, the Governor concludes that a local force might be raised of sufficient strength to defend the territory against the inroads of the enemy.

Peace propositions in the Virginian Legislature have been voted down by thirty-eight to one.

WEST INDIES AND INDIA ISLANDS.

The rebellion which broke out in the island of St. Domingo on Aug. 18 caused a terrible sacrifice of property and life. A large number of Dominican Haytiens, having obtained arms and ammunition, attacked three of the garrisons on the northern Spanish side, destroying them by fire and murdering all the men, and in some cases, burning them in women and children. On the 27th Porto Plata was invaded by 2000 insurgents, who took possession of the town, but were afterwards driven out by the reinforcements of troops, who arrived by a Spanish steamer. The Colonel of the Spanish troops was killed in the encounter. Large bodies of troops had been dispatched from Havannah and Porto Rico to assist in quelling the rebellion and executing summary justice upon all those taking part with the insurgents.

The prospects of the tobacco crop in Cuba were considered more promising than they have been for the island contains a fine crop and the growers were very sanguine as to the result of the next season.

The Island of Jamaica has had several ingressions of negro labourers from Barbadoes, who had found immediate occupation, and there was every prospect that the great want of the island would be supplied in the shape of a numerous body of labourers.

The Legislative Council at Trinidad met on the 1st ult. The Governor announced the intention of summoning the next Parliament of war Petrel arrived on the 28th. The island had been visited with heavy showers of rain, but no injury had resulted to the crops in consequence. The state of the island continued quiet.

The Barbadoes Legislature met on Aug. 11, and adjourned for two months. The Governor in his opening address to the Council stated improved throughout the island. Labour continued abundant for agricultural purposes, and emigrants were flocking thither yearly.

Jamaica was still suffering from the severe drought—at such so, that in some of the south side parishes crops have entirely failed, and there was much distress prevailing. The rate of wages had become intolerable, and much sickness prevailed. Trade of all kinds was dull.

CAPE OF GOOD HOPE.

The Parliament was prorogued on the 26th. The Governor had announced his intention of summoning the next Parliament to assemble at Graham's Town. Great excitement prevailed at Cape Town in consequence of this arrangement. A large and influential meeting was held on Aug. 17, at which a long series of speeches were made, and a petition to the Queen against the proposed change of site for the Parliament from the metropolis of the colony was adopted.

The ordinance for the House of Assembly to take place in November The Legislative Council will not be dissolved.

The Confederate war-steamer Alabama and Georgia were cruising in the Indian Ocean, and had taken up Portuguese colours. Among them the Tuscaloosa, formerly the barque Conrad, armed as a Confederate cruiser, had on board the Federal Mrs. Semmes, the daughter of a Federal barque Sea Bride within sight of thousands of the colonists as she was running into Table Bay. The United States' Consul protested against the vessel being received into port, but was overruled by the Governor. The Queen's proclamation, it was declared, was decided against both these cruisers, whereupon the Consul protested in the name of his Government, and pointed out that the original cargo of the Conrad, consisting of 1000 bales of cotton, and that the cargo of the Sea Bride would be similarly disposed of.

The Tuscaloosa was to be followed by the Alabama, Georgia, and the Vanderbilt had left St. Helena in chase of the Alabama.

MADAGASCAR.

Telegraphic intelligence from Réunion, by way of Suez, reports that MM. Dupré and Lambert had left on board the French vessel Hermione, awaiting the ratification of the treaty concluded with the Government of Madagascar. The Queen's refusal to receive the Queen's Government towards the French is sufficiently indicated by the statement that the Queen's name was omitted from the list of the active emissaries we have named. The Queen wishes to have the treaty modified, but the French agent demands a full ratification, and threatens, in case of refusal, to cut off all communication with the Government of Madagascar. Meanwhile, the Hermione has not saluted the Mahguey flag.

INDIA.

The *China Mail* gives details of the Japanese outrages on American, French, and Dutch vessels, and of the retaliation by the representatives of the insulted flags. A serious encounter has taken place in Hanchow Bay between her Majesty's gun-boat Lanser, a Chinese steamer, and a number of piratical junks. The Rosina, belonging to Reath and Reath, Port Adelaide, was attacked during her voyage from Ningpo to Shanghai, and carried off into the recesses of that bay.

Tuesday's *Moniteur* publishes a letter from Jeddo, dated July 28, containing details of the chastisement inflicted by Admiral Jaures upon the Japanese Government. The Prince of Satsuma, who alone had fired upon European ships. The letter states that these reprisals produced a very salutary effect. A Japanese Admiral proceeded to Yokohama to take place in the hands of the chief of the French Admiral the model of the flag borne by all the vessels which belong directly to the Tycoon. The object of this step was to acknowledge, on the part of the Government of the Tycoon, the right of foreign vessels to seize all ships which do not show this flag. The letter also contains some details of the manner in which the destruction of the fort was accomplished. The Japanese had displayed great courage in its defence.

The Swiss Federal Council has decided to withdraw their Embassy from Japan, in consequence of the Japanese refusal to make reparation.

The greatest fire that has occurred for many years in Japan took place in Jeddo on the 19th of July. The residences of thirty daimios, several temples, and a vast amount of property were destroyed.

The Engraving of the Imperial Chinese despatch-boat Keangkee, the flag-ship of Captain Sherard Osborn, given in our last Number, was from a photograph by Mr. Beato, of Hong-Kong.

"COOL AS A CUCUMBER."—(To the Editor.)—In reply to your correspondent's query in the issue of the 19th inst., I have occasionally translated into French Mr. Charles Mathews, I beg to state that it is the custom of the French to call a person who is cool in the face of danger at the Lyceum in that year; and that I know of no French farce which in the name of Cucumber. I am fortunate in being an English domiciled author who has made an appearance on the French stage.—BLANCHARD JERROLD.

The Royal Commission to inquire into the condition of the sea fisheries held an inquiry at Sunderland on Monday. A number of fishermen gave evidence, amongst whom were two or three trawlers, who stated that the fish were neither diminished in size nor in quantity by trawling, and that the trawling tended to the increase of fish. One witness stated, however, spoke of the decrease of fish of recent years, which they attributed in part to the deposit of ballast from ships and from the harbour, which filled the fish with which bitterns and crabs resorted. The commissioners visited Hart-spool on Tuesday.

CHURCH AND UNIVERSITIES.

Temple Church, having been thoroughly repaired, will be reopened for Divine service next Sunday.

A new church is in course of erection in St. George's-square, Finsbury, for a district to be taken out of that of St. Gabriel. The Rev. Mr. Walker will be the first Incumbent.

We hear that the long-vacant bishopric of Nassau has been filled up by the appointment of the Rev. A. R. F. Venables, M.A., of Exeter College, and Curate of St. Paul's, Oxford.

The late parochial church of Llanilltern, in the parish of St. Fagan, Glamorganshire, was reopened for divine service on the 20th ult., after having been rebuilt at a cost of £1000, raised by subscription.

Tuesday's *Gazette* announced that her Majesty has appointed to the See of Gibraltar the Right Rev. Walter John Trower, D.D., late Dean of Exeter, and formerly Bishop of Glasgow and Galloway, in the room of the Right Rev. G. Tomlinson, D.D., deceased.

On Thursday week the Bishop of Exeter, assisted by the Bishop of Jamaica, held a confirmation in Exeter Cathedral. Nearly 500 candidates were confirmed, and the cathedral was densely crowded. The aged prelate made a powerful address.

On the 22nd ult. the church of Tunstead, Norfolk, was reopened, after a thorough restoration. The service included the first consecration of the Decorated period existing in the county; it consists of a tower, a nave with two side aisles, and a chancel.

The foundation-stone of a new church, with all the seats free and unappropriated, was laid at Liverpool, on the 14th ult., by Mr. Samuel, M.P., who had given the site at a cost of £1000. The church will be dedicated to St. Titus, and is a simple adaptation of the Geometric Decorated.

Weyhill Church, Andover, after having been restored by Mr. Hakewell, architect, at a cost of nearly £1000, was reopened on Thursday week, when the Archdeacon of Winchester preached, in the absence of the Bishop, who is on his visitation in the Channel Islands.

On Monday the foundations of two new churches in Nottingham, in connection with the parish of Saint Mary, were carried out. The Rev. Canon Brooke, Vicar of St. Mary's, in that town, were laid by the Bishop of Lincoln and Earl Manvers, Lord-Lieutenant of the county. The first churches he has been instrumental in raising two new churches.

The Bishop of Lincoln has consecrated the new parish church of Woodcharter on Thursday week. The old church having fallen into decay, the new one has been erected on the site of the old one, which occupies about a quarter of a mile distant. The cost of the erection has been about £3400. The church will seat about 400.

On the 17th ult., at Stockton, Warwickshire, the parish church was reopened, after a thorough restoration of the nave and aisles, and the exchange of the high pews for uniform open sittings. There are 400 sittings rentock of luncheon at the rectory to the number of 120, while the poorer inhabitants were not forgotten.

Letters have been received from the Bishop of the Orange River Free State, dated from Bloemfontein, on his arrival, with his family, at Cape Town. After the delay of a few days they intended to proceed by the Dane to Port Elizabeth and by their destination. The Bishop has received from them Bloemfontein of a very satisfactory character for the prospects of the mission, and the people are represented with much interest.

Christ Church, Denshaw, Saddleworth, was dedicated by the Bishop of Manchester on Thursday week. It has been erected, furnished, and decorated at the expense of the Rev. Mr. Henry Outcrake, of Lancaster-cottage, Lyne, who have also provided an endowment and erected a parsonage-house. The land on which it stands was given by Lord Saville, of Rastrick.

St. Mark's Church, Preston, erected at a cost of £6000, on a site given by the late Mr. E. Pedder, was consecrated on Wednesday. It is the first church erected for the parish since the church—to which a district is attached—may be mentioned the communion-table and ecclesiastical plate, by Mr. Hardman, of Birmingham; the font, the gift of Miss Clark; the pulpit, by Mr. T. M. Shuttleworth; and the gasaliers, the gift of the Rev. T. Clark. The church has seats for about 1000 persons, and cost £6000.

The Bishop of London has appointed the following gentlemen to be the lecturers in connection with the Bishop's Cathedral during the present month:—Oct. 1, the Rev. Michael Gibbs, M.A., of Gonville and Caius College, Cambridge, Vicar of Saint Botolph, Bishopsgate; Oct. 8, the Rev. Henry Venn, B.D., of Queen's College, Cambridge, secretary to the Church Missionary Society; Oct. 15, the Rev. Henry Wace, B.D., of Exeter College, Oxford, Minister of Curzon Chapel, and secretary of the Society for the Propagation of the Gospel in Foreign Parts; Oct. 22, the Rev. Thomas Jones Pilkington, M.A., of Queen's College, Cambridge, Rector of St. Matthew's, Friday-street.

The opening of Pyrcroes School Chapel, Llandcy, Carmarthenshire, took place on the 16th ult. The service and sermon in English and Welsh in the morning, afternoon, and evening, and the attendance at each was very large. The chapel and schools have been built at the cost of about £240, in a remote part of Llandcy parish, and is to be used as a schoolroom during the week and for Divine service on Sunday. The building (which is in the form of a church), with porch, bell-turret, &c., is fitted up with deals and varnished. It will seat about 200 comfortable persons, and a portion of the room is ruled off for a reading-desk and communion-table.

The following testimonials to clergymen have recently been presented:—To the Rev. Thomas Parker, Curate of Ashton-under-Lyne, a tea and coffee service, together with £100, from his parishioners, after discharging the duties of Curate in the parish for upwards of twelve years; also a silver salver, cruet-frame, and Sunday-schools. To the Rev. J. C. Hose, Curate of the parish of Saint Peter's, Leicester, a coffee service, value £50, on the occasion of his resigning upwards of seventy-six members of the congregation. To the Rev. Thomas Hall, Incumbent of St. Mary's, Scarborough, Yorkshire, a testimonial of respect. To the Rev. R. Covey, a silver pocket communion service, on the occasion of his leaving the parish of Holy Wycombe, by the teachers of the man's evening-school. To the Rev. T. W. Powle, a richly-ornamented silver salver, value £100, by the inhabitants of Staines, as a mark of respect for his services among them as Curate for nearly five years. To the Rev. Thomas Jones, a davenport, writing, and gold pencilcase, by the congregation and Sunday-school of St. John's, Worsbro', Lancashire. To the Rev. Thomas H. Ellis, by the choir.

PREFERMENTS AND APPOINTMENTS.—The Rev. R. Newbery, Vicar of Thruxton, to be Rural Dean in the diocese of Ripon. Rev. T. R. Bruton to be Rector of Aynho, Northamptonshire. Rev. J. Yeo to be Vicar of East Coker. Rev. T. H. Wilkinson to be Incumbent of St. John the Baptist's, Leamington, Deans. Rev. Thomas Dean, The Low Church, Weasle Chapel; Rev. J. Lindsay to Temple Guiting; Rev. J. O. Stallard to Heath and Reach; Rev. W. Bowen to Llanfihangel-y-Creuddyn. Rev. Chancellor The Rev. J. Doe to Jarrow; Rev. R. Bentley to St. Cuthbert's, Darlington; Rev. J. Bramley to Ryhope; Rev. J. Pattinson to Walker; Rev. Hall to Baughton-le-Street; Rev. J. Henderson to St. Nicholas, Newcastle; Rev. J. Turner to St. Hilda's, Hartlepool; Rev. H. Ellis, Rural Dean, the choir.

THE UNIVERSITIES AND PUBLIC SCHOOLS.—The register of members of Congregation for the academical year at Oxford is 785, members of Congregation for the present year. Christ Church has 94 members, Magdalen on Interest of two and Trinity, 72 each; Queen's, Lincoln, Oriel, Exeter, 71, Merton 68, Balliol 67, Brasenose 66, Pembroke 64, Worcester, 59, and Keble 57. Last year Trinity, 72 each; Queen's, Lincoln, Worcester, and Magdalen, 71 each; Oriel, 70; Balliol, 69; Pembroke and Merton, 68; Exeter, 67; Brasenose, 66; and New Inn hall and St. Edmund Hall each one.

At Cambridge the Rev. J. Bell, M.A., of Trinity College, Professor for Bachelors will commence in the Arts School on Friday next. The Voluntary Theological Examination of the Rev. Thomas Worsley Tenn has been Tuesday next. A Fellowship has become vacant at Clare by the death of the Rev. H. F. Hutchenson, one of the Senior Assistant Masters of the University. The Fellowship is appropriated to natives of Kent, with a preference to those born in the county of Essex.

On the 22nd ult. the Rev. R. Woodard, Provost of St. Nicolas' College, after a dinner at his residence, presented to the Rev. Dr. Lowe, the head master and clergy of the neighbourhood, presented to the Rev. Dr. Lowe, the Head Master of the establishment, a set of silver plate, the work of Messrs. Hunt and Roskell, in recognition of his services in bringing the school to its present state of high prosperity. On the following Sunday the plate was put on the table and weighed nearly 100 ounces, was the following inscription:—"This silver salver, with tea urn and tea service complete, was presented to the Rev. Richard Cares Lowe, D.D., Fellow of S. Nicolas' College, and Head Master of S. John's College, Hurstpierpoint, Sussex, as a token of the gratitude of those subscribers, as a memorial to mark the date when, by his ability and exertions, the first public examination was awarded for the sons of the middle classes completed its number of 300 boys."

It is said that the Lord Mayor will succeed to the presidency of the Irish Society, in the room of the late Alderman Humphery.

The Bothschilds have re-constituted their firm, one member, Baron Gustave Rothschild, having retired with six millions sterling for his share of the business. There will henceforth be only four houses belonging to the firm—viz., at London, Paris, Vienna, and Frankfort.

Eight more of the gun-boats at Chatham have been ordered to be broken up. The Cyclops, Phœnix, and Victor, all six-gun steam-vessels, have also been sold to a commercial firm.

The *Panama Star and Herald* of the 8th ult. in its summary of news says that a grand ball given by the Spanish residents of this city on the 21st, in honour of Admiral Pinzon and the officers of the Spanish squadron lying off the harbour."

GENERAL VIEW OF THE WORKS FOR THE NEW BRIDGE OVER THE THAMES AT BLACKFRIARS IN CONNECTION WITH THE LONDON, CHATHAM, AND DOVER RAILWAY.—SEE PAGE 343.

"DIOGENES SEEKING FOR AN HONEST MAN," FROM AN ENGRAVING BY WILLIAM SHARP, AFTER A PICTURE BY SALVATOR ROSA.

To the execution of this Engraving time has been allowed which is not possible in engraving illustrations of current events. As the production of a tolerably well-known line engraving on copper by one of our first English masters, it affords an opportunity of ascertaining the comparative capabilities of wood engraving. If these capabilities have been proved to be greater than is sometimes supposed, we shall be satisfied.

Apart from this, both the original picture by Salvator Rosa and the engraving of it by Sharp, which we have copied, are in many respects interesting. Of William Sharp (born 1749, died 1825) less is generally known than, from his great ability and singular character, might be expected. Like Hogarth (by the side of whom he lies in Chiswick churchyard), he was apprenticed to a bright-engraver, and commenced on publican's pewter pots, but how—for he must have had a master—he acquired the extraordinary skill he afterwards displayed in the "Doctors of the Church," after Guido; the "Lear in the Storm," after West; the "Sortie from Gibraltar," after Turnbull; "John Hunter," after Sir Joshua Reynolds, and several other equally celebrated works, including the Diogenes, is not satisfactorily known. Sharp was almost as wild an enthusiast as poor Blake. For many years he was an entire believer in the immaculate conception of Joanna Southcote, and he even believed in Richard Brothers' mission, as a curious inscription on his portrait of that madman testifies, and of which a ludicrous story may be found in Smith's "Life of Nollekens."

The present situation of the picture, after which Sharp executed the Diogenes plate, has baffled our research. It is not identified at all in Lady Morgan's "Life of Salvator Rosa." It is not mentioned in Waagen's "Art-Treasures in England," nor is it described in any of the ordinary sources for reference. We have an impression that we saw it in a private gallery at Rome, and that it is now in the palace formerly called Pisaro, at Turin. Incidents in the life of Diogenes were, however, favourite subjects with Salvator, and frequently appear both in his pictures and etchings. The figure-pictures of Salvator, we may remark, are not so well known as his landscapes, but they equally display the power and originality of this extraordinary genius. The modern costume and architecture of the background in this picture were very common anachronisms in the works of both Italian and northern painters.

The anecdote which furnishes the subject of this work is one of many illustrating the singularity and insolence which, after all, must be regarded as the grand characteristics of the cynic. Diogenes is

said to have lit a lamp in the daytime and peered about the streets as if earnestly seeking something; being asked what he sought, he replied, "A man." We have retained the title of this picture, which follows the usual version, representing him seeking an honest man. But the point of the story is thus lost. The words in the "Life of Diogenes" by Diogenes Laërtius, are simply ἄνθρωπον ζητῶ—"I seek a man." Diogenes did not seek honesty; he wanted to find a man in whom honesty would be included with many other qualities. It was his constant reproach to his contemporaries that they had no manhood. He said he had never seen men: at Sparta he had seen children; at Athens women. One day he called out—"Approach, all men!" When some approached he beat them back with his staff, saying—"I called for men; ye are dregs."

It is hardly too much to say that the cynical, so-called philosophy of Diogenes was almost as feebly illuminating compared even with the light of nature as his lamp was in the natural day. Examined in the full light of our Christian civilisation, Diogenes himself is far, indeed, from a perfect man. When he had fled from Sinope to Athens, for complicity with his father, the banker, in debasing the coinage, he found himself reduced from splendour and extravagance to squalid poverty, and thenceforth made a virtue of his necessity. The magnificence of poverty, which Antisthenes proclaimed, attracted him, and he became a pupil of the cynic. "Poor," says Mr. Lewes, in his admirable "History of Philosophy," "he was ready to embrace the philosophy of poverty; an outcast, he was ready to isolate himself from society; branded with disgrace, he was ready to shelter himself under a philosophy which branded all society. Having in his own person experienced how little wealth and luxury can do for the happiness of man, he was the more inclined to try the converse; having experienced how wealth prompts to vice, and how desires generate desires, he was willing to try the efficacy of poverty and 'virtue.'" But his virtue, like that of the ascetics of a later day, consisted chiefly in the unnatural mortification of the body. He tried to live on raw meat and unboiled vegetables. His dress consisted solely of a cloak; a wallet and huge stick completed his accoutrements. In summer he used to roll in hot sand, and in winter to embrace statues covered with snow. He begged for bread, ate his meals and performed all the actions of life in public; being as brutish as the dogs of whom he made companions, and from whom he derived the title of "The Dog," in which he so rejoiced. He slept in the porticoes of the public buildings, or in his celebrated tub. The tradition of his living in a tub has, however, given occasion for much learned controversy; the authorities, for and against, are given in Dr. Smith's dictionary. If such was his domicile, the tub was probably of earthenware, as described in Marryat's "History of Pottery." It is so represented in a picture of Diogenes by the learned French painter of classical life, Gerome. Diogenes is represented as sitting in his tub, basking in the sun, when the renowned interview with Alexander took place. "I am Alexander, the great King," said the visitor. "I am Diogenes, the Dog," was the reply. Alexander then asked if there was anything he could do for him. "Yes; stand aside from between me and the sun." Surprised at such a, doubtless, unprecedented indifference to princely favour, he exclaimed, "Were I not Alexander I would be Diogenes." The cynic schooled himself to despise all men; and his undoubted energy of character, his witty repartees, and the protest his whole life was against the luxurious and social habits of the Athenians seemed to have extorted from them an admiration implied in the epithet they gave him of "the mad Socrates." But arrogant conceit was unquestionably the mainspring of all his eccentricities. His whole character is exhibited in one anecdote. Plato had given a splendid entertainment to some friends. Diogenes entered unbidden, and, stamping on the rich carpets, said, "Thus I trample on the pride of Plato." To which Plato admirably replied, "With greater pride, O Diogenes!"

CALENDAR FOR THE WEEK ENDING OCT. 10.

SUNDAY, Oct. 4.—Eighteenth Sunday after Trinity. Battle of Warsaw: Suwarrow defeats the Poles under Kosciusko, 1794. Moon's last quarter, 7h. 21m. p.m.

MONDAY, 5.—Faith, Virgin and Martyr, 290. The New Style begins in Italy; this day being changed from the 15th to the 5th, by Pope Gregory XIII., 1582.

TUESDAY, 6.—The awful and destructive explosion and fire at Gateshead and Newcastle (above fifty persons perish), 1854. The King of Denmark, Frederick VII., born, 1808.

WEDNESDAY, 7.—Treaty of Aix la Chapelle signed: peace between Great Britain and her allies with France, 1748. Louis Napoleon, at Bordeaux, declares that "L'Empire c'est la Paix!" ("The Empire is Peace.")

THURSDAY, 8.—Rienzi, the "last of the Tribunes," assassinated at Rome, 1354. Death of the great Italian poet, Vittorio Alfieri, 1803.

FRIDAY, 9.—St. Dionysius, or Denis, Archbishop and Martyr. Michael Cervantes de Saavedra, author of "Don Quixote," born, 1547. Congress of Sovereigns at Aix la Chapelle, 1818.

SATURDAY, 10.—Charles Martel's great victory over the Saracens at Tours, whereby Western Europe is saved, 732. The present Drury-lane Theatre opened, 1812. The Queen of Spain, Isabella II., born, 1830.

PICTURE FRAMES, Cheapest in London. Handsome gilt Frames, complete, 2s. each. Two-inch Maple or Rosewood and gilt, 3s. each, for the Coloured Pictures given this week, at GEO. REES', 57, Drury-lane.

BERNERS HOTEL, Berners-street, W., a FIRST-CLASS FAMILY HOTEL, large and small suites of apartments, quiet coffee-room for gentlemen—all scrupulously clean and comfortable. Charges moderate.
Established by present Proprietress 1825.

THE WIDOW of a CLERGYMAN begs to draw the attention of Parents to her Establishment for the SUPERIOR EDUCATION of the Daughters of Gentlemen. Highest references. Address Mrs. H., Brunker's Library, Inverness-terrace, Bayswater.

EDUCATIONAL.—Mrs. BLAIR LEIGHTON, of 40, Lansdown-crescent, Kensington Park, has VACANCIES for TWO PUPILS at her Establishment, where every home comfort is insured, coupled with the most desirable system of imparting knowledge, aided by first-rate Professors.
For Reference and Prospectuses, with full particulars, apply to Messrs. Boosey and Sons, 28, Holles-street, Cavendish-square.

MONEY ADVANCED by Mr. LUXMOORE, Silversmith, &c., of 92, St. Martin's-lane, W.C. (opposite New-street, Covent-garden), on plate and jewellery, at much less interest than is usually charged.—N.B. Jewels and plate bought.

TO PARENTS.—A Lady, residing in a very healthy locality at a short distance from Oxford, wishes to RECEIVE into her family TWO or THREE CHILDREN, to bring up and educate with her own. They would receive the most careful mental and physical training, and their health and happiness would be promoted by every possible means. Children requiring special care from delicate health, or whose parents are abroad, would here meet with peculiar advantages.—Address, "A. B. C.," care of A. Mac Laren, Esq., The Gymnasium, Oxford.

Now Ready, price One Shilling, beautifully Printed in Colours.

THE ILLUSTRATED LONDON ALMANACK FOR 1864,

containing Fresh-Water Fish, from Paintings by H. L. Rolfe, with interesting descriptions, by James G. Bertram, printed in the highest style of the Chromatic Art by Leighton Brothers; Twelve Fine-Art Engravings; Astronomical Diagrams of Remarkable Phenomena, with Explanatory Notes; and Twelve Original Designs as Headings to the Calendar, by F. W. Keyl.

It contains also Lists of the Royal Family of Great Britain; the Queen's Household; her Majesty's Ministers; and Public Offices and Officers; Law and University Terms; Fixed and Movable Festivals; Anniversaries and Remarkable Events; Times of High Water at London and Liverpool; Tables of Stamps, Taxes, and Government Duties; the Christian, Jewish, and Mohammedan Calendars; Astronomical Symbols and Abbreviations; and a considerable amount of useful and interesting information, rendering the ILLUSTRATED LONDON ALMANACK an acceptable and elegant companion to the library, boudoir, or drawing-room; whilst, as regards price, it is the cheapest Almanack published.

The ILLUSTRATED LONDON ALMANACK is inclosed in an elegant cover printed in colours.

Published at the Office of the ILLUSTRATED LONDON NEWS, 198, Strand, and sold by all Booksellers and Newsagents.

ROYAL ENGLISH OPERA, COVENT-GARDEN.—Miss LOUISA PYNE and Mr. W. HARRISON respectfully announce that the Eighth Season will commence on MONDAY, OCT. 12, with an entirely New Opera, by W. V. Wallace, entitled THE DESERT FLOWER. The Box-office will open on Thursday, Oct. 8. Prices as usual.

THEATRE ROYAL, DRURY LANE. Managers, Messrs. EDMUND FALCONER and F. B. CHATTERTON.—Last Five Nights. THE DEAL BOATMAN. Mr. G. Belmore and Mrs. E. Falconer. To conclude, NATURE'S ABOVE ART. No Performance on Friday.

THEATRE ROYAL, DRURY LANE.—Managers, Messrs. EDMUND FALCONER and F. B. CHATTERTON, who respectfully request the attention of the public to their proposed production, on SATURDAY, OCT. 10, of Lord Byron's Choral Tragedy of MANFRED, with a cast of the characters, vocal embellishments, stage appointments, and scenic illustrations in keeping with the dignity of a great work by a great English author, and what should be the character of performances at the National Theatre. In proof of this assertion, they beg to announce the facts of their having entered into engagements, partly for this production, with Mr. Phelps to perform the character of Manfred, and to assume the stage management with Mr. W. Telbin, to illustrate, upon a grand scale, the Alpine scenery and mystical imaginative haunts of the spirits, in which the action of the tragedy is supposed to take place, with Miss Poole, Miss Emma Heywood, Miss Cicely Nott, Mr. Swift, and a highly-skilled professional Choir of Fifty Voices, and an increased Orchestra under the direction of Mr. Barnard, to give in their entirety the Accompaniments, Vocal and Instrumental, originally composed for the first production of "Manfred," at the Theatre Royal, Covent-garden, by the late Sir Henry Bishop. The cast of the characters will include Mr. Phelps, Messrs. Ryder, Rayner, Charles, Neville, Mesgreson, Warde: Misses Heath, Atkinson, Rose Leclercq, Poole, Emma Heywood, Cicely Nott, Murray, C. Weston, and Mrs. Edmund Falconer, supported by all the minor artistes of the Company. Witches and Spirits by the numerous Ballet; the action arranged by Mr. Cormack. Stage Appointments and Properties by Mr. Needham and Assistants. Costumes, from designs by R. W. Keene, Esq., and from Flaxman's Illustrations of Classical and Mythological Conceptions. Machinery by Mr. R. Tucker and Assistants. Under the direction of Mr. W. Telbin. Box-office open from Ten till Five daily.

THEATRE ROYAL, HAYMARKET.—MONDAY, OCT. 5, and during the Week, AN UNLUCKY MORTAL; after which, for the 61st time, the Countess of Giffard's Comedy of FINESSE, OR SPY AND COUNTER SPY—Mr. and Mrs. Alfred Wigan, Mr. Buckstone, &c.; concluding with TURNING THE TABLES.

NEW THEATRE ROYAL, ADELPHI.—Sole Proprietor and Manager, Mr. B. WEBSTER.—On MONDAY, and during the Week, at Seven, THE TRAGEDY QUEEN—Mrs. Stirling; at Eight, LEAH—Messrs. A. Stirling, R. Phillips, A. Wood, and Billington; Miss Bateman, and Miss H. Simms; and CATCHING AN HEIRESS—Miss Woolgar.

CRYSTAL PALACE.—Week ending OCT. 10, 1863. Open, Monday at 9; other days at 10. Admission, Saturday, 2s. 6d.; other days, 1s. Children under Twelve, Half-price.
Monday to Friday—The Ghost in new characters.
Thursday—Display of the Great Fountains.
Saturday—Mr. and Mrs. German Reed and Mr. John Parry in their new Entertainment. Presentation of Prizes to the 1st Surrey Rifle Corps.
Orchestral Band, Great Organ and Pianoforte Performances, and Display of Fountains.
Great Picture Gallery, and Desanges' Victoria Cross Gallery. Notice the Exhibition of articles manufactured and for sale, at the lowest London prices.
The Park and Gardens now in perfection. Most extraordinary Display of Flowers.

CRYSTAL PALACE.—Immense Success of the GHOST. On Monday and during the Week (Saturday excepted), at Two o'Clock, Professor PEPPER will present his adaptation of the SPECTRAL ILLUSION, invented by H. Dircks, Esq., C.E., with new and startling effects.
The Concert-room has been perfectly inclosed and darkened for the purpose; the stage has been considerably enlarged and fitted with new scenery by Mr. F. Fenton; and Mr. Brough is engaged to give appropriate readings descriptive of the Apparitions.
The subjects will be frequently varied, and produced under the immediate direction of Professor Pepper. The admission to the Palace will remain, as usual, One Shilling. A few reserved seats will be provided at Half-a-Crown each.

SACRED HARMONIC SOCIETY, Exeter Hall.—Conductor, Mr. COSTA.—Thirty-second Season.—The Rehearsals will be resumed on Friday, Oct. 9. The Concerts will re-commence on Friday, Nov. 13, with the performance of Mr. Costa's Oratorio, ELI. Principal Vocalists already engaged—Mdme. Rudersdorff, Mdme. Sainton-Dolby, Mr. Sims Reeves, Mr. Winn. The Band and Chorus, carefully revised, will consist of, as usual, about Seven Hundred Performers. Tickets, 3s., 5s., and 10s. 6d., will be ready on Monday, Oct. 26. The number which can be issued for sale on this occasion being more than usually limited, early application for them will be requisite. The subscription to the Society dating from Michaelmas, is One, Two, or Three Guineas per annum.
Four Great Choral Meetings of the Sixteen Hundred Amateur Members of the Metropolitan Division of the Handel Festival Choir will be held during the Season, the dates of which due notice will be given; and admission to them will be confined to Subscribers to the Sacred Harmonic Society.
NOTE.—To prevent disappointment (particularly in regard to Subscriptions for Stalls and Reserved Seats), intending Subscribers are earnestly requested to make known their wishes as early as possible.
Oct. 1, 1863.

HERRMANN, PRESTIDIGITATEUR.—PRINCESS'S THEATRE.—Herr Herrmann's Performances Every Evening at Eight, in two parts, as given by him in all the principal theatres and opera-houses of the Continent of Europe and America. The whole of the marvellous illusions entirely new, and invented by Herr Herrmann. Prices of admission, 6s., 5s., 4s., 2s., and 1s. Doors open at Half-past Seven.

MINERALOGY.—King's College, London.—Professor TENNANT, F.G.S., will commence a COURSE OF LECTURES on Mineralogy, with a view to facilitate the study of Geology and of the application of Mineral Substances in the Arts. The Lectures begin on FRIDAY, OCT. 2, at Nine o'Clock a.m. They will be continued on each succeeding Wednesday and Friday, at the same hour. Fee, £2 2s.
R. W. JELF, D.D., Principal.

BENJAMIN JAMES EDWARDS, Seedsman, &c., 222, Strand, near Temple Bar, W.C., London.

BRADFORD'S WASHING-MACHINE.—In consequence of the extraordinary success of these Machines, to which an important improvement has just been added, many other machines, with a purposed resemblance, have during the last few years been introduced, upon terms offering strong inducements to general dealers having no definite agency. Numerous cases having of late come to the Patentee's and his appointed Agents' knowledge of intending purchasers, desiring a Bradford's *Patent*, having been induced to purchase other machines, upon the strength of the dealers' *assertion* that they also sold Bradford's Patent, &c. &c., such assertion being simply untrue, necessitating this Advertisement and the public announcement that Bradford's Patent can now only be had either from the undersigned or definitely appointed Agents. Intending purchasers are advised that Bradford's Patent Washing Machines are now delivered carriage-free to any railway station in the United Kingdom, and satisfaction guaranteed by a Month's Trial before Payment. Illustrated pamphlet of Washing-Machines, Indiarubber, and other Clothes Wringing-Machines, Mangles, Presses, &c., upon application to Thomas Bradford, Patentee and Manufacturer, Cathedral-steps, Manchester; 63, Fleet-street, London; and 23, Dawson-street, Dublin.

PUBLIC SCHOOLS CLUB.—Candidates for Admission to this Club must have been at one of the following Public Schools:—Charterhouse, Eton, Harrow, Rugby, Westminster, Winchester. Prospectuses, &c., may be had on application to the Secretary, No. 17, St. James's-place, St. James's, S.W.

PUBLIC SCHOOLS CLUB.—A GENERAL MEETING of the original Members of the Club will be held on the 5th of October, at 5 o'Clock p.m., for the Election of a Committee and Admission of New Candidates.
W. A. SWIFT.

GREAT NORTHERN RAILWAY.—TOURIST TICKETS, at Cheap Fares, available for one Calendar Month, are issued from King's-cross and other principal stations, to EDINBURGH, Glasgow, Stirling, Dunkeld, Perth, Dundee, Forfar, Brechin, Montrose, Arbroath, Aberdeen, Keith, Elgin, and Inverness; and also to SCARBOROUGH, Whitby, Redcar, Filey, Bridlington, Withernsea, Harrogate, and the Isle of Man.
For further particulars see programmes, to be obtained at King's-cross Station, at all the receiving-offices in London, and at the stations in the country.
London, King's-cross Station, September, 1863. SEYMOUR CLARKE, General Manager.

THE ILLUSTRATED LONDON NEWS.

LONDON: SATURDAY, OCTOBER 3, 1863.

LIKE a prudent house-steward, the State four times a year takes down its books, sums up its expenditure, balances it against its income, and in certain ingenious ways, which are generally overlooked in our haste to ascertain the grand result of loss or profit, informs the great British family of the condition of its financial resources. In this process the least curious and patriotic take a certain interest, akin perhaps to the feeling with which they approach their banker's book at Christmas time. However little it may personally affect each of us, we cannot avoid a feeling of vague uneasiness when the *Times* announces the revenue returns to be unsatisfactory. We go to our pleasure and our business with lighter step when we read over the breakfast table that the country is prospering, and that the Chancellor of the Exchequer may repose upon a satisfactory balance.

In the present instance we are enabled to announce that the quarter's revenue returns are favourable. Without entering into detail, it may be said that there are no signs of decay in any important branch of the revenue, and that a very substantial sum has been added to the existing balance. There was, no doubt, some reason to fear a different state of things. Had it been so it would have been easy to have assigned so many valid reasons why such a result should have been expected that the public would have been easily consoled and reassured. But as it is, considering the loss of some of our best markets and the continued interruption of our cotton manufactures, the prosperity of the country has been shown unmistakably in its power of treating these as difficulties easily surmounted rather than as disastrous catastrophes. It is scarcely possible but that these facts should lead us on to further gratulatory reflections upon the condition of the country.

By pursuing a policy which, although at first sight somewhat cold-blooded and selfish, commends itself, upon reflection, to the judgment of us all, Lord Palmerston has happily been enabled to steer us clear of complications which may yet prove dangerous to other States. Of the difficulties that must yet arise from the French occupation of Mexico we shall be spectators at a safe distance. Neither the provocation of the North nor the inducements of the South have embroiled or are likely to embroil us in the American struggle. We are unanimous—not unselfishly again—in our resolve to strike no blow for unhappy Poland. It is to be hoped that our statesmen are leaving Germany to itself, as the present Government may very safely do; and that the Schleswig-Holstein quarrel may find occupation for Earl Russell's ready pen rather than for Lord De Grey's activity.

But it must not be forgotten that our immunity from foreign cares leaves us with home responsibilities which it will not be safe to overlook. When we see how the freedom we possess is envied, and hear one of France's greatest and most brilliant thinkers and orators sigh piteously for privileges that may be enjoyed in every English community, we should aim at making ourselves and others more fitted for the possession of blessings which are valued lightly because we have never known their absence. It can scarcely fail to be a proud reflection that the Utopia of civil and religious freedom which the Count de Montalembert imaged recently at Bruges as the pattern that Christendom would be happy in conforming to is to be found existing in its entirety in any town or village on this side of the Border. North of the Tweed the existence of Dr. Begg and his co-religionists might render such an assertion hazardous. But in each English town it has happily become so much the fashion to respect differences of opinion in civil matters that soon few of any importance will be found to exist, while the churches of every denomination lift their steeples to heaven on equal terms. Men are free to think and act, preach and proselytise, as their inclination or conscience prompts. Firm in our conviction that Truth will in the end prevail, we leave it to make its own fight, and should not dream of calling to its aid the interference of Ministers of the Interior, prefects of departments, modern inquisitors, and fussy beadles.

But it must not be overlooked that, with all our prosperity, we have skeletons in our closets, which M. de Montalembert himself has before now detected and drawn forth for animadversion and satire. And it cannot be denied that we are a little too much given to regard these skeletons with impatience, and to hustle them back into their closets and turn the key upon them. It is not many weeks, for instance, since we, in common with many of our contemporaries, drew attention to certain fearful revelations of the sanitary condition of our soldiers in India calling for immediate recognition and reform. And yet, so far at least as the public interest is concerned, in this short interval a veil seems by mutual consent to have been let fall before the subject. So with the social condition of our great cities, upon which a dreadful light was for the moment thrown, then suddenly withdrawn.

The skeleton which is being just now by main force kept before the public eye is the condition of the homes of our agricultural labourers. No one familiar with the agricultural counties of

England is likely to underrate either the importance of, or the difficulties that are certain to beset action upon, the subject. For instance, under the present working of the poor law, the proprietor of the soil has every temptation to refrain from building cottages upon his estate; while the employer of labour, for obvious reasons, prefers, if possible, to hire men living out of his parish, and who, in case of old age or illness, will not swell his poor rates. The mischief will be found to have deep roots, and to need strong arms for its upheaval.

THE COURT.

The Queen continues at Balmoral, in good health.

On Thursday week her Majesty, accompanied by Princess Louis of Hesse and Princess Beatrice, and attended by Baroness von Schenck, drove to Inver Cluick. On the same day Prince and Princess Louis of Hesse, attended by their suite, dined at Abergeldie Castle.

On Friday the Queen, accompanied by the Princess of Wales, Princess Helena, and Princess Louisa, drove to Loch Callater. On the same day Prince and Princess Louis of Hesse, Prince Alfred, and Prince Arthur, attended by Baroness von Schenck, drove to Loch Builig and returned on horseback. On this day also Prince Alfred at Abergeldie.

On Saturday the Queen, accompanied by Prince and Princess Louis of Hesse and Princess Beatrice, drove to Alt-na-Guithasck. On the same day Prince Arthur, Princess Helena, and Princess Louisa, attended by Lady Agusta Bruce and Mdlle. Bauer, ascended Lochnagar.

On Sunday the Queen and the Royal family attended Divine service, performed in the house by the Rev. Dr. Caird, one of her Majesty's Chaplains, who is staying at Balmoral.

On Monday the Queen, accompanied by the Princess of Wales, Princess Louis of Hesse, and Prince Alfred, drove to Garmshiel. On the same day Princess Helena, Princess Louisa, and Prince Leopold, attended by Lady Churchill, Baroness von Schenck, and Lieutenant-General the Hon. Charles Grey, drove to Mar Lodge and honoured the Countess of Fife with a call.

The Queen and the Royal family take daily walks and drives in the vicinity of Balmoral.

The Right Hon. Wm. Gladstone, Chancellor of the Exchequer, has succeeded Earl Russell in attendance on her Majesty.

THE PRINCE AND PRINCESS OF WALES.

The Prince and Princess of Wales took their departure from Abergeldie Castle for Marlborough House on Thursday. The departure of their Royal Highnesses has been hastened in order that the Princess may have an opportunity of meeting her brother before his departure from England to assume the crown of Greece.

On Saturday last Prince and Princess Louis of Hesse left the Queen at Balmoral.

On Sunday the Prince and Princess, accompanied by Prince Louis, attended Divine service at the parish church of Crathie.

The Prince and Princess have made frequent excursions in the neighbourhood of Abergeldie up to the date of their departure for the south.

ARRIVAL OF THE CROWN PRINCE AND PRINCESS OF PRUSSIA.

The Crown Prince and Princess of Prussia, accompanied by their children and a numerous suite, arrived in London on Thursday morning, on their way from Balmoral. Their Royal Highnesses left the Potsdam railway station on Monday evening at a quarter past eight, and reached Hamburg about morning. They were received by the Commandant, and, after partaking of breakfast in a room at the railway station, left for Berlin, Princess Frederick Charles and the ladies and gentlemen in waiting, visited the far-famed cathedral. At half-past ten the Royal travellers left Cologne by the Rhenish Railway, on their way to Ostend.

Their Royal Highnesses reached Brussels on Tuesday evening, and on Wednesday morning embarked at Ostend for Dover. The Royal party arrived soon after three in the afternoon. The Crown Prince and Princess were received on landing by Count Bernstorff, the Prussian Ambassador to this Court, who had previously arrived from Brighton.

After a short stay at Dover their Royal Highnesses departed at a quarter past four by a special train on the London, Chatham, and Dover Railway, and reached Victoria station at 6.20. The Crown Prince and Princess, with their Royal children, travelled in the State carriage belonging to the Brighton Company, which had been sent to the London and Chatham Company for the occasion. At the Victoria station they were received by Mr. Frederic Kaste, the First Secretary to the Prussian Embassy; and immediately afterwards a telegram was sent to the Prussian Consul at Dover for the arrival of Prussia at Baden-Baden, announcing the safe arrival of the Royal travellers.

Later in the evening their Royal Highnesses left town for Scotland by the Great Northern Railway.

It is understood that the Crown Prince and Princess will not return to Prussia for some time.

The banners and achievements of his Royal Highness Prince Alfred and Earl Grey have been placed by Sir G. Young, Garter, in St. George's Chapel, Windsor.

His Grand Ducal Highness Prince William and his Imperial Highness Prince William of Baden have arrived at Claridge's Hotel, from Torquay.

His Highness the Maharajah Dhuleep Singh has arrived at Claridge's Hotel, from Yorkshire.

The Duke and Duchess of Buccleuch arrived in Belgravesquare, on Saturday, from the Earl of Romney's seat, near Maidstone. They have since left for Scotland.

The Duke and Duchess of Grafton left town on Wednesday for their seat, Euston Hall, Norfolk.

The Duke and Duchess of Saldanha have arrived in town from visiting the Duke and Duchess of Northumberland at Alnwick Castle.

Emily, Duchess of Beaufort, has left Hill-street on a visit to Viscount and Viscountess Dupplin, at Dupplin Castle, Perthshire.

The Marquis and Marchioness of Abercorn and Lady Georgiana Hamilton arrived on Saturday for Beaudesert.

The Marquis and Marchioness of Clanricarde returned to Stratton-street on Monday from visiting Mr. and Lady Margaret Beaumont, at Bretton Park, Wakefield.

The Marchioness of Londonderry has left town for St. Leonards-on-Sea.

The Earl and Countess of Craven and family have arrived at Ashdown Park, Berks, from Coome Abbey, Coventry.

The Earl and Countess of Stanley left Cobham Hall, near Gravesend, a few days since on a tour in Italy.

The Earl and Countess of Westmoreland have left Gopsall Hall for their seat, Apperley, Glamorganshire.

The Earl of Lincoln has arrived in town from Clumber Park, Nottinghamshire.

The Earl of Dalkeith has arrived in Hamilton-place from a Continental tour.

Lord Harris has returned to Belmont House, near Faversham.

Miss Jane Ward and Mrs. Frances Stonor have arrived at their residence in Hertford-street, from Brighton.

MARRIAGES IN HIGH LIFE.—The marriage of Lady Barrieti Macclesfield, second daughter of the third Earl of Romney, with Captain Fletcher, of the Scots Fusilier Guards, was solemnised on Thursday week, at Mote Park, near Maidstone.—The marriage of Mr. Crawshay Bailey with Countess Elizabeth Selina Metaxa, only daughter of Count and Countess Metaxa, took place on Tuesday week, at St. Luke's Church, Cheltenham.—A marriage is arranged to take place between Captain Charles Earle and Miss Villiers, daughter of the Right Hon. Edward Villiers, and niece of the Earl of Clarendon.—A marriage is also arranged to take place between the Hon. Mr. Herbert, brother of the Earl of Powis, and Miss Sykes, sister of Sir Tatton Sykes, Bart.

AUTUMN SONG.

AUTUMN clouds are dying, dying
Over the waste of blue;
Summer flowers are dying, dying,
Late so lovely new.
Labouring swains are slowly rolling
Home with wistful eyes;
Holy bells are slowly tolling
Over buried men.

Goldener lights set noon a-sleeping
Like an afternoon;
Colder airs come stealing, creeping
After sun and moon;
And the leaves, all tired of blowing
Chestnuts o'er the sun,
Change to sunset-colours, knowing
That their day is done.

Autumn's sun is sinking, sinking
Into Winter's night;
And our hearts are thinking, thinking
Of the cold and blight.
Our life's sand-glass is going
Down the hill of might:
Will our clouds shine golden-glowing
On the slope of night?

But the vanished corn is lying
In rich golden gloams.
In the churchyard, all the sighing
Is above the dead.
Spring will come, slow-lingering,
Opening buds of faith;
Man goes forth to meet his spring,
Through the door of death.

So we love, with no less loving,
Hair that turns to grey;
Or a step less lightly moving
In life's autumn day.
And, if thought, still-brooding, lingers
O'er each bygone thing,
'Tis because old Autumn's fingers
Paints in hues of Spring.

GEORGE MAC DONALD.

METROPOLITAN NEWS.

On Monday the Sheriffs Elect of London and Middlesex, Mr. H. E. Nixon and Mr. Alderman Cubitt, entered office. Mr. Wilson Nicholson and Mr. Gunston were appointed Under-Sheriffs.

A return just issued shows that the parish of St. Pancras was assessed this year to the property tax under Schedule A (in respect to the annual value of land (including the houses built upon it, the railways, &c.), at £1,798,721.

On Saturday the National Gallery was closed, for the annual vacation, until Monday, the 4th of November, when it will be reopened to the public, the days of admission being Monday, Tuesdays, Wednesdays, and Saturdays; Thursdays and Fridays being set apart for the use of students.

Formal notice has been given to the Railway Department of the Board of Trade that the Charing-cross Railway would be completed by the 1st of November, and requesting that the official inspection should be made by the officers previous to the opening of the line for traffic.

The Honourable Artillery Company had a field-day at the Alexandra Park on Wednesday. Although the members of the corps did not attend very numerously, the evolutions were performed in exceedingly good style.

A number of surveyors, with a corps of assistants, have been engaged in marking out the line of the new street to be formed by the Fleet. It would appear that one end of the contemplated bridge is intended to rest about two hundred yards to the north-west, crossing, and the other will just above St. Andrew's Church, Holborn-hill.

Mr. President Lincoln has caused a reply to be sent through Mr. Adams to the address of the Trades' Councils agreed to at their meeting at St. James's Hall in March last. The President thanks the Trades' Unionists for the sympathy they express for the Federal cause, and says he believes that they speak the sentiments of the people of Great Britain.

On Tuesday a number of workmen commenced laying in the foundations of the north-eastern wing of the New Records Office, for the purpose of completing the quadrangle. The new wing in general resembles will be in keeping with the architecture of the other parts of the structure. The cover over the quadrangle, however, will also be completed.

The Metropolitan Board of Works met yesterday week for the first time after their autumnal recess. The great business of the day was the opening of the letters sent to the Thames Embankment. There were thirteen tenders, the highest being that of Mr. George White, for £680,000, and the lowest that of Mr. Samuel Baker, for £464,000. Mr. Baker was accepted.

Mr. Alderman Humphery died on Monday, at his residence, Clapham-common, in the seventy-fifth year of his age. He was elected to the Mansion-house Court of Aldermen in 1857, elected Alderman in 1859, and Lord Mayor in 1862. We have also to record the death of Mr. W. A. Pescod, who was for many years the senior partner in the firm of Pescod, Duval, and twenty-six years deputy of the ward of Farringdon Without. Mr. Pescod had been connected with one of the most important governments in India for eighty-five years of age.

The election of Lord Mayor for the ensuing year took place on Tuesday at the Guildhall. The Common Hall assembled, and sent up the names of Alderman William Lawrence and Alderman Rule to the Court of Aldermen. Alderman Lawrence, Alderman Lawrence, the first on the list. The Lord Mayor elect thanked the liverymen, and promised to do his best to protect the privileges of the City. A long section of thanks to Lord Mayor Rose was then carried, and his Lordship briefly returned thanks.

The large tent in front of St. Paul's Day and Martin's Bank on Monday morning under rather extraordinary circumstances. It appears that the tide in the Thames rose at about seven o'clock, and, as it met the wind with the tide, and, coming on new ground, worked one end of the structure among the moorings of the vessels lying off it, it did not ride with the rising tide. The other end of the large rose with the tide, which, flowing over it, rose about a cubic foot in height, and carried away the tent, the tarring boxes and waiting-room. The barge itself filled and went down. The accident took place about half-past seven A.M.

On Thursday the Great Northern Company commenced running through trains from the Farringdon station of the Metropolitan Railway to Hatfield, and from Hatfield to the Great Northern London station to Windsor. There will be fifteen Great Northern trains from Farringdon-street every week day, and seven on Sunday, thus affording direct communication, without break of gauge, with Hitchin, Luton, Dunstable, Hertford, and the intermediate stations. Windsor, Eton, and Slough trains are fewer in number, there being between Farringdon-street and Windsor only six each way.

The winter session of the medical schools connected with the great metropolitan hospitals began on Thursday. According to annual custom, opening addresses were delivered by the professors. At Guy's Hospital, the address was delivered by Dr. F. W. Pavy; at St. Thomas's Hospital, by Mr. Sydney Jones; at London Hospital, by Mr. C. F. Maunder; at Middlesex Hospital, by Mr. T. W. Stone; at Westminster Hospital, by Mr. Christopher Heath; at St. Bartholomew's, by Mr. J. Fagge; at Charing-cross Hospital, by Mr. C. W. Quain; at University College, by Dr. A. B. Garrod; at St. Mary's Hospital, by Dr. W. O. Markham; at University College Hospital, by Dr. Ellis; and at St. George's Hospital, by Mr. R. Lee.

Last week the births of 1801 children—848 boys and 833 girls—were registered in London. In the ten corresponding weeks of the years 1858-67 the average number (corrected) was 1808.——There were 1198 deaths in London last week. The average number in ten corresponding weeks (viz., the thirty-ninth in each of the years 1858-67), with the omission of deaths from cholera in 1854, and a correction for increase of population, becomes 1240. Scarlatina appears decidedly to be on the increase. The deaths from it, which were in the previous week 130, rose to 141 last week. They have been constantly above 100 weekly since the middle of July. Diphtheria does not exhibit the same tendency to increase: it was fatal in twelve cases.

The annual distribution of new silver money to the scholars of Christ's Hospital took place on Saturday afternoon, in the Egyptian Hall of the Mansion House. There were no fewer than 745 assembled, attended by the heads of the hospital. They were accommodated with seats on the floor of the hall, and, on the Lord Mayor and his officers entering, they advanced, headed by the boys in clerical garments. The former received from the hands of the Lord Mayor a golden angel, the recent coin, and the scholars a new shilling each, in addition to a glass of wine and a bun. A large number of ladies were present as spectators. The ceremony and custom generally take place on Easter Tuesday, but owing to a fever among the boys at that time it was put off.

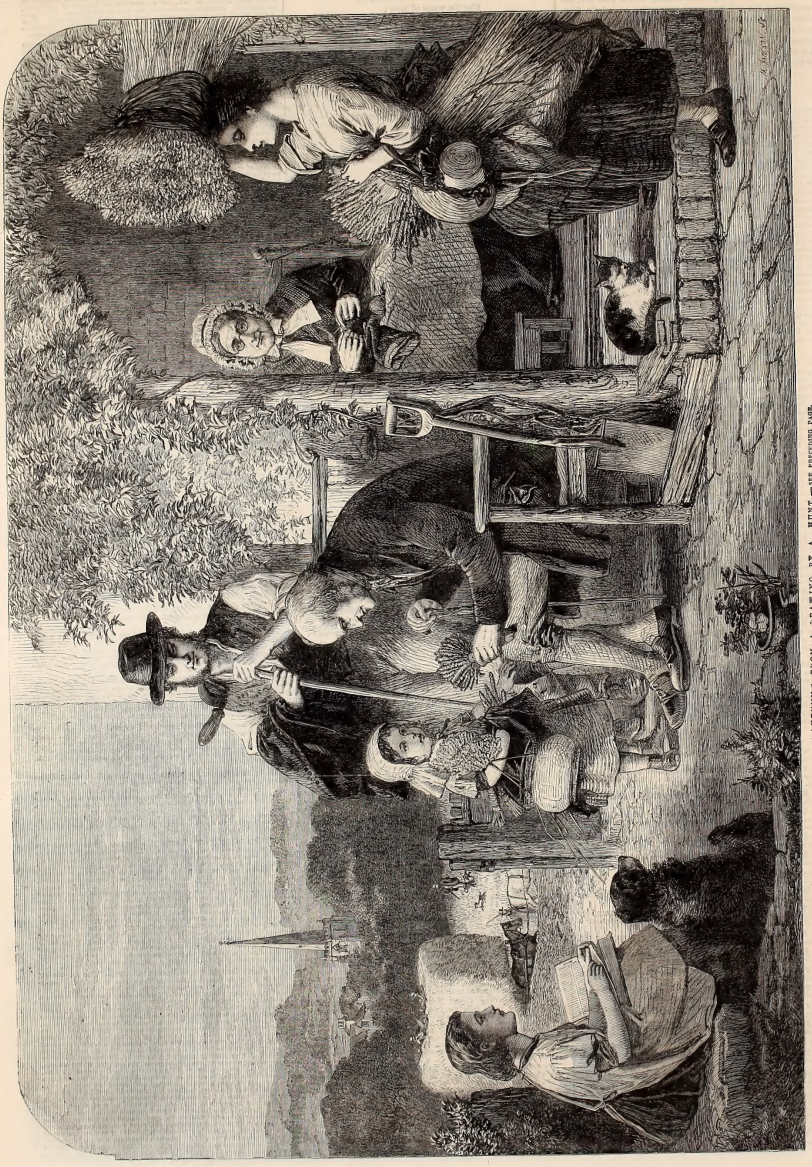
Since the improvements which have been so successfully effected during the past season on the left side of the Broad-walk of Regent's Park, considerable activity in the formation of flower-gardens therein was previously a waste plateau lined with trees, it has been decided to extend them to the entire right side of the promenade in the first park. The decision has given much satisfaction to the thousands of persons who daily visit the park, the improvements in which are there, under the direction of the Right Hon. W. Cowper, having been the constant theme of admiration. The same amount of space which is occupied by the new gardens will be devoted to the proposed improvements, which, when completed, will extend from the entrance near Ulster-terrace to the gates of the second park. The ground has already been laid out and arranged into innumerable oval, circular, and parallel beds, interested at different intervals with shrubs, which will be nearly raised, and the laying out of which has involved the felling of a large number of horsechestnut trees.

A meeting of the Royal National Life-boat Institution was held on Thursday at its house in John-street, Adelphi. A payment of £71 0s. 8d. was ordered to be made to the exertions of the Southport life-boat at the institution's station, during the winter's wide and chill and twelve of the crew of the barque St. Lawrence, of Liverpool, which, during a gale of wind and heavy surf, had stranded on the Southport Sandbank, on the memorable night on the 26th ult. The captain and three of the crew refused to leave the vessel, and the Life-boat Journal, which also belongs to the institution, afterwards put off with the view of saving them; but, as they remained firm in their determination not to quit the ship, the life-boat returned to the shore. The institution voted £8 to pay the expenses of the service. It was reported that the Egremont life-boat ultimately succeeded in bringing the vessel into port, much to the satisfaction of the owner, who witnessed the persevering and gallant exertions of the crew from the shore, and who had a large interest in the vessel and her cargo. Both life-boats behaved admirably while engaged in these services. A vessel of 40 tons was voted to pay the expenses of the Watson life-boat of the institution in putting off, on the night of the 22nd ult., in a tremendous storm, in reply to signals from the light-vessel off the Goodwin Sands, and casting a ship in distress. On reaching the Sands no vessel could be discovered, and, after searching for some time, the life-boat anchored on the edge of the sands and remained until daylight, when she returned to the shore. It was found on the following morning that a schooner had grounded on the sands, but had fortunately got off before the arrival of the life-boat. Various other rewards were voted to the crews of shore-boats for valuable services in saving life from different wrecks. It was reported that the late Milborne Williams, Esq., of Winchmore-hill, had left to the institution a legacy of £10. It was also stated that the institution had life-boats ready to be sent to Eastbourne, Aldeburgh, Southwold, The Nre. R. S. Sutton, Rector of Rye, near Burnt Green, had sent the society £3 8s. 6d., as a thank-offering from his congregation for the gallant conduct of the crew of the Rye Harbour fleet. Esq., of Highcote House, had forwarded to the institution a donation of £100. Payment amounting to £1,000 having been made on various life-boat establishments, the proceedings terminated.

LAW AND POLICE.—What is the custom of Billingsgate market in regard to the sale of salmon? The question was the question raised in the Sheriffs' Court on Tuesday. Mr. Winter bought a piece of salmon in the market in August last for 3s. 6d., and took it home to Pentonville Hill. Mr. Winter doubted the correctness of this. He took the fish to a butcher's shop and had it weighed, when he found that the weight was 7lbs. He went back to the shop where he bought it and demanded the difference in price between 7lb. and 12lb. He did not get it, and therefore summoned the salesman. The defence was that it was customary to sell the entrails of salmon with the fish, but that custom was abolished by the fish sold to Mr. Winter weighed 12lb. The Judge did not accept this custom, but ordered the defendant to pay the amount for which he had summoned him.——At Bow-street Police Court, on Tuesday, Messrs. Shoolbred and Co., of Tottenham-court-road, appeared before the Magistrate, Sir Sydney Smith, the pattern of which was alleged to be a fraudulent imitation of a design registered by Messrs. Cubitt and Co., of Gray's-inn-road, in opposition to which the two witnesses were called to prove that the pattern of the chintz sold by Messrs. Shoolbred was the property of the latter that of Messrs. Cubitt was registered, and that it could not therefore be a piracy. Mr. Cortis, the magistrate, dismissed the case.

Affairs in Central America remain unchanged. The dispute between Bolivia and Chili is not settled, but is still occupying the disputed territory.

The Demerara Court of Policy met on Aug. 26. The resignation of the Hon. Dr. Henry was accepted by the Court. The Hon. Robert Smith had appealed to the Government for protection against the removal of the immigrant labourers to Surinam, as, since the emancipation in that colony, numbers had left Demerara before completing the time of their indentures.



Earl Russell, having been memorialised by a "Manchester Reform Club" to request the Government to lend their influence to prevent respecting the unrelenting and exterminating character which the war in North America has assumed, has replied that he has received no communication of her Majesty's Government will do good, but that he will instruct her Majesty's Minister at Washington to report on the subject to him.

The late severe weather has caused several disasters on our northern coast. Among others, a brig belonging to Yarmouth was driven between Scarborough, and Filey Bay, and was lost the same day. A much more serious disaster befel a collier brig, the Castalia Cook, which foundered on her voyage to Sunderland. Her crew were saved by the sea, were, unfortunately, drowned.

The Duke of Sexos Cubas to Ascuzio, an eloquent member of the Spanish Cortes, and director of the liberal journal the *Iberia*, is recalled. The population of Madrid, without distinction of class or opinion, declare that Iberia is even more necessary than ever. Besides the sudden death of the Duke of Rivas, a grandee of the first class, the deceased has brought to his family which possesses the privilege of receiving every year the clothes worn by the Kings and Queens of Spain on the day of the Epiphany a new privilege, which is that of being placed in a coffin made exclusively to visitors to Madrid.

THE PROFESSION OF LETTERS.—Letters have become a profession, and, probably, of all professions it is, in the long run, the least conducive to personal happiness. It has the least precious few, above all others, to be weak in to be miserable. It is the least mechanical, consequently the most exhausting; and it is the one which, in the long run, most wears the material, utilises his emotions, trades on his faculties of love an l imagination, and, in short, exposes the man's whole heart by which to live. Nobody has a man requires for himself: and when they are in a large properti in transported to an ideal world, they are apt to forget that the man in question suffers and is ruined, and leave his ordinary existence all the more acrid and commonplace. The poet who sings loudly of love and love's delights may, in the ordinary intercourse of life, be an habitual drunkard, and his wife may have removed while describing an imaginary death-bed to lay a all the worn likely to be produced by the man standing by her side. Authors are to-morrow, the poets only in their books; their wives know them out of them. Their wives are the other side of the moon, and their friends are those who will never how they have appreciated that.—*Dreamthorp. By Alexander Smith.*

APPARENT DEATH FROM DROWNING, &c.—"The Discovery of the Physiological Method of Restoring Respiration in Cases of Apparent Death from Drowning, Chloroform, Stillbirth, Noxious Gases, &c.," is the title of a work published by Dr. B. A. Ridenour, which has already reached a third edition. After explaining the methods previously adopted—1, alternate compression and relaxation of the chest; and 2, the use of the "tracheal or ready method," recommended by the late Dr. Marshall Hall—he proceeds to describe his own method, which, he says, is more natural, more meritorious, and is effected by means of the same muscles as are employed by nature. In ordinary deep inspiration the chest is raised and enlarged by the muscles and other muscles which pass between the chest and the shoulders, and thus tend to produce a vacuum within the lungs. "In order," says Dr. Sylvester, "we lift the ribs and sternum by the pectoral and other muscles which pass from the shoulders to the chest, and thus produce the patient's arms." The method, which has been tested on a dead body, is fully explained by means of diagrams. The small price at which the work is offered, and the attention to be paid to the Dr. Sylvester's principles, will no doubt cause the adoption of the late Sir B. C. Brodie, Dr. Sharpey, and other eminent physiologists, and the Royal Humane Society. The pamphlet contains numerous testimonials to the efficacy of the system of respiration, the auxiliary treatment to be adopted in cases of asphyxia, &c.

"AUTUMN," FROM A DRAWING BY A. HUNT.—SEE PRECEDING PAGE.

THE VOLUNTEER RIFLE MATCH BETWEEN AUSTRALIA AND ENGLAND: THE ROBIN HOOD TEN SHOOTING AT THE SUDBURY RANGE, DERBYSHIRE.—[See page 341]

ECHOES OF THE WEEK.

THAT Professor Pepper's ghost has got into Chancery, and, body and bones, paid a visit to Lord Westbury at Hackwood Park, where he was exhibited in all the glory of refracting lenses and his lime-light, to the great edification of his Lordship, and the recitation of the curious fact that the Chancellor, when plain Mr. Bethell, fifty-five years ago, saw a somewhat similar ghostly illusion exhibited by Belzoni, the famous Egyptian traveller; that Professor Pepper's ghost is now, on mature consideration, declared to be the original and orthodox ghost, and entitled to a patent under the Great Seal of England; that the unfortunate Gordon Cumming has had another run of ill-luck, and has been nearly crippled in a storm in the Atlantic, lying helpless as a log in the trough of the sea, notwithstanding the combined efforts of twenty-two men under the lee wheel to steer her; that, worse than all, her expenses during the last season exceed her receipts by twenty thousand pounds, thus entitling her to rank in the same once more to that of "The White Elephant," and that she will probably have to be sold by auction: that the Rev. Isaac Taylor is reviewing; gratuitously; that Professor Lincoln has suspended the Habeas Corpus Act, and that the last bulwark of constitutional liberty is now broken down (until Parliament shall reassemble, Lincoln); that we are to have in London during the winter the largest horse-riding circus ever seen in this country, or, perhaps, anywhere else out of Astley's; and there is nobody in the streets and nobody at the clubs; that guarding has begun again, and that ferocious assaults with the police more than three times a week are the rule. These things are chronicled in the ordinary departments of daily and weekly journalism, and can scarcely be tabulated as Echoes. Here, then, I am nevertheless, that our readers may know (as Hooker the Judicious has it) that we have not allowed things "to pass by idly, as in a dream."

The latest discovery in photographic portraiture is said to be invention, about to be patented as a casket, or crystal echo miniature," in which a solid image of the sitter's head is seen, looking with extreme life from the interior of a crystal ball, or other crystal feature standing out as in perfect relief as though chiselled by the hand of fairy sculptors. We are not told whether the crystal is given by the sitter, or supplied by the artist, or looking in the glass, but this portable and indelible specimen, reflecting no mere fleeting image, but containing the true form of humanity, promises to be mainly a most startling novelty. Natural science is daily explaining illusions which formerly gained their power from superstition, and the German language he has produced no further than the word "*Fresco*," which is understood as "unaffectedly and sociably plain," a quality extremely distinctive of the Teutonic. It is singular that we have in our unwritten *argot* a term nearly equivalent, "frame," to which a Hebrew ear is said to be peculiarly sensitive.

Although the dictionary remains unfinished, Jacob Grimm had, with his brother William, achieved deserved renown by the "German Grammar," and by many other philological works of the greatest interest. Yet in a popular sense the surest foundation of the fame of the "Grimm Brothers" is their "Kinder und Hausmärchen." Grammars and dictionaries may be superseded by new discoveries in word-mastery; but those charming tales on which the literature of luxurious nurseries in the days of Grimm, Ruckstuhl and Hablot Browne has been lavished will endure for ages. The consummation is not to be wished for, but it is to be hoped that many years may pass ere Jonathan Swift nothing will be remembered than that he was the author of "Gulliver's Travels"—the book which is the very quintessence of misanthropy against his fellow-men, but which the little children seized upon at once and made their own for ever. Happy the great writer who can leave such a legacy behind him. We talk of the Scaligers, the Casaubons, and the Bezas; but what are their names but a name? Very few Greek scholars can read a line of the text of learning, Bishop Aeschylus." Alas! the good Bishop has been buried in the gulf of his own erudition, and the only relic of him, the prototype of Paul de Kock, the author of a cloud of novels quite as comic and even more risky than those of Gregory Lewis, is the old call "*questo amabile Signore Paolo di Kocco*." King Jerome used to "read" with Pigault Le Brun; but the pair followed him to exile in a page quoted by Horace Walpole in the "Noctes," who "wrote crabbed Greek in no silly days," and moistened their labours with abundant potations of wine. In case of these more convivial readings, which concocted a wild pantagruelic letter to the "big brother" in Paris in answer to one of the latter's appeals to send out to Cassel "the cook" of the ravaged the Emperor and King that he put Jerome under arrest in his own palace, and locked up Pigault Le Brun in a dungeon for six months.

Victor Hugo is said to be "doing" Germany in a coach and pair, with a suite of the Grand Duke Constantine. Victor Hugo's coach and pair" may brake to his mind the good old days of Tentonic travelling when he was to be met at the gate of the Rhine-land would have bought the sucking-pig he saw in the market at Aachen—if he had only had the cash to buy with it.

A great pillar of the Roman communion in England has fallen. Father Ed. Oxley, the Oratory of St. Philip Neri, has died of the terrible penalty of sedentary life. Eloquent tributes have on all sides been paid to the memory of Dr. Faber. What of hot clergymen pronounce recovery has been denied, the conscience rite to must be buried in his grave. He must be remembered only as a most learned, most pious, and most charitable man. In virtuous man. Nor should lovers of literature forget that in his youth Frederick William Faber was one of the sweetest and most promising of the English poets. Both Walter Lord Lisle and Faber with grace and melody. Bibliophiles, too, will remember that some of his most charming poems are bound up with the lyrics of his fellow-traveller and friend, Lord John Manners, the patrician Moschus to Faber's Bion. The latter sighed for the days when the humbler classes might "once again feel the kind pressure of the social chain," and opined that it would be better for laws and learning, arts and eruditions, to die, than that we should be deprived of the old nobility."

A complaint has been addressed to the *Times* adverting to the unseemly conduct of the gravediggers after the funeral of Professor Cockerell, in St. Paul's. The men of the mattock and spade are accused of having rudely disturbed and flung about the nosegays and *memento*s which the hand of affection had placed on the coffin of the deceased. This is shocking; but gravediggers, we fear, will be gravediggers to the end of the chapter, and will never vary much from the characteristics of their great Danish exemplar, save in their seven waistcoats, and sent his subordinate to fetch him a stoup of liquor while he was digging Ophelia's grave, and played at loggats with Yorick's skull. The subject may be classed as one of the "painfully frivolous" kind; but gravediggers' ways are not the only things open to animadversion in St. Paul's. We wandered the other day into the glorious fane—the "pauchius," as one of Wren's most ardent disciples called it—and could not but feel shocked at the general shiftless, scrambling, slovenly aspect of the interior. We have, while in the presence of workmen employed in restorations, but to the extraneous untidiness and neglect. Not a verger was to be seen; they were all busily engaged in taking their front-of-the-house comers strangers the crypt and the whispering gallery; but the nave and aisles were full of idle lads and girls romping and slouching about in sayings but a common-place. Surely for the honour of the Protestant and bobdebeckes munching apples. Or do we think it very decent on the part of the officers of St. Paul's to allow the most magnificent monument *inside* the cathedral for the price of admission to the hall and crypt. Westminster Abbey, the Tower, *et cætera*, are free. Whatever the reason of this planned in, savours rather too strongly of the Alhambra, in Leicester-square. If the Dean and Chapter have ever travelled in Spain, they will have noticed the walls of the churches, notably in Venice, this significant reminder, "*Hospedale la casa di Dio*." The inscription is of unknown antiquity, and is displayed on a board attached to the outer railings of the churchyard, and Christopher Wren's stone walls thus left in peace. Otherwise the spirit of the age, which is a mixture of the serpent and fool, and a nonsequitur, but cause for an indignant blush.

COUNTRY NEWS.

At the Hull Police Court, on Tuesday, George Harding, a cooper, residing on the Hessle road, was fined £200 for keeping an illicit still.

The Duke of Northumberland, K.G., Lord Warden of the Stannaries, has inaugurated on Wednesday week by the opening of the additional or Particular Wing of the North Devon Infirmary, at Barnstaple.

The Queen has approved of Don Pedro Ortega Morejon as Consul at Newcastle for Spain; and of Mr. Edward Frederick Monster as Consul at Belfast for Denmark.

A project is stated to be on foot for increasing the length of Margate Jetty from 1250 ft. to 1550 ft. or 1600 ft., by removing the present head and constructing a new one further out to sea.

The annual meeting of the Metropolitan and Provincial Law Association was held on Wednesday evening at the Jurists' Society's house, in Chancery-lane, Mr. Lumley Smith, of Leeds, in the chair. It is stated that we have in our unwritten *argot* a term nearly equivalent, "frame," to which a Hebrew ear is said to be peculiarly sensitive.

The sister session of the Birmingham and Midland Institute has begun. On Monday evening the opening address was delivered by Mr. Scholefield, M.P., in the Midland Institute, in the absence of the council, the Mayor, the Right Hon. C. B. Adderley, M.P., and a large audience.

The two large masses of rock in the Menai Straits, known as the low and high Carters, which have long been a source of navigation of the straits, are being removed. Several masses have been blasted and taken up under the direction of Mr. Hughes, the harbour master.

A preliminary meeting of influential citizens of Glasgow, headed by the Lord Provost, was held on Wednesday week to take measures on the motion of Sir Archibald Alison, to call a public meeting of the inhabitants, to be held in the City Hall on October, for the purpose of originating a memorial in honour of Lord Clyde.

The prizes gained at the national competition and local examinations in science and art were distributed at the Society of Arts, John-street, Adelphi, on Wednesday afternoon, in the new Corn Exchange, St. Neots—the Earl of Sandwich, K.G., in the chair. The examinations were held by Lord R. Montagu, M.P.; Mr. Herbert (the Mayor of Huntingdon), and a large number of the nobility and gentry were present on the occasion.

The bottom part of a silver épergne, which had been presented in 1861 to Mr. W. Ewart, Mayor of Belfast, by his fellow-citizens, was recently found in a field in Clyde, near Belfast, and has been handed over to the police. After communicating with the authorities in Belfast, the two gentlemen mentioned, the spoil-sharers, have left the matter in the hands of the Mayor's house, in the absence of the family, on the 9th or 10th ult.

In a meeting of the Suffolk Chamber of Agriculture, held at Ipswich Yesterday Cavalry, Suffolk, the first prize, a silver tankard presented by Archibald Prentice, Esq., of Manchester, and the second prize, a silver cup, by Mr. Foley, jun., by Private J. King. After the match, the fifty-eight commissioners were entertained at dinner by Captain Hamilton.

Agents of the Archaeological Society of Kent have been engaged during the last few days opening several ancient graves in the parish of Barne, near Deal, in Kent. The spot selected was on the top of a hill, being a little to the east of the present parochial burial-ground. Traces of human remains were found at a depth of about three feet from the surface, as, in several instances, swords and spears were discovered close beside the bodies, which were found to be in a state of decay. Fragments of pottery and rings and other ornaments were discovered in close proximity to the remains.

The Canal Fleet arrived in Dublin Bay last Saturday, and the visitors began to pour into the metropolis from the surrounding and as enthusiastic as their friends on the side of the Channel. The officers were entertained at a grand banquet given by the Lord Mayor, at his mansion House, and the Lord Mayor presided, but the entertainment was attended by Cowper, Admiral Sir Alexander Milne, and the rest of the Yesterday evening in the Rotunda, which was numerously and gaily attended. The medical officers of the fleet were entertained at dinner on Tuesday by Dr. Corrigan, the President of the Royal College of Physicians.

The fourth annual conference of the South Staffordshire Association for the Amendment of the Criminal Law and Prison Discipline was held on Monday last at West Bromwich. The proceedings commenced with the business meeting of the Association, which was held in the Temperance Hall at twelve o'clock, when the chair was taken by Lord Lyttelton. The conference occupied the attention of the members during the afternoon, and in the evening the members of the society dined together—Lord Lyttelton in the chair.

In the absence of some excavations at Pershore Abbey Church, Worcestershire, on Thursday week, the workmen, in digging round the font, laid bare the foundation of the original Norman font, which had constituted the floor of the north wing of the Abbey Church. Remains of a similar description were found on a beautiful slab of marble in Edward's Chapel. Men with bows and arrows, lions, deer, and other devices were depicted on the pavement. It is contemplated to take the whole of the pavement up and replace it in the interior of the church. Pieces of the bells which was broken or melted at the great fire which consumed a portion of the edifice have also been found. Traces of the fire are still visible on the walls of the church.

The *Elgin Courant* mentions a fight between a lad of seventeen and a stag, at Glenavon. The animal was being hooted by a brace of deerhounds, and was getting the best of the fight, when young Morrison attacked it with a stick, and drove it over the summit of the hill. The stag then turned upon him, pitching him over a rock; but, on coming at him again, the lad seized its horn with one hand and plunged a knife into it here with the other.—As a pendant to the above "wild sport," the *Orkney Herald* mentions the capture of a solan goose by Dr. Logie, of Kirkwall. He was driving home last night, when the bird, attracted by the light, perished in hovering about the vehicle so closely that he seized it.

A large whisky-still was discovered in full operation last Saturday, in a retired wood a few miles to the west of Newcastle-on-Tyne. A water-butt had been sunk into the Cockburn farmhouse, near Winlaton, and the traces left behind in rolling the barrel afforded a clue to the destination, which was followed up by police-officers Stephenson and Thompson, of the Durham County Constabulary. It had been carried through woods, fields, and over fencing stone, for about three miles, suddenly terminated at the brink of a cliff, about sixty feet high, at a solitary spot called Malkmore Burn. On reaching over the edge of the cliff, the officers were astonished to see a whisky-still in full operation. A pitman, named Peacock, was in charge of the apparatus at the time. The officers found "gallons of the wash" near the still, and about four gallons of comly complete whisky. The apparatus was taken before the county bench at Newcastle on Monday, and were remanded.

Yesterday week, as the workmen employed on the eastern section of the Isle of Wight Railway were making a cutting near the little hamlet of Wroxall, in the vicinity of Lord Yarborough's extensive park and domains, they came upon an urn filled with Roman coins. Unfortunately, the urn was broken up, and the coins partially dispersed before the value was discovered; but a considerable number of the coins, of which there appears to have been many thousands originally in the receptacle, have been still remain in the possession of George Smith, the foreman (but for whom the whole would have been scattered to the winds), in addition to which a large number that have found their way into the stores of private collectors. The urn, which was a perfect globe in form, was found about 3 ft. below the surface. No bones or marks of interment were discovered near it. This is by far the largest number of Roman coins found in the Isle of Wight, though a considerable number have been discovered scattered about in different parts. The coins still await examination and classification by the learned. The above notice d in a cursory survey is one of Claudius, by whom, or rather his Genera the whole island is said to have been subdued under the Roman yoke.

A disgraceful riot has taken place at St. Catherine's, a village near Guildford. It seems that on Tuesday, the annual wake or fair, which takes place on Oct. 4, is known as "Tar-up Sunday, and on that day, as well as on the Sunday before, it is the custom for the men here to be drunk and noisy. Tar-up Sunday is also associated with a popular license—that of throwing chestnuts, which this year was carried to an unusual extent. Between 300 and 400, or about 400, not contents with pelting passers-by with chestnuts, hustled showers of stones at them, and assaulted several of them, among the latter two two ladies. A gentleman, venturing mildly to expostulate with them, was rewarded with a reception of this description, and was obliged to take to flight. They had in him of too ugly for his presumption, went to his premises and pulled up the whole of the window frames in the house and conveyed them to the top of the hill at St. Catherine's, where they made a huge bonfire. The whole account of the affair reads like an old-fashioned description of the rough manners of the English in the fifteenth century. The county constabulary force was powerless.

James Andrews, a "tall, seedy-looking man," was charged at the Liverpool Police Court, on Wednesday, with having in his possession a number of decorations and insignia, apparently belonging to a military officer. The prisoner was found in the act of attempting to dispose of the articles at a shop. Among the articles produced was a gold ornament of a K.C.B., for which he wanted 30s. at a pawnbroker's shop. Other articles were also found in his possession a jewel and ribbon of a K.C.B.; a star with a silver plate in the centre of the Order of the Bath, and a belt of the latticed Turkish pattern of 1842; a large and handsome gold seal, on which was engraved a coat of arms with three bees for the crest, and the motto "Sic vos non vobis;" the star of a K.C.B.; a massive gold memorial mourning ring with a diamond in the centre, and with the inscription, "A token to Gilt;" a small silver medal, with "Solomon" and "Persepcus" inscribed on the bars; a smaller gold jewel of a K.C.B.; the Turkish order of the Medjidie, in gold and silver, and with the inscription "Chilianwallah" and "Goojerat;" a small star with Victoria Regina" on the centre bar, and the words "Meanee, Feb. 26, 1843;" a large silver medal, with ribbon attached, and the words "Sobraon," and "Persepcus" engraved on the bars; and a silver medal, with "Ava" on it. R. J. H. Birch, 17th Regt., No. 1. This medal was one of those issued to the officers of the 17th Regiment after the battle of the Indus, but the same officer was found upon him, with other articles. The prisoner was remanded.

The dinner of the Staffordshire Agricultural Society came off at Stafford yesterday week, and was largely attended. Lord Hatherton, in proposing success to the society, referred to the subject of steam cultivation, and said that an extraordinary improvement was anticipated to be effected by that method. He hoped it would not be long ere companies would be formed for the purpose of hiring out steam engines to farmers requiring them. But it must be remembered that to it farms for steam cultivation a large outlay would in the majority of cases be necessary, and that the fields would be altered, and expenses incurred in various other ways. All this pointed in one direction—that more and more land was likely to be laid out in large farms, and that therefore it became every day more important that encouragement should be given to the experiment of cottage farms. Mr. Chetwynd, M.P., proposed the health of Lord Talbot de Malahide, and he was glad that the subject had been taken in hand by a nobleman like Lord Talbot, who had the means to forge before and begin a model entry settlement. The great aim ought to be to give the tenant security, by which means he would be induced to lay out his capital in the improvement of farmers in the midland counties who did not get out of their farms a fair remuneration for their capital and labour. He knew that many tenants had incomes if they withdrew their capital, invested it in the funds, put their feet on the border, and smoked their pipes. He never could admit the "tenant right of the Tenant Farmers." He also said it could not be expected that tenants should improve their farms without the full security for their capital. He referred to agreement for compensation to the tenant to leave, because as the expiration of the term of his agreement approached he would not enter into any species of discouragement as that against which he had now to fight; but unless he could be secured in the full capital guarantee that he should receive his tenancy expired he would receive compensation for his outlay upon unexhausted improvements. Mr. Chetwynd, M.P., proposed the health of Mr. Eaton, of Hyde Hall, near Tamworth, a Manchester merchant, who holds views as indefinite as the climate in question is. Mr. Peel refuses to pledge himself on any question.—The elevation of Mr. Sergeant Pigott to a seat on the judicial bench has caused a vacancy in the representation for the borough of Reading. Already one candidate has appeared to supply the vacancy in Mr. Sutton Sharpe, Q.C., who is, we believe, a relative of the member for the borough and nephew of Viscount Eversley. In his address he says:—"In home politics I am conservative. I believe in the two parties in the House of Commons, added to the engrossing interest in foreign affairs, has prevented the attention being given to many necessary measures of reform; but I hope that such questions will at an early period obtain the attention they deserve, and, if intrusted with your confidence, I will do my utmost to promote their advancement.—At Harrogate Mr. Benjamin Scholefield, the Conservative candidate for the seat vacant by the death of Mr. Fotb. The second candidate is Thomas Lloyd, Esq., of Speke Hall, near Liverpool. This gentleman is a Liberal, and states that he is in favour of the extension of the borough franchise, of Mr. Locke King's Act to abolish the property qualification for freehold franchise, and approves of the ballot. He is a member of the Church of England, a supporter of liberty of conscience and the maintenance of the Irish Church as it is, and he desires the abolition of church rates. He approves of Lord Palmerston's policy.—Mr. Peel has left for India and during the time he remains there the recess will take effect in the forthcoming elections. By several Acts, from George III. to the present time, the Speaker of the House of Commons is the warrant to the Clerk of the Crown to make out new writs for the election of any Member who may vacate his seat by reason of the acceptance of, or giving fourteen days' notice in the *London Gazette*. The law was altered by an Act passed in the present session, and hereafter the time prescribed for notice by the speaker.

The last intelligence given by the journals of the Beaujolais, the Mâconnais, and the Bourgogne, is that the vintage in those districts will be inferior in quantity to last year's, but that the wine will be of a very superior quality.

M. Paul Mendelssohn, brother of the celebrated composer, has handed over to the Mayor of Leipsic 100 thalers, arising from the sale of his brother's letters to Jenny Lind. The interest of this sum is to be paid, on the 21st of February, the anniversary of the great musician's birth, to two widows of natives of the Leipsic workhouse, designated by him.

NATIONAL SPORTS.

The idea of any meeting this year between Lord Clifden and Macaroni seems quite given up, and "Argus" states that they will most probably not face each other before the Ascot Cup Day; if Lord St. Vincent (after special mentioning York or Doncaster as the venue in his challenge) chooses to give away what he considers the advantages of ground. Lord Clifden arrived at the Victoria Station on the Tuesday after the St. Leger with four greys to his van, postilions, grooms, &c., with brown and white ribbons. No doubt, as a noble Lord recently said of his prize Southdown ram, he will "have mutton-chops, if he likes," to eat all winter. Never did owner, horse, and trainer work their way so bravely out of adversity. A curious instance of the truth of running occurred last week. On Tuesday Fanfaron ran a dead heat, 1¾ mile, over Richmond course, with Oldminster, at 39 lb., after a splendid head-and-head struggle from the distance. In the second bout Fanfaron forced the running and won cleverly by a neck. On the Friday the pair ran the same distance over Manchester course at 35 lb., and, after racing together all the way, the young one just won again by a head! The above is, perhaps, the best specimen of staying which the Fandango stock have shown as yet, and will put his foreign owner in still better humour with his purchase. Sir Tatton Sykes only retains one relic of the old Sledmere blood, but that is a pretty choice one—"a two-year-old chestnut filly by Colsterdale, dam by Pyrrhus the First, out of Thornhill's dam, by Hetman Platoff—Chateau Margaux—Grey Momus's dam." Let us hope that ere long she may have nine or ten companions in those beautiful paddocks across the road. The Mecca of Yorkshire would look very strange without a few thorough-bred mares and foals.

The *Sporting Life* states that the settling for the St. Leger has been most satisfactory, with two exceptions, one of whom was "absent without leave" on a former occasion. Monmouth has produced another two-year-old Lambton winner in Lord Uxbridge's Vabalathus, bred by Captain Skipworth, whose lot of Lambton yearlings have been again purchased by his Lordship. Sir Joseph Hawley's Doncaster success with his new trainer was eclipsed at Newmarket by the victory of his St. Alexis, a son of Stockwell and Mendicant, in the Great Eastern Railway Handicap. Linda was struck out; and the 9 lb. extra quite defeated Fille de l'Air in the Hopeful Stakes, which Lord Stamford's Yamuna (purchased at her Majesty's annual sale for 600 gs.) won by a head. His Lordship has thus been rewarded for following the Imaus family blood so closely as he has done; and he has a yearling half-brother to the chestnut in breaking. The stable also won during the afternoon with Bertha and Cambuscan; Fantail (W. Boyce) showed her tail from the post to a couple in the Grand Duke Michael; and Fordham's defeat of Sam Rogers and Aldcroft in two successive races did a good deal towards restoring that ancient prestige which he lost so terribly in the Derby. The Caledonian Hunt at Perth, Bedford, and Northallerton are the race meetings of next week, and the coursing commences as well with Ashdown Park, Combermere, Border Club, Market Weighton (O), County Louth Club, and Tredegar Park Club.

It is not yet decided who goes with the "Australian team" in the place of Mortlock. Let us trust that they will come back determined to bury all those unfortunate differences which have fairly poisoned the past cricket season, and deprived us of a second match between the Elevens. If other leading cricketers had only taken the manly independent course which Willsher did, and not shirked playing at The Oval to please any one, we should have soon heard the end of it. E. M. Grace made 112 in a match with a weak Eleven of England at Southampton this week, and was beautifully caught by Caffyn. "Billy" made the best score, 22 and 19 (including a square leg hit for six), for his side, but without avail, as the Gentlemen of the Southern Counties won the match by nine wickets. Twenty-two Nottingham "colts" (selected from sixty) fairly collared the Eleven of their county, but it was not played out, to the great advantage of the latter.

The *Sporting Magazine* is illustrated by a spirited sketch after Corbet, who is much happier in horses than in dogs; but Hacker's rough engraving of it shows very badly by the finished work of Backshell, who renders full justice to one of the best things we have had from Cooper's hand for some time. A smart copy of verses accompanies the latter picture. "The Omnibus" is devoted entirely to the Doncaster week, with the exception of the part where the writer describes his interview, *en route* with "The Poet Close." "Bachelor's Hall" pursues its course merrily; and "A Deer-drive in America" and "The Pheasants and the Coverts" are seasonable papers. *Baily's* portrait of the month is Lord William Powlett, in whose memoir some characteristic reminiscences of his late father are introduced. "The Gentleman in Black" revels in the racing of the Black Forest; and there is capital promise in the first chapter of the "Early Days of an M.F.H." "The Van" is most amusing in its Doncaster chat, but its shorthorn lore is rather funny.

NEWMARKET FIRST OCTOBER MEETING.—Tuesday.

Trial Plate.—Press Forward f., 1. Gentle Kitty c., 2. Naxos, 3.
Handicap Sweepstakes of 20 sovs.—Bertha, 1. Leotard, 2. Prince Lee Boo, 3.
Hopeful Stakes.—Yamuna, 1. Tomfoolery, 2. Fille de l'Air, 3.
Sweepstakes of 10 sovs.—Zeelo, 1. Atlas, 2. The Hare, 3.
Great Eastern Railway Handicap.—St. Alexis, 1. Queen Elizabeth, 2. Juliet, 3.
Buckenham Stakes.—Hengist, 1. Phemy f., 2.
Croome Stakes.—Cambuscan, 1. Durham, 2.
Grand Duke Michael Stakes.—Fantail, 1. Escape, 2. Melrose, 3.
Third Year of the Fourteenth Produce Stakes.—Harlequin, 1. Hurricane, 2. Buckenham, 3.

WEDNESDAY.

Fifty Pounds.—Novice walked over.
Second Year of the Fifteenth Triennial Produce Stakes.—Tornado, 1. Turcos, 2. The Ranger, 3.
Handicap Sweepstakes of 15 sovs.—Moulsey, 1. Bradamante, 2. Regina, 3.
Handicap Sweepstakes of 20 sovs.—Merry Maid, 1. Knave of Trumps, 2. Wild Duck, 3.
Sweepstakes of 10 sovs.—Antoinette, 1. Lady Constance f., 2. Salvioni, 3.
Sweepstakes of 10 sovs.—Edward the Confessor, 1. Folly, 2. Plover, 3.
St. Leger Stakes.—The Ranger, 1. Early Purl, 2. Sandford, 3.
Granby Stakes.—Union Jack, 1. Linda, 2. Durham, 3.

THURSDAY.

Queen's Plate.—Isoline, 1. Harlequin, 2.
Sweepstakes of 10 sovs.—Walloon, 1. Croagh Patrick, 2.
Sixteenth Triennial Stakes.—Ely, 1. Tomato, 2.
Handicap Plate of £50.—Manrico, 1. Bosh, 2.
Handicap Sweepstakes.—Land of the West, 1. Galileo, 2.
Rutland Plate.—Acolyte, 1. Esperance, 2.
Sweepstakes of 5 sovs.—Marpesia f., 1. Naxas, 2.

LATEST BETTING ON THURSDAY.

Cesarewitch.—12 to 1 agst Lioness (t), 25 to 1 agst Drummer Boy (t), 25 to 1 agst Limosina (t), 28 to 1 agst Romanoff (t), 30 to 1 agst Anfield (t), 30 to 1 agst Fantail (t), 100 to 3 agst Cher Amie (t), 100 to 3 agst Umpire (t), 40 to 1 agst Hurricane (t), 40 to 1 agst Buckenham (t), 50 to 1 agst Twilight (t).

Cambridgeshire.—100 to 8 agst Catch 'em Alive (t), 25 to 1 agst Exchequer (t), 40 to 1 agst Cairncastle (t), 50 to 1 agst Bathilde (t), 1000 to 15 agst Jacqueline c (t), 1000 to 15 agst Polynesia (t).

"Tullochgorum."—(To the Editor).—In your notice of the opening of the Inverness and Perth Railway you say, referring to a portion of the route, "The farms which give name to the reel of Tulloch and the song of Tullochgorum. Of this latter Burns says that it is the best song Scotland ever saw. It was written by a Jacobite Bishop of the Scottish Episcopal Church." Permit me to correct this statement. The author of Tullochgorum was the Rev. John Skinner, Episcopal Clergyman, Longside, Aberdeenshire. He was not a Bishop, although he might have been; but he declined the offer, and said—"I'll rather abide with the numerous flock of which I have the charge and keep a' the Bishops in Scotland *richt*."—A Grandson of the Poet. Longside, Aberdeenshire.

A Treasury warrant has come into operation providing that all packets consisting of patterns or samples of merchandise, of no intrinsic value, may be transmitted by the post, within the United Kingdom, at the following rates:—On every such packet, if not exceeding 4 oz. in weight, there shall be charged and taken one uniform rate of postage of 3d.; if exceeding 4 oz. and not exceeding 8 oz., 6d.; if exceeding 8 oz. and not exceeding 16 oz., 1s.; if exceeding 16 oz. and not exceeding 24 oz., 1s. 6d. No such packet shall exceed 24 oz. in weight, or more than 2 ft. in length, width, or depth. There shall be no inclosure, sealed or otherwise closed against inspection, or any writing or printing, except the address of the person for whom it is intended, the address of the sender thereof, a trade-mark, and number and price. All packets shall be sent in covers open at the ends, so as to be easy of examination. Nevertheless, samples of seeds, drugs, and such other articles and things as cannot be sent in open covers may be inclosed in bags of linen or of other material, which shall be tied at the neck; but bags so closed that they cannot be readily opened, even though they be transparent, shall not be used for that purpose. The postage must, in every case, be paid in stamps.

The funeral of the late George Potts, Esq., the Conservative M.P. for Barnstaple, took place on Monday last at Tottenham.

Intelligence from the Caucasus, highly unfavourable to the Russians, has been received. The Circassians are everywhere resuming the offensive.

The Accountant-General's office of the Court of Chancery will be open on Thursday, the 15th; Friday, the 16th; and Saturday, the 17th instant., for the delivery out of any regular interest draughts which have become payable in respect of the October dividends, and of any other regular interest draughts which shall have become payable during the closing of the office.

The new Passengers Act took effect on Thursday. Some important alterations are made. Every steam-vessel, British, foreign, or colonial, carrying passengers other than cabin-passengers, is to be subject to the provisions of the Act of 1855 and the present. In future, persons called "stowaways," who get on board fraudulently to obtain a passage, are to be liable to a penalty of £20. In the event of a master proceeding to sea without a certificate of clearance the ship is to be forfeited, but may be released on payment of a sum not exceeding £2000.

The distribution of flags to the army of Roumania by Prince Couza took place on the 14th ult. at the chapel of the camp at Cotroceni. The Ministers of State, the Judges, the high clergy, the civil employés, and an immense crowd of persons, including many ladies, assisted at this imposing ceremony. After the performance of mass and the benediction of the flags, they were delivered by the Prince to the several Colonels. Prince Couza, surrounded by the clergy and the troops, then made an eloquent speech from the throne, which dwelt upon the fact that their old standards, which perpetuated the memory of the separation of Moldavia and Wallachia, were now replaced by the flag which reunited the colours of the two Principalities—the flag of Roumania, one and indivisible.

MONETARY TRANSACTIONS OF THE WEEK.

(From our City Correspondent.)

The fluctuations in the value of Home Securities, this week, have been trifling; nevertheless, owing chiefly to the demand for money having been very active, the amount of business doing, both for money and time, has been somewhat limited, and the supply of Stock afloat has rather increased. Indian Stocks, &c., have changed hands slowly, at about previous quotations.

The Money Market is well supplied with capital. The great activity in the demand, however, has kept prices firm, and very little accommodation has been obtained under the bank rate. In Lombard-street, the quotations are as follows:—

Thirty days' bills	3¾ 4 per cent	Four months' bills	4½ per cent.
Sixty days' bills	4 ,,	Six months' bills	4½ 5 ,,
Three months' bills	4½ ,,		

Very high rates have been paid in the Stock Exchange in connection with the adjustment of the foreign account.

Throughout the Continent money continues in moderate request. We annex the rates in the leading cities:—

	Bank rate per cent.	Open market per cent.		Bank rate.	Open market.
Paris	4 ..	3¾	Amsterdam	3 ..	3
Vienna ..	5 ..	5	Turin	5 ..	5
Berlin ..	4 ..	3½	Brussels ..	4 ..	3½
Frankfort ..	3 ..	2¾	Hamburg ..	— ..	3
			St. Petersburg	6 ..	8

About £900,000 in bullion has arrived, and most of the gold at hand has been sent into the Bank of England. Several parcels, however, have been withdrawn for export, and the steamer for India has taken out £557,660, of which £170,000 is gold, the remainder silver.

A new bank for the metropolis has been started. It is called the East London Bank, with a capital of £600,000, in shares of £50 each.

Letters from New York state that the Money Market was very sensitive, and that gold continued to fluctuate rapidly. Nearly the whole of the Continental exchanges are still in favour of this country.

On Monday the Consol Market was far from active, yet prices ruled steady:—Consols, for Money, were done at 93¼ ⅜; Ditto, for Time, 93⅜ ½; Reduced and New Three per Cents, 91 to ⅞; India Five per Cents, 108½ ¼; Ditto Debentures, 100¾; Exchequer Bills, 1s. dis. to 3s. prem. The Five per Cent Rupee Paper was 107½. The Funds were heavy on the following day. Consols, for Transfer, closed at 93¼ ⅜; Ditto, for Time, 93⅜ ½; Reduced and New Three per Cents, 91⅞; India Five per Cents, 108½ ¼; Exchequer Bills, 1s. dis. to 2s. prem.; India Five-and-a-Half per Cent Paper, 116¾. On Wednesday Consols were 93¼ ⅜ for Money, and 93⅜ ½ for Time; Reduced and New Three per Cents realised 91⅞ 92; India Five per Cents, 108⅜ ⅝; Ditto Debentures, 100½; Ditto Bonds, 16s. to 20s. prem.; Exchequer Bills, 1s. dis. to 2s. prem. On Thursday the market was without material change:—Consols, for Money, marked 93¼ to ⅜; for Account, 93⅜ ½; Reduced and New Three per Cents, 91⅞ 92; Exchequer Bills, par to 3s. prem.; and India Five per Cents, 108⅜ ⅝.

The New Two-and-a-Half per Cents changed hands at 77. Bank Stock, for Account, sold at 238.

The returns of the Board of Trade, showing the extent of our trade during the first eight months of the year, are very favourable.

The dealings in American Securities have been on a very moderate scale. Prices, however, have been fairly supported. United States Five per Cents have been 68; Atlantic and Great Western Seven per Cents, 81; Erie Seven per Cents, 70.

A very unfavourable report has been issued by the directors of the Great Ship Company. The trade liabilities exceed £30,000; but, in some quarters, the shareholders are recommended to form a new company.

The market for Foreign Securities has been rather flat, and, in some instances, the quotations have slightly declined. Confederate Scrip, however, is somewhat firmer, at 28 to 26 dis. Egyptian Seven per Cents have realised 101½; Greek, 38; Ditto, Coupons, 18¼; Mexican Three per Cents, 47½; Moorish, 95; Portuguese Three per Cents, 49½; Russian Five per Cents, 93½; Spanish Passive, 36½; Ditto, Certificates, 14⅜; Turkish Old Six per Cents, 95½; Ditto, 1858, 70⅞; Ditto, 1862, 71; Italian Five per Cents, 73½. Venezuela Three per Cents, 26½; Ditto, Six per Cents, 61⅜.

A full average business has been transacted in Joint-stock Bank Shares, and prices have ruled very firm. Agra and United Service have sold at 116½; Alliance 41½; Ditto, New, 21; Bank of Egypt, 27½; Bank of Queensland, 15½; Bank of Wales, 8¼; Bank of New Zealand, 12⅜; Brazilian and Portuguese, 8¼; Chartered of British Columbia, 12¼; Consolidated, 10¾; English and Irish, 11; English, Scottish, and Australian Chartered, 25; Hindustan, China, and Japan, 29⅞; Imperial, 25; Imperial Ottoman, 19⅜; London and Brazilian, 51; London, Buenos Ayres, and River Plate, 51½; London and Colonial, 9; London and County, 51½; London and Middlesex, 9½; London and Northern, 12; London and South African, 29½ ex new; Mercantile and Exchange, 11½; National Provincial of England, 137; Ditto, New, 37; Oriental, 60½; Provincial of Ireland, 92½; Scinde, Punjaub, and Delhi, 7; Standard of British South Africa, 24½; Union of Australia, 58; Union of England and France, 11; and Union of London, 40.

Colonial Government Securities have been in limited request:—Canada Six per Cents have marked 103; Ditto, Five per Cents, 92⅞; New Brunswick Six per Cents, 102½; New South Wales Five per Cents, 1888 to 1892, 102¼; and Victoria Six per Cents, 114⅜.

The Miscellaneous Market, on the whole, has ruled steady:—Berlin Waterworks have sold at 9⅜; Crystal Palace Debentures, 118; Egyptian Commercial and Trading, 4½; General Credit and Finance of London, 6⅜; Great Ship, Seventeen-and-a-Half per Cent Preference, 3s. 6d.; Hudson's Bay, 9⅞; International Financial Society, 11; Italian Irrigation, Canal Cavour, 4⅞; Ditto, Six per Cent Bonds, 89¾; Joint-Stock Discount, 7; London District Telegraph, 1⅞; Mediterranean Extension Telegraph, 3½; and United Kingdom Telegraph, 2½.

The Railway Share Market has been extremely inactive, but no change of importance has taken place in the quotations. The "calls" for the present month, chiefly for foreign lines, is £1,000,068. Annexed are Thursday's official closing prices:—

Ordinary Shares and Stocks.—Caledonian, 120; Dublin and Belfast Junction, 39¾; Great Eastern, 51⅞; Great Northern, A Stock, 129½; Great Western, 66; Ditto, West Midland Oxford, 43; Lancashire and Yorkshire, 112⅜; London and Blackwall, 73; London and Brighton, 112½; London, Chatham, and Dover, 42½; London and North-Western, 103; London and South-Western, 102; Manchester, Sheffield, and Lincolnshire, 46; Metropolitan, 131½; Ditto, New, 8; Midland, 128⅞; North British, 56½; Ditto, Edinburgh, Perth, and Dundee, 26½; North-Eastern—Berwick, 101½; Ditto, York, 89; Shropshire Union, 51; South Devon, 32¾; South-Eastern, 97⅜; Staines, Wokingham, and Woking, 10½; Victoria Station and Pimlico, 160½.

Preference Shares.—Great Western, Birmingham Stock, 75; Midland—Bristol and Birmingham, 139; Ditto, Four-and-a-Half per Cent, 101½; Ditto, Leicester and Hitchin, 94½.

Lines leased at Fixed Rentals.—Birkenhead, 91½; London, Tilbury, and Southend, 100.

British Possessions.—Bombay, Baroda, and Central India, 103; Buffalo and Lake Huron, 6⅜; Calcutta and South-Eastern, 107⅞; Eastern Bengal, 100½; East Indian, 103½; Grand Trunk of Canada, 21½; Great Indian Peninsular, 108½; Great Southern of India, 107½; Great Western of Canada, 10¾; Indian Branch, 2¾; Madras Five per Cent, 108; Melbourne and Hobson's Bay, 57⅞.

Foreign.—Bahia and San Francisco, 20⅞; Northern Railway of Buenos Ayres, 10½; Ottoman, 12¾; Recife and San Francisco, 19; Turin and Savona, 4

The return of the Bank of England for the week ending Sept. 30 shows the following results, when compared with the preceding statement:—

An increase of circulation of	£797,016	A decrease of bullion of	£151,953
An increase of public deposits of ..	978,995	An increase of rest of	1,750
An increase of other deposits of ..	857,880	A decrease of reserve of	918,828
An increase of securities of	2,790,591		

The total circulation is £22,312,747. Public deposits amount to £9,270,436; and private deposits to £13,717,460. Securities are £33,751,401; and the stock of bullion is £15,477,835.

THE MARKETS.

Corn Exchange, Sept. 28.—The show of English wheat in to-day's market was very moderate. Selected samples of both red and white were taken off somewhat freely, at full prices; but other kinds met a dull inquiry, at late rates. Foreign wheat—the supply of which was large—moved off slowly, on former terms. The barley trade was heavy, at 1s. to 2s. per quarter less money. No change took place in the value of malt. We have to report a dull inquiry for oats, beans, and peas, at late rates. The flour trade was in a sluggish state, on former terms.

Sept. 30.—The demand for all kinds of produce was in a very inactive state to-day; nevertheless, compared with Monday, no change took place in prices.

English.—Wheat, Essex and Kent, red, new, 40s. to 45s.; ditto, white, 41s. to 47s.; Norfolk and Suffolk, red, 40s. to 45s.; rye, 32s. to 34s.; grinding barley, 26s. to 28s.; distilling ditto, 29s. to 32s.; malting ditto, 28s. to 33s.; Lincoln and Norfolk malt, 60s. to 66s.; brown ditto, 50s. to 57s.; Kingston and Ware, 60s. to 66s.; Chevalier, 66s. to 68s.; Yorkshire and Lincolnshire feed oats, 18s. to 22s.; potato ditto, 22s. to 26s.; Youghal and Cork, black, 16s. to 22s.; ditto, white, 16s. to 23s.; tick beans, 30s. to 33s.; grey peas, 31s. to 36s.; maple, 33s. to 40s.; white, 37s. to 38s.; boilers, 38s. to 39s. per quarter. Town-made flour, 40s. to 43s.; town households, 34s. to 36s.; country marks, 27s. to 30s. per 280lb. American flour, 19s. to 25s. per barrel; French, 36s. to 39s. per sack.

Seeds.—Tares have moved off heavily, on lower terms. Most other seeds, as well as cakes have met a slow inquiry, at late rates.

Linseed, English, crushing, 64s. to 69s.; Calcutta, 64s. to 65s.; hempseed, 44s. to 46s. per quarter; coriander, 16s. to 19s. per cwt.; brown mustard seed, 10s. to 11s.; white ditto, 11s. to 12s.; tares, 5s. 6d. to 6s. per bushel; English rapeseed 60s. to 61s. per quarter. Linseed cakes, English, £9 10s. to £10 5s.; ditto, foreign, £9 10s. to £10 15s.; rape cakes, £6 to £6 15s. per ton; canary, 36s. to 50s. per quarter; red clover seed, 38s. to 48s.; white ditto, 54s. to 58s. per cwt.

Bread.—The prices of wheaten bread in the metropolis are from 7d. to 7½d.; of household ditto, 5d. to 6½d. per 4lb. loaf.

Imperial Weekly Averages.—Wheat, 43s. 9d.; barley, 35s. 9d.; oats, 20s. 2d.; rye, 32s. 1d.; beans, 38s. 11d.; peas, 37s. 5d.

The Six Weeks' Averages.—Wheat, 44s. 10d.; barley, 31s. 2d.; oats, 21s. 9d.; rye, 32s. 7d.; beans, 39s. 5d.; peas, 36s. 3d.

English Grain Sold Last Week.—Wheat, 131,590; barley, 41,567; oats, 13,810; rye, 531; beans, 2254; peas, 1135 quarters.

Tea.—Most kinds are inactive, yet prices are fairly supported.

Sugar.—Raw qualities continue in fair request, at full currencies. Refined goods are a slow inquiry, at 44s. 6d. per cwt. for common brown lumps. Stock, 110,223 tons, against 87,863 tons last year.

Coffee.—The market has been devoid of animation, at about previous quotations. The stock amounts to 10,704 tons, against 7879 tons in 1862.

Rice.—Most qualities support previous rates, but the demand is by no means active. Stock, 42,704 tons, against 59,777 tons.

Provisions.—Irish butter moves of slowly, at 85s. to 100s. for Carlow, and 80s. to 101s. for Cork. Foreign qualities are dull, at 102s. for the best Friesland. Bacon is less active, at 66s. to 68s. per cwt. for Waterford sizeable. Bladdered lard is held at 48s. to 58s., and keg 40s. to 48s. per cwt. In other provisions very little is doing.

Tallow.—The trade is steady. P.Y.C., on the spot, is selling at 41s. 9d.; and for delivery during the last three months, 45s. per cwt. Rough fat, 2s. 3d. per 8 lb. Stock of tallow, 42,755 casks, against 37,373 ditto last year.

Oils.—Linseed oil is selling at 43s. per cwt. Rape may be quoted at £41 10s. to £45; olive, £52 to £60; cocoanut, £45 to £47; and fine palm, £37. French turpentine, 76s. per cwt.

Spirits.—No change has taken place in the value of rum. Brandy and grain spirits move off slowly, at late rates.

Hay and Straw.—Meadow hay, £3 to £4 10s.; clover, £4 to £6; and straw, £1 8s. to £1 16s. per load.

Coals.—Best house coals, 18s. 6d. to 19s. 3d; seconds, 17s. to 18s.; Hartley's, 16s. to 17s.; and manufacturers', 13s. 3d. to 15s. 3d. per ton.

Hops.—The supply of new hops is large, and the demand is steady, at from 100s. to 150s. per cwt.

Wool.—The market generally is firm, and the quotations are well supported.

Potatoes.—The supplies are very large and in excellent condition. Sales progress slowly, at from 50s. to 90s. per ton.

Metropolitan Cattle Market (Thursday, October 1.)—There was a fair average supply of beasts on offer here to-day, as to number; but the general quality of the stock was inferior. Sales progressed slowly, at Monday's currency. The top figure was 4s. 10d per 8lb. The show of sheep was moderate. Most breeds changed hands somewhat freely, at full prices. The best Downs realised 5s. 2d. per 8 lb. Calves were in demand; but no change took place in the quotations. The best veal was worth fully 4s. 4d. per 8lb. The sale for pigs was heavy, and prices had a drooping tendency. Milch cows were very dull. Per 8lb. to sink the offal:—Coarse and inferior beasts, 3s. 2d. to 3s. 6d.; second quality ditto, 3s. 8d. to 4s. 2d.; prime large oxen, 4s. 4d. to 4s. 6d.; prime Scots, &c., 4s. 8d. to 4s. 10d.; coarse and inferior sheep, 3s. 6d. to 4s.; second quality ditto, 4s. 2d. to 4s. 6d.; prime coarse-woolled sheep, 4s. 8d. to 4s. 10d.; prime Southdown ditto, 5s. to 5s. 2d.; large coarse calves, 3s. 4d. to 4s.; prime small ditto, 4s. 2d. to 4s. 4d.; large hogs, 3s. 8d. to 4s. 2d.; neat small porkers, 4s. 4d. to 4s. 8d.; suckling calves, 14s. to 20s.; and quarter-old store pigs, 20s. to 26s. each. Total supply:—Beasts, 1020; cows, 135; sheep, 6500; calves, 310; pigs, 470. Foreign: Beasts, 512; sheep, 1560; calves, 249; pigs, 20.

Newgate and Leadenhall.—The trade for each kind of meat is heavy, as follows:—Beef, from 2s. 6d. to 4s.; mutton, 3s. 6d. to 4s. 6d.; veal, 3s. 8d. to 4s. 2d.; and pork, 3s. 8d. to 4s. 8d. per 8 lb. by the carcass. Robert Herbert.

BOOTHROYD, Southport, Lancashire, cabinetmaker.

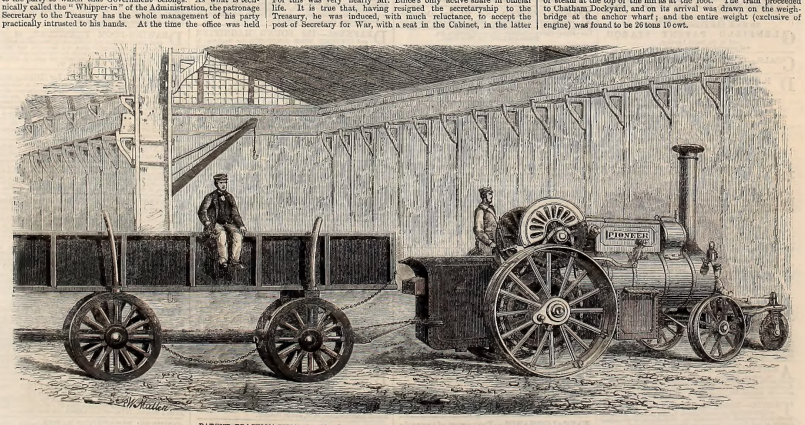
SCOTCH SEQUESTRATIONS.

G. SOMMERVILLE, Edinburgh, lapidary.—T. SCOTT, Bridgend, Argyleshire, general merchant.

THE RIGHT HON. EDWARD ELLICE.

Those who have contemplated the political world on the surface only, will, no doubt, be surprised to know that a statesman of remarkable power and influence has passed away in the person of the Right Hon. Edward Ellice, for many years member of Parliament for the city of Coventry. Attentive observers of the proceedings in the House of Commons, even of late years, were aware that Mr. Ellice was, so to speak, one of the standing counsel to the House, and more especially to the Liberal side. Indeed, for some years past, Mr. Ellice never rose in his place except to give advice; and that advice was always directed towards the adoption of a temperate course. He always urged moderation; usually suggested delay, in order to give time for consideration; and often interposed between a rash and hasty vote when the acknowledged leaders on both sides had lost all control over the House. In the last two or three years the neutralisation of party has reached to such a point, and the occasions for hot disputes on vexed questions have been so few, if they have existed at all, that Mr. Ellice has not been called on to exercise his prescriptive function, and his voice has scarcely been heard during the last three Sessions. Still there existed an abstract sense of his value as a Parliamentary arbitrator, and he was tacitly acknowledged to be the Nestor of the House, happily divested of the prosiness of his Homeric antitype. To have attained such a position in an assembly like the House of Commons, the larger proportion of the elements of which must have been materially changed during Mr. Ellice's long Parliamentary career, so that by a considerable majority of members his influence was accepted only by tradition, was no small tribute to his qualities as a public man. But the result of a political life of nearly fifty years was much more important and comprehensive than is implied in the holding of a quasi-judicial ascendancy amongst members of Parliament. A rare combination of mental qualities, a great capacity for labour, and singular powers of order, the result of special education and early mercantile training, enabled Mr. Ellice to play an

FANCY DRESS BALL GIVEN BY THE NAVAL OF LIVERPOOL IN THE TOWN-HALL, TO THE OFFICERS OF THE CHANNEL FLEET.—SEE PAGE 408.



important part in politics during changeful and eventful times, and, coincidently with the punctual and unwearied performance of public duties, to administer the affairs of more than one commercial undertaking, besides those of the house of business with which he was privately connected. Those who attribute the peculiarities of a man's character to the influence of blood and race might find an apt instance of their theory in Mr. Ellice. In his shrewdness, his calm judgment, his tact, and his faculty—without the least offence, be it spoken—of cultivating successfully the main chance, a good deal of the inherent qualities which are supposed to belong to the races from which he sprung might be traced. His grandfather, a descendant of a Scottish family in Aberdeenshire, settled in the Transatlantic possessions of England; his father, on the breaking out of the War of Independence, which issued in the establishment of the United States of America, removed to Canada, and founded there a mercantile house, which in time became great, and was at length established in London. Mr. Ellice, his third son, was born in London; was educated first at Winchester School and afterwards at the Scotch University of St. Andrew; and early in life entered his father's office as a clerk. After a short probation, he was employed as the agent of the house in the occasional supervision of its affairs in Canada and the United States, and between 1803 and 1809, he paid several visits to those countries, observing their growth in population, wealth, trade, and commerce, and acquired peculiar knowledge of their political condition. He was intimately acquainted with all the principal statesmen of the United States of the last half-century; and is said to have concurred with them in that political prescience which anticipated a rupture and a struggle for ascendency on the one part, and for independence on the other, between the North and South. In 1818, Mr. Ellice entered Parliament as member for Coventry; and he represented that borough, with a short interval between 1826 and 1830, until his death. His political principles at that time were what were then called extreme Radical; that is, he was of the school of Sir Francis Burdett; was an associate of Sir John Cam Hobhouse and Lord King; and it may be here parenthetically mentioned that he was a friend of Byron, and was associated with him in the management of Drury-lane Theatre. It would seem that the Radicalism of that day is pure Conservatism now, for Sir Francis Burdett's last election was won by him on a profession of at least modern Tory principles; and since 1832 Mr. Ellice has been a steady opponent of any organic political change. No doubt Mr. Ellice's position in society must have been an assured one even before he entered on public and Parliamentary life, for in 1809 he married a sister of Earl Grey. After her death, in 1842, he married the widow of the Earl of Leicester, better known as Coke of Norfolk, the last being a daughter of the fourth Earl of Albemarle. Even in his matrimonial alliances he was true to his political principles, for he thus became connected by family ties with the chiefs of the Liberal party. By the time that Earl Grey succeeded to office Mr. Ellice had glided into Whiggery; and it was as patronage Secretary to the Treasury in the Whig Government of 1830 that Mr. Ellice first held office. At all times, this office is one of great importance, not only to a Government but to the party to which that Government belongs. As what is technically called the "Whip-in" of the Administration, the patronage Secretary to the Treasury has the whole management of his party practically intrusted to his hands. At the time the office was held by Mr. Ellice it was one involving peculiar difficulty, and requiring singular powers in the man who held it. He held it during the desperate party struggles of the era of the Reform Bill, when numberless contending interests were to be reconciled; when opposition was to be met directly or to be neutralised; when successive general elections were to be managed, if not to be controlled—for it is useless to blink the fact that everything was not conducted on mere purity of principle; there were experienced and wily, perhaps unscrupulous, opponents to be encountered, in a battle which each side felt to be one of political life and death. In this case the personal character and the social qualities of Mr. Ellice, by which he had gained friends in all parties, stood him in as much stead as his ability, industry, and tact; and it has been long well understood that it was from that time that he acquired the influence with the leaders of the Whigs which he has ever since exercised. For this was very nearly Mr. Ellice's only active share in official life. It is true that, having resigned the secretaryship to the Treasury, he was induced, with much reluctance, to accept the post of Secretary for War, with a seat in the Cabinet, in the latter days of the Ministry On the breaking up of the Administration he bid farewell to political place, but, as has already been indicated, by no means to political power. It is believed that, besides his authoritative position in the House of Commons, he generally had a great deal to say in the way of advice, which was, of course, asked, in the formation of all the Liberal Ministries of the last twenty-five years. His political sagacity made him a power in public life, and his influence, if it was exercised for the promotion of party, was never made to subserve his private and personal interests. Although during his tenure of office he had made some sacrifice of his private fortunes, in so far as they could be affected by the withdrawal of his personal supervision over his affairs, he was a man of large means, and, as a merchant-prince, had nothing to ask of the comparatively poor pecuniary rewards of public life. He more than once refused a peerage, contented with a nominal private station, which, in his case, was undoubtedly a post of honour. As a proof of Mr. Ellice's aptitude and readiness of acquirement, it may be mentioned that, although he held the office of Secretary for War for a very brief period—scarcely more than eighteen months—he gained so thorough a knowledge of the organisation of the Army that he ever after spoke on subjects connected with military administration with an authority which would not have been accepted by the House on any but tenable grounds. It has been well said of Mr. Ellice that he was in all respects a citizen of the world. His views were large, because his sympathies were wide. Although connected by political and domestic ties with some of the most aristocratic families, he always gave proofs of his interest in the welfare of the people. Although he had reached the ripe age of eighty, he was a man who will be missed—at least in the arcana of political life.

THE LATE RIGHT HON. EDWARD ELLICE, M.P.

TRIAL OF TRACTION-ENGINES AT CHATHAM DOCKYARD.

A TRIAL took place at Rochester, on the 17th ult., of two of Aveling's Patent Road Locomotive Engines, in the presence of Captain Nicolas Skarlatine on behalf of the Russian Government. The first engine experimented on was built for the Russian Government for use in one of their dockyards. This engine, besides being suitable for hauling heavy loads, is adapted for driving sawing machinery and also for winding having screwed his entire apparatus of steam at the top of the hill as at the foot. The train proceeded to Chatham Dockyard, and on its arrival was drawn on the weighbridge at the anchor wharf; and the entire weight (exclusive of engine) was found to be 26 tons 10 cwt.

PATENT TRACTION-ENGINE, MANUFACTURED BY MESSRS. AVELING AND PORTER, OF ROCHESTER.

**** The charge for the insertion of Births, Marriages, and Deaths is Five Shillings for each announcement.*

BIRTH.

On August 10, at Allenhage, Cape Colony, the wife of John E. Dyer, Esq., M.R.C.S., Eng., of a son.

DR. DE JONGH'S
(Knight of the Order of Leopold of Belgium)
LIGHT-BROWN COD-LIVER OIL,
prescribed by the most eminent Medical Men throughout the world as the safest, speediest, and most effectual remedy for
CONSUMPTION, CHRONIC BRONCHITIS, ASTHMA, COUGHS, RHEUMATISM, GOUT, GENERAL DEBILITY, DISEASES OF THE SKIN, RICKETS, INFANTILE WASTING, AND ALL SCROFULOUS AFFECTIONS,
is incomparably superior to every other variety.

SELECT MEDICAL OPINIONS.
Sir HENRY MARSH, Bart., M.D.,
Physician in Ordinary to the Queen in Ireland.
"I consider Dr. DE JONGH'S Light-brown Cod-liver Oil to be a very pure Oil, not likely to create disgust, and a therapeutic agent of great value."

DR. GRANVILLE, F.R.S.,
Author of the "Spas of Germany."
"Dr. Granville has found that Dr. DE JONGH'S Light-brown Cod-liver Oil produces the desired effect in a shorter time than other kinds, and that it does not cause the nausea and indigestion too often consequent on the administration of the Pale Oil."

EDWIN CANTON, Esq., F.R.C.S.,
President of the Medical Society of London, &c., &c.
"For several years past I have been in the habit of prescribing Dr. DE JONGH'S Light-brown Cod-liver Oil, and find it to be much more efficacious than other varieties of the same medicine which I have also employed with a view to test their relative superiority."

DR. DE JONGH'S LIGHT-BROWN COD-LIVER OIL is sold only in Imperial half-pints, 2s. 6d.; pints, 4s. 9d.; quarts, 9s.; capsuled and labelled with his stamp and signature, WITHOUT WHICH NONE CAN POSSIBLY BE GENUINE, by respectable Chemists and Druggists.

THE PRINCE CONSORT.
Now ready, with Portrait, one volume 8vo, price Half-a-Guinea,

THE PRINCIPAL SPEECHES AND ADDRESSES OF H.R.H. THE PRINCE CONSORT; with an Introduction, giving some Outlines of his Character.

From the Introduction.

"It must be obvious to the reader of this introduction that the writer has received the most valuable and important aid from those who, by their constant intercourse with the Prince Consort, could best appreciate the high qualities in him which shone forth in domestic life—from persons in the Royal household, who saw him daily—from members of the Royal family, and especially from the Queen herself. To her Majesty the writer is indebted for a view of the Prince's character in which a loving and profound appreciation is combined with the most earnest desire for exact truth and faithfulness."

THE PRINCE OF WALES.
Now ready, with Plans, one volume 8vo, 9s.,

SERMONS IN THE EAST. Preached before H.R.H. the Prince of Wales during his Tour. With notices of some of the places visited. By Rev. A. P. STANLEY, D.D., Deputy-Clerk of the Closet, and Canon of Christ Church.

From the Preface.

"The Sermons in this volume are now for the first time given to the public, in deference to the gracious expression of her Majesty's wishes. It will be seen that their interest depends entirely on the circumstances and the occasion of their delivery. A more elaborate style, or more copious illustrations, would have been out of place in the original composition of such Addresses, and would, if subsequently added, have destroyed the only value which they possess. Whatever special allusions they may contain to the scenes of the journey will, it is believed, be sufficiently explained in the Notices added at the conclusion of the volume."

JOHN MURRAY, Albemarle-street.

CHEAP EDITIONS of POPULAR NOVELS.
Each Volume embellished with Two Illustrations.

THE PLANETS and DOUBLE STARS seen distinctly by a new Telescope for £5, which will also distinguish the face of a sheep and features of a man four miles, the sign of a public-house five miles, shot marks upon a target two miles, and time by a church clock ten miles. This instrument is guaranteed in writing to perform the whole of the above, and to be equal in the most important respects to telescopes costing £70. It has a 3-in. superior achromatic object-glass, two eyepieces, &c., with portable metal tripod stand with jointed claw feet.—S. and B. SOLOMONS, 39, Albemarle-street, Piccadilly. Persons are invited to apply for a diagram with full particulars, sent free. Powerful small pocket telescopes, opera, field, and general outdoor glasses.

POCKET BAROMETER, COMPASS, and THERMOMETER, all in one, the size of a watch, for telling the weather, the heights of mountains, direction of winds, and temperature of the air. Guaranteed for 12 months. Price £4 15s., sent free. S. and B. SOLOMONS, Opticians, 39, Albemarle-st., Piccadilly

---

ACHROMATIC MAGIC and DISSOLVING LANTERNS.—The advantage of achromatic lenses over the common lenses now in use is brilliancy and beautiful definition. No additional charge is made upon this improvement, as a large sale is anticipated. Catalogue sent free.—S. and B. SOLOMONS, Opticians to the Government, 39, Albemarle-street, Piccadilly.

SPECTACLES.—The PATENT TINTED SPECTACLES are patronised by the majority of the nobility, including Viscount Palmerston. They give extraordinary relief by day and night to weak, dim, and defective vision. The adaptation of spectacles to imperfect vision by experienced persons is, indeed, of vital importance. One of the Firm who has had great experience and practice attends to this branch only.—S. and B. SOLOMONS, 39, Albemarle-street, Piccadilly. Opposite the York Hotel.

DEAFNESS.—The SOUND MAGNIFIER and INVISIBLE VOICE CONDUCTOR, for Deafness. It fits into the ear not perceptible, removes singing noises in the head, and enables deaf persons to hear distinctly at church and at public assemblies.—S. and B. SOLOMONS 39, Albemarle-street, Piccadilly.

UNIVERSAL MICROSCOPE. Price £5 5s.
SMITH, BECK, and BECK,
31, Cornhill, E.C. (late 6, Coleman-street).
Catalogues sent on receipt of six postage-stamps.

MAGIC LANTERNS and DISSOLVING VIEWS. Price Sixpence. Instructions for Exhibiting Dissolving Views, and for the Management of the Apparatus, with Lime Light or Oil Lamps. By JOHN J. GRIFFIN, F.C.S. Illustrated by numerous Engravings. To which is added a priced list of about 2000 sliders, arranged in collections suitable for lectures, including many new and brilliant subjects. Single Lanterns, 3½ in. lenses, with rack-work adjustment, 55s. Pair of Lanterns, with all the apparatus necessary for exhibiting dissolving views to public audiences, £12 12s.
JOHN J. GRIFFIN, 119, Bunhill-row, E.C.

"RECONNOIT'RER" GLASS, 9s. 6d. ! This Tourists' Favourite weighs 8 oz., is achromatic, and so strong that ships, houses, trees, &c., ten miles off; Jupiter's Moons, &c., are distinctly seen by it; and when used as a landscape glass is valuable on a twenty-five mile radius. "I think the Reconnoiterer very good."—The Marquis of Carmarthen. "I never before met an article that so completely answered its maker's recommendation."—F. H. Fawkes, Esq., Farnley, Otley. "Regarding the glasses supplied by Messrs. Salom, I am well pleased with them."—From a report by the Head Gamekeeper of the Marquis of Breadalbane. "The economy of price is not secured at the cost of efficiency. We have carefully tried it at an 800-yard rifle-range against all the glasses possessed by the members of the corps, and found it fully equal to any, although they had cost more than four times its price."—The Field. Post-free, 10s. 10d. The Hythe Glass, showing bullet marks at 1200 yards, 31s. 6d. These Glasses are only to be had direct from SALOM and CO., 98, Princes-street, Edinburgh, who have no agents.

KEYZOR and BENDON'S TWO-GUINEA BINOCULAR FIELD, RIFLE, or OPERA GLASS.—The extraordinary power of this instrument renders it adapted to define objects distinctly at ten miles' distance. Suitable for the theatre, racecourse, target practice, sportsmen, tourists, and general outdoor observation. Illustrated Price-lists of Optical Instruments for two stamps.—50, High Holborn, London.

BENSON'S CHURCH, TURRET, and STABLE CLOCKS.—Clergymen, Architects, Committees, &c., can be furnished with Estimates and Specifications for every description of Horological Machine, especially Cathedral and public Clocks, chiming tunes on any number of bells. A short pamphlet on Church and Turret Clocks post-free on receipt of one stamp.—J. W. BENSON, maker of the Great Clock for the Exhibition, 1862, 33 and 34, Ludgate-hill, E.C.

BENSON'S WATCHES, adapted for every class, climate, and country, wholesale and retail. Chronometer, Duplex, Lever, Horizontal, Vertical, Repeating, Centre Seconds, Keyless, Astronomical, Reversible, and Chronograph Watches, from 200 guineas to 3 guineas each. An Illustrated Pamphlet and price-list of every description of Watch post-free for two stamps.—J. W. Benson, Manufactory, 33 and 34, Ludgate-hill; Branch Establishments, 46, 47, and 63, Cornhill.

THE PRETTIEST GIFT FOR A LADY is one of JONES'S LEVER WATCHES, at £11 11s.; for a Gentleman, at £10 10s. Rewarded at the Exhibition for cheapness of production. Manufactory, 338, Strand, opposite Somerset House.

DENT'S CHRONOMETERS, WATCHES, and CLOCKS.—M. F. DENT, 33, Cockspur-street, Charing-cross, Watch, Clock, and Chronometer Maker by special appointment to her Majesty the Queen, 33 and 34, Cockspur-street, Charing-cross (corner of Spring-gardens).

DENT, Chronometer, Watch, and Clock Maker by special appointment to her Majesty the Queen and H.R.H. the Prince of Wales, and Maker of the Great Clock for the Houses of Parliament, 61, Strand (adjoining Coutts's Bank), and 34, Royal Exchange.

GOLD CHAINS and FINE GOLD JEWELLERY.—A very elegant STOCK of GOLD CHAINS, 18s. to 20 gs.; Gentlemen's Albert Chains, 21s. to 18 gs.; Gold Brooches, 20s. to 15 gs.; Gold Bracelets, 55s. to £20; Wedding and Keeper Rings, 10s., 15s., and 20s. Gem ditto, 12s. 6d. to 20 gs.; Gold Earrings, 12s. 6d. to 5 gs. per pair. Gold Lockets, 10s. to 16 guineas. Gold Scarf Pins, 5s. to 10 gs.—FREDC. HAWLEY, Goldsmith, 148, Regent-street. Jewellery repaired and Diamonds reset. List of prices free.

WATCHES, TIMEPIECES, and CLOCKS. Elegant GOLD WATCHES, jewelled in four holes, £2 15s. to £35; Silver Watches, £1 5s. to 12 guineas; eight-day Timepieces, 12s. 6d. each; Clocks going 14 days, three guineas and upwards.—FREDERIC HAWLEY, Watchmaker, 148, Regent-street, W. (from 75, Strand, and Coventry-street). Established nearly a Century. List of prices free. Old Watches, Gold, Silver, Diamonds, &c., purchased or taken in exchange. Merchants and Captains supplied on liberal terms. Watches and Clocks repaired. A new assortment of large Musical Boxes with all the late improvements.

DEANE and CO., The Monument, London-bridge.

FURNISH YOUR HOUSE with the best articles at DEANE'S Ironmongery and Furnishing Warehouses. Established A.D. 1700. New Illustrated Catalogue and Priced Furnishing List gratis and post-free.
Deane and Co., The Monument, London-bridge.

EASY-CHAIRS, SOFAS, and COUCHES, best quality only, made to any shape, on approval, at T. H. FILMER and SON'S Manufactory, 31, 32, and 34, Berners-street Oxford-street, W. An Illustrated Priced Catalogue sent post-free.

THE LORD DUNDREARY EQUILIBRIUM CHAIR. Extremely comfortable, good, and very cheap. "There's the idea!"—A. SEDLEY and CO., 210, Regent-street, London, W., Patentees of Equilibrium Chairs.

SEDLEY'S Patent EQUILIBRIUM CHAIRS are the most comfortable and cheapest yet offered to the public. Capital for India, packing up in less space than any other chair. Also, first-class Furniture, Carpets, &c., at very moderate prices. 210, Regent-street, London, W.

DRAWING-ROOM FURNITURE, of the most superior design and workmanship, arranged in complete suites, and covered in brocaded silks, rice moquette, and Neuilly tapestry, in all colourings, always ready for inspection and delivery, at prices varying from 35 guineas per suite for cash.—A. SEDLEY and CO., Upholsterers, 210, Regent-street, W.

ANTIQUE FURNITURE, for Dining-room and Library, old oak, in good preservation, of a very choice character, suitable for mediæval decorations; the carvings are unique, chaste, and elaborate. The dining-room set consists of ten high-backed chairs, a pair of elbow chairs to match, large set of telescope dining-tables, with extra leaves, dumb waiter, &c., truly beautiful sideboard fitted with plate-glass back. Price of the foregoing, 68 guineas—half its value. The library set comprises an 8-ft. bookcase, six Gothic chairs, and a library table same style. On view at the BELGRAVE FURNISHING COMPANY, 12, Sloane-street, Belgrave-square.

PIANOFORTE.—A Lady, having no further use for her TWO PIANOFORTES, is anxious to DISPOSE of them both; are full compass, splendid tones, all the recent improvements, and nearly new, in very handsome walnut cases. Prices respectively, 16 guineas and 22 guineas each. May be seen at LEWIN CRAWCOUR and CO.'S, Upholsterers, 73 and 75, Brompton-road, Knightsbridge, S.W. N.B. On Sale also a Brilliant-toned Grand 6¾ octaves, in elegant rosewood case, by Stoddart, a great bargain.

COSTLY FURNITURE, for Drawing-room, Dining-room, and Bedroom.—The Belgrave Furnishing Company, No. 12, Sloane-street, S.W., have for DISPOSAL (part of the contents of a mansion) THREE SUITES of FURNITURE, of a most superb recherché character. The Drawing-room is in the style of Louis Seize, richly gilt and covered in silk brocade, includes twelve chairs with padded backs, large Turkish ottoman, four easy chairs, and a large conversation settee, the whole luxuriously upholstered; there are also several unique and magnificent inlaid tables, a cabinet, several other ornamental items, and three truly beautiful and very large chimney-glasses with console and girandoles to match. The dining-room is equally magnificent, in oak, consisting of the usual requisites of an entire suite. The bedroom is likewise very superb, and comprises all the necessaries of a best bedroom in fine Italian walnut. Noblemen and gentlemen about furnishing a large house would find this a most desirable opportunity, as the above will be sold, together or separately, for a comparatively very low sum.

WILLIAM S. BURTON, GENERAL FURNISHING IRONMONGER by appointment to H.R.H. the PRINCE OF WALES, sends a CATALOGUE gratis and post-paid. It contains upwards of Five Hundred Illustrations of his illimited stock of sterling Silver and Electro-plate, Nickel Silver, and Britannia-metal Goods, Dish Covers, Hot-water Dishes, Stoves, Fenders, Marble Chimneypieces, Kitchen Ranges, Lamps, Gaseliers; Tea Trays, Urns, and Kettles; Clocks, Table Cutlery, Baths, Toilet Ware, Turnery, Iron and Brass Bedsteads, Bedding, Bedroom Cabinet Furniture, &c., with lists of prices and plans of the twenty large Showrooms, at 39, Oxford-street, W.; 1, 1A, 2, 3, and 4, Newman-street; 4, 5, and 6, Perry's-place; and 1, Newman-yard, London.

WASHING, WRINGING, DRYING, and MANGLING MACHINERY and APPARATUS, for Families, Hotels, Institutions, &c. Adopted by her Majesty's Government. Indiarubber Wringers from £1; Washing-machines, £3 10s.; Mangles, £2 10s.—WILLIAMSON, 133, High Holborn.

CHUBBS' FIREPROOF SAFES, with their Drillproof and Powder-proof Locks; Cash and Deed Boxes, Detector Locks, Street-door Latches. Illustrated Price-lists, gratis and post free.—Chubb and Son, 57, St. Paul's-churchyard, London.

Queens and Empresses use them.

THOMSON'S PRIZE MEDAL CRINOLINES.
All are pleased with them.

TO SUM UP the PROPERTIES of these CRINOLINES in a sentence, they are economical, convenient, healthful, graceful, fashionable, artistically beautiful, as well as popular, modest, ladylike, queenly, and well deserving the praise lavished upon them by all classes throughout the civilised world.
To see is to admire; to wear is to appreciate, and discard all others.

LADIES' DRESS ARTISTICALLY CONSIDERED. To dress in perfect good taste a lady should thoroughly understand the philosophy of apparel. Dress is not simply an article of use—a garment which the female sex indiscriminately can wear, and in which each will appear equally well; but it is a means whereby the especial nature of the wearer is clearly displayed. That which is becoming and appropriate to one is essentially out of place if worn by another; while some costumes (the Bloomer for instance) possess no fitness for any, and simply serve to make the wearers ridiculous. Many things are merely utilitarian in character, and have no claim to the slightest beauty but are stiff and unseemly. Such garments may be convenient for common use, but grace and elegance of costume are the truest signs of a lady. A woman of a tall figure, dignified in her carriage and inclined to soberness of spirits, if she would preserve these characteristics, would doubtless select such stuffs for her dresses, of neutral tints, as would increase this impression, and would have it then made up in a simple, chaste style, and wear them with hoops. If the impression she desired to make were lively she would probably choose bright colours, and add flounces and other trimmings.
The opposite of this lady, a brilliant, gay, little beauty, would select materials much higher in tone, and probably with brighter and more contrasted trimmings. Such a lady can wear hoops of a moderate size with great advantage; indeed, the present fashion of hoops, which we are glad to see continues unchanged, notwithstanding all the gossips say to the contrary, is becoming to more persons than any style of dress heretofore adopted. It combines gracefulness and elegance with healthfulness and comfort. Since their introduction spinal disease, once so common, has in a great measure disappeared; nor has any other complaint arisen in its place. There is no dress a lady can adopt, no matter what may be its material, its colour, or its fashion, that is not improved in its general appearance by being worn with hoop skirts. Through their aid dignity and grace are attained, and the sweeping line of the robe itself preserved in all its purity.
"Thomson's Crown Skirts are the best, both in shape and make."—Family Herald.

CAUTION.
Crinolines stamped "Thomson," "Thomson's Patent," or "W. S. and C. H. Thomson," are thus stamped to ensure sale for inferior goods. THOMSON'S PRIZE MEDAL CRINOLINES are never stamped thus, but always with their Trade Mark, a CROWN.
N.B. Infringers are hereby notified that proceedings will be commenced unless former infringements are settled at once.
Drapers are cautioned against all goods not bearing the Trade Mark, a Crown, or the Name or Trade Mark of Messrs. Thomson's Licensees, as they are infringements, and render them liable for damages.

SOLD BY GOOD DRAPERS EVERYWHERE,
THOMSON'S PRIZE MEDAL CRINOLINES.
Trade Mark, a Crown.

*** Lowest price for the insertion of a Column of the above Advertisements, stereotyped or not, to be sent to W. Riddell, Advertisement Contractor, Crosby Hall Chambers, Bishopsgate-street, London.

THE EYVA.
Registered at Stationers' Hall.
This remarkable garment combines a Lady's Jacket and Vest in an ingenious manner, producing a most elegant and pretty effect, and which by means of an elastic band fits any figure. The Garibaldi, introduced in the autumn of 1861, was generally welcomed and largely patronised as being a step in the right direction; but the Eyva exhibits an appearance of tastiness and finish, which is altogether wanting in the Garibaldi, and can be worn on any occasion in place of the high dress body. The Eyva, being the invention of Mr. Peter Robinson, cannot be furnished from any other house.
A complete assortment now ready.
PETER ROBINSON'S, 103 to 108, Oxford-street, W.

PATTERNS FREE.

JOHN HARVEY and SON, 9, Ludgate-hill.

THE SELLING-OFF at ARGYLL HOUSE,
Nos. 256, 258, 260, and 262, Regent-street.
JOHN ORCHARD and CO. (late Hodge, Lowman, and Orchard) beg to acquaint their Patrons and the Public that their Establishment will be
CLOSED TILL MONDAY NEXT, THE 5TH INST.,
to facilitate the re-marking the whole of the Stock
AT THE REDUCED PRICES.
The SALE will COMMENCE on MONDAY, the 5th inst., at Ten o'Clock.

SELLING OFF—The RICH and VALUABLE STOCK of SILKS, SHAWLS, CLOAKS, DRESSES, LINENS, CARPETS, &c., of Messrs. JOHN ORCHARD and CO. (late Hodge, Lowman, and Orchard), Argyll House, 256, 258, 260, and 262, Regent-street.—J. O. and Co. respectfully announce that they are making arrangements for the
Admission of a New Partner
(rendered necessary by the increase of their trade), prior to which it is imperative that the existing Stock should be disposed of Without Reference to Present Prices, and in a limited space of time. Consequently, the Whole of the Goods in every department are undergoing the process of re-marking in plain figures, at such Reductions as must ensure a Speedy Clearance.
To Ladies requiring such Goods, this will be found an opportunity rarely to be met with, as not only the old stock, but the purchases recently made of novelties for the forthcoming season have borne an equal reduction; and J. O. and Co. venture to hope that the long standing and known respectability of their house will be a guarantee for the genuineness of the sale.
The Firm trust that it will be unnecessary to remind their Patrons that, during the Sale, the Goods are marked CASH PRICES, as it must be obvious, upon an inspection of the Stock, that such a REDUCTION as has been made would be justified only by a rigid adherence to such terms.
The Doors of the several Establishments will be opened and
THE SALE COMMENCE at TEN O'CLOCK on MONDAY
MORNING NEXT, OCTOBER 5th.
JNO. ORCHARD and CO.,
Argyll House, Nos. 256, 258, 260, 262, Regent-street.
It is requested that all accounts owing to the Firm be paid at their Counting-house, 256, Regent-street.

RICHARD COEUR DE LION. M. BESLEY'S New Cantata performed with immense success at the Norwich Festival is now ready, price 5s. for Voice and Pianoforte. The principal music, 6d.; as sung by Mdlle. Tietjens, Madame Lemmens-Sherrington, and Mr. Santley, are published separately. A list of which may be had on application to
CHAPPELL and CO., 50, New Bond-street.

SECONDHAND PIANOFORTES. CHAPPELL and CO. have a large Stock of SECONDHAND PIANOFORTES from Cottages to Grands, by BROADWOOD, COLLARD, ERARD, &c., &c., that have been hired for the season, at very reduced prices. Also, a few Pianofortes of every description.—Chappell and Co., 50, New Bond-street.

PIANOFORTES at CHAPPELL'S.—The Pianofortes by Lund, Broadwood, Collard, Erard, &c., for Sale or Hire.—50, New Bond-street.

CHAPPELL'S FOREIGN PIANINO (the only Pianino to which the Prize Medal was awarded), very elegant Pianoforte, of small size, the full compass, check action, and most perfect touch, admirably adapted to small rooms, yachts, boudoirs, &c. Warranted to keep in tune, and to be the best and cheapest Pianoforte. With check action and all the latest improvements. Price, in mahogany, rosewood, or walnut, 35 and 36 guineas. A great variety may be seen at
Chappell and Co.'s, 50, New Bond-street.

CHAPPELL and CO.'S ENGLISH MODEL COTTAGE PIANOFORTE.—To enclosure preferring the pure English tone of the Broadwood or Collard quality, the English Model Cottage Pianoforte, by Chappell and Co., will be found unrivalled in excellence. The action is of the same simple construction as the above manner, and therefore especially adapted to the country where the tuner cannot attend so frequently as he should to keep the instrument in regular condition. The touch is elastic, and the repetition of the most rapid character. The compass is seven octaves, the full compass known in England at the same price. Every instrument will be warranted, and (if desired) exchanged within six months of the purchase.
Chappell and Co., 50, New Bond-street.

BROADWOOD, COLLARD, and ERARD, the Pianofortes of every description, including all the newest kinds by those celebrated makers, may be tried side by side (and hired, if desired) at CHAPPELL'S, 50, New Bond-street.

ALEXANDRE'S DRAWING-ROOM MODEL HARMONIUM, the best that can be made, containing twelve stops and 3½ octaves of pedals. Illustrated Catalogues of Pianofortes and Harmoniums upon application to
CHAPPELL and CO., 50, New Bond-street.

SIX-GUINEA HARMONIUM by ALEXANDRE, with five octaves, two foot-boards, and 10 sets of reeds. This instrument is low in price and superior to all other cheap harmoniums. Descriptive lists on application to
CHAPPELL and CO., 50, New Bond-street.

SECONDHAND HARMONIUMS, by ALEXANDRE, nearly (if not quite) as good as new, at greatly-reduced prices, at CHAPPELL'S, 50, New Bond-street.

ALEXANDRE'S PRIZE EXHIBITION MODEL HARMONIUM, for the CHURCH, 18 stops, 4 rows of vibrators, and Venetian swell, worked by the feet of the right foot, in oak case, 32 guineas. A large assortment may be always seen at CHAPPELL and CO.'S, 50, New Bond-street.

G. GRETTON'S PIANOFORTE WORKS. 24, Rêve sans Mesure, 3s.; Ten Step Waltz, 3s. 6d.; Ten Leaves, 3s. 6d.; the Merry Old England Tarantella, 3s.
CRAMER, BEALE, and WOOD, 201, Regent-street, W.

CRAMER'S PIANOFORTE GALLERY. Messrs. Cramer and Co. beg to announce that the Pianoforte Gallery, 207 and 209, Regent-street, is now open for the season. The collection of Pianofortes by the most eminent makers is unrivalled for its completeness, and comprises every description of Pianoforte, suitable for the drawing-room, the concert-room, or the study. The selection, or mechanism, is of the very best description, being constructed under the personal superintendence of the first artists of the day. The stringing is complete, there being three wires to each note throughout the entire compass.
Cramer and Co. guarantee these instruments to be of the most perfect description, and forward them to all parts of the country without extra charge. Cramer and Co., 207 and 209, Regent-street.
Pianoforte Gallery, 207 and 209 Regent-street.

CRAMER'S NEW 7-OCTAVE SEMI-OBLIQUE PIANOFORTES. Price 45 guineas in Rosewood, and 50 in Walnut.
In introducing this instrument prominence has been given to the following points:—Great power, with a pure quality of tone; a touch responsive to the slightest pressure, and capable of the most rapid repetition; flexibility and elasticity of touch, durability of action, and the capacity to develop to the maximum, in the hands of the powerful player of the artist, or drawn out by the less accustomed hand of the amateur; the whole of the mechanism being so simple as to be easily understood, and not liable to get out of order.
The action, or mechanism, is of the very best description, being constructed under the personal superintendence of the first artists of the day. The stringing is complete, there being three wires to each note throughout the entire compass.
Cramer and Co. guarantee these instruments to be of the most perfect description, and forward them to all parts of the country without extra charge. Cramer and Co., 207 and 209, Regent-street.
Pianoforte Gallery, 207 and 209 Regent-street.

CRAMER'S ENGLISH PIANETTE. 7½ guineas.—Cramer and Co. beg to announce this useful and elegant little Pianoforte as the most perfect instrument of its size and price ever produced. It is 3 feet 3 inches high, 1 foot 8 inches wide, and 1 foot 6 inches deep, and contains all the compass of the ordinary Pianoforte, with the exception of the last note in the key and worn in 166 Guineas. In rosewood, 25 guineas; in walnut, 26 guineas.
Cramer and Co. guarantee these instruments to be of the most perfect description, and forward them on receipt of a remittance to the above amount, or single notes, but the double or check action; and Cramer and Co. beg to call the attention of the public to the fact that this is the only manufacturer of the kind in England.—207 and 209, Regent-street.

INDIAN PIANOFORTE.—CRAMER, BEALE, and WOOD have received from Calcutta a CABINET PIANOFORTE, in solid Mahogany, with metallic tractions and all the latest improvements, which, from the dryness of the climate, it was feared would be affected by the extreme heat. The success of the instrument as well as the Case has been secured throughout by means of a peculiar varnish, the composition of which has received years of study from the manufacturer, and they have obtained the highest commendations for the perfect manner in which it has withstood the climate.
CRAMER, BEALE, and WOOD, 201, Regent-street, W. A pamphlet in case a friend wish else, at any home port, for 32 guineas. Size—Height, 3 feet 3 inches; width, 3 feet 6 inches; depth, 1 foot 10 inch.
Pianoforte Gallery, 207 and 209, Regent-street, London.

THALBERG'S GRAND PIANOFORTES. These magnificent Instruments, manufactured by Messrs. S. and P. Ibach, of Barmen, and sold by CRAMER, BEALE, and WOOD, are pronounced by the most eminent Pianists to be unrivalled in the perfection of the mechanism and the beauty of the tone. Messrs. Cramer, Beale, and Wood have the honour to announce that they have obtained the sole agency for the sale of these Pianofortes in London, and have now on view a large assortment of Cabinet and Grand Pianofortes, which they are prepared to supply at the manufacturer's prices.
201 and 207, Regent-street.

CRAMER'S MECHANICAL PIANOFORTE, manufactured by the Messrs. Alexandre, of Paris, is an instrument entitled to rank foremost among the triumphs achieved by the ingenuity of modern mechanism. The tone is full and rich, and the touch is elastic. It will be found admirably adapted for the performance of Overtures, Quadrilles, Waltzes, &c., in an open space, such as a Ball-room, Concert-room, or Theatre, and is not liable to derangement. Price 70 guineas.
CRAMER, BEALE, and WOOD, 201, Regent-street, London.

LE SOMMIER ÉLASTIQUE PORTATIF. The foundation for all luxurious bedding should be elastic, and the present system is too heavy and cumbersome for transit. THE NEW SPRING now PATENT LE SOMMIER ÉLASTIQUE PORTATIF is made in three separate parts, and is therefore light and portable; it is also cheap and durable, and as it has no stuffing on the top it cannot harbour vermin.

THE LATE PROFESSOR COCKERELL, R.A.

Of this distinguished architect we gave a brief memoir in our Journal of last week. His professional career may be said to have commenced more than half a century since, when he assisted Mr. (afterwards Sir Robert) Smirke in the rebuilding of Covent-garden Theatre; which service Sir Robert always freely acknowledged. In the following year, 1810, Mr. Cockerell, having been well schooled in classical architecture, commenced a tour of exploration in Greece, Asia Minor, and Sicily, and studied, with great advantage, the architectural and sculptural remains of those renowned countries; he also, in his long and patient explorations at Egina, Phigaleia, &c., recovered a great number of ancient sculptures, inscriptions, and architectural fragments, most of which are deposited in the British Museum and the Glyptothek, in Munich. Thus he became grounded in that antiquarian and artistic knowledge and keen appreciation of sculpture in its relation to architecture which proved one of his specialties. His intricate measurements of Greek edifices have been of great service to archæology, and his services in this respect stood out in bold relief to the student. While the *dilettanti* were arguing and discoursing, it has been well observed, "Cockerell dug, drew, measured, and thought;" and subsequently wrote upon these subjects essays which are most treasurable contributions to the history of Art. Mr. Cockerell extended his tour to Turkey, and passed some months in Constantinople. His labours at Egina were, however, the most important results, in the discovery of marbles pre-eminently illustrative of the history of Greek sculpture. They consist of entire statues; and, with the figures from the Parthenon pediments, are, according to Mr. Scharf, "the only instances of an extensive range of Greek composition that we can refer to as still existing." His next important discovery was the existence of Bassæ of the sculpture now known as the Phigaleian marbles. He then made a tour through the Seven Churches; cruised along the coast of Karamania with Captain Beaufort; and next, in Sicily, collected materials for his restoration of the Temple of the Giants at Girgenti. He subsequently visited Naples and Pompeii, passed a winter at Rome, studied the next summer at Florence, went in the autumn to Lombardy and Parma, and returned to England, his mind well stored with these fruits of travel and research, in 1817. His professional labours now commenced. In 1819 Mr. Cockerell was appointed Surveyor to St. Paul's Cathedral; and in the same year he exhibited his "Idea of a Restoration of the Capitol and Forum of Rome," which, with the companion "Restoration of Athens," are familiar from the published engravings. In 1820 he exhibited his Restoration of the Parthenon, with the scenery of the Acropolis, from drawings and observations made on the spot. In 1821, Mr. Cockerell replaced the ball and cross of St. Paul's with a new one. In 1823, he commenced Hanover Chapel, Regent-street, which is much admired for the picturesque effect of its portico. Mr. Cockerell now became actively employed; but we have not space to enumerate his labours. About 1833, he succeeded Sir John Soane as architect to the Bank of England; here his principal work is the south side of the garden court in the Threadneedle-street buildings. In 1836, Mr. Cockerell was elected a Royal Academician. In 1836, he completed, in conjunction with Mr. Tite, the London and Westminster Bank, in Lothbury, the design being, in the main, Mr. Cockerell's. In the same year, he exhibited his "Tribute to Wren"—a collection of his principal works—which has been engraved. In 1840, Mr. Cockerell succeeded Wilkins as Professor of Architecture in the Academy. Mr. Cockerell competed for the Royal Exchange, his design having salient columns in the front supporting statues, and, in some respects, reminding one of a Roman triumphal arch. The Taylor and Randolph buildings, Oxford, were Mr. Cockerell's next important work; the grouping and details are much admired. In 1842 was commenced the Sun Fire Office, in Threadneedle-street, excellent in its details, and with the novelty of orders in the upper portion of the building, and not in the lower one. St. George's Hall, Liverpool, has been referred to as Cockerell's greatest work; but it should be stated that the design was originally Elmes's, whom Cockerell greatly assisted, the sculpture for the pediment, composed upon the Greek system of the Parthenon, being designed by him. Mr. Cockerell publicly gave, after Elmes's death, great praise to this young architect's work, and generously exerted himself for Elmes's widow. Mr. Cockerell, between 1847 and 1854, completed the magnificent interior, including the St. George's Concert Hall. In

THE LATE CHARLES ROBERT COCKERELL, ESQ., R.A.

MACON, GEORGIA.—SEE NEXT PAGE.

1855 he commenced his latest building—the structure for the Liverpool and London Insurance Company in Liverpool. In 1857, he retired from the Academy; but in the following year exhibited "A Study of the Mausoleum at Halicarnassus," from the classic texts and from measurements of the fragments in the British Museum. On the death of Earl De Grey, Mr. Cockerell accepted the office of president of the Royal Institute of British Architects, of whose gold medal he had been the first recipient. His lectures, essays, and contributions to the literature of sculpture and architecture, displaying unwearied research and long study, are very numerous; his illustrations, by plans and drawings, were most valuable; and "never has lecturer in the Academy collected round him more attentive listeners." Mr. Cockerell was an honorary D.C.L. of Oxford, a member of the Society of Dilettanti, one of the eight Foreign Associates of the Academy of the Institute of France, Member of the Academy of St. Luke at Rome, and those at Munich and Berlin, &c. He was an active member of the Royal Academy. He was also one of the most efficient members of the direction of the School of Design at Somerset House. His remains have been most appropriately laid within the walls of St. Paul's Cathedral, near the grave of Sir Christopher Wren, whose works he had so highly esteemed, and over whose greatest structure he long presided. In the funeral cortége were members of the Royal Academy and of the Institute of British Architects, and many eminent builders. Each of the pall-bearers carried an immortelle, and, after the solemn musical service in the choir, the coffin was borne to a spot in the centre of the dome-area of the cathedral, where the rest of the service was chanted. Thence it was lowered into the crypt, into a grave by the side of that of John Rennie, the celebrated engineer, whose second daughter the deceased married.

Thus were borne to their resting-place the remains of a man who, fervently loving the study of his art, rose to become illustrious in its practice and development. No artist ever quitted life more honoured, beloved, and regretted. His sympathies were as generous as his love of art was pure. His active professional life extended through half a century; and though in his early years he enjoyed advantages denied to many, he toiled long in the paths to true greatness; and, mindful of those less favoured than himself, he was ever ready "to take by the hand the humble artificer."

Our Portrait of Mr. Cockerell is from a photograph taken by M. Claudet.

MACON, GEORGIA.

The town of Macon, in the heart of Georgia, is about forty miles south-west of the capital Millegeville, one hundred miles south-east of Atlanta, and within one hundred and fifty of Chattanooga, on the borders of Tennessee.

The importance of Macon has greatly increased since the commencement of the civil war. Though for many years it has been a handsome and enterprising town, new foundries and factories have lately sprung up; it is the dépôt of large Government stores; and as danger approaches its neighbourhood so does its consequence augment. Macon will probably become the base of operations and supplies for the Confederate army of the west; and Atlanta, on the line of railway from Tennessee, must be protected.

The direct route between Virginia and central Georgia has hitherto been by the Virginia and Eastern Tennessee Railroad, through Knoxville and Chattanooga. The loss of these two places will now compel the Confederates to abandon that portion of this very important line of traffic, their sole remaining one between the capital and the south-west, and thus greatly hamper their future communications with Georgia, Alabama, and West Florida.

Macon and Atlanta are each the central point of diverging railroads, and to retain these two towns is now of the utmost importance. The little town of Rome, where a portion of General Bragg's army is at present stationed, is at the termination of a branch railway at the extreme north-west of Georgia.

Macon has hitherto felt comparatively few of the sufferings consequent on the war and blockade. Ordinary provisions remained abundant, and were sold at their usual prices long after luxuries had vanished from the borders of the Confederacy. It is situated upon the Ocmulgee river, a branch of the Altamaha.

Owing to the abundance of trees that conceal the buildings, our Engraving conveys a somewhat inadequate idea of the size of the town, which has a population of some six or seven thousand people. Like most other Southern towns, the very wide streets have a row, sometimes a double row, of thickly-planted trees down the middle and another along each side, bordering the pavements, or "sidewalks," where, as well as in the private gardens, the catalpa, mimosa, ailanthus, and other flowering trees, with varieties of oak and willow, flourish luxuriantly.

College Hill, from which the sketch is taken, is one of a high range, adorned with handsome public institutions and private residences, the roads and approaches to which remain in primitive wildness. Mulberry-street, which the hill commands, is one of the principal thoroughfares. At the extremity is the County Courthouse; on the right is the tall spire of the Presbyterian, and on the left the tower of the Episcopal Church. Here and there another church or cupola and some taller buildings peep forth from the trees, gleaming white and dazzling in the bright sunshine; and the undulating distant country spreads in a chequered landscape of dark forests and crops of golden corn.

On the occasion of settling the affairs of a deceased member of the Benazet family, it has transpired that the average clear profits of their contract for the gaming-houses of Baden is 1,200,000 f. per annum. The gaming-houses at Aix-les-Bains, suppressed in 1857 by Count Cavour, gave M. Bias, the contractor, a clear annual profit of 1,000,000 f.

At a recent meeting of a cottage gardeners' society in Cornwall, Mr. W. Coulson, of Kenegie, High Sheriff of the county (and late Senior Surgeon to St. Mary's Hospital, London), made some very pertinent remarks on the subject of cottage gardening. Addressing the cottagers, he said:—"Some of you may meet me with the objection—How can a man, fatigued and worn by his daily work, devote time or labour to any other occupation than the one on which his bread depends? To this I have a twofold answer—In the first place the hardest-worked man always finds some time for occasional recreation, which is indeed, necessary to relieve both his body and mind. All classes of society feel this need; and if the poor man is unable to find recreation elsewhere he will seek it in the beershop, or even worse haunts. In the next place you know yourselves that change of work always relieves a man, be he ever so tired, and this is particularly the case when the change is from indoor labour to outdoor work—from constant labour of the same kind, in a confined room and close atmosphere, to outdoor field work under the genial influence of our temperature. One of the chief advantages, then, of cottage gardening is that, by affording rational recreation to the working man, it keeps him at home instead of sending him to the public-house, and thus raises his social condition, while it contributes to improve his health by agreeable and wholesome occupation. Another advantage of cottage gardening is the sense of comparative independence which it affords, and its actual utility in contributing to the support of himself and his family. A man who rents a small piece of ground, as well as his cottage, can look beyond the day, for he has something which he can call his own, or of which he cannot quickly be dispossessed; and, should employment fail him for a time, the produce of his garden will keep him from actual want. Even the political advantage of cottage gardens are not to be overlooked. They attach the cottager, not only in his home, but to his country; they foster sober, industrious, and domestic habits; they encourage that feeling of independence which is the surest character of a citizen of a free land like our own." Mr. Coulson then pointed out the sanitary uses of a garden, and discussed the best modes of cultivation. He then proceeded to say:—Our labourers and cottage population are not so ignorant of their own interests, or so little inclined to improve their condition, as to reject cottage gardening altogether. But they often find difficulty in getting a piece of ground, which is necessary to make the humble garden of the poor. Landlords and farmers must look to this, and one of the duties of this society will be to endeavour to remove such difficulty by showing the possessors of land how rural society is improved, and the connection between the labourer and his employer is strengthened, whenever those obstacles are removed which prevent the working man from getting a piece of garden ground for his cottage. Another of our duties will be to afford advice and assistance to those who, having obtained a garden allotment, show they are desirous of cultivating it in a proper manner, and it is a great encouragement to us to know that cottage gardening is always advanced in those districts where societies like our own exist and are properly supported. After dilating on the many other advantages derivable from cottage gardens, Mr. Coulson went on to describe the produce suitable to the soil and climate of Cornwall, and concluded a long and instructive speech amid applause. Several other gentlemen having addressed the meeting, it was unanimously resolved that Mr. Coulson's speech should be printed and circulated in a cheap form for the instruction of the labouring classes.

OUR COLOURED SUPPLEMENT.

The View of the "Village of Argenio, Lake Como," the first of our Coloured Illustrations, will probably awaken some peculiarly delightful recollections in the traveller, and will prove, we hope, pleasing and acceptable to all. There is no region in the world, not even the happy Valley of Cashmere, where greater contrasts and surprises are afforded than those presented to the traveller descending from the passes of the Simplon, the St. Gothard, and the Splügen, to the lovely lakes lying at the foot of the Alps, in Lombardy and Piedmont. To pass from ice and snow, torrent and avalanche, mountain and precipice, in a few hours to luxuriantly fertile plains, dotted with villages, and lakes whose polished azure is only broken by the reflection of the giant mountains and mountain spurs that screen them from the north wind, is like stepping from one hemisphere to another. The Lago di Como is especially remarkable for the beauty of the views from nearly every part of its shores. A long, narrow, and tortuous piece of water, flanked by two projections of the Rhætian Alps, and is thus shut in between shores which are richly diversified by numerous promontories, gulfs, and small bays, the two ridges sending out many offsets towards the lake. The transverse valleys formed by the latter are drained by numerous streams that, like the one seen in our View, empty themselves into the lake. The neighbourhood of the lake is one of the most delightful in Italy, the climate being mild and genial, the soil productive in fruits and vegetables, and the country studded with thriving villages, fine villas, and mansions, the sites of which are, as also indicated by the View before us, generally rendered at once more conspicuous and picturesque by castles and campanili.

Argenio is one of the numerous villages bordering the lake, and is situated on its south-west arm, half way between Cadenabbia and Como. It is overhung by steep hills clothed almost to their summits with the vine, the fig, and the noble walnut. One might fancy the village to have started into existence close to the margin of the lake, and to have fallen back in later times into strange nooks and corners along the hillside for shelter, and thus acquired its straggling and at the same time picturesque appearance. The tourist seeking novelties, or the artist desiring to enrich his portfolio, could not pass a few days to greater advantage than by taking a boat and visiting this same Argenio and its many sister villages, with their marvellous old, tumble-down houses, their streets leading nowhere, and their ancient churches—in many instances beautiful pieces of architecture—crowned with elegant campanili. Members of the Alpine Club, and our no less adventurous lady pedestrians, would find a few days spent in such visitings a charming relaxation, or a pleasant prelude to more arduous undertakings—perhaps over the Via Mala or the Pass of St. Gothard.

Our second chromotype is from a picture, entitled "Little Loves," to which was assigned a place of honour in the last exhibition of the British Institution, and which is, it seems to us, graceful in fancy and elegant in composition. The subject is at first sight simple and obvious enough. A fair young maiden (so extremely pretty that she may surely be called a "little love") sits at an open casement within the pleasant shade afforded from the summer sun by its painted blind, and round which floats air perfumed with the breath of flowers. Here, in cushioned ease and innocent luxuriousness, she whiles away the happy moments, playfully cherishing her "little loves." "Lovebirds" rightly are these beautiful little creatures named, for they will only live in pairs. One of her little pets she gently places to her lips to perform the dove-like billing which has become a synonyme for human kissing; while towards the other rival candidate, who has come to the cage door for the customary favour also, and seems to be fluttering a jealous protest against its mistress's partiality, she throws a glance of arch coquetishness. That the painter was not averse to the suggestion of a more latent meaning in the subject of his picture may be gathered from the accessories so appropriately and tastefully introduced—the emblematical rose, twining convolvulus, and jasmine spray; the tendrils of the vine clasping the passion-flower; and the bas-relief of amorini, which the reader will please observe are, though very "little loves," no other than Cupid and Psyche.

THE LONDON, CHATHAM, AND DOVER RAILWAY

BRIDGE AT BLACKFRIARS.

The changes recently effected in London, by means of private enterprise alone, exceed by far in their extent the large works carried out by Napoleon III. in Paris, about which we have lately heard so much. Our own improvements have not, it is true, in every instance, been so ornamental to the metropolis as they might have been made by a slight extra outlay and a little attention to good taste; but there can be no doubt of their being a great addition to the convenience and comfort of the public generally. We make our improvements one by one, and without much consideration for the general effect produced by them, so that occasionally valid objections are raised on the score of incongruity; but yet, taken altogether, it must be admitted that our system has worked well, and that London has been considerably benefited by its free operation.

As an example of the extent of these changes, we may instance those effected in bridge communication alone. Within a comparatively short time we have built and rebuilt, or are in the act of doing so, no less than nine bridges, all of which span the Thames within a brief limit. At Battersea, we have a new railway bridge; at Chelsea, a new suspension bridge; at Pimlico, a new railway bridge; at Lambeth, a new suspension bridge; at Westminster, a new bridge for general traffic; at Hungerford, a new railway bridge; at Blackfriars, two bridges, one in lieu of the present old Blackfriars structure, and the other for the London, Chatham, and Dover Railway's City branch; and a little above London Bridge there is now being erected a bridge to connect the South-Eastern Railway with Cannon-street, City.

Our Engraving shows the progress made with the Blackfriars Bridge for the London, Chatham, and Dover Railway, as seen from a spot near the centre of their intended railway terminus, on the east side of Blackfriars-road. On the left of our Engraving is seen old Blackfriars Bridge, which, being in a very dilapidated condition, is about to be pulled down and rebuilt. Immediately between it and the new railway bridge are to be observed the piles which are being driven in to form the basis of a temporary public bridge, to be used during the period occupied in pulling down and rebuilding the old one—a space of time probably of from three to four years. The temporary bridge will have a roadway very nearly upon the same level as that of the old Blackfriars Bridge for horses and vehicles; but foot passengers will traverse a kind of upper flooring, to be erected along the top of it for their especial use. The London, Chatham, and Dover Railway Bridge, in course of erection by Mr. Cubitt, will be 1216 ft. in length, by 53 ft. in width, and adapted for four lines of railway. It will be supported by four piers and two abutments, leaving five openings to the river; the centre opening, 193 ft. in width; the two next it, 180 ft.; and the two outer, 162 ft. The bridge will be of iron, with parapets of a slightly ornamental character (of trellis-work pattern), with decorated terminals above each pier, 5 ft. high; and the abutment terminals will bear the company's name and arms neatly designed in garter fashion. The abutments themselves are made of a handsome white stone known to architects as the "Bramley Fall" kind. Each of the above-named four piers is to be composed of three circular stone piers, standing eleven feet six inches from one another, and each of these stone piers will support four iron cluster columns, the main girder of the bridge being carried by these columns, which will therefore be placed in twelve groups of four columns each.

The bridge, it will be seen, runs almost parallel with old Blackfriars Bridge, and is intended to connect, by means of lines crossing Earl-street and Ludgate-hill, the London, Chatham and Dover line with the lines which have communication with the Metropolitan Extension Railway at the farther end of Farringdon-street. When the Great Eastern Railway shall have made its extension from Shoreditch through Finsbury to Smithfield, that also may be connected with the south-eastern coast by means of this bridge and line.

The new railway station in Blackfriars-road occupies a space 270 yards in depth—that is to say, from the bank of the Thames to Church-street—and from Blackfriars-road to John-street it has a width of 260 ft. This vast edifice, capable of accommodating an enormous traffic, is composed of yellow brick with red brick dressings, and is to have an arched iron and glass roof elevated above the railway beneath it, to the extent of 50 ft. and 95 ft. above the level of Blackfriars-road. The forty-five feet between the bottom level and that of the railway line will be overcome by means of a gradually sloped road, which will be used solely for passenger traffic, and the space beneath—the ground floor, so to speak, of the building—will be occupied entirely by the heavy-goods traffic; and lower lines of rail will be continued to the river-side, whereat, by means of wharves built for the purpose, cargoes of all kinds may readily be laden or discharged.

The Blackfriars-road station, it will thus be seen, will be one of the most extensive and important in the metropolis. Placed in the very centre of London, it will afford to business men travelling daily into the City immediate communication with their homes in Camberwell, Peckham, Brixton, Stockwell, Dulwich, Herne Hill, or Beckenham, &c., to the same extent as the West-end has been convenienced by the other arm of this railway at Pimlico, while travellers from the Continent or from the many important towns and cities on this line—Dover, Canterbury, Faversham, Sheerness, Rochester, Chatham, Margate, Ramsgate, &c.—will all participate in the like great advantages.

The sinking of the cylinder for one of the circular stone piers upon which the bridge is to rest is an interesting incident of the work now going on, and our Engraving shows by what means the labour is is performed. Working many feet below the bed of the river, the labourers are engaged digging out the foundations of the pier, and are protected from the river by being inclosed in a huge cylinder, the size of the intended stone piers. The earth they dig out is placed in a sort of semicircular iron box, which is lifted quickly and easily by means of a small steam-engine controlled by one man, and empties itself into a barge stationed alongside ready to receive it. The ease with which large and weighty masses of earth are thus moved is really surprising, and affords excellent evidence of the amount of skill now shown in economising human labour.

INTERNATIONAL RIFLE-MATCH.

ENGLAND VERSUS AUSTRALIA.

The volunteer institution has taken root in our colonies, and in Australia several corps have been formed, the members of some of which have attained high proficiency as marksmen. Last year the Captain of the Milang Company, in the Geelong district, a company which then comprised twenty-two marksmen, sent a challenge through the War Office to the company which, out of all the volunteer corps in Great Britain, had registered the best shooting and possessed the highest number of marksmen for the year 1862. On a scrutiny being made by the National Volunteer Association it was found that No. 1 (Castle) company of the Robin Hood Rifles (Captain Mundella) was entitled to the distinction of the premier company in Great Britain, and that the task of representing the mother country in the challenge-match devolved on them. By the conditions, as prescribed by the challengers, the competing squads were to consist of ten from each company, and to shoot at butts at which they had not previously practised, the time to be about the middle of September, Government long Enfield rifles, and seven shots each at eight ranges, from 200 yards, to 900 yards inclusive. Lord Vernon, who has recently erected, at great expense, for the benefit of the Derbyshire volunteers, superb butts in his picturesque park at Sudbury, kindly granted permission to the Robin Hoods to shoot the match there; and accordingly, on the 16th of September, the competitors appeared on the ground, commanded by Captain Mundella. Lord Vernon, who was to have acted as umpire, was prevented by an attack of neuralgia from being present; but his Lordship was represented by Captain Boothby, brother of Lady Vernon, and his son, the Hon. William Vernon. Captain Hay, late of the 47th Infantry and now Adjutant of the Sudbury volunteers, officiated as umpire in his Lordship's absence. The day was not a favourable one for good shooting. At ten o'clock, when the squads went to the ranges, there was a light breeze, with sunshine. The breeze subsequently died away, and the sky was overcast with clouds. Again the wind rose and blew in fitful gusts from the left across the ranges, increasing to a gale as the squads were drawn up at the 600 yards' range. At this distance Lord Vernon has built a large and spacious shooting-lodge, from which the volunteers may practise in the worst weather; but Captain Mundella would not avail himself of its shelter, and the squads shot from the open outside. The result of this varying character of the weather was to unsteady the aim and cause the men repeatedly to change their sights. The score, under the circumstances, was by no means equal to what like numbers of the Castle Company of the Robin Hood Rifles are in the habit of making. The following is the official return:—

	200 yards.	300 yards.	400 yards.	500 yards.	600 yards.	700 yards.	800 yards.	900 yards.	Gross Total.
Lieutenant Evans	23	18	17	19	20	19	8	9	133
Ensign Perry ..	17	18	19	21	9	20	6	3	113

Totals ..	190	156	196	163	125	142	109	74	1155
	19·00	15·60	19·60	16·30	12·50	14·20	10·90	7·40	115·50

The accompanying Illustration is from a photograph taken on the spot by the Hon. William Vernon, late of the Coldstreams, second son of Lord Vernon.

All the members of the competing squads are engaged in businesses, and had no experience of military matters before the formation of the volunteer corps. Captain Mundella, is a member of the firm of Hine, Mundella, and Co., extensive hosiery manufacturers. He, with Lieutenant Evans, Ensign Perry, and Colour-Sergeant Simkins are amongst the oldest members of the Robin Hood Rifle Battalion, their names appearing upon the first muster-rolls of the founders of the corps in May, 1859. Mr. Brewster won the bronze medal of the National Rifle Association at the county meeting of this year; of the others, Messrs. Shepperley, Evans, Perry, Redfern and Bass are winners of principal prizes at county competitions.

The Great Eastern Steam-ship.—An important report relative to the general and financial position of the Great Ship Company has been issued to the proprietors by the directors. It states that the directors regretted that circumstances over which they had no control had compelled them to call the proprietors together, in order to give them an approximate statement of the financial affairs of the company, and in order that immediate steps might be taken either to relieve the undertaking from its present embarrassments or to wind up its affairs. The report, after alluding in detail to the expensive repairs required by the vessel consequent on her last two or three voyages out an in, states that the rates in passengers and freights had been seriously affected by the competition that had existed throughout the season. There had been a considerable falling off in the number of passengers and the earnings of the several voyages made this season, compared with what the receipts would have been if the rates had been as in August last year. The figures show that for the three months of May, June, and August, 1863, as compared with 1862, the falling off in the receipts had been £19,915, the receipts in 1862 being £57,223, and in 1863 £37,308. On the last voyage out and home the vessel had sustained damage, and, under all the circumstances, the directors had considered it not desirable to send her out again this year or to enter into further engagements. The financial position of the company had been crippled, and the cost of repairs rendered it imperative that some steps should be taken. The working account showed an excess of disbursements over receipts of £18,979. The company's affairs were critical, and steps must be taken either to raise additional capital or dissolve the company. The ship could not be retained in the company's possession unless £30,000 were raised

INDOOR AMUSEMENTS.

PRIVATE THEATRICALS AND CHARADES.

The rage for amateur theatrical performances has increased wonderfully within the last few years, and acting charades, as a branch of the above, has become equally popular. We all recollect James Smith's song :—

> Cloudy mists every valley and hill bury ;
> Spurred and booted, on sofas we sprawl ;
> Back the galloway, put up the tilbury ;
> Sad wet weather at Drizzledown Hall.
> One cannot read "Waverley" twice over cleverly,
> Talents should never be idle, they say ;
> Best of all madrigals, private theatricals ;
> All that we want is to settle the play.

And in those days a curtain across the drawing-room, with two screens, formed the stage ; while some dozen ladies and gentlemen, very imperfect in their parts, and ready to burst out into alarming fits of laughter at their own imperfections, formed the *dramatis personæ*. Well might Sheridan, when asked which he liked best at one of the above entertainments, reply, "The prompter ; for I see less and hear more of him than any one else." Occasionally, some amateur of distinction appeared on the public boards, and fully deserved the remarks that we once read upon an amateur member of Parliament, who acted Richard III. and Caleb Quotem at the Salisbury Theatre. They ran as follows :—"Mr. —— appeared last night for the first—we trust it will be for the last—time upon our boards. The risible faculties of the audience were so excited in the tragedy that they had not a smile left for the farce." Of late years many amateurs, by dint of deep study, have become good actors ; and Campden House (now in ruins), the St. James's Theatre, Canterbury, Windsor, Brighton, Dublin, Hounslow, Richmond, Leamington, and Melton Mowbray, have witnessed their triumphs in the histrionic art. There can be no reason why well-educated ladies and gentlemen should not succeed in representing the characters drawn by the masterly hand of a Shakspeare, a Byron, a Lytton Bulwer, a Sheridan, a Colman, a Reynolds, a Morton, or many of the writers of the present day. All that is required, in addition to natural abilities, are a thorough insight into the author's meaning, a careful study of the part, and constant rehearsals. How often have we heard of amateurs going before the public after a few desultory morning rehearsals, and a grand dress one in the evening ! How often has the unfortunate manager been told, when requesting that a scene might be gone through properly, "Oh, we shall do that all right on the night of performance !" In a country house there are few better amusements than an amateur play or acting charades ; and, the play or charades being selected, it would be well to send to Simmons, of York-street, Covent-garden, or some other costumier, for their portable theatre, which can be fitted up in a hall or drawing-room without in the slightest degree damaging the walls. If charades are only acted, a proscenium may easily be raised by covering a light framework with trellis-paper or figures of knights in armour, which can be procured at any paperhanger's, and the curtain is soon formed from others. The scenery, too, if not extensive or elaborate, can be made out of paper or oiled transparencies, which are to be had at the venetian-blind manufacturers', representing woods, hills, waterfalls, exteriors and interiors of halls. The theatre having been erected, with lamps (or floats, as they are technically called) in front, hid from the audience by a deal board covered with red or green baize, the next point to be decided is the programme ; and here, of course, much must depend upon the strength and talent of the dramatic corps. Under any circumstance, however, let tragedies, serious plays, and long comedies be avoided, for they will wear out the patience of the best-natured audience long before the curtain drops, and a farce afterwards, however well acted, will prove "flat, stale, and unprofitable." In order to ensure success, care should be taken to select some short, smartly-written comedietta, to be followed by a "screaming farce" (we adopt the phraseology of the day) or a clever burlesque ; bearing in mind that one at least of the two pieces should be in a costume, in order that the performers may not look the same in both. For first pieces we should recommend "Charles II.," "The King's Word," "The Ladies' Battle," "Loan of a Lover," "Perfection," "Delicate Ground," "Still Water Runs Deep," "Our Wife," "Midnight Hour," "Game of Romps," "Pride of the Market," "Used Up," "Naval Engagements ; or, Faint Heart never won Fair Lady." For the afterpiece, "Bombastes Furioso," "Slasher and Crasher," "Little Toddlekins," "Boots at the Swan," "Samuel in Search of Himself," "Slowtop's Engagements," "Othello Travestie," "Done on Both Sides," "Norma Travestie," or "Barefaced Impostors." If an occasional address is to be spoken, let it not be of a sentimental but of a comic nature, introducing the topics of the day and good-natured "hits" at amateur performances, bringing in, if possible, the plays selected for the evening ; thus—

> *Barefaced Impostors*—what a happy hit !
> Agreed *nem. dis.* by gallery, boxes, pit.
> And yet you'll own [turning to orchestra], among these wandering Costas,
> The *tenors* can't be classed with *base* impostors.

In all amateur performances, a prompter on each side, whose business is not alone to give the word but to direct the entrances and see that the properties are ready, will be found very available.

Proceed we now to charades, which, if properly got up, well selected, and characteristically dressed, form a delightful evening's amusement. Two of the best we ever remember seeing were the words Jumeaux and Nightingale. The former was represented at a grand party at Vienna ; the scene of the word Ju (for spelling is never attended to) was at a gambling house in Baden-Baden, where an unfortunate victim destroyed himself from losses at play ; the second was the inside of a hospital, with all the "ills" that "human flesh is heir to." The whole word, Jumeaux, was enacted by two tall Austrian Princes, who, dressed in baby's long-clothes, majestically crossed the stage without uttering a word. The word Nightingale, which created a great sensation at one of the "Country Homes of England," gave a spirited midnight smuggling scene, a laughable recontre at an hostelry, and a fearful passage between Dover and Calais ; the whole terminating with Florence Nightingale—a name endeared to all—visiting the sick at Scutari. According to our own ideas, founded upon practical experience, we consider that the best way of selecting a charade is to find one in which each syllable can be represented by a scene out of a popular play or poem. For instance, let us take from Walter Scott, "Farewell !" The first syllable can be embodied by the scene from "The Lady of the Lake," in which, guided by Roderick Vich Alpine, the Knight of Snowdoun was led into the outlaws' stronghold ; the lines

> Enough, enough ; sit down and share
> A soldier's couch, a soldier's fare,

will be peculiarly applicable. *Well* may be represented by the opening chapter of "St. Ronan's Well," in which Meg Dods, showing all the despotism of Queen Bess herself, the grey-headed members of the Killnakelty Hunt ; the "pawky auld carles that ken'd whilk side their bread was buttered upon"—viz., a set of ancient brethren of the angle from Edinburgh, the "members of the Helter-Skelter Club, of the Wildfire Club, and other associations formed for the express purpose of getting rid of care and sobriety," and the copper-nosed sheriff-clerk of the county," might form prominent characters ; while the arrival of Frank Tyrrell, and his inquiries after Clara Mowbray, would give an interest to the scene. *Farewell* may introduce the Earl of Leicester muffled in his mantle, following Sir Richard Varney along the secret passage of Kenilworth Castle to the apartment of the Countess Amy, and the interview between her, Dudley, and the villain Varney ; ending with Leicester's speech :—"Varney, we must hence—*Farewell*, Amy, whom I am to vindicate, as mine own, at an expense and risk of which thou alone couldst be worthy. You shall soon hear from me." The curtain dropping upon a tableau, in which might appear Leicester, enveloped in his cloak, anxious and restless, his confidant raising his body after bowing low, and regarding Amy with a peculiar expression, as if he desired to know how far his own pardon was included in the reconciliation which had taken place betwixt her and her Lord, and the Countess looking upon him with a fixed eye, seemingly unconscious of his presence. Shakspeare and Byron will furnish many words—Bondmaid—Bond, the trial-scene in "The Merchant of Venice—maid, the interview of Joan of Arc with the Dauphin of France in Henry VI. ; Bondmaid, Gulnare and Conrad—

> I am his slave—but in despite of pride ;
> 'Twere worse than bondage to become his bride,

Bondage may equally be done, substituting the scene between Marino Faliero and Angiolina for age—

> 'Twas not a foolish dotard's vile caprice.

In conclusion, it is advisable to have a romantic or interesting charade for the opening, with a laughable one to wind up the entertainment, such as Coxcomical, in which a scene from "Box and Cox," one from a harlequinade, and an exquisite of modern days may be introduced to form the two syllables and the whole word. Last year, when the "Perfect Cure" was the rage, a clever charade was introduced—perfect and cure being easily embodied ; while, to give the entire words, each character, dressed after the illustration of the song, sang a verse, expressing a hope that the entertainment and supper would "prove a perfect cure."

FANCY BALL GIVEN TO THE OFFICERS OF THE CHANNEL FLEET BY THE MAYOR OF LIVERPOOL.

Whilst the Channel Fleet lay in the Mersey there was a continuous interchange of hospitalities between the authorities on shore and the officers on board. Several entertainments took place on board the ships, and the good feeling exhibited by the fleet was responded to in a kindred spirit by the authorities and the inhabitants.

On Friday, the 18th ult., a municipal banquet, followed by a fancy-dress ball on a munificent scale, was given in the Townhall in honour of the visit, by his Worship the Mayor, Mr. R. C. Gardner. The banquet was attended by about sixty gentlemen, including Rear-Admiral Dacres, commander of the squadron, and the chief officers connected with it.

The ball which followed was of a very brilliant character, being attended by upwards of 1200 ladies and gentlemen, among whom were the Right Hon. the Earl of Sefton and party, Rear-Admiral Dacres and the principal officers of the Channel Fleet, Captain Inglefield, R.N., and a large attendance of the leading families of Liverpool and its vicinity. The affair was in every respect most successful.

In the two ballrooms the decorator displayed considerable taste. The windows of the smaller room were filled with specimens of the richest greenhouse plants and delicate shrubs. Around the room were placed a number of fine mirrors, each of which was surrounded with lace and coloured drapery nicely festooned. In the principal ballroom the work of ornamentation was carried to a greater extent. The windows at each end and the one in the centre were covered with immense mirrors. Flags of varied descriptions and the gayest colours formed a sort of canopy, the mirrors being encircled by elaborate borders of lace and appropriately coloured drapery. In the centre of the noble apartment, immediately opposite the orchestra, was a tasteful device formed of flags of various nations, the union-jack predominating. Each flagstaff was surmounted with a richly-gilded spear, the central portion of the device consisting of a splendid banneret of white silk, bordered with gorgeous embroidery, with a regal crown in the centre. Mirrors were also placed over the fire-places, and the mantel-shelves were covered with rare plants. At each end of the apartment was a mirror of large size ; these were surrounded by lace hangings and graceful drapery, amongst which were shields bearing the quarterings of the Royal arms of England and other heraldic devices. Within the drapery ran a wreath of ever-greens and flowers intermixed, and from the top depended wreaths formed of the same materials, the whole being surmounted by a ducal crown. The ornamentation of this room was remarkably effective.

The minute description given in the local papers of the costumes worn by the ladies and gentlemen will supply us with a few particulars. The beautiful hall (says one account) enframed the picture on all sides with the rich entourage of noble and richly-tinted architecture, while the groups of variously-attired figures with which the floor was studded might have maddened Mr. Planché by their daring incongruity, or delighted Mr. Frith by their picturesqueness. Glancing at one group, you might fancy yourself transported back to the time of the Commonwealth ; but the buff jerkins separate a little, and there, in conversation with Lord Falkland and Colonel Ireton, are discovered a courtier of George II. and Marie Antoinette. Near one of the windows stands a group that might pass roughly for that in the picture at the Royal Academy representing the English Embassy at Paris on the night of the St. Bartholomew massacre ; but, on closer inspection, you perceive in their midst a stern inquisitor, and in familiar conversation with him a Spanish matador and an English foxhunter. In another direction stands a party of which a little Red Riding Hood is the centre. Red Riding Hood, we may judge by the animation of the crowd, is not less charming than her prototype ; but near her stands a Spanish duenna, apparently much interested in keeping the gay sparks at a distance from her protégée. Wolves, perhaps the duenna thinks, are not the only marauders a sweet young peasant should fear. But who are her admirers ? Well, there is a red Indian, a Nepaulese Ambassador, and a gentleman with all the appearance of Prime Minister to the King of Dahomey ; there is a scrivener of Dr. Johnson's time, a French Colonel of the present time, a Lord Chesterfield, a crusader, and Hamlet, Prince of Denmark.

Conspicuous amongst the brilliant throng was the party of the Mayor. His Worship wore a magnificent Court dress of the time of George III. The Mayoress also appeared in a rich Court costume of the same period — white moire dress with lace flounces, and quillings of blue satin ribbon ; a train of blue moire with bouquets of rose-coloured ribbon ; the headdress consisting of lace lappets, feathers, and water-lilies. Miss Gardner's dress consisted of a Court costume of the period mentioned, the dress of white silk, the overdress of tulle, a train of white glacé with bouquets of apple-blossom, and the headdress feathers and apple-blossom. Miss J. E. Gardner looked quite fascinating as the Dolly Varden of Dickens's "Barnaby Rudge." The young lady wore a cherry-coloured quilted petticoat, with maize basque laced bodice, high-heeled shoes, and hat with cherry-coloured ribbons. Mr. J. S. Gardner assumed a handsome Tyrolean costume, and Mrs. J. S. Gardner a rich dress of black velvet and silver. Una Signora Neapolitana di questo secolo, vestita per una grande festa della Chiesa. The Rev. Richard Titley, son-in-law of the Mayor, was attired as a gentleman of the time of Louis XV., and Mrs. Titley in a Court costume of the same period, the dress being of blue moire trimmed with white lace. Mr. Thomas Gardner wore an Albanian costume. Captain Preston, nephew of the Mayor, appeared as Mephistophiles, and wore a suit of black velvet, with mantle trimmed with gold, pink fleshings, long pointed shoes, and hat and feather to correspond. Miss Preston represented "Snow." Her dress was of white tulle covered with swandown, with the veil and headdress of frosted silver.

The costumes of the guests, both ladies and gentlemen, were of the most diversified kind. Here nobles and their ladies, dressed in the richest style of Louis Quatorze, mingled in the dance ; yonder stalked an Italian brigand, in his gay attire, with high-crowned hat covered with many-coloured ribbons ; while on every side, wherever the eye turned, were beheld Greeks and Turks, Zouaves and Venetian nobles, Hungarian soldiers and Spanish bullfighters, English Ambassadors and Polish patriots, rifle volunteers and naval officers, all mingled in one strange yet pleasing and harmonious throng.

"LORD CLIFDEN," WINNER OF THE ST. LEGER.

This celebrated son of Newminster and The Slave by Melbourne, whose merits and demerits have formed a more fruitful theme of discussion than those of any horse which has trod the turf for many a long year, was born in what turfites generally speak of as "the Wadlow country," in Staffordshire. His breeder, Mr. Hind, is said to have sold him for £4000, &c., to Captain Christie, the owner of Lady Clifden, who turned him over for another thousand and a £2000 Derby contingency to Lord St. Vincent. His Lordship was as keen in his pursuit of a good horse as "Cœlebs in search of a wife," and was not daunted in the least by the unfortunate burning of Klarikoff, almost immediately after he had purchased half of him for £5000.

Lord Clifden made his début for the Woodcote Stakes at Epsom, and won it very easily against The Orphan and thirteen others. After a long rest he came out at Doncaster, and won both the Champagne and Two-year-old Stakes. In the latter he carried 7 lb. extra, and only beat Bohemia by a head, Queen Bertha being third ; and then came the ceaseless controversy as to whether he was only a very bad beginner or a much more moderate horse than his friends imagined. He was not stripped again before the Derby, when he did not show the improvement which had been hoped for during the winter. The tremendous use which was made of him by his jockey, Fordham, through the deep ground (which was much against his long stride), and the gallant way in which he struggled home and was only caught by Macaroni on the post, caused the Derby to be a peculiarly memorable one ; but when he was all but beaten again on the Friday, in a mile race, by a very moderate horse like Jarnicoton, the question as to his real three-year-old merits became darker than ever. He was then taken over, the very next week, to run for the great international prize ; but the voyage and his Epsom work affected him so much that he could hardly raise a gallop on French soil. It had always been supposed that the St. Leger course was more especially the one for his fine sweeping stride ; but, after all these ups and downs, few cared to touch him for that race. Anonymous writers and officious friends were, it is said, very anxious to ruin Edwin Parr's character with Lord St. Vincent and have the horse sent to John Scott's ; but his Lordship stood firm, and the bay commenced his St. Leger work in earnest. No one seemed to believe in him much ; he was now at 8 and then at 25 to 1. As August wore on, and the horse was seen to take his gallops regularly at Telscombe, he began to come again in the betting ; and the tender attention he received from the touts was even beyond what they lavished on The Flying Dutchman, when Fobert "used to count their heads each morning, like crows on a wall." Somehow or other, they got completely out of their reckoning in this case, and the credit of the profession has been shaken to its centre. While they were informing their employers that the bay was doing no work, he was, we believe, never stopped but for one day, in consequence of an accident to his shoe.

The nature of the ground on which he galloped was such that they were effectually hoodwinked ; but they gained the public ear, and it was not until the horse was seen taking his canter in front of the Grand Stand that the ring were convinced that he was all right, and sent him to the post a first favourite. If the flag had been dropped an instant sooner, Queen Bertha would have been at his side ; but she had just got into the front rank, and lay about fifth during the earlier part of the race. At one time she must have been at least 150 yards ahead of Lord Clifden, but she had to "come back" like the rest, when Osborne began to creep up from the Rifle Butts, in the most remarkable "sensation race" that perhaps the Turf has ever known.

On the Friday Lord Clifden gave a stone to little Borealis in the Doncaster Stakes, and beat her with all ease ; but, as Lord St. Vincent did not wish to run any risks, the great sight did not come off of the Derby, the St. Leger, and the Oaks winners of the year trying conclusions in the Cup. But for the Doncaster Stakes engagement there is no doubt that his Lordship would have decided the great moot point between the two former then and there ; and it is said that he is now open to a match with Mr. Naylor for any sum from £1000 to £10,000, for one mile and a half or two miles, over York or Doncaster.

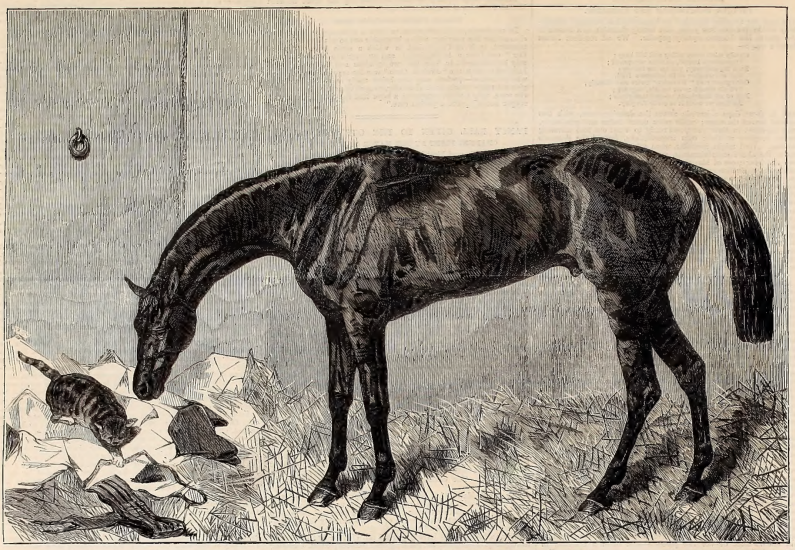
Lord Clifden is fully sixteen hands high, a rich bay, and with a very fine, deep girth. He has thickened very much in his neck, and, in fact, all over, since he ran at Epsom. His failing points are, perhaps, a slight tendency to be upright before, and a lightness in the back ribs, but another winter ought to bring him out the very model of a Cup horse. Osborne declares that he never rode such a stayer in his life, or anything approaching to him, and he has been on a great many good ones in his time. So far the horse has started for eight races, and won six, or rather more than £9000 clear. He is in the Claret Stakes at the Newmarket Craven Meeting of 1864, in which Blue Mantle, Rapid Rhone, and Armagnac are also engaged, as well as a nomination of Mr. Naylor, which is still "sealed up." It is said that his noble owner hedged over the Derby and lost nothing, and that his St. Leger winnings in bets amount to only £18,000. Both trainer and jockey, and, in short, everyone connected with the horse, has been most munificently remembered ; and even the proposed infirmary at Doncaster (the want of which is chiefly felt at race-times, when jockeys meet with accidents) has been aided by him, through Mr. W. C. Russell, one of its principal local promoters, with a very welcome "pony." This is only the fourth season that his Lordship has been on the turf, and it is a curious coincidence that he and Mr. Naylor (the winners of the Derby and St. Leger of this year) both ran horses in the Derby for the first time in 1860. The stakes (£4975) are the largest on record for the St. Leger, after which race his Lordship has named his son, who was born during the eventful week.

Our Portrait of the horse is from the pencil of Mr. Harry Hall, and represents him with his favourite cat.

Accounts from Naples state that the number of persons who visited the ruins of Pompeii during last August was 652 paying and 52 free.

In a debate last month in the Parliament of Canada, a member, Mr. Cauchon, having determined to speak against time to prevent a division that day, spoke first in English and then in French.

RECENT ADDITIONS TO THE ZOOLOGICAL SOCIETY'S AVIARY.



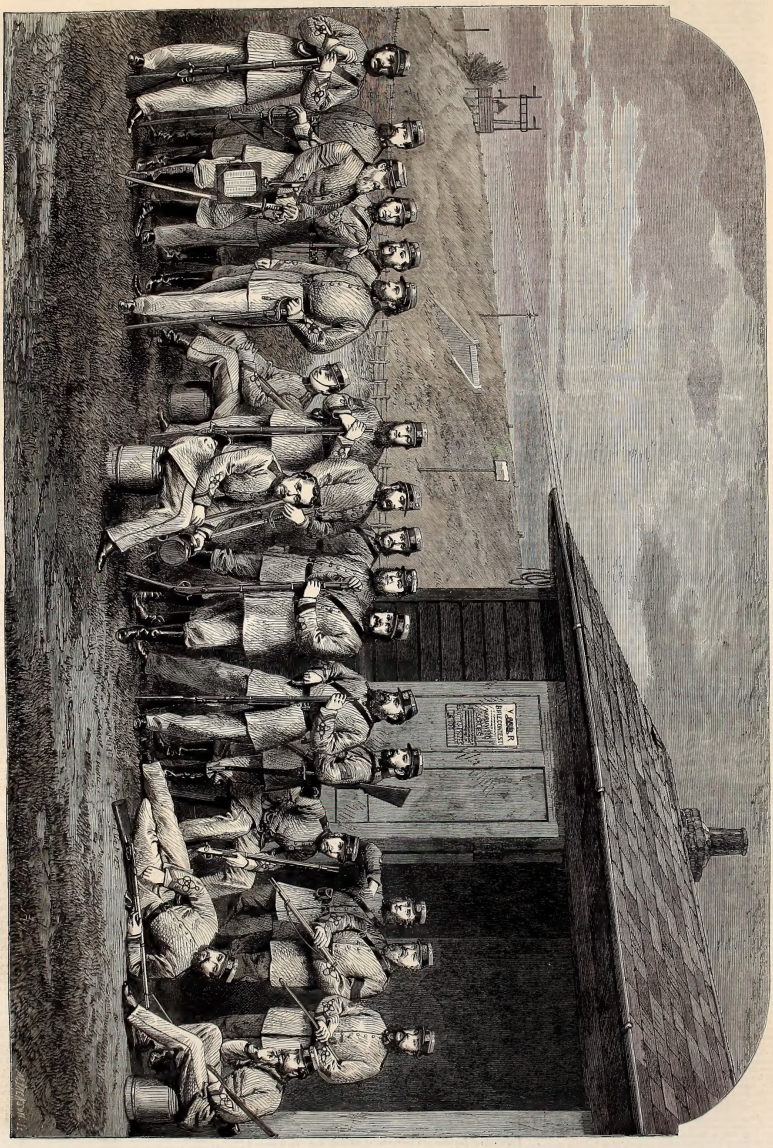
The large aviary on the right-hand side of the principal entrance to the Zoological Society's Gardens, in Regent's Park, which was completed in 1851, is considered by many visitors, especially by those who are interested in ornithology, as the most attractive building in the establishment. It contains nineteen divisions, tenanted by birds from Australia, the Indian Archipelago, and South America, which have ample space here to enjoy the free use of their wings and legs, and to show forth their natural habits. Its fault is that it is overcrowded ; but this, we are informed, will shortly be remedied by the completion of the new aviary on the left-hand side of the entrance, which is now in process of erection for the society by Messrs. Lucas.

In the meantime the western aviary, as the right-hand building is called, contains all the most interesting birds in the society's collection—such as the paradise-birds, the bower-birds, the kagus, the pallas' sandgrouses, and other rarities, which we have from time to time illustrated in these columns. Novelties, however, are continually coming in from the society's numerous correspondents in various parts of the world, and our Artist has now portrayed three of the most remarkable of these recent arrivals in one group—namely, the crested, or Derbyan, screamer, a new pigeon from the Philippine Islands, and the plumed colin.

The screamers (Palamedeæ) constitute a very singular group of birds, peculiar to South America, so called from the harsh, grating, often repeated scream which they frequently repeat when excited or disturbed. Their huge, ungainly bodies, thick legs, and swollen joints render them easily distinguishable from their allies, the jacanas (Parra) of the same countries, although they possess the same large feet and lengthened toes. Only three species are known of these birds. The Derbyan screamer (Chauna derbiana), which is the rarest of the three, is a native of New Granada. The present example was recently obtained in the neighbourhood of Cartagena, from the country bordering on the Dekke River, and presented to the society by Mr. Edward Greey, of the West Indian Mail Company's service, an active corresponding member of the society, who has forwarded several other valuable animals from the same country. Not only was this bird previously unknown in Europe in a living state, but it is of such rarity that but a single collection in this country contains a stuffed specimen of it. This is the Derby Museum, at Liverpool, where the example of this scarce bird, formerly in possession of the late Lord Derby, is preserved.

The Philippine Island pigeon, of which four examples have lately been received by the society, belongs to an entirely new species, as yet undescribed by naturalists, and is, moreover, a most beautiful and elegant bird. It is closely allied to another species of pigeon from the same islands, a pair of which are exhibited in the neighbouring compartment. This is the blood-breasted pigeon (Phlogænas cruentata), remarkable for the bright blood-red spot which ornaments the middle of its snow-white breast, and gives one exactly the idea of the bird having been wounded. The new pigeon, which we believe Dr. Schlater proposes to call Bartlett's pigeon (Phlogænas Bartletti), after the present able superintendent of the Society's gardens, has a corresponding mark on its breast, but larger and more of a brickdust red.

The plumed colin belongs to a group of partridges peculiar to the New World, called by naturalists Callissepla, and rendered very remarkable by the long pendent crest that adorns their foreheads. This



"LORD CLIFDEN," WINNER OF THE ST. LEGER.—SEE PRECEDING PAGE.

bird is a native of California, where it was first discovered by the late Mr. David Douglas, who described it in the sixteenth volume of the *Linnean Society's Transactions*. It is closely allied to the well-known Californian colin (Callipepla Californica), which breeds abundantly in all the zoological gardens in Europe, so that there is little doubt that this highly ornamental species would likewise do well in Europe, if introduced in sufficient numbers. Unfortunately, the Zoological Society has, at present, only a single male specimen, obtained by purchase in April last.

PHILIPPINE PIGEONS AND PLUMED COLINS. THE DARSTAN SCREAMER.

BIRDS RECENTLY ADDED TO THE ROYAL ZOOLOGICAL SOCIETY'S COLLECTION IN REGENT'S PARK.

A "BATTALION TWENTY" OF THE WEST MIDDLESEX RIFLE VOLUNTEERS.—SEE NEXT PAGE.

A BATTALION TWENTY OF THE WEST MIDDLESEX RIFLE CORPS.

OUR Engraving of these cracks shots, who have never been beaten by any other twenty, is from a photograph by Messrs. Alexis Brothers, of St. John's-wood-road. They are represented at the range of their corps, at Wormwood Scrubbs. Among the group are four gentlemen connected with the arts—Mr. G. E. Herring, the landscape-painter; Mr. E. Armitage, who painted "The Burial of an Early Christian Martyr;" Mr. Lupton, landscape-painter; and Mr. Every, engraver. The names of the gentlemen, taking them in order from left to right, are—Private G. Hall, Captain G. Dear, Sergeant-Major W. Lupton, Private F. Wells, Sergeant T. Webber, Ensign F. Cooke, Private G. Bond, Sergeant H. E. Barker, Private A. Smith, Sergeant J. W. Wright, Private G. Every, Lieutenant G. Mariner, Private G. E. Hering, Private E. Armitage, Sergeant R. B. Garner, Private R. Armstrong, Private H. Pritchard, Sergeant H. Harbour, Private T. Dane, Lieutenant R. Morris, Private N. O. Lupton. This "battalion twenty" have competed successfully with the St. George's Rifles, the Middlesex Irish Artillery, the Civil Service, Victorias (twice), and the 2nd and 7th Administrative Middlesex. Each achievement was the winning, in August last, of the Scribbs' plate, a Saxon shield, value one hundred guineas, subscribed and competed for by the West Middlesex, the Victorias, the St. George's, and the Civil Service Rifles. It is their property for a year, when it will be again competed for.

THE FARM

EXTRAVAGANT things were said about the harvest yield over a great deal of it was still in the fields and suffering heavily from the rain. The latter harvest has, however, been better than was expected, and the crops are nearly housed in fair order, but not in splendid order. The autumn rush of grass and corn is over, and will lessen stock, sheep especially, were never so dear. For Lincoln there have been a thousand more, and a large supply as well. Some ewe lambs have fetched as much as 30s., and the best wether principally sold at the Trent. Lincolners have kept their place as well, or better, than ever, as the price of fat cattle fully proves, and the show at Aylesby, Scothorne, Barton-le-Street, Brandsby, &c., have been remarkably good.

The Exmoor ponies—thirty-two bays, four of them "buffys" and two "rusty," four browns, two chestnuts, three blacks, and nine whites—were judged by Mr. C. Knight, M.F.H., who was brought in usual, to the hammer by Messrs. Tomkins, at Reading, on the last Saturday in September. The sale was very quickly broken, and some of them measured nearly thirteen hands. There was nothing over the lot to equal the celebrated Pansbarn, Palmerston, and Sparrowhawk Pony (the two former winners at the Bath and West and Royal Show at Barnstaple), which fetched 42 gs., 36 gs., and 32 gs. on this spot last year; but still the average, 21 lbs. 5d., or £1 15s. 5d., was fair to 42 gs. and about £3 3s. about the 1861. Three fifths of them were rising five, but a number were aged, which rather pulled down the average, as a mare-pony's life on the hills is rather a worrying one. The well-named Snug was the premier at 34 gs., and Mr. Poulett Scrope, M.P., gave 31 gs. for Sportsman, a big yet wonderfully active action. Palmerston (24 gs.) was very strong and good; and so were Raglan (13½ gs.) and Ratcatcher, 20 gs. (17 gs.), which seemed under any weight. The sweet, tapering head of Touch-me-not (19 gs.) was her great point, and the beautiful, thick, and dish-nosed Dolly was voted "a darling" by the ladies, as she was by the gentlemen. Sir Lord C. Manners gave 17½ gs. for a very blood-like horse-pony, while Pansbarn and the large grey, Sparrowhawk, and Lady Hood found their way together, excited thereto by the long red flag, but only made 15 gs. as a pair. Kelly, which was bred by Mr. Hamilton, went to her owner Newbury to be shown, and few would have recognised her, after a year of high civilisation, the chestnut "direct from the hills," which only fetched 4 gs. in her big year. Her foal, by Sportsman, made an immense canvas awning—a hint which auctioneers would do well not to neglect—and the many "blacks" and "whites" were sold by Lord Claude Hamilton, M.P.; Lord Charles Manners, M.P.; Sir J. Lawrence, C.B.; Mr. R. Barclay, M.P.; and Mr. F. W. Knight, M.P., &c., were among the company, which included many foreigners and ex masters of hounds, as well as metropolitan and country dealers.

The twenty-fourth volume of the Royal Agricultural Society's Journal" has just been published. The mecorology, live stock and cloud and mist, the diseases of animals, public health, and price of provisions for the twelve months ending June 1883 are dealt with in very valuable item for statistical reference; and the agricultural returns for 1882 are also most carefully arranged for the several separate heads. It strikes us, however, that the omission from the cattle prize-list of the sire of the dam and his Herdbook number tends to be remedied in future, as without it breeders are left quite in the dark on what they consider a most vital point. The same remark applies to the thoroughbred and hunter stock, and the judges would occupy no extra space, and make this annual record of the Royal rosettes a most perfect and valuable one. The editor, Mr. Shirley Hiers, has given us, in a truly international spirit, an interesting paper on the agricultural stock-exhibitions of the year (17 pp.), and a good medical list of the Agricultural Society of Rooer. "Since 1850 it has turned 500 acres of his own land near Dieppe, where he planted his laboratory, with the purpose of bringing his discoveries and use to the test of the balance-sheet. Having the advantage of good markets, he was well situated for the experiments, and under the system of management which gives the land no rest, but aims at securing a maximum crop by a fixed rotation." "Development of the Roots of Agricultural Plants" is the subject of a closely-reasoned paper by the Rev. M. T. Berkeley, and the results at which he arrives are most important. The subject is one of which many writers elsewhere might pursue with advantage; that is, if they have any decent results to chronicle. Steam cultivation occupies a large share of the volume, and, in addition to the reports of the judges, Mr. Algernon Clarke takes up the subject where he left off in 1858, and presents us, on answering, with a number of mechanical improvements and practical results, which have since then made steam-tilling the pre-eminent system of cultivation in this country. The subject is so completely exhausted that Mr. Moscrop's very neat prize essay on it is quite fitted for reading by its side; and it is also the misfortune of Mr. Gamgee, whose prize essay, "The Diseases of Hunters and Roadsters," is too bookish and not nearly so practical and interesting as we expected to find it, to be overshadowed by a capital letter on nearly the same subject by Mr. W. Dickenson, originally addressed to the Speaker of the House of Commons. Mr. Shirley Hiers begins with tar-water and ended with the Trench, and, in like manner, the answer of the surgery as to how Napoleon, a French-bred carthorse sire had turned out, produced that capital stock, "Why, it may answer very well," stable," as "Mik," by Dr. Augustus Voelker, will every "dairy mind. The scheme for steam rating and its butter-producing qualities are all treated of most ably in the latter paper, and the Professor furnishes the strongest argument yet against the cream-skimming machine, that by failing to stop the under property the superior richness of the cream of the principles is entirely lost. After having heard the pathetic lamentals of Mr. Hills when he speaks of the gradual loss of the Norfolk and Lyesham Gorse, we should almost tremble for his reason if he got hold of the interesting letter of the Journal on this paper (illustrated by a map) of the reclaiming of Wychwood Forest, from which official, professional and annual income is £3291 and five pence. It is all very well to say "pests and pestilence," and that because some fine woodland scenery has been swept away, but of what consequence is a magnificent view, &c., to the 1000 persons to whom his view hollow is no account, and his remembrance of those happy mornings in the days of forest? Let cabs breathe fresh air over the dens across the ridings with a whole pack of Affables and Rockets close at their heels, in nearly three hours.

The miscellaneous communications are on burning of clay land, portable fencing for sheep, composition of aastatic, cheap material for farm buildings, dairy practice and homœopathic treatment of cattle. The latter paper is by the editor, and gives as one of its examples a bullock which was treated with aconite and bryonia for four days, and finished up with phosphorus and sulphur, and increased 7 cwt. 2 qrs. 6lb. in the next five months.

In the Stewards of Stock report we are glad to find that in place have made their reports much more systematically than they did last year, in conformity with the request which was made by the stewards and embodied in their duties. The only jury which is sent out and in a report, jointly or severally, is the Cotswold and Lincoln one; and we can hardly wonder, if rumour be true, that they were glad to get rid of their task, seeing what uncourteous comments were made within earshot of them by some of the owners during its performance. The avenues will no doubt be roped off and held by one or two policemen next year, to guard against a repetition of this unwarrantable annoyance. The report sent in by the Leicester judges is commendatory in its brevity; and Mr. Dent, M.P., the steward in this department, makes very sensible suggestions, especially as to having fruit already, on a subject on which the council ought to have full information ready. The three shorthorn judges, in consequence of one of them being obliged to leave the ground immediately after the decision was left, with the exception of rather a different estimate of the bull-calf class, were unanimous in their awards. There was a good deal of fun in Mr. Fawkes's in this class which was unnoticed in the awards; but still the impression that the sire of "Shorthorn" so much that he publicly declared his belief that he would be a success as a sire of the best class on." Professors Simonds and Varnell report very favourably of the Herefords, and the latter gentleman says, "It is not to be at all astonished at the judges of draylooses have held their own opinion about what constitutes a good draylooser, but I may say as he is superior in mental acumen to that other. Except as a matter of opinion fundamentally different, it is of course worth very little noting. Be it, however, competent to speak as to public opinion in Baltimore, where he lingered a month, before he could find a guide, and to which he appears to have returned very much as he went and since in his attempts to gain a footing in Virginia, and that he declares to be overwhelmingly Democratic. He is apparently not at all ashamed that he, being "one whose enmity to all purely republican institutions is deep and lasting," and who "has no wishes nor views himself to have been unjustly imprisoned by those amongst whom it surely republican institutions" prevail, should have strong opinions touching his captors and prosecutors; and it will be generally believed that he does not express those opinions in the weakest terms at his command. It is not necessary, however, to speak truth, from the time of his capture to the end of the volume, is not over-creditable to the "cool Celt" which he claims to be, that appears to have been the title most commonly conferred upon him. Even Mr. Davis was a good Emperor, as Louis Napoleon is witness, cannot always prevent a certain inhumanity creeping into their captors, and which is generally be maintained by the actual captive. This one author seems to have succeeded, and he shows the judges affectedly, threatens him on paper, and amuses himself during his captivity by "chaffing" his prosecutors. It would have been better to omit such sentences as "officials at Washington," language savouring all waste of time and trouble; perhaps it say more simple to be to a subordinate tone of the whole correspondence. It is not everybody would have involved;" and "should the changes and chances of this mortal life ever bring us together again," and that jovial Judge on any neutral ground, by my faith and honour I will not be sure that five short words not lead to understood. "Bygone measure rebus in me his private secretary," which our authors have left in their work of which, appears either not to have remembered or wilfully to have ignored. He may have been the latter, but we fancy that of them must be the former by his "pistol story," nor does his behaviour under his trials excite any sympathy. Mr. Swinton Jacobs, his "Jeremiah" may be read with no small gratification, for in the "Jeremiah" and Swinton Jacobs, slashing, savage style which characterises "Guy Livingstone."

Mr. Swinton Jacobs, by Mr. Hawthorne. (Sampson Low, Smith and Elder.) Mr. Hawthorne has been justly said to be a man of genius, and in the volume before us we find instead of, that talented in a manner which makes them entertaining even to the native Briton. Mr. Hawthorne's account of Liverpool and the author's experience as American Consul at Liverpool, will be found by English readers the most interesting and the most amusing. There is considerable humour in his description of the Liverpool merchant in which part he has his countrymen, who, after the usual American fashion, considered that he was in a position to command the services of them upon whom he him as "my Consul;" would, with that idea, visit him in large bodies, and, when they found that he was not to be their slave, elect a spokesman to draw him out, and, having heard what he had to say for himself, retire contented (or discontented) with their "bargain." The other characters are also humorously drawn. The humorous incidents in tone, upon the English character, English manners, English places, &c., are also very amusing, and remind us of "Our Old Home." To show how extremely bilious Mr. Hawthorne must have been when he wrote the following sketches, it is unnecessary to do more than append the following quotation: "Liverpool, above all things, to be courteous; but, since the plain truth must be told, the soul and climate of English merchants are not favourable to the growth of the delicate fruit; and, though admirable specimens of both are to be met with, they are the exception rather than the rule, and neither politeness, nor, moreover, to relapse into the coarseness of the original sort. Even the women are not beautiful, though the female Bull be well enough adapted to the male." Mr. Hawthorne should really have his eyes examined by a good oculist: something must have happened to them since the "Transatlantic" when he seemed to be a judge of the beautiful.

The Rev. J. Alfred Eichhold and his Canaries. By the Author of "Roman Candles," &c. (1 vol. Maxwell and Co.) Mr. Jerrold's humour is not enough of the natural in it to be described as anything else, and the author has not sufficiently developed his subject as it above the regions of extravagance; still, extravagans is in its way pleasant reading. The author of "Roman Candles" may be thus briefly told:—The Rev. Alfred Holbein, being afflicted with occasional nervousness, is supposed to hold (for it is by no means clear that he does hold himself responsible in such of which he broaches the above-mentioned weakness, makes a pet of himself. The rev. gentleman's pet is a bird, and the bird is a canary. The canary, of which he is provided in the volume, which is filled with his misadventures, though it is left to the close of the story in expectation (not very likely to be realised) of an incumbency. A curate, a friend of Mr. Verdant Green, the superiority, if there be any, resting with Mr. Green, is also introduced—a curate who is blessed with a credulity to the whispers of Fancy, and pursues with eagerness the phantoms of Romance. The curate's name is Mr. Green, the Knight of Youth, attend to the history of Holbein, sometime Curate of Bear Garden," which is a specimen of the arts to which he frequently has recourse for the edification of his flock, is above this level, and never sinks below it.

Our Year. By the Author of "Ours," by the Rev. J. G. Woon. (1 vol. Routledge, Warne, and Routledge.) This volume, with its alarming date, 1884, is a book for the many publishing season. It is not a year before all of us is looming at no very great distance, and the opportunity in the wake of the recent discussions in the *Times* upon the subject of "Sparrows Destroy Fruit," this book in the small portion of his book is devoted by Mr. Wood to birds, he bears hearty witness to the fact that the sparrow has defended the small fruits from the groundless charges which have been brought against them. He says, "I cannot but avow myself a believer that our kind ought to be ranked as a foe to our gardens, and think that, at the worst, such birds as the bullfinch or the wood-pigeon may be placed among the neutrals." Mr. Wood also comes forward as the champion of the toad, that most scurvily-treated of all our beneficial "garden friends," at a few flashes of whose tongue, darting out straight, sideways or downward with equal certainty of aim, caterpillar, slug, beetle, moth, fly, earthworm, cockroach, and centipede. We could dispense readily with the short "sermons" with which Mr. Wood indperse readily with the natural history, but not on any account with the excellent illustrations and plates with which he has had his work embellished.

CURRENT LITERATURE.

Border and Battle. By the Author of "Guy Livingstone." (1 vol. Tinsley Brothers.) "Guy Livingstone" admits, with the manly candour to be expected of him, that his "excursion" to America was, so far as its principal object was concerned, a "failure, absolute and complete." His admission cannot, unfortunately, be disputed; but it can be and should be pleaded in extenuation of the fact that a spirit-stirring can possibly be conceived than a description of a real, eye-witnessed campaign by the author of "Sword and Gown." No pen can describe in fitter language than his all that pertains to the enthusiasm of war, to the art of expressing in his periods either the steadiness of the "thin red line," the stern advance of the bristling bayonets, or the irresistible rush of an impetuous squadron, the ring of armed steel, the clash of sabres, the flash of sabres, the hissing word of command, and "a low thunder of arms." It may be that he is a little too fond of accompanying his sword-thrusts with "a horrible blasphemy," until the expression rises to a terrible and awful shiver; but, in spite of all that, there is no modern writer who can more powerfully picture the "pomp and pride" of war. What was done de—no modern writer who can more successfully say so than his reader is left in a hungry passion to wish that it should be the labour of our lives to subdue. *Bells, horrids bells*, as the author has it, and there is in a certain sense to be deplored that he should have been reduced to put upon record the story of a not very extraordinary voyage across the Atlantic, of agreeable evenings with the fellow-passengers, of experiences in steerage, of drinking-parties and drunken Irishmen, of wanderings in search of a hotel, of an ingenious captivity, and of a dreary though not harsh, imprisonment. As he did not succeed in joining the Confederate army, of course anything he has to say upon that subject is only worth so much more than the paper whereon he writes as he is superior in mental acumen to that other. Except as a matter of opinion fundamentally different, it is of course worth very little noting. Be it, however, competent to speak as to public opinion in Baltimore, where he lingered a month, before he could find a guide, and to which he appears to have returned very much as he went and since in his attempts to gain a footing in Virginia, and that he declares to be overwhelmingly Democratic. He is apparently not at all ashamed that he, being "one whose enmity to all purely republican institutions is deep and lasting," and who "has no wishes nor views himself to have been unjustly imprisoned by those amongst whom it surely republican institutions" prevail, should have strong opinions touching his captors and prosecutors; and it will be generally believed that he does not express those opinions in the weakest terms at his command. It is not necessary, however, to speak truth, from the time of his capture to the end of the volume, is not over-creditable to the "cool Celt" which he claims to be, that appears to have been the title most commonly conferred upon him. Even Mr. Davis was a good Emperor, as Louis Napoleon is witness, cannot always prevent a certain inhumanity creeping into their captors, and which is generally be maintained by the actual captive. This one author seems to have succeeded, and he shows the judges affectedly, threatens him on paper, and amuses himself during his captivity by "chaffing" his prosecutors. It would have been better to omit such sentences as "officials at Washington," language savouring all waste of time and trouble; perhaps it say more simple to be to a subordinate tone of the whole correspondence. It is not everybody would have involved;" and "should the changes and chances of this mortal life ever bring us together again," and that jovial Judge on any neutral ground, by my faith and honour I will not be sure that five short words not lead to understood. *"Bygone measure rebus in me his private secretary,"* which our authors have left in their work of which, appears either not to have remembered or wilfully to have ignored. He may have been the latter, but we fancy that of them must be the former by his "pistol story," nor does his behaviour under his trials excite any sympathy. Mr. Swinton Jacobs, his "Jeremiah" may be read with no small gratification, for in the "Jeremiah" and Swinton Jacobs, slashing, savage style which characterises "Guy Livingstone."

Mr. Swinton Jacobs, by Mr. Hawthorne. (Sampson Low, Smith and Elder.) Mr. Hawthorne has been justly said to be a man of genius, and in the volume before us we find instead of, that talented in a manner which makes them entertaining even to the native Briton. Mr. Hawthorne's account of Liverpool and the author's experience as American Consul at Liverpool, will be found by English readers the most interesting and the most amusing. There is considerable humour in his description of the Liverpool merchant in which part he has his countrymen, who, after the usual American fashion, considered that he was in a position to command the services of them upon whom he him as "my Consul;" would, with that idea, visit him in large bodies, and, when they found that he was not to be their slave, elect a spokesman to draw him out, and, having heard what he had to say for himself, retire contented (or discontented) with their "bargain." The other characters are also humorously drawn. The humorous incidents in tone, upon the English character, English manners, English places, &c., are also very amusing, and remind us of "Our Old Home." To show how extremely bilious Mr. Hawthorne must have been when he wrote the following sketches, it is unnecessary to do more than append the following quotation: "Liverpool, above all things, to be courteous; but, since the plain truth must be told, the soul and climate of English merchants are not favourable to the growth of the delicate fruit; and, though admirable specimens of both are to be met with, they are the exception rather than the rule, and neither politeness, nor, moreover, to relapse into the coarseness of the original sort. Even the women are not beautiful, though the female Bull be well enough adapted to the male." Mr. Hawthorne should really have his eyes examined by a good oculist: something must have happened to them since the "Transatlantic" when he seemed to be a judge of the beautiful.

The Rev. J. Alfred Eichhold and his Canaries. By the Author of "Roman Candles," &c. (1 vol. Maxwell and Co.) Mr. Jerrold's humour is not enough of the natural in it to be described as anything else, and the author has not sufficiently developed his subject as it above the regions of extravagance; still, extravagans is in its way pleasant reading. The author of "Roman Candles" may be thus briefly told:—The Rev. Alfred Holbein, being afflicted with occasional nervousness, is supposed to hold (for it is by no means clear that he does hold himself responsible in such of which he broaches the above-mentioned weakness, makes a pet of himself. The rev. gentleman's pet is a bird, and the bird is a canary. The canary, of which he is provided in the volume, which is filled with his misadventures, though it is left to the close of the story in expectation (not very likely to be realised) of an incumbency. A curate, a friend of Mr. Verdant Green, the superiority, if there be any, resting with Mr. Green, is also introduced—a curate who is blessed with a credulity to the whispers of Fancy, and pursues with eagerness the phantoms of Romance. The curate's name is Mr. Green, the Knight of Youth, attend to the history of Holbein, sometime Curate of Bear Garden," which is a specimen of the arts to which he frequently has recourse for the edification of his flock, is above this level, and never sinks below it.

Our Year. By the Author of "Ours," by the Rev. J. G. Woon. (1 vol. Routledge, Warne, and Routledge.) This volume, with its alarming date, 1884, is a book for the many publishing season. It is not a year before all of us is looming at no very great distance, and the opportunity in the wake of the recent discussions in the *Times* upon the subject of "Sparrows Destroy Fruit," this book in the small portion of his book is devoted by Mr. Wood to birds, he bears hearty witness to the fact that the sparrow has defended the small fruits from the groundless charges which have been brought against them. He says, "I cannot but avow myself a believer that our kind ought to be ranked as a foe to our gardens, and think that, at the worst, such birds as the bullfinch or the wood-pigeon may be placed among the neutrals." Mr. Wood also comes forward as the champion of the toad, that most scurvily-treated of all our beneficial "garden friends," at a few flashes of whose tongue, darting out straight, sideways or downward with equal certainty of aim, caterpillar, slug, beetle, moth, fly, earthworm, cockroach, and centipede. We could dispense readily with the short "sermons" with which Mr. Wood indperse readily with the natural history, but not on any account with the excellent illustrations and plates with which he has had his work embellished.

Mr. Serjeant Pigott is to fill the seat vacant on the judicial bench by the appointment of Mr. Baron Webb to the Divorce Court.

A literary thief has carried off from the "Ambrosian Library" the MS. of the sixth book of Livy's history. It is said to be worth the Duke of Milan, from 1480 to 1510.

The Centennial Exhibition at the city of Messina was commenced on the 21st ult., in the presence of the authorities. The Syndic dealt the first stroke with a hammer, and the Prefect hoisted out with flags on the occasion, and a "Te Deum" sung in the cathedral.

The *Coburg Zeitung* publishes a project of federal reform. It sets up by the side of the present in Bundesrath a new one, with recently-published plans, although it is in advance of these as regards the representation of the German Reichstag.

The *Delhi Gazette* records a case of attempted suttee near Ferozepore. A young woman, after the ceremony, the widow predicted, as usual, the speedy downfall of British rule. She was then conducted to the funeral pyre, which was ignited, and assisted by the attendants, who tried to capture her. Reaching the River Sutlej, however, she escaped, and is now safe under her own friends. Several of those concerned in this crime have been apprehended and will be tried at once.

An iron-clad frigate, built for the Italian Government, was launched a few days ago at Castellamare, near Naples. The vessel, which is of 3100 tons measurement, has engines of 700-horse power, and is to carry thirty-four guns. The armour-plating is 22 inches thick at the water-mark, the water-mark is formed so as to act as a steam-ram. She is everywhere divided into water-tight compartments, and it is said that she will be the most exposed to the force of any shock, are much heavier than the others.

On the 22nd of August a schooner, name and nation unknown, captured by H.M.S. Rapid, was found to be engaged in the slave trade. On the approach the Rapid she arrived at the rendezvous with 111 slaves, the remainder of the number originally shipped having been thrown overboard. The vessel, which is of 70 tons above twelve years of age, who were willing to serve as soldiers, have been sent to Zanzibar, and the remainder, consisting of the remaining portion, 382 males and 35 females, have been lodged, under the care of the Government representative, at Mozambique.

In the course of the proceedings at the dinner of the Scottish Academy, on Saturday evening, Mr. Orchardson mentioned that his first effort at drawing was a representation of a Devonshire bull, when he was one of the boys at the High School. He was subsequently taken to task by the schoolmaster, who, being a bit of a naturalist, and no stranger even to the Highland cattle, knew that the animal was not a native of Devonshire, but of the Highlands. He thought it would be advisable to exhibit some animals in their native haunts. "If many of you," he added, "are to become artists, you will find, the greatest practitioner in the kingdom would have been Daniel Lambert.

The town of Ilfracombe (Devonshire) can boast of the oldest one-tree in Europe. It is said to have been planted by Ilfred, who built the town in the early part of the ninth century, when the episcopal see founded by his father, Charlemagne, was transferred from Crediton to Exeter. The tree is a yew, and is mentioned in the cathedral in 1012, but later records show that in 1078 Bishop Leofric of Exeter, who was also a great traveller, brought it from Constantinople. It has been an object of interest to travellers and naturalists, and no stranger ever visits Ilfracombe without paying a visit to the churchyard to see the cathedral. Within the last year the old roots have sent forth several new shoots, one of which is now a fine young tree, nearly as large as the parent stem.

The grand dignitaries who accompanied the Emperor of Russia to Poland, and who have just returned to St. Petersburg with his Majesty, have been the recipients of numerous gifts from the Poles of that country, and which is in such direct opposition to that now prevailing in Russia, that it is worthy of notice. The Archbishop of Gnesen presented to the Emperor a visit to the Archbishop of Holmogliew, when, to the surprise of the former, he was presented with a magnificent silver-gilt crucifix, which the Archbishop's table, and with it opened the door and admitted the Princes. On his departure the Archbishop accompanied him to the door with the same light in his hand. One must be acquainted with the prevailing luxury at St. Petersburg, and with the fact that a numerous number of servants are maintained at the mansions of the nobles, in order to appreciate the hilarity with which the recital of this anecdote is received. A still more comic adventure fell to the lot of Prince Gortschakoff when he visited the civil Governor of Warsaw. As the Prince was entering the carriage to return to his own window, and lamented that he could not admit his Highness, as the cook had the key in his pocket. The Prince, so goes the story, did the same.

Oct. 13, 1883

MUSIC.

Mr. Alfred Mellon's series of Promenade Concerts at Covent-garden Theatre terminated on Saturday last. They have been successful beyond precedent. During the very depth of the dead season—the period when, in common parlance, "everybody is out of town"—their attraction has literally filled the theatre to overflowing every night; and if they have now been brought to a close it was not because this attraction had at all diminished. The reverse has been the case; and Mr. Mellon might, apparently, have continued them as long as he pleased, without any falling off in popularity or profit. And the popularity and profit have been richly deserved, for they have been the best concerts of their class ever given in London. Mr. Mellon is not the originator of promenade concerts. Not to speak of those of an earlier date, everybody remembers the promenade concerts so long and so successfully carried on by M. Jullien, a man who certainly did as much as any single individual in *educating* (as it were) the popular taste in this country, by gradually accustoming the ears of the general public to music of a higher order than that with which they had previously been acquainted. Mr. Mellon took up promenade concerts at the point where Jullien left them. Jullien continued to the last to retain a large proportion of the *ad captandum* dance-music, of which his concerts at first had almost entirely consisted. Mellon banished this species of music almost from the outset; and his concerts, latterly, did not include a single piece unworthy of the most refined and classical taste. In this respect Mr. Mellon's entertainments have resembled the Monday Popular Concerts; and, like them, have shown the really catholic character of musical taste; have shown that it is not limited to a comparatively few artists and amateurs, but is a gift of nature for the happiness of mankind, given to all, but, like every other human gift and faculty, strengthened and refined by exercise and culture. The enthusiastic manner in which Mr. Mellon was received by the audience when he came forward to take leave of them on Saturday night was a just tribute to his character and merits, and will stimulate him to further exertions when he comes to resume the concerts (as doubtless he will do) next season.

There was a concert at the Crystal Palace on Saturday last, for the benefit of Herr Manns, the eminent director of the Crystal Palace Company's orchestra. The concerts given at Sydenham every Saturday during the past season have been greatly superior to those of any former year, both in quality and success. Herr Manns has formed an orchestra of first-rate excellence; he has availed himself of the services of the most accomplished singers and solo instrumental performers; his selections of music have been distinguished for taste and judgment; and in the course of the season he has brought forward many interesting novelties. Among others, he has made known to the public the young Polish violinist Lotto, one of the greatest performers of the day, who was engaged at the Crystal Palace before he had ever been heard in London. The programme of Saturday presented a most ample musical banquet—indeed, it was ample to a fault, for it was protracted till a great number of the guests had departed. Herr Manns, though a thorough German, seems to have learned since he came to this country that the English like value for their money, and look to quantity as well as quality in the entertainments provided for them. He would do better, however, to adhere to the more rational custom of his own country, and provide for his guests no more than they can partake of without satiety and weariness. One of the most interesting features of the concert was a concerto for the violin, composed by Herr Manns himself, and played by Herr Lotto—a sterling composition, most exquisitely performed. There was also an ample selection from Gounod's "Faust," arranged by Mr. Manns, the vocal solos being played on instruments—the oboe, clarinet, cornet, &c. This selection was skilfully arranged and admirably performed; but, being placed at the very end of an enormously long concert, many of the audience went away without hearing it. We need scarcely add that Herr Manns received those demonstrations of public favour which he so well deserves.

THE THEATRES.

New Royalty.—Mrs. Selby, the manageress of this elegant little theatre, is struggling hard to convert it into a popular place of amusement. On Monday she produced a new piece, with a classical and comic title—"Ixion; or, The Man at the Wheel." It has proceeded from the pen of Mr. Burnand, who has in it not unsuccessfully emulated the taste and point of Mr. Planché's mythological extravaganzas. Mr. Burnand deals adroitly with the burlesque element of the piece, and is tolerably prosperous also in the punning department. But great credit still is due to the management for the costliness of the appointments and the beauty of the scenery. For the most part, the characters are personated by females, who abound in Mrs. Selby's company, and some of them are her pupils. We may mention with respect Miss Jenny Willmore, as Ixion; Miss Harriet Pelham, as Jupiter; Miss Blanche Elliston, as Juno; and Miss Ada Cavendish, as Venus. The Cupid of Miss Marie Langford was lively and piquant, and no one can question the beauty of Apollo in the person of Miss Lydia Maitland. The spirit and animation infused into the whole performance testify alike to the diligence and talent of the nascent artistes employed, of whom it is probable we shall hear more hereafter on stages of larger dimensions. At any rate, Mrs. Selby may regard the new piece as an indubitable success.

Haymarket.—This theatre, newly embellished and newly accommodated with conveniences, has now fairly entered on business, and, accordingly, on Monday, Mr. and Mrs. Wigan appeared again in the Countess of Giffard's comedy, which, under the title of "Finesse; or, Spy and Counter-Spy," proved so attractive last season. The audience in the stalls and boxes can now listen to it with an ease which will greatly enhance the pleasure of witnessing so charming a production so elegantly acted. The comedy is calculated to maintain its position for several weeks.

Princess'.—It is not without a feeling of dissatisfaction that we register the fact that this theatre, so lately resonant with the poetry of Shakspeare, has passed out of the hands of a respectable tragedian into those of an adroit prestidigitateur. To this long word Herr Herrmann has a peculiar title, since it expresses at once his practice and his reputation. Both in the Old World and in the New we understand that he has achieved immense celebrity. Yet we doubt whether he will command an equal success in England. Here we have had ample experience of opposite schools of conjuring—from Professor Anderson's dramatic combination of tricks, conducted by means of elaborate mechanism, to Frikell's simple manipulation without any apparent machinery at all. Herr Herrmann belongs to the latter school, and in the use of his fingers is, perhaps, even more ready and complete. His tricks, too, are for the most part novel; but we question whether for the public his tricks are not too simple—we are certain they are too few. In the finish which their simplicity implies Herr Herrmann may be entitled to be considered as a conjuror for conjurors, who may wonder just where the public see nothing to wonder at; but to the popular mind something more complex and elaborate is more acceptable. That they are too few the impatient state of the house manifested on Monday. The gallery was particularly noisy and sportive between the parts, either calling for music or, when the music came, joining derisively in chorus. In one of the tricks an important error was committed, which, after some time, was confessed to be such by the wizard himself. Of his general dexterity, however, no doubt can exist; though, for the reasons we have given, we much doubt whether his present programme will command an extensive popularity.

Chinese Industry.—I saw a man once who had a plot of ground, in which he was going to plant out some cabbages. He knew there were beetles and other insects in the ground which would eat them, so, when it was all ready, he put bits of cabbage-leaf, about 2 ft. apart, all over the plot, placing a stone on each to keep it from being blown away. He left them for a time, and then visited them at intervals, finding insects at work on them each time. These he killed, removing carefully the remains, for fear of their scaring away the brethren. At last, when he could catch no more, he planted out his cabbages. All this I saw done with my own eyes, and the good man seemed to think there was nothing unusual in it, but that it was the most natural way in the world of securing the safety of his vegetables at the cost of a few leaves.—*Colonel Fisher's Three Years' Service in China.*

EARL RUSSELL ON AMERICAN AFFAIRS.

Earl Russell, who has been residing with his family at Meikleour House, Perthshire, for some weeks, was entertained by the tenantry on the estate to a public dinner, which was held in the Public Hall of Blairgowrie last Saturday afternoon. His Lordship was met at the outskirts of Blairgowrie by a procession consisting of the different trades and headed by the magistrates. On reaching the town he was presented with an address by the magistrates, in which allusion was made to his many and successful efforts in the cause of civil and religious liberty. Earl Russell then proceeded to the Public Hall, where the chair was taken by the Earl of Airlie; and Sir George Ramsay, Sheriff Barclay, and Mr. Kinloch, of Kinloch, were croupiers. The Rev. Mr. Marshall presented an address to the noble Earl, on behalf of the tenants of Meikleour, which referred at considerable length to various important measures in the carrying of which his Lordship had taken a part, and to his present difficult and delicate duties as Secretary of State for Foreign Affairs.

At the dinner the noble Earl, in replying to the toast of his health, reviewed at considerable length the foreign policy of her Majesty's Government.

Referring first to the Polish question, he insisted that Russia had not complied with the conditions on which Poland was secured to her by the Treaty of Vienna; nevertheless, neither the obligations nor the interests of England required that we should go to war for Poland, and he therefore thought it unbecoming for us to rail at Russia when we were not prepared forcibly to resist aggression.

With regard to Mexico, his Lordship pointed out the distinction between intervention for the redress of wrong and for the purpose of forcing upon a people a particular form of Government. France had chosen the latter form of interference in Mexico, and our Government had consequently felt it to be their duty to part company with the Emperor as soon as his real object was disclosed.

Earl Russell next spoke of what is going on in America, and defended the policy of our Government since the outbreak of the civil war. His Lordship's remarks on this subject are, on account of their importance, given entire.

AMERICAN AFFAIRS.—OUR CONCESSION OF BELLIGERENT RIGHTS.

I come now to another question, a question interesting to us all—a question to which I beg your attention, because I wish to explain some circumstances in which I think the character of this country has been maligned. I am speaking of what occurred in what a few years ago were the United States of America. Then we were exulting in the prosperity of that country; we were happy to see a people, derived from the same ancestors as ourselves, enjoying free institutions, enjoying apparent harmony with one another, and with whom we had—at least just before the civil war broke out—hardly a difference. There was a difference about a small island called St. John, and which we proposed to refer to the arbitration of the Swiss Republic. Such was the state of affairs when the war broke out. Nine of the Southern States of America declared that they would form an independent Republic. Our course on that subject has been attacked and blamed, sometimes in the bitterest terms—blamed sometimes by the Federals, sometimes by the Confederates.

The first offence was felt by the Federals. They say that we had no right to grant, as far as we were concerned, to the Confederate States, the rights of belligerents. Well, gentlemen, that question of the rights of belligerents is a question of facts; and I put it to you whether, with five millions of freemen declaring themselves, in States and collectively, an independent nation, we could pass it over as a petty rebellion. Our Admirals asked whether the ships they met bearing the Confederate flag should be treated as pirates or not. If we had treated them as pirates, we should have been taking part in that contest. It was impossible, looking at it as a community of five millions of people, to treat it as a mere petty insurrection, or as not having rights which at all times have been given to those who, by numbers and importance and the extent of territory they possessed, were entitled to those rights.

Well, it was said that we ought not to have done it, because it was a community of slaveholders. I trust our abhorrence of slavery is not in the least abated or diminished. For my own part, I consider that it is one of the most horrible crimes that yet disgrace humanity; but when we are treating of the relation which we bear to the communities of men I doubt whether it would be expedient or useful for humanity to introduce that new element, declaring that we will have no relation with a people that permits slavery to exist among them. We have never adopted it with Spain or Brazil, and I do not believe the cause of humanity would be served by adopting it.

But then, it was said, the Confederate States were rebels against the Union; perhaps we are not so nice as we ought to be on that subject. But I recollect we rebelled against Charles I., against James II., and that the people of New England, not content with these rebellions, rebelled against George III. I do not say now whether all these were justifiable or wrong. I do not say whether the rebellion of the Southern States is a justifiable insurrection—whether it is a great fact or a great crime; but I state the mere fact that a rebellion is not in itself a crime of so deep a dye as to cause us to renounce our relations with people guilty of rebellion. But, to look at the orations of the New England orators, and I have been reading lately, if not the whole, at least the greater part of a long speech by Mr. Sumner in New York, and I cannot but wonder that this man, the offspring of three, as we are of two, rebellions, should be speaking like the Czar of Russia or Louis XIV. of the dreadful guilt of a crime of rebellion.

CONFEDERATE COMPLAINTS OF THE BLOCKADE.

Then comes another complaint, and it comes from the so-called Confederate States. It is said we have, contrary to the declarations of Paris, contrary to international law, permitted the blockade of three thousand miles of American coast. It is quite true we did so; and the presumable cause of complaint is quite true that although the blockade is kept up by a sufficient number of ships, yet these ships were sent into the United States Navy in a hurry, and are ill-fitted for the purpose and did not keep up, so completely and effectively as was required, an effective blockade. Still, looking at the law of nations, it was a blockade we, as a great belligerent Power, in former times should have acknowledged. We ourselves had a blockade of upwards of two thousand miles; and it did seem to me that we were bound in justice to the Federal States of America to acknowledge that blockade; but there was another reason that weighed with me. Our people were suffering severely for the want of that material which was the main set-off of their industry, and it was a question of self-interest whether we should not break that blockade.

But in my opinion the men of England would have been for ever infamous if, for the sake of their own interest, they had violated the law of nations and made war in conjunction with these slave-holding States of America against the Federal States. I am not speaking sentiments which are peculiar to me who had no interest in the question, but such I believe to be the sentiments of that noble-hearted people of Lancashire who lived and flourished by that industry, but would not allow a single spot on their escutcheon in order to the maintenance of that industry.

THE ALABAMA.

Well, gentlemen, we come to new complaints on the part of the Federals, that we allowed ships to leave the port of Liverpool which afterwards commit depredations on their commerce. It would lead too far if I were to enter into all the particulars; but you must know that in order to prove, you require evidence, such evidence as might be sifted in a court of justice; and it was not until the day the vessel left that we had an opinion of lawyers sufficient to stop that vessel, and I doubt if even then we had brought it before a court of law whether there would have been evidence sufficient to condemn her, because, by an evasion of the law, the ship was fitted up without arms or equipment, and that equipment was conveyed to her in the waters of a foreign country, very far from the jurisdiction of England.

Gentlemen, these questions must be weighed; but I think they will be weighed, as they have been by the Government of the United States of America, in the balance of equity. We know that the Foreign Enlistment Act and the whole law respecting that subject is one of difficult application. The principle is clearing up; if you are asked to sell muskets, you may sell them to one party or the other—guns, powder, cannons in the same way. If you are asked to sell a ship you may sell a ship in the same manner; but if you train and drill a regiment with arms in their hands, and allow that regiment to go out with arms in their hands, and to take part with one of two belligerents, you violate the neutrality and commit an offence against the other belligerent. So with regard to ships: if you allow a ship to be armed, and to go at once and make an attack on a foreign belligerent, you are thus, according to your own law, taking part in the war, and that is an offence which is punished by the law.

But these questions will lead, as you will see, to most difficult problems—as, for instance, a thousand persons here may go out as labourers to the Federal States in one ship; there may be a thousand muskets go out in another ship; and when they arrive, those thousand labourers, having had an understanding before, now make a formal engagement with these States and are armed with these thousand muskets. But if that had been done in the territory of this country it would have been an offence.

There are other matters with regard to ships that have lately been prepared within this country, because these ships are not like ships that receive the usual equipment. They are not like vessels you sent in former times of war; but are in themselves, without any further armament, formed for acts of offence and war. They are steam-rams, which might be used for purposes of war without ever touching the shore of a Confederate port. Well, gentlemen, to permit ships of this kind knowingly to depart from this country—not to enter a Confederate port, not to enter the ports of a belligerent—would, as you see, expose our good faith to great suspicion; and I feel certain that, if during our war with France the Americans had sent out line-of-battle ships to break our blockade at Brest, whatever reasons they might have urged in support, we would have considered it a violation of neutrality. Such is the spirit in which I am prepared to act.

Everything that the law of nations requires—everything that the present Foreign Enlistment Act requires—I am prepared to do, even if it should be proved to be necessary for the preservation of our neutrality that the sanction of Parliament should be asked to further measures that her Majesty's Ministers may still add. In short, to sum up all, we are prepared to do everything that the duties of the neutrality require—everything that is just to a friendly nation, taking as a principle that we should do to others as we should wish to be done unto ourselves. But this we will not do, we will not adopt any measures that we think to be wrong. We will not yield a jot of British law or British rights in consequence of the menaces of a foreign Power.

STATE OF FEELING IN AMERICA.

And now referring again to the complaints that have been made, it is singular to observe how jaundiced the mind of some of those who speak in the New England States are upon the subject.

There were some persons in the House of Lords who thought fit to complain, upon an apparent grievance, of ships of ours that had been seized, in some cases passing from neutral ports, in other cases on the high seas, but apparently on legitimate voyages; and it was urged that we might not submit to have our vessels thus seized and interrupted. I had to deal with that case, and my answer was that, according to the law of nations, if a ship had an ostensible voyage to a destination, which was not her real destination—if she was bound in effect to the enemy's port with munitions of war—that belligerents had a right to stop that vessel on the high seas; and said that that law had been laid down by Lord Stowell and other great English authorities; but it had been laid down by those authorities in time of war, and that now we were neutrals I did not think we should depart from the law we had laid down as belligerents. I said that although in America there were some of the local courts which did not know the authority of such men as Lord Stowell and Sir William Grant, there was a court of appeal—the Supreme Court of the United States, which contained, and had contained for many years, men as learned, of as high reputation for law, and as unsullied a reputation for integrity as any that had sat in our English courts of justice, and that we ought to wait patiently for the decision of these tribunals.

Now, what was my surprise, and what will be your surprise, to find that Mr. Sumner has his mind so prejudiced as to bring against me the charge that I have attempted to diminish the reputation of the American courts, and show myself biassed against the American States by the declaration I had thus made.

I will not detain you further on this subject; but one remark I must make, one remark on the general tendency of these speeches and of these writings in America. The Government of America discusses these matters very fairly with the English Government. Sometimes we think they are quite in the wrong, and sometimes they say we are quite in the wrong. We discuss them fairly. With regard to the Secretary of State, I see no complaint to make. I think he weighs the disadvantages and difficulties of our situation in a fair and equal balance; but not so these others, and that speech of Mr. Sumner is one of them, being an epitome of almost all that has been contained in the press of America on the subject. There are others by whom our conduct is very differently judged.

I say, with regard to all these matters, they are difficult questions. We may have reason to complain in some instances, and the Federal Republic of America may have reason to complain in others; but let us recollect that we are, as I have said, descended from the same ancestors; that in the courts of justice in America the common law of England is constantly cited, the decisions of whose Judges are constantly referred to as decisions ever respected; that our Shakspeare and Milton are to them the classic books they are to us; that we have the same inheritance of freedom; that many of our institutions—as you may see by reading that excellent book of Tocqueville's, as he shows many of our institutions—are identical; that the same spirit of liberty animates us both; that though we, after our revolutions, chose constitutional monarchy as our form of government, and that though, after theirs, they chose a Republic as their form of government, yet this community, having the same spirit of law, having the same spirit of liberty, having the same spirit of freedom, we ought, when these unhappy days are over, to embrace one and other as friends; that we in the Old World, and they in the New, ought to be the lights to promote the civilisation of mankind.

Now, gentlemen, with this feeling, I own I almost lose my patience when I see men in what is called an oration heaping up accusation, misrepresentation after misrepresentation, all tending to the bloody end of war between these two nations. I cannot but say, are they not satisfied with the blood that has been shed in the field in the last two years—with that field of Gettysburg, where 10,000 corpses of men, mostly in the prime of manhood, lay stretched on the ground, who had been vigorous in the early morning?—are they not satisfied with this bloodshed, but would they seek to extend to the nations of Europe new days on which fresh sacrifices are to be made of human life, human interest, and human happiness? Gentlemen, I trust that will not be the case. I know, at all events, that my efforts, such as they are—weak they may be, ineffectual I hope they will not be; but my efforts, such as they are, will be directed to keep peace between these two nations—to do everything which I think is just, everything which I think is right, towards this people. I trust we shall be ready to meet an attack, if we are unjustly attacked—ready to bear our part in the contest, if contest there must be, but yet believing that we ought to make every effort that all these various complications may end in peace to the nations and in friendship. I say, at all events, I shall have a conscience that I have done my best to preserve peace between these mighty nations.

Gentlemen, this is a great subject. It affects the people in our part of the world and of America. It affects the future state of civilisation. It affects the well-being of the black race whom it was the crime of our ancestors to introduce into America, and who—if these matters are well ended, as I believe they will—are fitted to be peaceable and intelligent members of a free country, and on behalf of whose welfare we have been ready to make great efforts and to sacrifice much. But we will not sacrifice any of those views of ours to mere pretence. We have as strong a feeling for the good of mankind as any people can have; but we must maintain our own position; and my belief is that the people of what were the United States, whether they are now called Federals or Confederates, will finally do us justice; that they will observe—as, indeed, they cannot help observing—that in this free country, where there is so much discussion and so much difference of opinion, there are parties, very considerable in number, who sympathise with the Confederates, and there are other large masses, I believe superior in numbers, who sympathise with the Federals. But, whether sympathising with the one or the other, we have all impressed in our hearts the sentiments of justice, and that we will do to others the justice we expect for ourselves. And I hope I interpret the feelings of your minds when I say that justice ought to prevail.

The noble Earl sat down amid prolonged cheering.

SOCIAL SCIENCE AT EDINBURGH.

At the approaching meeting at Edinburgh, commencing on the 7th inst., a variety of interesting subjects will occupy the attention of the members in each of the six departments.

In the department of Jurisprudence many of the subjects to be discussed will be of national interest. Among these questions we find the transfer of land will be treated of in several important papers. Mr. R. R. Torrens, Registrar-General of South Australia, contributes a paper on the Torrens' system of "Conveyancing by Registration of Titles as in operation in Australia." Mr. Thomas Hare will lay before the department the draught of a bill "to facilitate the acquirement of house property by the working classes in large towns."

Among other subjects are the "marriage laws," and the necessity for a minister of justice and the laws of evidence, both in civil and criminal cases.

In the Educational department national education in Scotland occupies a prominent place, and is certain to call forth animated discussions. Professor Milligan, of Aberdeen, contributes a paper "On the Parish Schools of Scotland." Dr. Lees, of St. Andrews, "On the Scottish University System." The Rev. J. P. Norris, H.M.I., writes on the inspection of middle schools by the University of Cambridge.

Papers are also promised on the state of education in France and in America, on industrial education and industrial schools, on the training of teachers, the functions of the primary schoolmistress, the civil service examination, and other subjects of general and local interest.

In the Reformatory department the Right Hon. C. B. Adderley, M.P., will read a paper "On the Reports of the Royal Commissioners on Penal Servitude and Prison Discipline;" Mr. C. P. Measor, "On the Reformatory Principle in Criminal Punishment;" Sir John Don Wauchope, "On the Classes which Furnish Criminal Children;" the Rev. Dr. Robert Lee "On the Advantages of Reformatories." The question of licenses to public-houses, and the subjects connected with temperance reform, come within this department, and will be treated of in several able papers.

Among the papers in the Public Health department the following are of special interest:—"The Sanitary Statistics of Colonial Native Schools and Hospitals," and another paper "On the Army in India," by Miss Florence Nightingale; "The Changes which have have occurred in the Type of Disease in Edinburgh during the last Fifty Years," by Professor Christison; "Diseases in Cattle," by Professor Gamgee; "The Sanitary Arrangements of Edinburgh as compared with other large Towns," by Dr. Littlejohn; "On the Necessity for Prospective Legislation to prevent Dwelling-houses being Built in Disregard of the Conditions of Health," by Colonel Oldfield. Various other important subjects will be brought forward, such as the sickness and mortality of merchant seamen, the contamination of water by sewage and by public works.

Nearly fifty papers have already been communicated to the department of Social Economy.

The subject of emigration will occupy a whole day. It is treated of in several important papers, such as the relation between Great Britain and her colonies, by Mr. R. R. Torrens.

Mr. Edwin Chadwick contributes a paper "On the Comparative Results of the Chief Principles of the Poor-law Administration in England and Ireland as compared with Scotland." Several other papers deal with the operation of the poor laws.

Mr. Edmund Potter, M.P., will read a paper "On the Lancashire Cotton District."

The progress of co-operation, both in England and Scotland, will be treated by the Rev. Dr. Begg, Mr. Henry Pitman, and others.

Taxation, direct and indirect, the dwellings of the working classes, and almost every other subject practically affecting to any extent the social condition of the people will be more or less thoroughly discussed.

In the department of Trade and International Law, as far as regards the first division, local subjects seem to occupy the most prominent places. Professor Archer, the active local secretary of the meeting, and head of the Edinburgh Industrial Museum, contributes a paper "On the Industrial Features of Edinburgh." The recent progress and present condition of trades and manufactures of various districts of Scotland form the subjects of numerous papers likely to be of considerable interest.

In the other divisions of this department discussions are likely to arise on various points of international law, the importance of which is being daily demonstrated by the course of public events. We may mention a paper by Mr. James Anderson, Q.C., as likely to deal with several of these points; and also one by Mr. R. D. Chalmers, "On the Capture, during War, of Private Property at Sea." On international patent law, on international decimal system, and on international congress and tribunal for the prevention of war form the subjects of papers which have been contributed to this department.

TOULON.

(From a Correspondent.)

Defence is, and always has been, the fundamental theory of the French dockyards. To British resource and valour in bygone years this is mainly owing. Enterprising and heroic as France has been, these qualities were often, if not always, unavailing when confronted with what is still the greatest maritime population of the Old World or the New. The only course, therefore, for France to pursue was to make good against attack the great national establishments on which the naval strength of the monarchy, republic, or empire had been reared. To this necessity the engineering reputation of Vauban and the first Napoleon are largely owing. In this country, on the other hand, the time-honoured theory of the dockyards is attack, and it is because of this that military engineering has attained, comparatively, little prominence among ourselves. During the long and trying wars of the last and the present century, Spithead and our great dockyards may be said to have had no defence but our wooden walls, and, had engineering defence been resorted to, it would, not in England merely, but in France and Europe, have been thought an acknowledgment of exhaustion or decline. These different theories are, to the present day, the key to the grouping of our dockyard factories, shops, and stores, and to the diffusion of those of France. We have studied mere convenience, never dreaming of defence; while France, with the certainty of attack constantly before it, has sacrificed convenience that the consequences of bombardment might always be reduced to the lowest point. This difference is of great importance; because, if nowadays our dockyards are to be defended like those of France, it seems to follow that the first thing to be done is to "reconstruct" our dockyards by separating all the separable parts as much as possible from each other.

The Engraving of Toulon exemplifies the French dockyard theory. Instead of the Toulon establishment being on one side of the harbour, as it might be, it is on two, and the arrangement involves exactly the same superfluous labour as though one half of our own Portsmouth establishment were on the Isle of Wight. Within the five Mourillon ironclad building-slips, there are at the present time in hand three frigates and one transport; and while the timber entering into the construction is beside the workmen, the iron has to be shipped backwards and forwards either from the Maritime arsenal or the Castigneau arsenal. The inconvenience and delay must necessarily be great. But what of that? Were Toulon attacked by an enemy, the burning of Mourillon would leave the Castigneau and the Maritime arsenals unharmed, and the converse. Nay, so arranged are the parts of Toulon Dockyard—the best dockyard unquestionably in France—that were Castigneau to be burned the Maritime arsenal would probably escape, and were the Maritime arsenal to be burned Castigneau would probably escape. But that is not all. Mourillon is as far as possible the repository of all the combustibles within the dockyard; so that, let an enemy bombard as he may, no more, practically, than one portion of the dockyard can be burned. In our own dockyards, on the contrary, timber is stocked everywhere, and roperies, sail-lofts, mast-houses, and general storehouses have been erected—without the remotest reference to bombardment—in situations where at the time there happened to be room for them. Some of the roperies and other buildings are so situated that a single live shell falling into them would endanger the entire dockyard.

As might be supposed, from such a theory as that on which the French dockyard system rests, preparation for attack up to a certain point has always been maintained. During the long war with this country, France strained its naval energies to the utmost so as to be ready to strike effectively on all possible occasions. The practice still survives. France has never ceased to maintain its navy in a state of high efficiency, so as to be prepared for all the exigencies of the public service.

Turning again to the Engraving, the number of ships in Toulon Harbour in commission or in a forward state for commission is a marvel in comparison with what is usual in our own dockyards. France is always ready to strike a blow, while England, as the Russian War proved, is only ready when the time for striking has gone by. Old traditions strangely linger in both services, although the fact appears to be little known. Whether this is to be regarded as a danger to this country it is here needless to inquire. Suffice it to state that France now, as it always has done, makes use of its ships of war just as it makes use of its battalions at Châlons and elsewhere. A considerable fleet, it will be seen, is constantly in Toulon Harbour, with powder and crews on board; and the most timid must admit that, if it be justifiable to possess ships of war, accumulate stores of powder, and provide reserves of seamen, there is neither waste nor impropriety in bringing and keeping the three together a little freely. Down to the ships of war in the third division of the French steam-reserve the same wise forethought is displayed. France reduces no class of its fighting ships to the condition of helpless and useless privation that strikes observers so forcibly in the Medway, the Hamoaze, and Portsmouth Harbour. Between the third and second division, and the second and first division of the French steam-reserve, there is an interval so narrow that it can be spanned readily at any time, while in our own steam-reserve the reverse is the truth.

In the economy of Toulon Dockyard the convicts fill a conspicuous part. The six or seven thousand convicts at the present time in the Bagne in Toulon Dockyard perform the whole dockyard labouring work. And, strange to say, they labour well and willingly. What will also strike those as remarkable who have visited our own convict-prisons, is the fact that the French convict is less supervised than our own labouring convicts. Strolling through Toulon Dockyard, green-capped convicts—that is, those who have killed their man—are met with alone, or in twos or threes, pursuing some avocation or other, no eye over them, and no one near them. And yet the convicts, under such circumstances, toil diligently. At Portsmouth the governor of the convict-prison has, of late, allowed a small number of well-conducted convicts to do the same thing; but in the case of the French convicts there is no prospect of speedy liberation, nor promise of the benevolent attention and help of the Prison Aid Society. The French convict toils because he is forced to toil. If he fails in his allotted task his body suffers. The French system is repressive of crime; our system seeks the reformation of the criminal. Strange to state, neither answers its intended purpose. Repression may induce caution in the commission of crime, but it hardens and ruins every one brought within its influence. Benevolence, on the other hand, does not deter from crime, and the so-called reformations are rarely to be trusted in. As regards the French convicts in Toulon Dockyard, this at least is certain, that the convicts perform good service to the State, inasmuch as they obviate the necessity of employing many hundreds of the working population of Toulon, who have become absorbed in other, and no doubt more congenial, occupations—cultivating vines and olives, or supplying the constantly increasing requirements of the labour market of gay and prosperous Marseilles.

Our Engraving of Toulon is from a photograph by Mr. P. Barry, author of "The Dockyards and Shipyards of the Kingdom."

French papers state that the mission of Nubar Pacha has for its object to lay before the Suez Canal Company the bases on which the Porte and Egypt would wish to negotiate. Those bases are said to be that the company would entirely relinquish the conceded territory; and the Porte would, on the other hand, authorise the Egyptian Government to furnish workmen, on condition that they did not exceed 6000 at a time.

The Austrian journals state that a company of that country has just organised a pleasure excursion round the world. The screw-steamer Marco Polo, which is specially engaged, is to leave Trieste on the 5th of next March, and successively visit Algiers, Gibraltar, Madeira, Saint Helena, the Cape of Good Hope, Madagascar, Ceylon, Nicobar, Singapore, Hong Kong, Shanghai, the Sandwich Islands, Mexico, Panama, Lima, Monte Video, Rio Janeiro, and, lastly, Naples and Corfu. The trip is to last eight months and lost 5000 florins, or nearly £500.

On Wednesday week a large number of most respectable people, from the counties of Antrim, Donegal, and Armagh, left Belfast by the Morecambe and Fleetwood boats for London, to sail by the ship Light of the Age for Queensland. The emigrants were mostly farmers and their sons and daughters.——The emigrant ship Northumberland, 812 tons, Mr. W. H. Hawkins, master, sailed from Plymouth on the 26th ult., for Adelaide, South Australia, with 315 Government emigrants, under the care of Mr. J. L. V. Gregory, surgeon-superintendent, assisted by Mrs. Elizabeth Elliott, matron.——The Maritzburg, which sailed from Gravesend on the 28th of March, arrived at Natal on the 6th of July last with seventy-five Government emigrants. One birth, but no deaths, took place on the voyage.

MEMBERS OUT OF PARLIAMENT.

Tamworth has more than once been made famous as the recipient of a manifesto. Hither have come great State papers signed with the name of "Robert Peel;" and on its tiny hustings, and to the limited audiences which more or less surrounded them, have been declared great schemes of policy and profound political disquisitions from the lips of one who, for more than a quarter of a century, was confessedly the foremost statesman of this country. We associate with public demonstrations at Tamworth eloquent but grave discussions of public affairs; and, doubtless, the four hundred and sixty-five electors of that borough have unconsciously grown into a belief that somehow they have a special interest in the well-being and in the Administration of this country. It is true that this constituency no longer sends Prime Ministers to Parliament, but by virtue of hereditary if not of personal claim, it so happens that no Administration since the great Sir Robert passed away has existed without having within it a representative of the name of Peel. It is just a question whether the "tenth transmitter of a foolish face" is not happier in his irresponsibility to his ancestors than the inheritor of a great name and a proud public reputation. As a rule, it would seem that Nature has intervened to protect eldest sons of great men from the necessity of keeping up hereditary character. The second Earl of Chatham was palpably created to be left alone, and attempts to force him into the active service of the country were notable failures, and something more; and the example, although a crying one, is anything but singular. The theory is not wholly established in the case of the third Sir Robert Peel. Strictly speaking, there is no intellectual falling away here, but the transmission is by no means direct. Wider divergence of character and cast of intellect between father and son could hardly be, and the last proof of it is to be found in the latest appearance of the Chief Secretary for Ireland in his paternal borough. The occurrence of a vacancy in the representation of Tamworth has brought about a curious game of cross-purposes. One of the candidates is a connection, by marriage, of Lord Palmerston, and represents that noble Lord and nothing else; while the other, who is a Peel, comes to the Peel borough as a Peelite, and finds himself in hot opposition to a Sir Robert Peel. Somehow, the electors seem to object to active opposition to Peelism by a representative Peel; and, exercising those functions which belong to the components of public meetings, they, for the first time, flouted a Sir Robert in that place, and so caused him to give them a taste of his quality, which, they find, is not an inherited one. Instead of listening, as was once their privilege, to well-poised, rounded sentences, spoken in a voice like a trumpet with a silvery sound, insinuating everything, and only once in a way pronouncing anything, they hear a robustious monotone, rough almost to hoarseness, and a curious jangle of the English language which seems to tumble out of the speaker's brain in the very first moment of conception of what he is going to say, and before his thoughts can take form and purpose. With this there is a demeanour which denotes impulse irregular and hardly controllable, and which gives the idea that the energetic gentleman in question is only one degree from proceeding to physical force. Certainly, it does seem strange that at Tamworth hisses should be mingled with cheers when a Sir Robert Peel addresses its inhabitants; and curiously suggestive were some of the rather rude inquiries which came from a by no means unanimous audience. The situation was no doubt embarrassing, but the chief actor need not have thrust himself bodily into it; and we take it that if Sir William Hayter still managed the Government elections no such mistake would have been made as that of a member of the Ministry, prominent from his office, coming forward in a borough with which he is immediately and personally connected and publicly setting up a candidate who has very special reasons for having no other policy than the support of Lord Palmerston. If the thing was to be done it might have been done without the creation of something very like a scandal.

It was, we believe, the circumstance of his being a landed proprietor that converted Sir Bulwer Lytton from a second-rate Whig-Radical into a first-class Conservative. There have been politicians, the late Earl of Yarborough, for instance, better known in the corn-law days as Lord Worsley, who managed to combine Liberal principles with the tenets of protection; but Sir Bulwer Lytton adopted no such hybrid course, having sat in Parliament, disappeared from Parliament, and striven several times to re-enter Parliament as a political free thinker until 1841. He passed the time intervening between that year and 1852 in remodelling his ideas, so that he should adequately represent the agricultural county of Herts; and a Secretaryship of State was his reward, one which he might have sighed in vain for in the Liberal ranks, more thickly sown as they were with eligible candidates for office than those of the Derbyite following. At Hitchin, where he has been discoursing, Sir Lytton is, of course, a power; and certainly his talk on agriculture there was philosophical enough, and he seemed as if he meant to insinuate a little of that doctrine of materialism with which some people say his writings are tinged. In the house he is oracular, in the sense of speaking, seldom, and then in what may be called a profound see-saw. He never has caught the House of Commons' style; and probably no one wants him to do so now, and as his once-a-Session-or-so speeches are taken as diversions, and listened to merely as intellectual exercitations, it does not much matter. He was wholly mute last Session, and for the good reason that none of his opportunities occurred. He had no chance of introducing an oration, carefully written and committed to memory, into a well-selected juncture of an adjourned debate. Something had been said of a declaration of policy by Sir Lytton Bulwer this autumn; but he gave no sign of such a thing at Hitchin. To be sure, he would hardly venture to take the initiative in a party move; and he may yet be waiting to follow suit to his immediate Parliamentary chief, who, it seems, could not brace his nerves to encounter a second harvest-home, at which he was expected, and so sent his apologies on the score of indisposition by Mrs. Disraeli.

Out of almost a crowd of provincial communers with their constituents, Mr. Bentinck, the member for West Norfolk, ought to stand prominently. In the house he bears himself proudly as the representative of a section of the Conservative party which disclaims allegiance to the leaders who formally ceded the question of protection; and, holding decided opinions on every question, great or small, that comes before Parliament, he never fails to enunciate them with a boldness which sometimes verges on effrontery. Last Session he appeared to be less vivacious than usual, and assuredly he was much less pointed than has been his wont—nay, at times he was even dull, and, worse, he more than once was nearly prosy. It is to be hoped that his tendency to eclipse was only partial, for in the present house such debaters as Mr. Bentinck can ill be spared. He is of a class which is getting rarer every day, and which may be called the impracticables. They are always harmless, but they are apt to elicit discussion and brighten up debates, because if no one cares to reply to their arguments, at any rate they can get fun out of them. In common with all the other spokesmen at the rural gatherings, Mr. Bentinck was somewhat put to it for animating topics. He showed a little invention, perhaps, by introducing the idea that the agricultural population wanted more representation in Parliament; but was not that an admission of some necessity for a Reform Bill? And it comes oddly from a county member who, to judge from his ways, conceives himself capable of representing all England, and, indeed, occasionally endeavours to do it.

Saving the Tamworth demonstration, all the talk of members in the provinces has been, perhaps perforce, alien from politics, and a certain sameness pervades their speeches. Here and there one of them varies the perpetual congratulations on the harvest with an infusion of the great beer question, apropos to Mr. Somes's Public-house Closing Bill, which really seems to be the only *bête noir* of our legislators. No doubt it is a subject which, in a crowd, comes home to many a man's feelings; but it marks the singular dulness of the political hour, that recourse should be had to such a topic in order to get up such ebullitions of popular feeling as are the necessary stimulants to the making of a good speech in a public assembly.

A letter from Han-Kao (China), of July 1, says:—"The first tea crop has been gathered in the central provinces, in consequence of which our market is very brisk. Nevertheless, prices range high, the Russians having, it seems, bought up a large quantity while growing."

NAVAL AND MILITARY INTELLIGENCE.

WAR OFFICE.

1st Life Guards: E. Venning to be Assistant Surgeon.

3rd Dragoon Guards: Cornet H. H. Arthur to be Cornet.

11th Hussars: H. W. Apperley to be Cornet. 12th: C. Ashton to be Cornet. 14th: T. W. Gill and H. Bancroft to be Cornets. 19th: Capt. G. A. Bishop to be Captain.

16th Lancers: Capt. H. D'Arcy P. Burnell to be Major; Lieut. H. C. Wilkinson to be Captain; Cornet A. W. Erskine to be Lieutenant; Cornet G. C. Childs, R. G. Mackenzie, and G. Schwabe to be Cornets.

Royal Artillery: Cadet H. A. Graves to be Lieutenant.

5th Foot: Staff Surg. J. N. Bell, M.D., to be Surgeon. 7th: Lieut. W. L. Barr to be Lieutenant. 16th: Capt. G. Gibson to be Captain. 17th: Staff Assist. Surg. J. H. H. Tohill to be Assistant Surgeon. 20th: A. Dening to be Ensign. 23rd: Ensign L. J. W. Haddent to be Lieutenant; Cadet G. H. Hutton to be Ensign. 24th: Lieut. H. B. Church to be Instructor of Musketry. 26th: Lieut. W. Bears to be Captain; Ensign S. H. Hardy to be Lieutenant; Cadet L. Clarke to be Ensign. 30th: Ensign J. Thom to be Lieutenant; Cadet F. Clowes to be Ensign. 35th: Ensign W. A. Brock to be Lieutenant; Cadet A. A. E. Oelrichs to be Ensign. 40th: Lieut. C. S. P. E. Mansergh to be Captain; Ensign A. Simeon to be Lieutenant; Cadet R. Pretor to be Ensign. 48th: Lieut. E. Bridges to be Lieutenant. 53rd: Lieut. A. K. Ffrench to be Captain; Ensign W. E. S. Battiscombe to be Lieutenant; C. Irvine to be Ensign. 58th: Lieut. T. E. Jones to be Captain; Ensign D. G. Anderson to be Lieutenant; Cadet G. V. C. Napier to be Ensign. 59th: Lieut. C. W. Hutton to be Captain; Ensign H. H. Griffiths to be Lieutenant; Cadet G. Poignand to be Ensign. 60th: Staff Surg. R. C. Todd to be Surgeon. 66th: Ensign J. A. Baxter to be Lieutenant. 70th: Major T. E. Mulock to be Lieutenant-Colonel; Capt. A. J. O. Rutherfurd to be Major; Lieut. H. B. Good to be Captain; Ensign J. M'Pherson to be Lieutenant; Cadet L. Hornby to be Ensign. 80th: Staff Assist. Surg. R. W. Hare, M.B., to be Assistant Surgeon. 94th: Staff Assist. Surg. J. D. Salter to be Assistant Surgeon. 96th: Lieut. A. C. G. Leman to be Instructor of Musketry. 101st: Major F. O. Salusbury to be Lieutenant-Colonel; Capt. G. C. Lambert to be Major; Lieut. N. H. Wallace to be Captain; Ensign H. P. Airey to be Lieutenant; Cadet M. O. M. Dixon to be Ensign. 104th: Capt. F. P. Luard to be Captain. 106th: Lieut. J. W. Garlick to be Instructor of Musketry.

Rifle Brigade: Ensign F. E. Kerr to be Lieutenant.

Brevet.—Capt. and Brevet Lieut.-Col. S. E. Gordon to be Colonel in the Army; Major S. G. Bunbury to have the honorary rank of Lieutenant-Colonel.

ADMIRALTY.

The following promotions, dated the 12th ult., consequent on the death, on the 11th ult., of Vice-Admiral of the Red H. Dundas, have taken place:—Vice-Admiral of the White Sir H. B. Martin, K.C.B., to be Vice-Admiral of the Red; Vice-Admiral of the Blue Sir T. Hastings, K.C.B., to be Vice-Admiral of the White. Rear-Admirals the Hon. A. Duncombe, R. Fitz Roy, C. H. Swinburne, on the reserved list, to be Vice-Admirals on the same list. Rear-Admiral of the Red J. Nias, C.B., to be Vice-Admiral of the Blue; Rear-Admiral of the White the Right Hon. Lord C. E. Paget, C.B., to be Rear-Admiral of the Red; Rear-Admiral of the Blue G. St. Vincent King, C.B., to be Rear-Admiral of the White; Capt. J. P. Bower to be Rear-Admiral on the reserved list; Capt. F. Warden, C.B., to be Rear-Admiral of the Blue. Retired Rear-Admirals W. Hamley and J. Drake to have the rank and title of Retired Vice-Admirals, in pursuance of the Order in Council of May 7, 1858.

INDIA OFFICE.

Her Majesty has approved of the undermentioned promotions and alterations of rank amongst the officers of the Staff Corps, and of her Majesty's Indian Military Forces:—

Brevet.—Madras Infantry: Lieut.-Col. H. W. Blake to be Colonel; Major E. W. Boudier to be Lieutenant-Colonel; Capt. C. Nicholls to be Major. Bombay Infantry: Lieut.-Col. C. Pattenson to be Colonel; Major J. E. Mayne to be Lieutenant-Colonel; Capt. M. B. Whish to be Major. Bengal Infantry: Lieut.-Cols. R. G. Taylor, C.B., R. W. O'Grady, and C. F. North to be Colonels; Majors F. J. Goldsmid, W. A. A. Thomson, and J. G. Halliday to be Lieutenant-Colonels; Capts. R. Gordon, A. S. O. Donaldson, and T. W. Seager to be Majors.

Bengal Staff Corps.—Capts. Brev. Lieut.-Col. C. A. Barwell, Brev. Major C. M. Fitzgerald, and J. W. F. Bean to be Majors; Lieut. Brev. Capt. J. T. Morgate to be Captain.

Bengal Army.—Infantry: Lieut.-Cols. General St. G. D. Showers, C.B., to be Colonel; Major Brevet Col. Sir H. B. Edwardes, K.C.B., to be Lieutenant-Colonel; Brevet Col. C. Troup, C.B., to be Colonel; Major M. J. Slater to be Lieutenant-Colonel. Late 1st European Fusiliers: Capt. C. O'Brien Palmer to be Major, and Lieut. John Morland to be Captain. Late 5th European Infantry; Capt. A. B. Fenwick to be Major. Late 15th Native Infantry: Lieut. P. Wheeler to be Captain. Late 32nd Native Infantry: Lieut. R. Blair to be Captain. General List of Infantry Officers: Ensigns A. Oldham, W. E. Gowan, A. Harden, T. Nicholls, C. C. Brownlow, G. Waterhouse, and B. H. Russell to be Lieutenants.

Bombay Staff Corps.—Capt. W. L. Briggs to be Major; Lieuts. C. D. J. Dodd, J. S. Drummond, and J. S. D. Bolton to be Captains.

Bombay Army.—Infantry: Lieut.-Col. H. James to be Colonel; Major E. Charles to be Lieutenant-Colonel. 2nd Light Cavalry: Lieut. C. A. Moore to be Captain; 16th Native Infantry: Lieut. J. W. Watson to be Captain. 23rd: Capt. J. Peyton to be Major. General List of Cavalry Officers: Cornet H. B. M'Neill to be Lieutenant. General List of Infantry Officers: Ensigns F. A. Boville, S. S. Dalmahoy, E. A. Douglas, and J. M. Heath to be Lieutenants.

A sea wall is to be built, at a cost of £5000, to protect the new forts at Cliff-end and Warden Point, in the Solent.

A vacancy has occurred among the flag officers of the active list by the death of Admiral Sir Henry Hope, K.C.B.

The 76th Regiment, quartered at Aldershott, is under orders for immediate embarkation, its destination being the East Indies.

The Lily, 4, 200-horse power, now serving in the West Indies, having been fitted with a new system of ventilation, the invention of Admiral Sir A. Milne, K.C.B., Commander-in-Chief, orders have been received at Chatham Dockyard directing the whole of the gun-vessels and gun-boats to be fitted with a similar system of ventilation before proceeding on foreign service.

The last stern-plate of the iron frigate Achilles, 32, 6079 tons, 1250-horse power, was fixed in its position on Saturday, and the entire length of the vessel, with the exception of about fifty feet of the stern, is now incased in iron armour. Upwards of 1600 shipwrights, caulkers, smiths, fitters, and other workmen are employed upon her.

Orders have been issued for the immediate removal into winter quarters of the infantry regiments stationed at the Curragh. The 10th are to proceed to Waterford, Duncannon Fort, and Kilkenny; the 12th and 32nd to Dublin; and the 58th to Newry and Enniskillen. The cavalry and artillery have been already withdrawn. The Royal Horse Artillery are divided between Newbridge and Dublin; the Royal Artillery between Fermoy and Ballincollig. The 4th Dragoon Guards have been sent to Belturbet and Dundalk; the 4th and 10th Hussars to Dublin; the 11th Hussars to Longford, Dublin, and Newbridge; and the 15th Hussars to Kilkenny, Athy, Newbridge, and Carlow.

The fortieth course of musketry instruction for the regular service has terminated at Hythe institution, and a large number of first, second, and third class certificates having been granted after examination, most of the officers and men have left for their respective regiments. Several sergeants and men-of-war's-men, however, still remain for further instruction. Several prizes have been given by the officers to the best shots in each wing and section. Lieutenant Trench, of the 55th Regiment, won a prize of £12, and Ensign Cox, of the 87th Regiment, a prize of £15. The course for volunteers commenced on Tuesday week, and at its termination the school will be closed until January next.

The project for connecting Aldershott camp with London by a railway junction is assuming a more definite form. According to the preliminary prospectus just issued, the proposed line will be about seven miles and a half in extent, commencing from the South-Western Railway between the Woking and Farnborough stations, proceeding by a direct route to Aldershott, and thence to a point near to the Farnham station of the London and South-Western Railway Company. It can be connected also with the South-Eastern Railway at or near North Camp or Ash Church stations, whereby the whole of the military material and commissariat stores from Chatham, Woolwich, and the Tower will be conveyed direct to the Government stores by rail.

The Channel Fleet arrived at Dublin Bay on Saturday morning shortly before seven o'clock, having left Liverpool on Friday at eight a.m. The squadron, on its approaching the bay, presented a very imposing spectacle, the famous ironclads contrasting strikingly with the less powerful wooden walls. The fleet was saluted by the Ajax. During the day great excitement prevailed in Kingstown. Large numbers of persons arrived by the various modes of conveyance—rail, steamer, and omnibus. The several yachts in the harbour were decked in their gayest bunting, and flags, banners, and union jacks were suspended from the windows of the clubhouses and public buildings. At one o'clock, according to arrangement, the Lord Mayor and members of the Corporation left the East Pier, Kingstown, on board the Ballast Company's yacht the Princess Alexandra, for the purpose of presenting an address to Admiral Dacres. On arriving at the flagship Edgar the party were shown on board, when the Right Hon. the Lord Mayor read an address. Admiral Dacres having replied, the Lord Mayor said he was chairman of the committee of the citizens of Dublin who had resolved on giving the Admiral and the officers of the fleet a fitting reception. He had now, on behalf of that committee, to invite them to a banquet at the Mansion House on Monday evening, and to a ball on Tuesday evening. Admiral Dacres accepted the invitation, and said that as many officers as could be spared would attend. The Kingstown town commissioners, headed by their chairman, also proceeded on board Admiral Dacres's ship, and read a very loyal address of welcome, which was replied to. At Bray, a fashionable Court watering-place adjacent to Kingstown, a subscription-list has been opened for the purpose of offering several prizes, to be competed for by the crews of the fleet in the men-of-war's boats. The fleet was visited by an immense number of persons on Sunday.

THE VOLUNTEER MOVEMENT.

The annual prize meeting of Lord Ranelagh's regiment, the 2nd (South) Middlesex, will take place on the 6th and 7th inst.

There was a field-day, a sham fight, and an evening bivouac at Hadley, near Barnet, last Saturday, under the command of Colonel Wilkinson. Several of the well-known metropolitan corps took part in the proceedings, which throughout were well conducted and gave complete satisfaction to every one present, whether as volunteer or as mere spectator.

Yesterday week an exciting contest among members of the second or B company of the 9th (West) Middlesex for a silver challenge plate, subscribed for by the members of the company and valued at £26, and also for a tankard for the second best shot, took place at the rifle-ranges of the corps, Wormwood Scrubbs. Private Armitage won the plate, and Major Bridgman the tankard.

On Tuesday week those members of the second battalion of the 22nd Middlesex, Queen's (Westminster), who had passed two periods of class-firing competed at the regimental butts for prizes given by the "Knights of the Round Table." More than sixty members entered. The prizes were £10 10s. (won by Starkie), £7 7s. (won by Watson), and £5 5s. (won by Tracey).

The seventeenth company of the Queen's (Westminster)—the St. Clement Danes' division—assembled at the ranges of the corps on Wednesday week at Wormwood Scrubbs, to compete for their prizes, which

amounted in the aggregate to £110. There were upwards of thirty competitors present, and, despite the unfavourable weather, some good shooting was made.

On Monday the prize meeting of the Finsbury Rifle Volunteers (39th Middlesex) was held at Rainham, in Essex. The first three prizes—namely, a silver cup, value £15, the gift of Mr. H. Holland; a watch of the same value, the gift of Mr. E. D. Johnson; and the sum of £10, the gift of the Commandant, Colonel Penton—were won by Private Strugnell, Colour-Sergeant While, and Lieutenant Hislop (who tied with Private Hoofling and won on shooting off).

The annual competition for the prizes of the 9th Tower Hamlets (London Docks) took place recently at the range at Plaistow. The highest prize, a silver cup, value £10, was won by Ensign Croxton.

A party of fifteen first-class members of the Tendring Hundred corps have been prosecuting first-class practice at the Colchester range in Wyvenhoe Park, their own range only extending to 600 yards. Of fifteen who fired thirteen obtained the requisite number of points constituting them marksmen. Annexed are the results of a competition of the Essex at Southend:—The first prize, given by Captain Fawke, a purse of £5, was won by Private Boreham, of the Shoebury section; the second prize, a cup, given by Mr. T. Lindsell, by Private W. Parke, of the Shoebury section; and the third prize, a tankard, was won by Private Jones, of the Prittlewell section.

Last Saturday the members of the 2nd Surrey Artillery Brigade met at Plumstead Marshes for the purpose of competing with carbines for various prizes given by the officers and friends of the regiment. The corps assembled to the number of about sixty men, all of whom entered for the first prize, which consisted of a silver cup, presented by Mr. William Jewell, of Clapham. In the prize-list was included a silver tankard, presented by the Rev. W. B. Hawkins, M.A., Honorary Chaplain to the brigade; a silver cup, presented by the ladies of Brixton: several valuable prizes given by the commanding officer (Major Durnford); and eleven other prizes by the officers of the regiment. For the prize presented by Mr. Jewell the principal scores were Captain Bryan, 23; Private Williams, 23; Private Lewis, 22; Private Baldry, 22; Major Durnford, 21; Sergeant Longley, 21. For the cup presented by the ladies of Brixton the leading scores were Private Baldry, 24 marks; Major Durnford, 21; Private Macbeth, 20; Sergeant Longley, 19; Captain Bryan, 18. There are eleven other prizes yet to be competed for.

The annual prize contest of the 1st Kent (Gravesend) Volunteer Artillery took place on Thursday week at Bycliffe, with the following result:—First prize, a cup, value 10 guineas, was won by Gunner Fox; the second prize, a cup of the same value, given by Mr. Amos French, by Gunner J. Steele; the third prize, of £5, by Gunner French. The challenge cup and medal, given by the Corporation of Gravesend, were won by Gunner J. Steele.

The ceremony of presenting the prizes won at the recent prize meeting of the Brighton Rifle Corps took place on Thursday se'nnight at the Townhall. The Mayor (R. Wilson, Esq.) presided. The officers' prizes were presented by Colonel Crofton; the company challenge cup (value £14, given by Mr. Abbey) by Mrs. Coningham, wife of the senior member for the borough; the artillery and rifle challenge cup, by Lieutenant-Colonel D'Albiac; and a purse of £15 (given by Mr. H. Moor), by Mr. M. D. Scott. The other prizes were presented by W. Coningham, Esq., M.P., and the officers of the corps. The proceedings terminated with a ball.

The Taff battalion of the Glamorganshire volunteers held their autumn review at Caeraw, near Cardiff, on Thursday week. The great attraction of the day was the attack and defence of a Roman encampment, situated on the top of Caeraw-hill, within which were mounted four field-pieces, with a body of artillerymen, supported by the cavalry and a few companies of riflemen. The operations, which were admirably carried out, occupied three hours. At length the artillery were driven from the encampment, and the attacking party captured the place. The men were then drawn up in square, and Colonel Clarke, the commanding officer, congratulated the battalion upon the decided improvement which had taken place.

The North Somerset Yeomanry Cavalry completed its eight day's permanent duty at Bath on Saturday. The regiment was inspected on Friday by Colonel White, of the Inniskilling Dragoons. The number of officers and men assembled was 370, and their efficiency was tested in a variety of movements, some of them of an intricate nature. At the conclusion of the inspection, Colonel White deputed Colonel Sir William Miles to congratulate the men on their general performance of the evolutions, at the same time administering a mild rebuke for some talking he had observed in the ranks. A splendid sword, in a silver scabbard, was presented to Colonel Sir William Miles, on behalf of the non-commissioned officers and privates, by Regimental Sergeant-Major Anderson. This mark of respect and esteem was acknowledged by Sir William in a feeling address. The prizes offered by the officers of the regiment were awarded as follows:—For the best sword exercise, first prize (£5), Sergeant Fennell, of the Bath troop, who, having been the fortunate competitor last year, received a medal; and the money prize was awarded to Sergeant Flower, of the Stone Easton troop. The second prize was gained by Private J. Day, of the North Marsh troop. The Wells troop carried off the prize of £5, for the best turned out troop during the week.

In Suffolk the Halesworth corps held its annual company shooting yesterday week. The first contest was for the honour of holding for a year the Johnston challenge cup, of the value of £15 15s., given to the corps by Mr. A. Johnston and Captain F. Johnston. The winner, in addition to the privilege of holding the cup for a year, received £2 2s. from the funds of the corps.——A match took place last week between fifteen members of the Sudbury corps. The first prize was won by Private Wheeler, the second by Private Westoby, the third by Private Leney.

On Tuesday week the volunteers of East Dereham and of the adjacent towns of Wymondham and Hingham were entertained at Letton Hall, the seat of Mr. Brampton Gurdon, one of the members for the western division of Norfolk.

In compliance with a general desire on the part of the volunteers of Lincolnshire that they should be again brigaded, Lord Aveland, the Lord Lieutenant, authorised a field-day of the various corps, both rifles and artillery, to be held at Boston on the 1st inst. His Lordship, as at Lincoln last year, defrays the expense of dinner for the entire assemblage of volunteers.——The Spalding corps has closed its class-shooting for the year. Fourteen members of the corps out of the thirty-one who fired have obtained marksmen's badges. Lieutenant Seddon has accepted the captaincy of the Grimsby corps, and Ensign Nainby has been promoted to the post of Lieutenant by election. Lieutenant Mackinder has resigned his commission in the Spalding corps, and has been succeeded by Ensign Preston. Six marksmen have appeared as the result of the class-shooting of the Barton corps.

The Thorneywood Chase (5th Notts) Corps was inspected at Epperstone, by Colonel Harman, on Tuesday week. The corps having been put through a variety of movements, Colonel Harman addressed the men. He said he was unaccustomed to use flattering language in speaking of volunteers; and, after alluding to the difficulties they were under in getting together, expressed his great satisfaction at the proficiency they had obtained in drill, and declared that it had not been his duty at any time to inspect a scattered country company superior to the one before him.——On the 24th ult. a number of the members of No 7 (Pelham) company, Robin Hood Rifles, assembled at the butts to shoot for a series of prizes. Mr. Dunnington bore away the first prize, Colour-Sergeant Bardsley the second, and Sergeant H. Browne the third.

Colonel M'Murdo inspected the first and second battalions of the Worcestershire Rifle Volunteers on Monday week. About 3000 spectators assembled to witness the spectacle. At three o'clock the inspecting officer rode to the front, and the event of the day began. In company with Colonel M'Murdo were Lord Lyttleton (Lord Lieutenant of the county), Lieutenant-Colonel Dick (Assistant-Inspector of Volunteers), and Captain Lavie (Adjutant of the Worcestershire Militia). The brigade was put through a variety of manœuvres. Colonel M'Murdo said that was the third inspection which he had had the pleasure of making of the volunteers of Worcestershire, and on each previous occasion it had been his duty to express to them the great pleasure he felt at the manner in which their manœuvres had been performed. He could only repeat to-day what he had said on former occasions, that he was well satisfied with them.——The Redditch or 17th Worcestershire Rifle Volunteers held their prize-shooting last week. The town subscription cup was closely contested for and was won by Private Gregg, who also carried off two smaller prizes. The target-glass was won by Private F. Heming, Private Gregg second. The cup given by the late Earl Beauchamp was won by Private Bains, Private Gregg second again. The Captain's prize medal, with an additional £1 from the funds of the corps, was won by Private Parker.

The annual contest of the 21st Lancashire was brought to a close on Saturday week, the shooting having occupied two days. Since the last competition the Wigan corps has been coupled with the one at Bury for purposes of drill, and the entries for several of the prizes were on this occasion open to members of the 8th, and also to effectives of the corps at Hindley.——On Saturday Mrs. W. Wilkinson, as the representative of the ladies of Clitheroe, presented a silver bugle to the volunteers of that town.

The Cumberland Administrative Battalion of Rifle Volunteers was reviewed yesterday week on the Swifts, Carlisle, the ground on which the annual races are held. A great concourse of spectators, variously estimated at from 10,000 to 15,000, were attracted to the scene. The muster of each corps showed a slight diminution as compared with last year, with the exception of Carlisle, which had forty-four more men, and Egremont one more. The total strength of the battalion this year was 746, last year 758. At the close of the review Colonel Roney addressed the battalion, complimented them highly upon the manner in which they had gone through their manœuvres, and said if ever there was a doubt as to how the system of administrative battalions was working they had a proof that day that there was no difficulty in bringing one into the field in perfect order.

The second annual prize meeting of the Border Rifle Association has recently been held at the Bowden Moor range, distant two miles from Melrose. The aggregate value of the prizes was £200, for which there were 800 competitors.

The third annual competition of the Highland Rifle Association began at Inverness on Monday week and was brought to a close on Saturday last. The presentation of the prizes took place in Bell's Park. Mr. Hercules Ross had a gratifying reception on coming forward to get his prizes, as also Captain Edward Ross, Lord Bury, Lord Haddo, the Master of Lovat, Corporal W. Fergusson, and, indeed, all the competitors whose names were conspicuous in the prize-list. Mrs. Major Wardlaw, Belmaduthy, presented to Colour-Sergeant Menzies, 6th Elgin Rifles, the second of the Highland counties volunteer prizes (a silver cup, given by herself), and was received with immense applause. Lady Mackenzie, of Gairloch, presented the bronze medal for Ross-shire, along with the handsome challenge silver cup, making a few complimentary remarks, which were loudly applauded. At the conclusion three hearty cheers were given for the Queen, the Prince and Princess of Wales, for the Lord Lieutenant of the county, Lord Lovat, and for Cluny Macpherson.

SCIENTIFIC NEWS.

The Gecko Swinhonis, a small Lizard, brought home from Formosa by Mr. Swinhoe, and determined to be a new species by Dr. Günther, of the British Museum, is described by the former gentleman in the *Annals of Natural History*. He found the eggs of this gecko in holes of walls or among mortar rubbish. They are round, and usually lie several together, resembling those of ordinary lizards. The young, when first hatched, keep much under stones in dark cellars, where they remain till they attain about two thirds of the adult size, when they begin to appear in public to catch insects, but evincing great shyness of their seniors. Mr. Swinhoe states that on the plaster-washed side of his bedroom, close to the angle of the roof, every evening when the lamp was placed on the table below, four little musical lizards used to make their appearance and watch patiently for insects attracted by the light. A sphinx or a beetle buzzing into the room would put them into great excitement, and they would run with celerity from one part of the wall to the other after the deluded insect as it fluttered in vain, buffeting its head, up and down the wall. Two or three would run after the same insect, but as soon as one had succeeded in securing it the rest would prudently draw aloof. In running over the perpendicular face of the wall they keep so close, and their movements are made so quickly, with one leg in advance of the other, that they have the appearance at a distance of gliding rather than running. The tail is somewhat writhed as the body is jerked along, and much so when the animal is alarmed and doing its utmost to escape; but its progress even then is in short runs, stopping at intervals and raising the head to look about it. If a fly perch on the wall it cautiously approaches to within a short distance, then suddenly darts forwards, and with its quickly-protruded, glutinous tongue, fixes it. Apart from watching its curious manœuvres after its insect food, the attention of the most listless would be attracted by the singular series of loud notes these creatures utter at all hours of the day and night, more especially during cloudy and rainy weather. These notes resemble the syllables "chuck-chuck," several times repeated; and, from their more frequent occurrence during July and August, are, I think, the call notes of the male to the female. During the greater part of the day the little creature lies quiescent in some cranny among the beams of the roof or in the wall of the house, where, however, it is ever watchful for the incautious fly that approaches its den, upon whom it darts forth with but little notice. But it is by no means confined to the habitations of men. Every old wall, and almost every tree, possesses a tenant or two of this species. It is excessively lively, and even when found quietly ensconced in a hole, generally manages to escape—its glittering little eyes (black, with yellow ochre iris) appearing to know no sleep; and an attempt to capture the runaway seldom results in more than the seizure of an animated tail, wrenched off with a jerk by the little fellow as it slips away, without loss of blood. The younger individuals are much darker than the larger and older animals, which are sometimes almost albinous. In ordinary fly-catching habits, as they stick to the sides of a lamp, there is much similarity between this gecko and the little papehoo, or wall-lizard of China; but this is decidedly a larger and much more active animal, and often engages in a struggle with insects of very large size. The Chinese colonists of Formosa greatly respect the geckos, in consequence of a legend which attributes to them the honour of having once poisoned the supplies of an invading rebellious army, which was thereby totally cut to pieces. The geckos were raised to the rank of generals by the grateful Emperor of China, which honour, the legend states, they greatly appreciated, and henceforth devoted their energies to the extermination of mosquitoes and other injurious insects.

Physiology of Bone.—M. Jobert de Lamballe has laid before the Academy of Sciences at Paris a memoir containing the continuation of his researches on the reparation and regeneration of organs, in which he treats especially of bones and their tissues. We give the chief points:—At an early stage in animal life the formation of cartilage begins in the primitive gelatinous mass, and is completed at about the end of the second month, when points of ossification here and there, which go on enlarging till birth, at which time the long and broad bones are very much developed. By degrees the predominating organic element is penetrated by the saline earthy matter, so that, in the bone of the adult, the organic and inorganic substances are nearly equal. The vitality of the osseous tissue is much greater in infancy, and diminishes with age. This explains the flexibility of the bones and the facility of their consolidation when broken in childhood, and their totally opposite conditions in old age. The osseous tissues are composed of the arrangement of fibres and lamellæ (thin plates) running in various directions, but identical in all other points in spite of the different aspect which the profound layers offer in comparison with the superficial ones. The spongy substance is composed of the numerous cellules which are met with in the interior and extremities of bones. The saline earthy matter, in invading the amorphous substance of the cartilage or of the non-cartilaginous blastema, which precedes the formation of bone, deposits itself in concentric layers, more or less regular, round the elements of which the osseous tissues are composed. In these are the canals which enclose the sanguineous vessels, and the osseous cavities containing the cellules of cartilage, which become cellules of bone. By this arrangement all the phenomena of nutrition are accomplished. In the composition of bone are also found membranes, vessels, nerves, &c. These anatomical richness in bones constitute a condition highly favourable for their reunion when fractured. The external surface of bone is enveloped by a cellular fibrous substance termed periosteum, which adheres to it by fibrous prolongations, and which, according to our present knowledge, is quite insensible to pain. MM. Serres and Doyère have determined that the colouring of bone by garancine is only an example of dyeing. The coloration proceeds a very small depth into the tissue of the bone, and is subordinate to the general march of the blood in the capillaries. The capillary system of bones has a double arterial origin; and to this double origin is due the duality of the general system of coloration.

Geology of Cyprus.—In the new number of the *Journal of the Geological Society* is a paper on this subject by Professor Unger, of Vienna, from which we extract a few notes. The island, on a surface of only 173 square miles, exhibits two distinct mountain systems—the larger occupying the south and south-west portion, and partly rising to a height of 6000 ft. above the level of the sea; the other running parallel with the north coast, in a lengthened range of steep cliffs. The fundamental rock of both is greenstone, with its varieties; this igneous rock, associated with a small portion of trachyte, being everywhere overlain by sedimentary deposits. In the north chains these are red cliff-limestone and white compact limestone, containing corals of an upper jurassic appearance. Numerous and well-preserved organic remains denote their quaternary age, belonging to a time when the geology of the Mediterranean basin was nearly the same as at present. The upheaval by which this marine sediment was raised above the level of the sea, and the present physical features given to the island, must have established a land communication with Syria. This supposition alone may account for the agreement of the Cyprian fauna and flora with those of the neighbouring continent. The communication may have been taken away by the sinking of the isthmus shortly before the beginning of the historical period, in consequence of one of those commotions which, in later times and even in our own days, have converted several places on the island into heaps of ruins.

The Vibrations occasioned by Railway-Trains passing through a tunnel formed the subject of experiments by Sir James South, made by him in 1847 over the Watford tunnel, in the Cassiobury Park, the property of the Earl of Essex, in consequence of the attempt, in 1846, to run a line of railway through Greenwich Park in what seemed a dangerous proximity to the Royal Observatory. Suitable first-class apparatus was set up in an observatory erected for the purpose, so that night or day, if clear, an observer could have the reflected image of the star in the mercurial vessels ready to testify against the tremors caused by any train. In the new number of *The Proceedings of the Royal Society* Sir James has printed the result of his observations, thinking that, although all danger to the Observatory is past at present, yet that no observatory can now be considered secure from railway injury. He says that, "with the ordinary disturbance to which an observatory is liable (as wind, carriages, or persons moving near it), the reflected image of a star breaks up into a line of stars perpendicular to the longest side of the mercury-vessel. With increased agitation another line of stars perpendicular to the first appears, making a cross. With still more the cross becomes a series of parallel lines of stars; still more makes the images oscillate, and at last all becomes a confused mass of nebulous light. The first of these (the line) is not injurious to one class of observations; but the others are, and therefore the second (the cross) was taken as a measure of the beginning and end of injurious disturbance. Signal-shots were fired when a train passed the southern entrance of the tunnel, and a shaft 1162 yards from it. Hence the train's velocity was obtained, and thence its position at any given time." These observations led Lord Auckland, then First Lord of the Admiralty (1847), to say that "they would be quite conclusive if the question of carrying a tunnel through Greenwich Park were again agitated."

Two Paraselenes, or False Moons, seen by M. Goldschmidt on August 28 last, at Fontainebleau, are described in *Les Mondes*. After a day of rain a halo formed around the moon, accompanied by paraselenes, when it was about 30 deg. above the horizon. The astronomer's attention was first fixed on the formation of a small iris cloud, which gradually increased in splendour to the moon's right. A halo formed at the same time, surrounded by white clouds. The space between this and the horizon remained open for twenty minutes, when it became covered with a prismatically-coloured cloud. The interior space of the halo was free, and blue sky could be discerned. The star α of Pegasus appeared at the interior limit of the halo to the north-west of the moon, then silvery white. By the help of an opera-glass a bluish white fog appeared to be moving towards the south-south-west. A diffused light, directed from the north to the south, traversed the lunary centre, without attaining the interior limits of the halo, and formed a cross with a great whitish semi-transparent transversal circle, presenting c-marked contours which passed through the lunar disc and rose up to the right and left, cutting the halo, till it was lost in the mass of clouds in the northern sky. The concavity was less charged with clouds, which produced the appearance of two interlaced halos. Two false moons appeared at the right and left of our satellite at the point of intersection of the halo and circle, their brilliancy varying in intensity, and resembling our moon when seen through clouds. The elongated images showed no marked contour, and they presented all the colours of the spectrum, the red end being turned towards the centre of the halo. At the end of forty minutes the heaven was invaded by clouds, and all the phenomena disappeared.

The Norway Lemming is the subject of a note recently communicated by M. Guyon to the Academy of Sciences at Paris, when he exhibited a living specimen, which he had just brought over. The genus Lemmus is formed of a group of small mammals spread over the northern regions, and remarkable, among other things, for their emigration, which, however, is not periodical. The Norway lemming dwells on the summit of mountains, and principally feeds on lichens and mosses. Like its congeners, it sleeps by day, and awakes only at the approach of night, when it becomes exceedingly active, putting out all its strength at once in tearing up, gnawing, and murmuring. Some years have elapsed since it emigrated; but in the spring of the present year emigration recommenced in smaller numbers than usual. In their ordinary manner, the animals spread themselves over the country, following the direction of rivers and lakes. During his tour in Norway M. Guyon, in his passage to Lillehammer, on the Lake Miœsen, in the first fortnight of July, saw great numbers of lemmings running through the gardens and houses, the streets being strewn with their dead. In spite of its delicate structure, the lemming is full of strength and courage. It flees when pursued, at first; but soon stops, and makes a lively defence by the help of its claws and sharp teeth, uttering very acute cries. Lemmings are accused of devouring each other, in certain circumstances; and those caught generally have wounds on the shoulders. M. Guyon examines the three supposed causes of their emigration:—1. The animal's presentiment of a severe winter. If this were the case, the emigration would take place at a time more or less near winter; but this year it took place in spring; 2. The failure or scarcity of food. Now, this year (says M. Guyon), the lichens and mosses of the mountains are as abundant as in preceding years; 3. The great multiplication of the animal in certain years, which seems to be the most plausible cause. According to all the probabilities, the direction which the lemmings follow in emigrating is given by the declivity of the land. It appears that at a given moment in the years of emigration they descend their respective mountains and unite at their base, proceeding across the country in close columns, which, in inhabited places, are rapidly thinned by death through the feet of men and the teeth of dogs, cats, foxes, and other animals. It is said that even the reindeer, although herbivorous, will not spare them. The lemmings then quit their mountains for ever, leaving only a few to continue the species. M. Guyon found the specimens which he captured to be voracious feeders, drinking frequently. As the lemming has never been seen alive in France, he endeavoured to bring home five. Three of these died before he quitted Norway. The other two, embarked on the North Sea, endured a maritime life very well, eating freely biscuits, almonds, nuts, raisins, &c., combined with the products of their native mountains, such as rubus arcticus, and vaccinium. Things went on very favourably at Paris, after their arrival, till, a few days ago, one of the captives was found dead in his cage. M. Guyon, fearing that the remaining one would not long outlive its companions, was induced to submit it to the examination of the members of the Academy, by whom it was regarded with much interest.

The Rain-water of Paris has been examined by M. Robinet, who has collected 118 specimens during the period from March 1, 1862, to September, 1863. On evaporating, the water left a yellowish circle and a white centre, the latter being due to sulphate of lime, existing in the atmosphere of Paris, and the latter to magnesia, possibly conveyed from the sea by winds. This rainwater, when mixed with nitrate of silver, assumed a red colour of various tints, and formed a garnet-coloured deposit, containing silver. M. Robinet states that the nature of the substance producing this coloration is not known.

Rapid Tanning.—At a recent meeting of the Franklin Institute, Pennsylvania, Mr. Howson exhibited a calfskin tanned in accordance with a patent granted to Mr. H. G. Johnson, improved by Mr. S. Dunseith. The principal ingredient employed is a decoction of the wild chamomile. It was stated that, by this process, an ordinary calfskin can be tanned in fourteen days, and a cowhide in twenty-one days.

THE BISHOP OF OXFORD ON COMPETITIVE EXAMINATIONS.

At Brighton, on Thursday week, the Bishop of Oxford presided at the distribution of prizes awarded at the Oxford Local Examination.

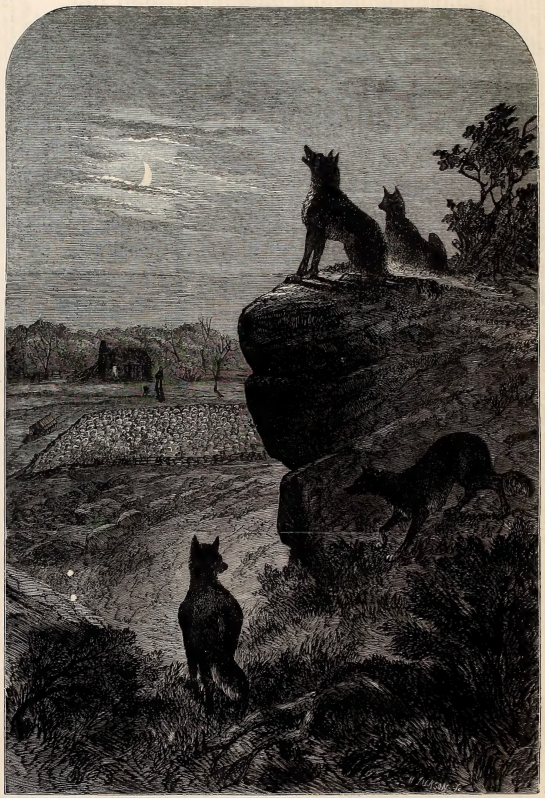
In the course of a speech on the occasion, the Right Rev. Prelate said:—I think these examinations are also useful things for the boys, for they must profit by them. Every one of us has in his constitution more or less a love of ease, a love of idleness, and of laziness. This works differently with different people, but it comes to the same point at last; it is a kind of attempt to draw the shoulder from the collar when the collar pinches, and it becomes up-hill work (Laughter). Some boys draw the shoulder back just when it comes to the point that will make their characters better and brighter. They are fond of doing what they can do easily, but they are thrown back if any difficulty arises. Now, these examinations they cannot hurry over in a careless manner; they must be done well, they make them laborious, they make them active, they lead them to honest hard work to meet the difficulty and to overcome the difficulty; they remove them from the short means of seeming to know and lead them to find the longer means of knowing. That is the blessing which they bring with them (Applause).

An examination does this—it brings out all the weak points. A boy who fails in such an examination has got probably a lesson that will last him for life. He will know it is no use putting in bad stuff; and so the prospects of the coming examination and the result of the examination have a tendency to perpetuate among the boys habits of duty, habits of honest hard work; and by these means a boy, instead of being contented with doing a something, will endeavour to do that something well (Loud applause).

It used to be a thought with me at school, as I have no doubt it has been with many boys, "Oh, if I could but turn the tables on the masters for a time, to make them go through all this!" It is almost one of the uses of these examinations to do a little of this. I can whisper to a boy who has such thoughts (as I had) that these examinations are examinations of the masters. It was all very well when the master examined his own school, giving to Master Jones a certificate of his being a most excellent boy; but then he gave a similar certificate to Master Smith, who must have been a little better than Jones; and another to Master Robinson, who, in turn, must have been better than either Jones or Smith (Laughter and applause). This was all very well; it was very pleasing to the parents, who would say, "See how my boy has distinguished himself; he has got this certificate!" Ah! but perhaps every boy in the school has got a certificate of a similar character and so there is no distinction about it. But when, instead of this sort of thing, boys come to be examined, not by a friendly master, who gives these certificates out of kindness and as a means of keeping up the credit of his establishment—when they come to be examined with the boys of other academies, I should like to know who are then being examined? The master more than the boys (Applause).

It is a great help for a master to know that his work is going to be examined by competent examiners. When the time of the examination comes on he is spurred on to new efforts, for he knows his work is going to be examined thoroughly, and he must put out renewed energy in endeavouring to make his boys the most efficient (Applause).

Thus it is that these examinations are of benefit to the Universities, are of benefit to the boys, and are of benefit to the masters. They are truly most excellent institutions.



Besides all this, they bring all to one common organisation. I am not speaking in favour of a system of centralisation; centralisation is often a great evil, but organisation is of great service. The organisation in these examinations has a tendency towards teaching all schools what they ought to teach; they present one common standard of instruction, which I conceive to be of great benefit to the schools, as well as to the masters, the boys, and the Universities. And this is one of those blessed strifes in which there is no envying; each one seeks to rise, but he seeks to rise in company with his fellows; each one seeks to rise by a common standard, lifted higher and higher by the contest of intellectual capability, founded on a basis of real, of intellectual, and of religious belief (Loud applause). And so there is, in the ambition engendered by these examinations, no harm, if it is kept within legitimate bounds; they are struggles between schools, and between the boys in each school. To say there is harm in such competition would be to charge Providence with evil, for the whole world is a struggle for success; and while men thus struggle heartily, with kindness, seeking not to pull others down but to pull themselves up, I believe the light of God's approval falls on such honest endeavours (Loud applause).

One of your members has said he believes there is no greater evil to education than cramming. In this I fully agree with him; but such examinations as these are a sort of great anti-cramming plan. Many of you, my young friends, will at once think of the word that rhymes with cram; every boy who obtains success by such a means is nothing more than a sham. Cramming is putting into the mind what it cannot digest, making it preternaturally fat, poisoning it, or killing it in some other way. I never knew good come of it, but I have seen many minds fatally injured by it. That which you take into your minds and make part of yourselves will be so much better for you; but that which you only take in to reproduce, whole and undigested, will neither do you nor anyone else the least good (Applause). The real good of these examinations is the doing away with cramming—like taking a crammed fowl's crop, giving it a good squeeze, which detects the crammer and relieves the fowl (Laughter). They may have a good squeeze at the time, but they will feel a good deal better afterwards; and it will be a great lesson to crammers, who will find all their cramming materials exposed, and of no avail (Applause).

Advices from Teheran to the 19th of August state that "The Sirdar Sher Ali Khan, who has succeeded the late Dost Mahomed as chief of Afghanistan, and who is in possession of Herat, has sent a deputation to Sultan Murad Mirza, in command of the Persian army in Khorassan, to express his desire to live on friendly terms with Persia, provided he be allowed to retain Herat."

SKETCHES IN AUSTRALIA.

DR. DOYLE, to whom we are indebted for the accompanying Illustrations, has supplied us with the following descriptive details:—

Those who have asserted that the aboriginals of the great continent of Australia are the lowest in the scale of humanity will be found, I think, to have come to that conclusion upon very insufficient experience of the race they have condemned. In order to form anything like a correct opinion upon this point, something like a personal experience of savage life in Australia is necessary; and no one possessing it will, I think, place the aborigines on the lowest round of the ladder in the scale of humanity. In observing the ingenious manner in which they supply their actual wants—such as procuring food, drink, and weapons of war for purposes of offence and defence—I have formed a very opposite opinion of their natural abilities; and I am not without hope that the following description, illustrative of the sketches I have sent, may be accepted as proof of the correctness of my conclusions.

SNAKE-HUNTING.

EMU HUNT.

A description of chase which offers the rider and his dogs most noble sport in Australia is that of the emu, a large bird (order Cursores), not unlike an ostrich, and only second to it in size. It possesses long limbs of great strength, but scarcely any wings, being evidently designed to scamper over great tracts of country in quest of food. Some extensive plain, far away from any settled or inhabited district, is its favourite abode. So shy is this bird of man when he is on foot that it runs if he appears even as a speck on the horizon, and yet it will allow him to approach tolerably close on horseback. But, once it does start, no animal in Australia that makes use of its legs can put them to such good purpose. For about two miles it will leave the fleetest horse and swiftest dog so far behind as to make one believe its capture by pursuit impossible. If, at the end of that distance, it cannot gain shelter in mountain or forest, its pace slackens, and there is a possibility that it may be overtaken.

To hunt the emu, therefore, it is necessary to be well mounted and to be accompanied by a couple of good kangaroo dogs which are under perfect command. The hunter and dogs proceed quietly many miles over the plain till they sight the prey, which, at a great distance, have very much the appearance of men on horseback. Coming well within sight of them, the hunter—keeping the dogs at the heels of his horse, which he puts into a gentle canter, so as not to frighten the birds, but to enable him to speedily get near them—observes the troop, consisting generally of six or seven, lift their heads inquiringly, and seem rather puzzled at the intrusion; but, as they find themselves still nearer approached, they separate, and the hunter, singling out one, leads his dogs on to him, and off they start. The emu, either insensible of his danger or sure of escaping, runs rather easily at first; but, being pressed, lifts its wings and dashes away at tremendous speed, instinctively making for the nearest timber; and if that happens to be within three or four miles there is little or no chance of its being taken; but, should it happen to be ten or twelve miles distant, its escape may be looked upon as doubtful, inasmuch as its powers of endurance cannot be compared to that of the horse or dog, and each mile tells fearfully against it. Nor does it die without a kick; for, though naturally the most timid creature in existence, finding escape impossible, it attempts to face its pursuers, and defends itself for an hour or more with beak, feet, and wings. The savages of the country capture them by other and more subtle means than by running them down, and are very successful. An expert member of a tribe will have the skin of an emu very neatly stitched round him, and, shoving one arm up through the neck, he will imitate, with wonderful fidelity, all the movements of the bird—picking on the ground, and scratching with the feet, &c.—and by this means he is enabled to approach near enough to quietly kill one or two without materially disturbing the rest. So perfectly do these men make up for this business, and so accurately do they mimic the peculiar gait of the bird, that they may, at a short distance, be readily mistaken for emus; and instances are on record of sportsmen in quest of emus firing at and wounding one thus disguised.

KANGAROO HUNT.

The kangaroo belongs to the class Marsupialia, and is in itself a timid, harmless animal, that feeds on the rich green herbage of the country and furnishes the aborigines with venison; but since the white man has taken up his residence in that land of promise this poor animal is oftener hunted for sport than from necessity, as it affords a good run, and the tail gives the chef de cuisine ample opportunity of manufacturing a soup that cannot be surpassed by any

THE BEE-HUNTERS.

modern production. The male kangaroo is most prized for chase, both because, when beaten in speed, he will stand at bay, and will make back to a tree, afford good sport, by fighting the dogs; and, as many of these kangaroos are "old men forresters," as they are called, standing six or seven feet high, and are rich in the possession of a toenail no much kind but about the size of a small reaping-hook, they are no contemptible foes, and many a good hound that rashly ventured within the grasp of their short upper extremities rolled his entrails on the plain as the penalty of his precipitancy. Nor are the hunters themselves the least remarkable portion of the chase. Mounted on strong cobs, with bone and blood enough for any purpose, daring and bold even to temerity, and unrivalled—perhaps unequalled—as horsemen by any riders in the world, they perform most extraordinary feats. Riding with short stirrups and small, close-fitting saddles, and dressed as I have shown in the sketch; yet they ride, except for driving sheep down, his head hanging over the pool, he remained perfectly motionless for a length of time. Presently a man, passing slowly, and I was beginning to feel tired of watching a man apparently looking at his own shadow in the water, when the bum of a bee attracted my attention. Round and round over the pool it circled, the deep hoarse note of my sable companion, now on one side, and now on the other, now close to his ear, and then receding from him as the bee, in its circuit, betrayed the "bee-hunter." Indifferent as a stone to everything but his prey, he maintained the "sign" of life by the slapping follow in the water, gave notice by the change in its tune that it was about to sip. Suddenly, with a snort, Worrywallah discharged the water from his mouth in a little fountain, "like a miniature whale," and I knew the effects of this unexpected douche, he seized it in a most dexterous manner by the wings, holding his own between the claws, which he did by fastening to it a bunch of flocculent wild cotton with some resinous gum in it. The hunter now explained that on such he let the bee go it would make for the hive, and the cotton which he had fastened on would serve the twofold purpose of impeding its progress and of marking the hive. Off it went, "as straight as a line," the moment joined by some of the tribe, and the bee was let go. Away it went, at first slow, as if it were burdened, but soon it got into its accustomed note; and away the natives went after this little screamer over bramble and brake. In the course of half an hour, however, I came up with them. There were found a group of aged 100 years-and-upwards, whereas in England and Wales, in a population of 29,066,224 only 201 centenarians are reported. The number of females are not known, as, in the case of centenarians, there are said to be 29 of 110 years of age and upwards, while two females are returned as having attained that age in Wales and Monmouth. If these statements be taken literally, there are persons now alive in the British Isles who were born before the battle of Culloden, and who remember Conbermee as juveniles, belonging to a generation contemporaneous with their sons and daughters. *Redcast Saturnius regnat!* Our first impression is that the Celtic temperament is favourable to longevity and longevity. We must remember, however, that the Saturnian rule is not unrestricted. The Celtic order of things are marked by a feeble development of the critical faculties. To a matter-of-fact, sceptical eye, such as that we have often to look upon in England, a critical picture-book of the Celtic order of things are surrounded by an atmosphere of myth. English opinion, highly sceptical as it is in the matter of supernatural prodigies, would look upon the "mythical theory" in its endeavour to realise and co-ordinate such returns as we have. The critical faculties of the Celtic temperament have no baptismal certificates or family registers to produce. They guess at their ages even in the middle term of life, and when they had threescore years passed quarrel, in argument, as to what is to be multiplied by two by affectionate and admiring relatives, who take a pride in the "longevity" of their kinsfolk. If there be, then, any information necessary for the filling up of the schedules, they are found to rely so stintedly by each, nor even by the head of the cross-examination, that it is scarce for the statistician to believe in the existence of great, even though unconscious, exaggeration in the case of the Celtic Irish order of things as returned by the census. This consideration in no way vitiates the statement of the proportion of the number of centenarians having been kept down in 1851 by the influence of the famine years and the prospect of emigration.

Dividing the term of human life into five-year periods, we ascertain that the rates of increase and decrease in the absolute numbers of the people at the several age-periods in 1881, as compared with 1851, are as follow :—

Years.	Land under 5			Increase or decrease	Per cent.
5	10	..	..	decrease	24
10	20	..	..	"	18
15	20	..	..	"	16
20	20	..	..	"	2
25	20	..	..	"	2
30	20	..	..	"	10
35	20	..	..	"	10
40	20	..	..	"	15
45	20	..	..	Increase	6
50	20	..	..	decrease	10
55	20	..	..	Increase	5
60	20	..	..	"	17
65	20	..	..	"	11
70	20	..	..	"	16
75	20	..	..	"	26

These figures tell more eloquently than words how the youth and bloom, the bone and sinew, of Ireland have left their native isle, leaving behind them the aged, who, consequently, acquire an abnormal preponderance in the population.

During the long and heart-rending crisis which in twenty years depleted Ireland of one-half of her population, the Government, as interested themselves in her destiny have, at least, had the consolation of believing that they who remained behind were better off than those who had emigrated. The Commissioners of Education in the Commissioners on the state of education in Ireland in 1861 fully warrants this belief. It is pleasant to read the following words, which we do not find in the 1861 with that of 1841. The big, black blots covering so large a portion of the Celtic population of Irish history have disappeared in 1861. The last stronghold of crass ignorance in Ireland seems to be the counties of Galway and Mayo. Those regions, which were lightly shaded in 1841, have become still lighter in 1861.

The first striking fact that one meets with in this section of the report is that the number of Irish above the age of five years who can neither read nor write was 3,760,995 in 1841, 2,760,263 in 1851, and only 1,753,382 in 1861. Thus, in the last ten years, the ranks of absolute ignorance have diminished by nearly 800,000 souls. But we must not congratulate ourselves too much on this score, for this diminution of ignorance represents to a great extent *the disappearance of the population* ; but not wholly so, for, relatively to the aggregate of the population, the number of totally ignorant has declined. In 1841, 53 per cent of the population were unable to read or write ; in 1851, only 47 per cent ; in 1861, only 42 per cent.

The proportion of those who could "read only" remains nearly unchanged. It was 20 per cent in 1841 and 1851, and 19 per cent in 1861.

The most cheering fact set forth by the education tables is the absolute and large relative increase in the number of those who can both read and write. In 1841, when the population of Ireland was 8,175,124, only 1,956,156 persons could read and write. In 1851, when the population had fallen to 5,798,967, the readers and writers had increased to 2,105,508. Between 1851 and 1881, 1861 was the large 2833 and 41 per cent respectively. When we consider that emigration has swept off, along with the flower of the youth of the Irish peasantry, a considerable number (estimated by the commissioners at 165,000) of those who can read and write, the result is a very cheering one. It justifies us in saying that, if Ireland has emerged from a long agony a less populous nation than of yore, she has also become a more educated one.

If we analyse the returns according to the ancient provinces of Ireland, we find that Ulster takes the smallest percentage of persons above the age of five years—namely, 30 per cent ; Leinster, 31 per cent ; Munster, 46 ; and Connaught, 58. Nevertheless, the order of precedence as between Leinster and Ulster is reversed if we take as a standard the number of those able to read and write. Leinster has 33 per cent of her population able to read and write ; Ulster, 32 per cent ; Munster, 30 per cent ; and Connaught, 28 per cent. The returns fully bear out the conclusion that education has spread most widely in those parts of the country where the "native Irish" element has been most powerfully modified by Anglo and Scotch Irish settlements, and that it is most backward in those parts where the native Irish exist in their purest state, and have been most successful in resisting the introduction of a foreign civilisation.

Of the large towns, Dublin city and suburbs, Carrickfergus, and Belfast make the most favourable returns, they having a proportion above the average ages, 65, 72, 61, and 57 per cent respectively, able to read and write.

If we revert to the several counties we gather that the following nine counties contain the smallest proportion of totally ignorant: Leitrim, 49 per cent ; Roscommon, 49 ; Mayo, 49 ; Clare, 49 ; Cavan, 48 ; Dublin County, 22-22 ; Londonderry, 24-19 ; Carlow, 29-32 ; Kildare, 29-42 ; Queen's, 30-03 ; Fermanagh, 31-60 ; and Tyrone, 32-61. The following nine counties show the largest percentage of totally ignorant—viz., Mayo, 49-53 ; Galway, 49-03 ; Waterford, 58-76 ; Kerry (counties united), 59-03 ; Limerick, 59-21 ; Clare, 59-37 ; Donegal, 52-09 ; Cork, 50-66 ; Roscommon, 47-96 ; Clare, 46-80.

In the census of 1881 there were 4,845,116 children returned as of school age. Of these, 220,776 were male pupils, and 193,730 were female pupils. Those attending superior schools were only 22,337, of whom 13,628 were males, and 8,709 females. The "superior education" referred to be a school where any foreign language, ancient or modern, is regularly taught. The number attending primary school during the past week was 1 in every 23·0 of the population ; in 1851, the ratio was 1 in every 24·6. Of the 4,845,116 pupils attending primary schools, 877,522 belonged to schools in connection with the National Board ; 46,055 to Church education and parochial schools ; 23,271 to the schools of the Christian Brothers ; and other Roman Catholic schools not in connection with the National Board ; 25,248 to primary schools under other auspices than those of the Roman Catholics ; and 41,623 to private schools. Those under "superior" instruction were 2665 more numerous in 1881 than in 1851, notwithstanding the great decrease in the population.

Lastly, the commissioners offer a return of the relations in which the pupils in primary schools attending schools stand to each of the Faiths. Those who speak Irish only number 163,275, or 2·8 per cent of the population. In Irish alone there were returned 319,622, or 5·5 per cent of the then population. Of these 163,275 persons, 77,818 were of Connaught, 67,630 of Munster, 23,180 of Ulster (almost all in Donegal), and 236 only in Leinster.

Those who spoke both Irish and English amounted to 912,561, or 15·7 per cent of the entire population. Adding this figure to that of those who spoke Irish only, we obtain the result that those who can speak Irish are 18·5 per cent of the population. In 1851 they were 23·5 per cent. The proportion of Connaught monoglots remains the largest percentage—namely, 44·9 of Irish-speaking inhabitants. In Munster they are 34·3 ; in Ulster, 13·3 ; and in Leinster 7·3 (almost half of whom are in the county of Donegal) ; in Leinster 2·5 per cent.

The Rev. Lucius Hodgson holds its present family in Galway and Mayo, Kerry, the West Riding of Cork, Waterford, and Clare.

THE DISTRESS IN LANCASHIRE.

The usual weekly meeting of the Central Relief Committee was held in the Manchester Townhall on Monday—the Earl of Derby in the chair. The noble chairman handed in a list of exchange for the sum of £600, which had been forwarded to Secretary Chamberlain, and which was received by her Majesty's Legation at Athens, as a subscription, in addition to the sum of £1000 already sent, from the Greek nation in that country, for relief voted on account of the Lancashire distress.

The honorary secretary reported that the money received during the week was £761, and that the total sum to the banks was £37,000.

Mr. Commissioner Farnall read his report, which stated that "there was a decrease in the number of persons receiving parochial relief in twenty-seven unions in the cotton-manufacturing districts, as compared with the number so relieved in the previous week, of 1,000. The weekly sum of out-door relief on the 19th inst. was £9602 12s. 3d.; in the corresponding week of 1881 that sum was £1,000 less. There was an increase of 1,000 on the 12th, as 9784 2 per cent. In the corresponding week of 1882 it was £2310 4s. 1d. The average per cottage of the weekly relief distributed some unions on the 9th inst. was 7·1. In the corresponding week of 1881 it was 2·2 ; and in the corresponding week of 1882 it was 1·6. The amount of money due from the out of the treasurers of the above unions on the 19th inst. was £39,119 17s.

Colonel Patten, M.P., stated that he had received a remittance of £61 5s. 6d., being the balance of £2000 raised by subscription in Port Elizabeth.

A grant of £1000 was made to Blackburn from the Mansion-house and School Fund ; and a grant of £40 was made to Blackburn for the superintendence of labour.

From the General Relief Fund several grants were made, including the following :—Ashton, £4000 ; Astley, £1000 ; Dukinfield, £1000 ; Eccles, £1800 ; Rochdale, £900 ; Heywood, £700 ; Salford, £800 ; Ancoats, £400 ; Hulme, £400 ; Stretford, £100.

The committee were occupied for a considerable period in discussing suggested amendments of the rules, with a view to the guidance of district committees in the administration of relief ; and other portions of the manual were left over for consideration next week.

At the annual meeting of the York School of Art, held on Wednesday week, the Lord Archbishop of York, who occupied the chair, announced the intention of the Government to offer £1000 towards the institution and the mechanical system of drawing as it used to be taught, he said, that the present system was not being understood, and that it ought to be changed. In asking what this advancement was, he said that it was the opinion of many in the trade and in the community, in the history of painting, that the art declined when it was taken away from the hands of the people. Not exclusively had they sprung from one rank or another, because the youth who had shown talent was taken up and educated out of the human race. To offer facilities for the study of drawing—to offer instruction—to enable the best to spread their ideas among the workers of the community in the hope of catching a genius swimming unknown to them ? It only afford half a century of study, the architects and stained-glass painters and others enrich the stores of art, the expense, and trouble, and labour would be fully compensated. Mr. Ruskin's method of art was taken as being the best example by a Mittee or a Raphael should be allowed to run to waste—no spot seeing them, and no attention paid to them. There was no doubt that it was due to the painter's or sculptor's skill. But whilst a taste for art existed in all classes, he was quite sure that the working classes were most likely to develop more than any other, because skill and practice must go a great way in making an artist. As taste is appealed to by the surroundings of the people in their daily life, social scale, they were multiplying genius and daily great men etc. He knew them referred to the great schools of art at Kensington, Glasgow, and elsewhere, the difficulty compared with the present which Messrs. Hook and Rowbotham had to experience to obtain artists for the purposes of their trade ; after which he touched upon the subject of Art's services in the improvement of dwellings. He then, in conclusion, said there was really something sincere and thorough in art-education. It admitted of no trifling or deception. Art brought a man to his senses, and left no room for vanity. A man proved he art never thought of being beaten, but saw an infinite vista before him, and went on on, ever hearing more and more. There was nothing unchildish in this line of study ; it was precisely what persons ought to be taught ; they had to learn to have the courage to own up to them. On this account, although he confessed he had not learned this lesson of humility, he felt that every person ought to who will to a school of this kind (Applause).

COLUMN FOR THE CURIOUS.

SAINT WINEFRED, in this age of ablution, is entitled to her share of revivalism; for, in the words of Jeremy Taylor, "there is a natural analogy between the ablution of the body and the purification of the soul." The Saint's Holy Well, in Flintshire, has raised a small village to a flourishing manufacturing town, and the stream which issues from the well of St. Winefred drives the machinery of many mills. Her martyrdom dates from the seventh century; and pilgrims from Lancashire were to be seen here even in the last century in deep devotion up to their chins for hours, sending forth prayers and making evolutions with an excess which sometimes costs the devotees their lives. Sir John Floyer, in his curious old book on Cold Bathing, sets down St. Winefred's as one of the coldest springs in England; he doubts her legend: but Sir John is all for St. Chad's, and its superior stypticity. The fountain, and the elegant Perpendicular crypt at Holywell to this day attract tourists; and, curiously enough, the water first passes into the service of a paper-mill, and the chapel above the crypt has been restored within the last twenty-five years, and is now used as a school. Baths have been provided for less devout visitors than were the Lancashire pilgrims; and it is now proposed to construct additional baths, and to improve and alter the Well premises, for which architects are invited by the Local Board to furnish competitive designs. In this movement we hope the preservation of the beautiful crypt will not be lost sight of amidst more utilitarian views. It would be well if we had "local boards" for the conservation of our national antiquities, as well as for objects of more tentative character. Mr. Ambrose Poynter, in June, 1846, contributed to the *Archæological Journal* a very interesting paper descriptive of St. Winefrede's Well and its restoration, which may be advantageously referred to in connection with the projected improvements.

Passing from old to new, we find that on the 21st ult. a new fountain was inaugurated in the market-place at Durham, by the Mayor and Corporation. There is some demur as to the propriety of retaining the old tutelar Neptune, though, according to the *Durham Chronicle*, the architect, Mr. Robson, "has done his best, by gilt and varnish, to render the old sea-god as little objectionable as possible." We may ask, what has a sea-god to do with a drinking-fountain? However, Neptune appears to have been long located upon this spot on the old punt, or "pant," now replaced by the fountain; it would have been a risk to eject him; and the spring conveyed from Sidegate to the market-place reservoir was presented to the city of Durham more than four centuries since. The new provision is at once a drinking-fountain, a public reservoir, and a well for cattle, as indicated in sculptured discs of "Hagar athirst in the Wilderness," "Moses Striking the Rock," and "The Meeting of Jacob at the Well." After the inauguration ceremony, the authorities and their friends adjourned to the Mayor's chamber, where many pleasantries were evoked in civic testimony of health-giving streams, and the delicious water of the Sidegate spring, all agreeable enough,—but toasting a drinking-fountain is surely a *non sequitur*. From the old fountains occasionally flowed stronger streams; but, in sober truth, the Mayor and Corporation of Durham have completed a good work, with taste and liberality worthy of commemoration.

In another column of the *Durham Chronicle* attention is called to the interesting fact that on Sunday last thirty-eight years had elapsed since the opening of the first passenger railway—that portion of the Stockton and Darlington system, which originally extended from Witton Park in the west, past Darlington and Yarm, to Stockton-on-Tees in the east. The account of the opening, on Sept. 27, 1825, is then quoted from the *Durham Chronicle*, Oct. 8, 1825, with copies of the bills announcing the ceremony and the first "coach" bill. The retrospect is interesting, and such peeps at the past have their sweet uses: three individuals are named as "about all who are left of those who were actively engaged at the opening."
